John Harris VK2 Fine And Dandy (VK2FAD) at Budgewoi on the New South Wales Central Coast worked VK100WIA on the 80-metre band, while it was being put to air by the Orange & District Amateur Radio Club.

At its average logging rate over the first five weeks the special callsign for the Centenary of Organised Amateur Radio in Australia will achieve 15,000 or more contacts when its goes QRT in October.

VK100WIA has logged 60 DXCC entities so far and Worked All Continents. The WIA Centenary Committee is urging rostered clubs to where possible, work more DX stations, to guarantee the special callsign can qualify for the DXCC award.

The Committee has also set a challenge. Is there a DX club on the roster that can make an all out effort to work 100 DXCC entities in three-days?

ORANGE AND APPLES

Both the Apple Isle and the Orange District Radio Club have been highly successful in obtaining local media publicity for their involvement in the WIA's Centenary of Organised Amateur Radio in Australia.

Orange Club President Robert Alford VK2ZRJ advises that in the lead-up to 3 days of operating VK100WIA from Sunday the 4th of July, the club scored interviews on the local ABC, FM and AM radio stations.

A highlight was a great story on Prime TV News that obviously picked up a number of prompts from the WIA Media Kit and gave the Orange District Radio Club great publicity. It has been recorded by club members and proudly put up on YouTube.

http://www.youtube.com/watch?v=qGOrpEcalsc

Tasmania, the Apple Isle learns even more about amateur radio

Well, here on last weeks broadcast we reported how Justin Giles-Clark VK7TW got a five minute interview on ABC local radio in Hobart to coincide with the Radio and Electronics Association of Southern Tasmania rostered use of the special callsign VK100WIA.

While that report was going to air Justin was on his way to the ABC radio studios to once again be an on air guest, this time with presenter Chris Wisbey on a program heard throughout Tasmania that lasted a whopping 18 minutes.

The session covered lots of aspects of amateur radio including the Jamboree On The Air, the use of Morse code in modern amateur radio, the electronic warfare susceptibility of solid state components when compared to valves or vacuum tubes, and dispelled a few myths along the way.

Now courtesy of ABC radio, here's part of that interview.

(Play tape ABC_Tassie_VK7TW ..ends with ?sometime in the future?)

And that interview has generated lots more interest in Tasmania about amateur radio ? a very good job done by Justin VK7TW

A look ahead at the VK100WIA roster

Today the Sunraysia Amateur Radio Group is operating VK100WIA from the Tri Annual Junction Rally in Wentworth New South Wales. Plenty of interest is being generated at this well attended event.

Tuesday the 13th to Thursday the 15th of July the special callsign will be transmitted from VK8 with Spud and the Gang, alias the Darwin Amateur Radio Club at its club rooms in Fannie Bay, more from Spud in a moment.

There has been some Northern Territory media interest on the role that amateur radio played immediately after Tropical Cyclone Tracy hit Darwin in 1974.

On Friday the 16th through to Sunday the 18th of July, Australia's oldest radio club, the Waverley Amateur Radio Society continues with its strong support of the Centenary of Organised Amateur Radio in Australia.

A group shot photograph of its early members does feature on the WIA Centenary posters, certificates and the VK100WIA QSL card.

The Waverley Amateur Radio Society formed in 1919 will operate from its club rooms at 2 Vickery Avenue, Rose Bay, with its doors wide open inviting members of the public to attend and learn more about amateur radio.

The Moorabbin and District Radio Club, ALARA, Townsville Amateur Radio Club and the Frankston & Mornington Peninsula Amateur Radio Club are finalising their plans - more about them on next week's broadcast.

Yet another WIA Supported Centenary Activity

Three WIA members have come together in the South Australia capital to secure a place for an amateur radio display at a major public event.

Adrian Snell VK5ZSN, Paul Hoffman VK5PH and Paul Schulz VK5FPAW have announced a new activity - 'The Amateur Radio display at Science Alive! 2010, August 7 & 8, Goyder Pavilion, Adelaide Showgrounds, Wayville.'

After being considered by the WIA Centenary Committee it has been endorsed as the very latest WIA Supported Centenary Activity.

Adrian VK5ZSN, Paul VK5PH and Paul Schulz would like to hear from any other radio amateurs in the Adelaide area who can help out with the display at Science Alive! The trio is also mounting a display on Friday the

6th of August at a Careers Day for High School students

Check the text edition of this broadcast for a point of contact.
VK5ZSN rfhead@internode.on.net

On next week's broadcast we'll have news of another major event, well actually a series of collaborative events, that will be a WIA Supported Centenary Activity.

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

Now for those in range of Sydney - the next Trash and Treasure at VK2WI Dural will be in two weeks time on Sunday morning - the 25th. Major items on offer can be viewed on the ARNSW web site - www.arnsw.org.au - under disposals. At the same time exam assessments will be conducted and anyone wishing to undertake one should register their interest by telephoning 02 9651 1490 and leave a message with contact details -- In the afternoon the Home Brew and Experimenters group meet at VK2WI

VK3
web service:- http://www.amateurradio.com.au/news/
VKC Roundup http://www.police

The last NERG meeting was ons Thursday night with a very interesting talk on Amateur Radio Adventure on Macquarie Island by VK3KR:

Each winter around twenty people get to experience the rugged terrain, amazing wildlife and extreme weather on Macquarie Island, entirely reliant on expeditioners' skills to keep the station running.

In 2004-05 David, VK3KR had the privilege of serving as SCTO and operated as VK0MT.

Interesting things happened and best of all - David WAS the DX!

The East Gippsland Amateur Radio Club's AGM is Sunday 25th July at Bairnsdale RSL 1:30pm with the July General Meeting following at the completion of AGM.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

A couple of weeks ago I was listening to an interview on broadcast radio and the person answering the questions was tremendous! This person not only knew his subject but was enthusiastically knowledgeable into the bargain. The presenter only had to raise a subject to be given fact and reminiscence by this enthusiast.

This was the classic example of some-one selling their subject without trying, without gimmicks or media advisors. I was sorry I wasn't in Sydney to attend the event at which he was demonstrating his craft.

Now, more clubs are getting contact with their local broadcasters as a result of the WIA media kits distributed ahead of VK100WIA operations. For my part, I would love to hear some-one who enjoys the hobby of amateur radio and whose voice sounds like they are enjoying it - even during the interview.

I'm Geoff Emery and that's what I think, how about you?

CLUBBING -

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

Congratulations to GCEG members Greg and Nathan who recently passed their amateur radio licence exams. Greg will upgrade to a standard call and Nathan will join us on the airwaves with his new F-call. We're looking forward to hearing you both on-air with your new call-signs, well done from the Gympie Group.

On the 29th of June, amateur radio was represented at the "Tracy II" communications exercise at Tin Can Bay. The event was organised by Gympie Regional Councillor Julie Walker. The primary purpose was to enable all emergency support services to get together to give a presentation showing how each group worked and to improve communications between the different groups. The day was based on the scenario of a cyclone having crossed the Coast in the Tin Can Bay area.

The Gympie Communications & Electronics Group display was manned by Bob VK4MR, Erik VK4AES and Roger VK4BNQ. The Gympie Club was well supported by the Sunshine Coast Club who very generously towed their WICEN van all the way up from Peregian Beach. Thanks to Noel VK4NL and Warwick VK4NW who gave their time to display and demonstrate the van to several Council reps and emergency and support personnel. They were all suitably impressed with the professional set-up of the SCARC WICEN Van Comms Centre.

Representatives of the Gympie Club have since received an invitation from local SES Controller Terry Clark to discuss setting up a comms centre with amateur radio facilities. A meeting has been scheduled for this coming week.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
http://ipswichdistrictradioclub.webnode.com/

This is Allan VK4FABR reporting on behalf of Mike, VK4QS, and the members of the Ipswich & District Radio Club.

We would like to take this opportunity to sincerely thank all those stations who made the effort to contact us whilst we held the Centenary callsign VK100WIA throughout the period of July 1st through to 3rd 2010.

Primarily we focused on HF operations within the 40 & 80 meter bands, as dictated by propagation, though other HF bands were tried without success. Contacts were also achieved using PSK31, with much success internationally.

Operations on 40 and 80 metres saw contacts into New Zealand as well as a few late night contacts into the US and Japan to give the callsign an overseas element. Our Operators ceased duty each night at around Midnight, having worked all we could hear.

All this was achieved with just a Full Wave 80 Meter Loop and a multiband Vertical located at our Clubhouse on Denmark Hill here in Ipswich

To those stations whom we failed to contact for one reason or another, we apologise, especially the VK6 boys. It was not from lack of trying I can assure you.

Finally we wish to convey the fact that it was truly an honour and a pleasure to take part in some small way, in this, our Centenary year of the Wireless Institute of Australia.

So, till next time we meet on the airwaves, it's Cheers on behalf Mike VK4QS, and the members of the Ipswich & District Radio Club.

I'm Allan VK4FABR.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from Rockhampton and District Amateur Radio Club, the RADAR club. This is Les, VK4VIL reporting.

July is Motorama month in the area, lots of different automobile events with the RADAR club providing all comms for two major car rallies. On the weekend of the 17th July, Ridges Resort near Yeppoon hosts a high grade rally, conducted in the Byfield Pine Forest. The next weekend see sprints in and around the Rockhampton Showground. Obviously, comms are paramount for safety and efficiency of these events and Secretary Clive, VK4ACC has put a mountain of work into organization.

And now to another road event.

Seventy years after winning a VK3 State Road Cycling Championship, Club member Bill Thaw, VK4FGN is preparing for a 570km bike ride traversing Central Queensland. At the tender age of 85 years young, Bill has decided to take the challenge. While Bill is attempting to play down the trial, indicating some trepidation with the possibility of not finishing, it is worth recalling another amateur's comment which could be a thought for the week.

On failing to complete a Dick Smith VK2DIK sponsored climb of the Kokoda Trail, a group of school children attempted to repay Dick. On his refusal to accept, Dick indicated that Australia was short of adventures after the past military conflicts and being involved in an adventure was more important than its

completion.

We're all behind you Bill - and miles behind.

I'm Les, VK4VIL, on behalf of the Rockhampton and District Amateur Radio Club.

TOWNSVILLE
vk4wit@wia.org.au
4773 1196 or 0408 001142
po box 333 Garbutt East, QLD 4814
www.tarc.org.au

Greetings ! This is Don VK4FNQA, transmitting from where the hills
are reverberating to the sounds of highly tuned ultra performance V8
engines. Here is the news from North Queensland.

This Tuesday July 13th the TARC Project Night will be happening
at the Club Rooms atop SES HQ Green Street West End from
7-30pm. Come along and lend a helping hand to make something
work or be there to proclaim "Egadsl!!" all welcome !

More VK100WIA activity planned for the North.
As part of The Townsville Amateur Radio Club operations of
VK100WIA for the Centenary Celebration of the WIA, the
North Queensland Net happening on Sunday 25th July will be
controlled by VK100WIA on 3605.4kHz from 0930UTC
until the net finishes and on the Townsville VHF Repeater from
1000UTC until the net finishes. The net is normally controlled
by TARC Club Station VK4WIT however will change the
callsign for this special evening. The full log will be transferred
to the VK100WIA online log to ensure the correct
acknowledgement of all stations worked.
Control operators for this net will be -
on 3605.4kHz, Gavin VK4ZZ
and Townsville VHF Repeater, Richard VK4FRJG

Finally, here is a call going out to anyone who can help out
with communications support for the following events -

Magnetic Island to Townsville Swim, still several positions
open for sea-going and land lubber positions next Sunday
July 18th and

Nighthawk Scouting Activities in the area around Ross
Park in Kelso, still several positions open for mobile
stationary operation to act as a checkpoint for Saturday
evening July 24th and

King of the Hill Hill climb Heat 3 on the Mount Stuart
Road on Sunday July 25th, several positions
open to play with radios to the sound of burning rubber.

If you can help please contact Gavin VK4ZZ on either
Mobile 0427182469 or

email vk4zz@wia.org.au soonest !

Time has run out yet again, so I must go back to the
scanner and listen in to the exciting action between the
V8 super cars and their pit crews.
So, bringing this edition of QNEWS for Sunday 11th
July to a close.....

This has been Don VK4FNQA in Tropical Thunder
Paradise for the Townsville Amateur Radio Club Inc, and
you have been listening to, and enjoying to the very core
of your being, QNEWS from VK4WIA.

VK8

News from the Darwin Amateur Radio Club

This is Spud VK8ZWM President of the Darwin Amateur Radio Club

The clubs last meeting was very well attended and discussion was lively and noisy at times.

We welcomed 6 new members with more possible from the 12 recent successful examination candidates.

Ron VK8NRI has been the club secretary for several years. We thank him for his work in this role and wish him all the best in his move to Queensland. Now what better excuse do you need for a barbecue than a send off. It's the 18th of July at the clubrooms at 6pm. Let Ritchie vk8rr know if you are coming and how many for catering purposes.

Peter VK8HPB is taking on the role till the AGM in December.
We also welcome Ian VK4SC portable 8 to the committee. A long lost member come home.

While I'm talking drinking. Tea and coffee that is, and eating cake and biscuits too. Let me tell you that the morning tea's held on Thursday mornings at 10 am at the clubrooms are very popular. If you are visiting Darwin then do drop in. For assistance call VK8DA on repeater 6900.

The most important news I have today though is that the Darwin Amateur Radio Club is activating VK100WIA on Tuesday Wednesday and Thursday this week. Keep an ear out around the bands for this special event callsign.

There will be a special entry on the www.abc.net.au/darwin, then select Julia's breakfast show website, postcards section.

That famous event the Darwin Lions Clubs Annual Beer Can Regatta is on again at Mindil beach on Sunday the 8th of August. The Clubs members through WICEN N.T. will be assisting on the beach during the day. You might even get to hear Spud VK8ZWM in full flight.

That's it from Darwin for this week.

This has been Spud Vk8ZWM.
Now its back to VK1WIA.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Internet Connected Amateur Radio

The ZL Ministry has raised concerns with NZART about IRLP, D-Star, EchoLink, APRS and similar modes as they do not appear to fit within current licence conditions.

Concerns raised include:

the use of unattended transmitters and unlicensed Digipeater for APRS and

Amateurs based overseas operating (via the Internet) a NZ amateur station.

The ALO, Don Wallace ZL2TLL is currently putting together a paper on this topic and would appreciate input from interested zl amateurs.

Amateur Satellite to Investigate Power Line Interference

Hans, ZS6AKV will be giving a presentation on South Africa's first CubeSat at the AMSAT-UK Colloquium in Guildford, England, July 31 - Aug 1.

The important mission of the SA AMSAT CubeSat is to measure the High Frequency noise levels over South Africa and report these measurement back to a ground station for analysis and action to reduce these unwanted signals.

The information from the tiny satellite will identify the areas where the HF frequency polluters are situated and will help "reducing or eliminating the source."

It is also hoped to include a 30 kHz linear transponder and an Automatic Packet Reporting System (APRS) in the CubeSat.

AMSAT-UK International Space Colloquium, Guildford, England July 31 - Aug 1
http://www.uk.amsat.org/colloquium/

(73 Trevor M5AKA)

Adrian VK2VHF says Apple has come clean about an embarrassing software glitch that overstates network signal strength in its hot-selling iPhone, as complaints mounted about the phone's wraparound antenna.

Apple admitted its signal strength miscalculation dates back to its original 2007 iPhone. It promised to fix the glitch in a few weeks, but did not directly address concerns that its antenna design caused reception problems for iPhone 4, its newest phone.

Apple's apology - a relative rarity from the company known for its marketing savvy - marked the third time in less than three weeks it had to apologise to customers of iPhone 4.

Upon investigation, Apple were stunned to find that the formula used to calculate how many bars of signal strength to display is totally wrong.

Since the iPhone 4 hit stores on June 24, consumers have complained about phone reception problems when they hold the phone in a certain way. Even while just standing in one place, a rapid decline in the number of signal bars can be observed, depending on how the phone is gripped.

==========

G4TUT SOUTHGATE AMATEUR RADIO CLUB NEWS DESK

Coordinated EU approach to Radio Spectrum

Neelie Kroes, Vice President of the European Commission and European Digital Agenda Commissioner, has emphasised the crucial need for a coordinated EU approach to radio spectrum.

In her speech on June 23 to the 5th annual European Spectrum Management Conference in Brussels she expressed her desire for the 800 MHz band spectrum to be released across the EU well before the 2015 deadline.

She said that Wireless Broadband will have a big role to play and that Europe needed harmonised frequency bands so that 1000 MHz of broadband spectrum is available. She took heart from the fact that some of the spectrum used for national security and defence is being reassessed voluntarily.

Geoff Chance M0GRC - SK

Geoff M0GRC, who was known to many around the world for the considerable work he put into organising International Marconi Day, passed away recently having lost his battle with illness.

Geoff, an active member of the Cornish Radio Amateur Club, will be sadly missed

by all of us who have taken part in IMD over the years.

Next year's International Marconi Day will be held on Saturday April 30, 2011

For VK1WIA news I'm Richard G4TUT.

==========

WEIRD AND WONDERFUL

Here's another off-beat story from Peter Ellis VK1PE, but it comes with a lesson for us all.

Smith Chart Art - or, missing the obvious

Recently I ran across a passing mention of a person who had a Smith Chart tattooed on his arm. Sure enough, I found it was true: There is a picture on his website dating the tattoo to 9 years ago, and he responds to emails and confirmed that it is there. Chris Sanabria got his doctorate in Electrical Engineering in 2006, and is working on high power, high frequency RF devices. I asked him whether he was, by chance, an Amateur Radio operator. His answer was that no-one had ever mentioned it, although he knew about it. That ate at me. Here is an obviously gifted RF scientist who has been missed to Amateur circles, at least until now. How many other gifted and talented maybe-Amateurs have slipped by each of us? It is up to us! And, Chris Sanabria is correct,

only .0001% of the world's population has any idea what the tattoo is, including Amateurs: It's that spider-web looking chart, a graphical aid or nomogram designed for electrical and electronics engineers specializing in radio frequency engineering, or Amateurs, to assist in solving problems with transmission lines and matching circuits.

For National Radio news,
Peter Ellis VK1PE

NOV 20-21 WIA Spring VHF-UHF Field Day
John Martin VK3KM tac@wia.org.au

Good Morning Trent Vk4ti here..

A Dxpededition for the RD contest ?

What would be the best location for the HF categories of the RD contest ?

You can't work intra state except on 160 and 10 M so the best spots are good distance to the capitals and centres of activity..

VK1, VK7 North coast, VK5 especially if you are a VK3 or 2 or west of Goondiwindi in Queensland..

Why are they the best ? They give rough equal distance to the population centres of Melbourne and Sydney ...

RD its worth going on a DXpedition for in 2010

with further on this years RD contest here is contest manager Peter VK4OD

Peter Harding, VK4OD the WIA RD Contest Manager here and due to some unforeseen circumstances, the Rules and my introduction to the 2010 Remembrance Contest, failed to make it into the July Amateur radio Magazine.

If you need a copy of these rules you can log onto wia.org.au

At the bottom of the RD Contest page is a link to download a PDF copy of the Rules and my introduction, or you can email me at rdlogs@wia.org.au and I can send a copy of both in PDF format.

Basically, there have been NO changes since last year, however, as this is the WIA's Premier Annual Contest, I like to get the rules published each year.

I would ask that any newly licensed Amateur Operator taking part in this year's contest take the time to read the rules. As we did last year, I have included the new section for Unmodified World WARII equipment. This equipment can be on HF or VHF. Please read the rules regarding criteria for this equipment.

Today, 11th July as this news goes to air, you have about 5 weeks to check your equipment, logs sheets, and Logging Software updates.

Over the next couple of weeks I will make available, at the bottom of the RD Contest page, printable log sheets, declarations, etc.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

IARU Monitoring System - Intruder Watch

The source of non-amateur signals on the 20 metre band has been identified by the WIA as being inter-modulation product emissions from Voice of America transmitters located in the Philippines.

These have been reported to the Australian regulator, the ACMA. Consideration is being given to whether these spurious emissions are in excess of what is permitted under the International Telecommunications Union requirements for transmitters.

An inter-mod sounds like two different AM broadcast signals on the same frequency. They can occur when two or more transmitters share the same site.

there have been reports of VOA inter-mods heard on the ham bands from Hong Kong too.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Hello I'm Jim Linton VK3PC. Just how hard can it be to load batteries into devices and get the polarity correct?

Well, apparently this very simple task is just beyond some people, who we will describe as being Polarity-Agnostic, or call a spade a spade, they're battery bunglers.

So prevalent is this lack of skill that Microsoft and Duracell have identified it as an untapped market, and created batteries that have both positive, you know that's the one with the plus sign, and negative or hyphen, at both ends.

This bipolar set-up of terminals is subject to a patent entitled 'Eliminating Incorrect Battery Placement'.

The InstaLoad technology is a brilliant, basic mechanical solution without electronic components or circuitary. Already it has found application in hearing aids, torches and soon to follow will be a host of gadgets presumably the Duracell Energiser Bunny.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

CRARC's next WICEN event is the LCCC "Mini Corsa" Rally being held on Saturday July 10th.

This rally will have 8 stages consisting of 4 stages each run twice and will be run with 2 stages near town (Zoo / Pipeline & Bluetts) and 2 out near Uriarra (Sherwood & Tidbinbilla).

Good response so far, however CRARC are still needing one or two more for HQ plus one in the field.

Please contact VK1ZPL@WIA.ORG.AU

I know it is only July 11 and still very cold but it is time to start thinking of the Murray Marathon again.

There are some key dates to remember:-

The Mini Marathon October 16th, a one day practice event where paddlers and volunteers can sharpen their skills in readiness for the major end of year event.

The Murray Marathon December 27th To December 31st is a canoe race down the River Murray between Yarrawonga and Swan Hill and WICEN provides communications for the safety team that looks after paddlers on the River.

It is a fun event with free camp sites being provided down the River.

Radio Operators are wanted for the event, so if you are interested in playing radio and assisting the YMCA in this classic fund raising event then please contact Graham Mason or Gerard Werner and indicate if you will be attending both or one of these events.

Graham Mason 04 1753 9710
Gerard Werner 03 9773 6313

Official opening of a new radio museum

The Rockhampton & District Amateur Radio Club, or RADAR, has set up a station in the famed Rockhampton Heritage Village just 10 kilometres north of Rocky's city centre.

This is a unique township consisting of original buildings and replicas depicting the century 1850 to 1950, with the radio shack is on the top floor of Nielson's Buggy and Sulky Works.

For the official opening of the new radio museum, RADAR VK4WIR will be on air on Sunday the 25th of July, looking for contacts on 7080, 14210, and EchoLink & IRLP Node 6973 144.7MHz.

Put it in your diary now and give the Rockhampton & District Amateur Radio Club support by making a contact during this public event.

GB2RS NEWS

Sunday 11th July 2010

The news headlines

Changes to some GB2RS news readings

Amateur satellite to Investigate Power Line Interference

Thai amateurs to have access to 50MHz for 48 hours

Because no volunteers have come forward to join the depleted 80 metre news reading team for the North East of England, it has been agreed that the existing 11am news reading will now be brought forward by 30 minutes and combined with the North West reading. As from today the new combined North of England news reading will take place at 10.30am on 3640kHz LSB. The readers will be headed up by Mark, G0VOF in Blackburn and Melvin, G0LYZ in Driffield. The reading will be followed by an after-news net when reception reports will be greatly appreciated.

The RSGB is pleased to announce that two volunteer GB2RS news readers have come forward to restore the Scottish east coast reading on 80 metres. As from today, 11 July, Alex, GM3ZBE near Leven and John, GM8MHU in Aberdeen will be reading the news at 11.30am on 3640kHz LSB. After each reading they will be especially appreciative of reception reports.

Hans van de Groenendaal, ZS6AKV will be giving a presentation on South Africa's first CubeSat at the AMSAT-UK Colloquium in Guildford, which is held on 31 July and 1 August. HF radio communication is very susceptible to noise levels that are created by power lines, electrical installations and overhead lines used by trains and busses and power line telecommunication systems. If fact, today there are many installation that do not necessarily comply with internationally agreed emission standards. With increasing solar activity interference signals are propagated over large areas and will interfere with HF communication. The important mission of the SA AMSAT CubeSat is to measure the High Frequency noise levels over South Africa and report these measurements back to a ground station for analysis and action to reduce these unwanted signals. The information from the tiny satellite will identify the areas where HF frequency polluters are situated and will help reduce or eliminate the source. It is also hoped to include a 30kHz linear transponder and an Automatic Packet Reporting System in the CubeSat. For more information on the AMSAT-UK International Space Colloquium visit their website at www.uk.amsat.org/colloquium.

The international standards committee responsible for EMC matters, CISPR, has launched an information-gathering campaign aimed at determining the extent and seriousness of interference from plasma TV receivers. Initially they have asked national standards organisations for this data and, in the UK, BSI contacted our Regulator, Ofcom. They posed the simple question, asking how many complaints have there been? Ofcom indicated that they had received only 12 to 15. Over the last few years, the EMC Committee have received many more complaints from members, but no recording system is in place. So, we now need your help. If you have suffered, or are suffering now, from interference from a plasma TV receiver we need to know. All that you have to do is send a very brief e-mail to plasma.tv@rsgb.org.uk. We only need to know the number of interference cases, no details, and no names/addresses. Please act as soon as possible, since the timescale for gathering this information is very tight.

Amateurs in Thailand will be allowed to use 6 metres during the CQWW VHF contest. For the 48 hours of the contest on 17 and 18 July, Thai amateur radio operators will be operating between 50 and 54MHz. This will be the first use of the 50 to 54MHz allocation by Thai amateurs for 18 years.

Region 1 of the IARU is looking for help to keep their records up to date. They have asked that Member societies update or verify the spectrum privileges, especially for 600, 60, 6 and 4 meters as we have been through a period of change in the recent past. If you are interested in seeing what spectrum privileges each country has, then visit www.iaru-r1.org and click on Spectrum and Band Plans on the left hand side of the page.

Tickets for the National Hamfest are now available online and buying early can be of benefit. Check out the website www.nationalhamfest.org.uk to see the various discounts that are available. The National Hamfest, organised by the RSGB in conjunction with the Lincoln Short Wave Club, will take place on 1 and 2 October at the Newark and Nottingham Showground.

And now for the details of rallies and events for the coming week

The South Yorkshire Microwave Round Table finishes today, 11 July. Organised by the UK Microwave Group and the Finningley Amateur Radio Society, the event is held at the HQ of the Finningley ARS, near Doncaster, South Yorkshire. Registration facilities and more information is online at www.g0ghk.co.uk; just follow the links on the left side of the home page. Prior registration is essential; numbers are limited for the various workshops and lectures.

Today, 11 July, the 47th Cornish RAC mobile rally takes place at Penair School, Truro, Cornwall, TR1 1TN. There will be trade stands, a Bring & Buy as well as catering facilities. Doors open at 10.30am and admission is ?2. Details from Ken, G0FIC, on 01209 821073.

The 2010 McMichael Amateur Radio Rally and Car Boot Sale takes place on Sunday 18 July at Reading Rugby Club, Sonning Lane. The B4446 is just

off the A4 at Sonning; for satnav users the postcode is RG4 6ST. Car boot setup is from 8:30am and the gates open at 9.30am. There will be a large car boot area and plenty of free parking for buyers, as well as a snack bar and licensed bar. Traders have an indoor area and there will be demonstrations and displays by special interest groups. Martin Lynch & Sons will be holding their annual Summer Party at the event again this year. Car boot pitches cost ?10, admission is ?2 and site rules require no dogs except guide dogs. Details from Pete, G8FRC, on 01189 695697.

QRP in the Country is a new event that is being held on 18 July at the farm of Tim Walford, G3PCJ, at Long Sutton, Langport, Somerset TA10 9NJ. Entry is free and homebrew radio is the theme. The gates opens at 10am. In the event of poor weather, all will be under cover in the cattle sheds! More information from Tim Walford on 01458 241224.

On 18 July, the Macmillan Northampton Hamfest will take place at Roade Village, Northamptonshire. There is no entry fee, no traders fee, only a request for donations to Macmillan. All refreshment monies will go to Macmillan too. Contact G6NYH on 01604 234333.

Now for the news of special events

Castles And Stately Homes On The Air in Northern Ireland will have a major activation on 16 July. Bobby, MI0RYL has obtained permission to activate both the Stormont Parliament Buildings and Stormont Castle within the Stormont estate in Belfast. A special QSL card will be issued to any contacts that are made. The station should be up and running by 10am with the castle activation number GI022 and WAB No J37.

Also on 16 July, Fir Park Wings and Wheels will put GB0FWW on the air from Market Rasen in Lincolnshire. GB0WKS will be on the air on 17 July for the West Kent Society from Tunbridge Wells in Kent.

On 18 July, GB2CPS will be on the air from the Castle Point Show on Canvey island in Essex and GB6MMR will be on the air from the McMichael Mobile Rally near Reading.

And now the HF DX news compiled from 425 DX News and other sources.

Steve, GW0GEI and Tony, GW4VEQ will be taking part in the IARU contest this weekend from Anglesey. The RSGB team is GR2HQ and the station on Anglesey will be one of three 10m SSB stations around the UK. There will be three stations due to the unpredictability of 10m propagation so the station with the best propagation can be picked at any time during the 24 hours. Anglesey is a good location for 10m but if there are times with no Sporadic-E or tropo they are hoping that more local stations will keep the points rising.

Once again the Strumble Head DX and Contest Group are activating Ramsey Island, which is IOTA reference EU-124. Using the club call MC0SHL, they will be on the air from 22 July through to 26 or 27 July, depending on the tides. This trip also takes in the RSGB IOTA contest where they will be on the air using the club contest call MW9W over the weekend 24 and

25 July. They will have 3 stations on the air, mostly with SSB, but with some RTTY and CW thrown in. Full details and photographs of last year's operation are on the group's website www.mc0shl.com. All QSL requests should go via the team manager M0URX, see www.m0urx.com.

The Finnish WRTC 2002 group in association with Radio Arcala, OH8X, will activate four DXCC countries and ITU zones in the IARU HF World Championship, this weekend, 10 and 11 July. Look out for Greenland with callsign OX8XX, QSL via OH2BH, Aland Islands with callsign OH0X, QSL via OH2TA, Iceland with callsign TF4X, QSL via G3SWH and the Azores with callsign CQ8X, QSL via OH2BH. Following the IARU weekend, and sailing out from the port of Reykjavik, Iceland, you may catch Martti, OH2BH and Leena, OH2BE cruising in Greenland waters, zigzagging among the icebergs for a period of eleven days.

Peter, EI4GZB and Declan, EI9HQ will be out activating Worked All Ireland Squares on 18 July. Planned squares to be worked are Oscar 33, 34, 35 and 36 around County Dublin. All squares will be activated /MM. Frequencies to be used will be 14.268, 7.068, 3.680 and 3.760MHz SSB only plus or minus QRM.

Now the contest news

The IARU HF Championship finishes at 1200UTC today, 11 July, and there may just be enough time to contact one of the HQ stations for those valuable last few points. About 60 of Britain's top contesters will be devoting themselves to the HQ station this year, in a bid to win the coveted HQ section of the contest. Britain and has never yet been placed 1st, coming in at 5th place last year. The HQ team ask that amateurs try and work as many HQ stations on as many bands as possible; all you'll need to give is a signal report and the IARU Zone for Britain, which is 27.

13 July sees the 432MHz UK Activity Contest taking place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

The 80m Club Championships continues on 14 July with the SSB leg between 1900 and 2030UTC. Exchange s signal report and serial number.

Low Power Field Day takes place on Sunday 18 July. Using appropriate and efficient antennas is key to success, because with low power you need to direct as much as possible of your RF at the right angle for the kind of distances that you can expect to work. Most QSOs take place around Britain, but on 40m in particular the Continent will be worked. Of course you'll need a good pair of ears for this event, because the signals from some competing stations will be extremely weak. There are four sections to enter, two for portables and two for fixed stations, with a total of three trophies to be won. Starting at 0900 and ending at 1600UTC, it's CW only and the exchange is signal report, serial number and power.

The 70MHz Trophy on also the 18th. Traditionally this event was held in August, but it has now been brought forward by a month to bring it into the Sporadic-E season. With the band available to an ever-increasing number of countries, last year just under 200 stations from twelve countries appeared in the logs. Compare this to ten years earlier, when nobody's Best DX was outside of the UK. The number of entries received has remained remarkably steady though, with 31 in 1999 and 36 in 2009. Running between 1000 and 1600UTC, all modes may be used and the exchange is signal report, serial number and locator.

The Worked All Britain QRO 2m Phone contest takes place on Sunday 18 July between 1000 and 1400UTC. Multipliers are WAB squares and DXCC countries. You don't have to be a member of the award scheme to partake or give points away. Using all modes in the 2m band the exchange is signal report, serial number and WAB square.

Now the solar factual data for the period from the 28th of June to the 4th of July, compiled by Neil Clarke, G0CAS on the 5th of July.

A large single spot gradually rotated across the solar disc during the period. The sunspot is probably the remains of a sunspot group from a month ago on its last rotation. Solar activity was very low with no solar flares taking place at all. On the 3rd a series of coronal mass ejections occurred and was spectacularly captured by the SOHO spacecraft. The cause of these CMEs was a couple of filaments that erupted. Solar flux levels decreased slightly from 74 units to 72 by the 3rd. The average was 73. The 90 day solar flux average on the 4th was 75 units, that's the same level as last week. X-ray flux levels showed little variation day to day and averaged A4.4 units. Geomagnetic activity was dominated by a recurring coronal hole disturbance that lasted slightly longer than forecast. The most disturbed day was the 30th with an Ap index of 19 units. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 460 kilometres per second to 710 kilometres per second by the 30th. Particle densities were low every day. Bz varied between minus 2 and plus 3 nanoTeslas on the quiet days and between minus 9 and plus 8 nanoTeslas during the disturbance.

The geomagnetic disturbance resulted in a somewhat bumpier ride than most recent weeks, with MUFs at times degraded at HF, particularly over east-west paths. However, the bands appeared to have recovered by the 3rd, with the trans-Atlantic path in notably good shape up to 24MHz. Radio aurora was reported on 6m on several days, but only at high latitudes.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be at very low levels. Solar flux is expected to be at its lowest level for this solar rotation and be around the 70 for most of the week. Geomagnetic activity could be unsettled for the next couple of days due to a recurring coronal hole. The disturbance should not last too long and its effects should be rather mild - going on its last rotation is anything to go by. Quiet conditions should return from midweek onwards. MUFs during

daylight hours at equal latitudes should be around 18MHz for the south and 15MHz for the north. Darkness hour lows are expected to be about 11MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 17MHz. The optimum working frequency with a 90 per cent success rate will be about 13MHz. The best time to try this path will be between 110 and 1400 hours. Sporadic-E could take place most days. Openings on 144MHz are still possible. Double hop openings should occur to place like the Middle East, North Africa, the Caribbean and North America on 50MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 11 July Kettering & District Amateur Radio Society is having a social meet from 10am. Details on the web at http://kdars.co.uk.

On Monday 12 July Gloucester Amateur Radio & Electronics Society is visiting Courtyard Books at Bishops Cleeve, with kind permission of Brian Woodcock, G4CIB. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 12 July South Birmingham Radio Society is having a contest planning meeting. Contact Don, on 0121 458 1603.

On Monday 12 July Stratford Upon Avon District Radio Society is having a barbecue and night on the air. Contact G0CHO, on 01608 664488.

On Tuesday 13 July Derby & District Amateur Radio Society is having a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 13 July Eagle Radio Group is having a talk by Brod, G4RPB, entitled Shackelton Patrol. Details from Terry, G0SWS, on 01507 478590.

On Tuesday 13 July Kettering & District Amateur Radio Society is operating from 7 - 9pm. Details on the web at http://kdars.co.uk.

On Tuesday 13 July Loughborough & District Amateur Radio Club is having a kite night, subject to weather conditions. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 13 July Mid-Warwickshire Amateur Radio Society is having a fox hunt on 2m. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 13 July Wythall Radio Club is having a committee meeting. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 14 July Bolsover Amateur Radio Society is having a talk on the 6m band by Don, G4KXW. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 14 July Kettering & District Amateur Radio Society is having a gentleman's group afternoon. Details on the web at http://kdars.co.uk.

On Wednesday 14 July Lincoln Short-Wave Club is having a talk on planning permission by M5ZZZ. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 14 July Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Thursday 15 July Kettering & District Amateur Radio Society is having a training night. Details on the web at http://kdars.co.uk.

On Thursday 15 July RAF Waddington Amateur Radio Club has a shack and chat night with radio and antenna play. Details from Judy Rowlands, on 07544 456422.

On Friday 16 July Coventry Amateur Radio Society is taking part in the 3rd round of the G2FDC Trophy. Contact John, G8SEQ, on 07958 777363.

On Friday 16 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Friday 16 July Spalding & District Amateur Radio Society is having a construction contest. For more information contact Graham Boor, G8NWC, on 07947 76448.

On Friday 16 July Stenigot Chain Home Amateur Radio Club is having a talk on modern radar techniques by Brian, G7AJP. Contact Steve Burke, M5ZZZ, on 01507 600202.

On Saturday 17 July Lincoln Short-Wave Club is putting G5FZ on air from the shack and doing odd jobs. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 17 July RAF Waddington Amateur Radio Club commences its weekend event, operating a special event station at North Coates Flying School for the Vintage Wings and Wheels Weekend. Details from Judy Rowlands, on 07544 456422.

On Sunday 18 July Kettering & District Amateur Radio Society is having a social meet from 10am. Details on the web at http://kdars.co.uk.

NEWS FOR THE NORTH OF ENGLAND

Listeners will be pleased to know that John, G0NAJ, one of the North West team of GB2RS newsreaders is recovering well after open heart and bypass surgery. Other readers will continue to maintain a nearly full service in the region although it is unlikely they will be able to read on 51.530MHz on the 11th. We wish John a speedy and full recovery.

On Monday 12 July Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 12 July Bolton Wireless Club is having a talk on Summits On The Air by Tom M1EYP. For details, send an email to boltonwireless@gmail.com.

On Monday 12 July Scarborough Amateur Radio Society is having a talk on the U2 spy plane by Robert Clutson, G0WHO. Contact Jerry Scarr G6LBL, on 01751 476601.

On Monday 12 July Sheffield Amateur Radio Club is holding a portable evening at Whitely Woods & the club fields. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Tuesday 13 July Chester & District Amateur Radio Society is having a committee meeting. Details from Barbara Green on 07957 870770.

On Tuesday 13 July Otley Amateur Radio Society is having a members' presentation. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 14 July Hornsea Amateur Radio Club is having a demo of Super Duper by G4YTV and taking part in the 80m Sprint SSB. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 15 July South Manchester Radio and Computer Club is having a general knowledge and electronics quiz run by John, G6ISA. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 15 July Wakefield & District Radio Society is on the air and having a committee meeting. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 16 July East Cleveland Amateur Radio Club is having a bring in something interesting evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 17 July Wakefield & District Radio Society continues its Foundation Licence course. Contact Ken, 2E0SSQ, on 07900 563117.

On Sunday 18 July Hornsea Amateur Radio Club is having a low power field day from 9 until 4pm. Contact Gordon MacNaught, G3WOV, on 01377 240573.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

Glenrothes & District ARC member Doug, GM0AIR operates a Morse Enthusiasts Group Scotland as GM0RSE on Monday and Thursdays at 1800UTC

on 3530 plus or minus QRM.

On Tuesday 13 July Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 13 July Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946192.

On Wednesday 14 July West of Scotland (Glasgow) Amateur Radio Society is working on construction projects and holding licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 15 July Aberdeen Amateur Radio Society Club is closed. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 16 July West of Scotland Amateur Radio Society is having a club night, including presentations, guest speakers, a raffle and quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 11 July Southdown Amateur Radio Society is operating GB2PW at Polegate Windmill Fete. Details from John, G3DQY, on 01424 424 319.

On Monday 12 July Coulsdon Amateur Transmitting Society is having a talk by RSGB Regional Manager Alison Johnston, G8ROG. More information from Andy, G8JAC, by email to g8jac@btinternet.com.

On Tuesday 13 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 13 July Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 14 July Aylesbury Vale Radio Society is having a barbecue hosted by Gerry, G7VFV and Mandy. Details from Roger, G3MEH, on 01442 826 651.

On Wednesday 14 July Chelmsford Amateur Radio Society is having a committee meeting at Danbury. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 14 July Darenth Valley Radio Society is on the air and having a natter night. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 14 July Farnborough & District Radio Society is having a talk by Julian, M0XPJ. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 14 July Havering & District Amateur Radio Club is having a barbecue at Fairkytes Arts Centre. Contact John, M0UKD, on 07817 365354.

On Wednesday 14 July Norfolk Amateur Radio Club is having an informal, construction, and workshop evening, plus taking part in the RSGB clubs

contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 14 July South Essex Amateur Radio Society is having a DVD & radio chat night. Contact Norman, M0FZW, on 01268 692776.

On Wednesday 14 July Southgate Amateur Radio Club is having a talk on learning Morse by Nigel Williams, G0RPM. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 14 July Worthing & District Amateur Radio Club is having a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 15 July Colchester Radio Amateurs plan their rally and events. Details from Kevan, 2E0WMG, on 07766543784.

On Thursday 15 July Horsham Amateur Radio Club is having a social evening at The Limeburners Arms, Newbridge. Details are on the web at www.harc.org.uk.

On Thursday 15 July Lowestoft & District Amateur Radio Club is having a club night at shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 15 July Sutton & Cheam Radio Society is having a talk on radio controlled model aircraft by Darren Parvin, M0PRV. More information from John, G0BWV, on 020 8644 9945.

On Friday 16 July Loughton & Epping Forest Amateur Radio Society is having a talk on RadCom by its Technical Editor, Giles Read, G1MFG. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 16 July Mid-Sussex Amateur Radio Society is having its Chairman's BBQ at the QTH of Sue, G6YPY. Contact Peter, G4AKG, on 01444 239371.

On Friday 16 July Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 17 July Loughton & Epping Forest Amateur Radio Society commences its annual summer get-together weekend event at Aylmers Farm, Old Harlow. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Sunday 18 July Reading & District Amateur Radio Club is at the McMichael Radio Rally. Details from Pete, G8FRC, on 01189 695 697.

On Sunday 18 July South Essex Amateur Radio Society is running a field event at Castle Point Show, Waterside, Canvey Island. Contact Norman, M0FZW, on 01268 692776.

NEWS FOR THE SOUTH WEST

On Sunday 11 July Cornish Radio Amateur Club is at the Cornish Rally at Penair School, Truro. Details from Steve, G7VOH, on 01209 844939.

On Monday 12 July Bristol RSGB Group isn't having a meeting as such instead is holding a late Christmas meal at the Toby Carvery, Henbury. Details from Robin, G3TKF, on 01225 420442.

On Monday 12 July Cornish Radio Amateur Club Computer Section is meeting. Details from Steve, G7VOH, on 01209 844939.

On Wednesday 14 July Taunton & District Amateur Radio Club is on the air. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 14 July Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 15 July South Bristol Amateur Radio Club invites members to bring in examples of thermionic valves and valve equipment. Contact Len, G4RZY, on 01275 834 282.

On Thursday 15 July Swindon & District Amateur Radio Club is having part 2 of the talk on RF measurements by Ian, G8JHC. Contact Den, M0ACM, on 07810 317750.

On Thursday 15 July Yeovil Amateur Radio Club is having a talk by M6KMW on "my first year as an amateur". Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

NEWS FOR WALES

Wrexham ARS has changed venue to Brymbo Sports and Social Complex, College Hill, Tan-Y-Fron, Wrexham, LL11 5TF. The next meeting is Tuesday 20 July.

On Monday 12 July Llanelli Amateur Radio Society Club is holding a raffle. Contact Craig, MW0MXT, on 01269 840292.

On Thursday 15 July Porthmadog and District Amateur Radio Society is on the air, when members will be able to familiarise themselves with the society's new equipment. Details from Glyn, MW5CAD, on 01286 830078.

SARL NEWS - SUNDAY 11 JULY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with deep regret that the passing of Dawie Cloete, ZS4EV, of Virginia at the end of June, must be announced. We extend our sincere condolences to his friends.

(PAUSE)

In the news today:

DID YOU WRITE THE OCTOBER 2009 RAE AND RECEIVED AN ICASA ACCOUNT?

ARRL's 500 kHz EXPERIMENT SHOWS SMALL GROWTH

TECHNOLOGY IN AMATEUR RADIO -WHERE ARE OUR INNOVATORS

NATIONAL SCIENCE WEEK

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

DID YOU WRITE THE OCTOBER 2009 RAE AND RECEIVED AN ICASA ACCOUNT?

If you wrote the October 2009 Radio Amateur Examination and received an account from ICASA for R173,75 don't pay the full amount. You only need to pay R6,75.

The account shows R140 examination fee, R27 License fee and R6,75 for the last three months of 2009. The SARL has paid R167 to ICASA in respect of each candidate. The problem is that ICASA has not allocated the bulk payment to individual licensee's accounts. It is mistake on ICASA's side. They are rectifying their oversight. However it may take

some time before ICASA will complete all the corrections. Just pay R6,75 and your amateur radio License will be fully paid up till December 2010.

INTECNET TO FOCUS ON CONTESTING

The next INTECNET will be held on Sunday 18 July at 19:30 and will focus on contesting, both HF and VHF.

Clubs wishing to link to the teleconference network should send a request to armi@sarl.org.za by not later than Monday 12 August.

If you were not able to attend the recent Indaba or had a representative of your club attending, here is your opportunity to ask questions and make suggestions.

ARRL's 500 kHz EXPERIMENT SHOWS SMALL GROWTH

In the quarterly report for the ARRL's 500 kHz Experimental Station for the period ending May 2010 Experiment coordinator Fritz Raab, W1FR, reported that since the experiment began in late 2006, 20 of the 32 participating stations are currently active. The FCC's Office of Engineering and Technology granted the WD2XSH experimental license to the ARRL in September of that year. "Our present license grant expires on August 1," Raab said. "We are planning to do an 'as-is' renewal this month."

The WD2XSH Web site has received 511 reports since the end of February, bringing the total number of reports to 11 234 since the beginning of the issuance of the experimental license. Raab said more than 60 000 hours of activity has been logged on the Web site since September 2006. Stations do not have to be members of the experimental team to post reception reports.

On the international front, Raab said that German amateur Horst St�cker, DO1KHS, has been issued experimental license DI2AN. The Radioclub YO2KAB beacons in Romania, using call sign YO2X, is reported to be operating a beacon on 505,110; this is the second Romanian station to operate on 500 kHz. The Fort Pearch Rock special event station, GB4FPR, operated on 502 kHz from Fort Perch Rock to celebrate Marconi Day in April.

Raab said that the International Maritime Organization (IMO) continues to oppose an amateur allocation on 600 meters. The IMO's subcommittee on Radiocommunications and Search and Rescue (COMSAR) noted in its March meeting that "a secondary allocation [in the 415-526,5 kHz band] for the Amateur Service would increase the probability of harmful interference."

In South Africa the support for an amateur allocation around 500 kHz also looks problematic with similar objections as voiced by COMSAR. The WRC12 agenda item will be discussed at a meeting of the ERC 12 preparatory group in Pretoria later this month. For some more

interesting information on 500 kHz visit http://www.500kc.com/.

UNIQUE VISIT TO CUBESAT LAB PART OF CAPE TOWN RTA

Delegates to the SARL Radio Technology in Action 2010 will have the opportunity to visit the laboratory where the CPUT CubeSat is being designed and constructed. The RTA will be held on 24 July on the Cape Peninsula University of Technology, Belville campus. The full programme is available on the SARL web at www.sarl.org.za, click on RTA and follow the links. The cost to attend the RTA is only R50 which includes refreshment and participation in the attendance prize draw which is sponsored by RS Components.

TECHNOLOGY IN AMATEUR RADIO -WHERE ARE OUR INNOVATORS

The SA Amateur Radio Development Trust has thus far received one entry in the Innovation in Amateur Radio Competition from an Amateur in the UK. Where are the South African innovators?

Radio amateurs and technologists are invited to submit projects that will innovate amateur radio whether it is software, amateur radio and the Internet, the development of compact HF antennas for flat and complex dwellers or innovation in Emergency Communications.

Out-of-the box ideas are required to solve some of the problems and challenges faced by the 21st century radio amateurs. The innovation project is in the form of a competition to stimulate the creative side of amateurs to develop those solutions that will make the hobby more enjoyable to amateurs all over the world. Even old ideas improved with modern design techniques and modern components can generate a "wow" factor. Solutions will be judged by their uniqueness, e.g. not having been previously published.

Entry of paper designs are invited by 30 September 2010. The designs must be innovative but also practically implementable. Three entries will be chosen to go to the final stage of the competition which requires the entrant to develop and build a prototype. The three winners of the first stage will be announced at on 31 October 2010. Visit www.amateurradio.org.za for details and an entry form.

NATIONAL SCIENCE WEEK

Sci Bono Discovery Centre is hosting the National Science week from 2-7 August 2010. This year more than 6 000 school children are expected during the science week.

Daily activities during the week lasts from 09:00-14:00 CAT Monday to Friday.

Radio Amateurs wishing to promote amateur radio to the youth during this week are invited to come and present interesting lectures to learners.

To book your spot, contact Chris Gryffenberg, ZS6COG, at 083 543 5668.

CONTEST NEWS

The 2010 FIFA Soccer World Cup is almost over and since September 2009, various amateur radio clubs in the country have operated the special event call sign ZS10WCS. These clubs are asked to ensure that the logs are submitted to Dennis, ZS4BS, so that he can update the SARL QSL system as well as the ARRL Logbook of the World. The logs can be sent in ADIF or CSV format. The last update was in early May 2010. Send the logs to zs4bs@netactive.co.za.

The QRP Sprints have been changed to QRP Contests and there will be four during the year. The Winter QRP Contest will be run on Saturday 17 July from 12:00 to 15:00 UTC. The rules are available via e-mail from Geoff, ZS6GRL, email glevey@gmail.com.

The Boland ARC 40 metre Sprint takes place on Sunday 25 July from 13:00 to 16:00 UTC. You can participate as a fixed or mobile station (Mobile includes field stations and portable stations). The exchange is your call sign, a RS report and the year in which you were licensed.

The fourth SARL 80 m Club Contest is on the air on Wednesday evening 28 July from 17:30 to 18:30 UTC. This is a phone contest and the exchange is a RS report and a consecutive serial number starting at 001. Clubs are asked to encourage their members to participate.

The complete rules for the Boland 40 metre Sprint and the Club Contest can be found in the 2010 SARL Contest Manual.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 086 is rapidly fading away. There is a good possibility that a big sunspot may soon rotate within view. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the afternoons till sunset. During sunrise and sunset it will be good towards Europa. contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible on 40 m after sunset. Contacts with Brazil and South America are challenging.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Local conditions are going to be good during the day time on 40 m. With the change of season 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in noise levels 80 m is best for the shorter distances and also during the early mornings and late afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 July - Last date to submit mane for CubeSat project; 17 July - Winter QRP Contest 14:00 to 17:00 CAT; 18 July - Intechnet at 19:30 on VHF-/UHF- and microwave matters; 23 - 24 July - Preparation and launch of the HABEX balloon project; 24 July - RTA symposium in Cape Town; 25 July - Boland ARC 40 m Sprint 13:00-16:00 UTC; 28 July -SARL4th 80 m Club Contest 17:30-18:30 UTC; 2 August - Closing date for PIC course in Pretoria on 14 August; 2-7 August - National Science Week at Sci Bono and ZS6SCI on the air from 09:00 till 14:00 CAT; 12 - 14 August - International EME Conference, Dallas, Texas.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 11th July 2010

DX Century Club (DXCC)

The DXCC award, issued by the ARRL, is one of the most sought-after awards for amateur radio activity. The award is available to radio amateurs who can confirm contacts with at least 100 entities. Endorsements are available for individual bands and modes.

There is plenty of interest in this award in EI, with 50 EI amateurs currently participating in the DXCC programme. Have a look at www.irts.ie/dxcc to see the current standing of the EI call signs in the DXCC listings.

Note in particular some remarkable jumps in the rankings over the past month!

Aren News

ComReg has issued a new set of callsigns for use by the Amateur Radio Emergency Network. The callsigns are available for use during training and emergency nets as directed by the National Coordinator. The three callsigns are EI0AC, EI0EC, and EI0NC and supersede any callsigns issued in the past.

Limerick Radio Club

Limerick Radio Club's 70cm repeater has been taken off site for updating & maintenance and it is hoped to have it back on air soon

---

Increased Power for Contests

The Society is continuing to pursue with ComReg the question of securing increased power for the duration of contests on a list of international HF and VHF contests still to be finalised. In order to take this matter further, ComReg wish to have submitted a list of licensed amateurs who would be interested in getting permission to operate with increased power for the contests concerned. Anyone who wishes to have their name included on this list should e mail the contest manager Thos Caffrey EI2JD at contestmanager /at/ irts.ie or to

thoscaffrey /at/ hotmail.com

Major Castles on the Air activation in Northern Ireland

On Friday 16th July 2010 callsign GN4KPT/P will be active from Stormont Castle and Parliament Buildings the home of the NI Assembly in Belfast.

Bobby MI0RYL will be activating this for Cashota-NI and hopes to use as many of the hf bands as propagation allows. A special QSL card will be sent to all contacts made on the day.

The station should be up on air by 10am till evening, with the castle activation number GI022 and WAB No J37 Information can be found at www.Cashota-NI.org or by emailing lamph121 /at/ o2.co.uk.

WAI Squares Activation

Peter EI4GZB Declan EI9HQ will be out activating Squares on the 18th July

Planned squares to be worked are Oscar 33 34 35 36 County Dublin. All squares will be activated /MM from the boat it is planned that the above squares will be activated both times during the day, on the outward and return journeys.

Bands to be used will be 20m 40m & 80m 14.268 7.068 & 3.680/760KHz SSB only + - QRM.

EJ1DD QRV from Clare Island for IOTA Contest

Members of the Dalkey Island Contest Group are again travelling to Clare Island this year for the IOTA Contest which is scheduled for the weekend of 24-25 July. The callsign will be EJ1DD and the operators are Paul EI2CA, Peter EI7CC, Sean EI7CD, Seamus EI8BP, Ger EI8CC and Aiden EI8CE.

QSL Manager is EI7CC. For the IOTA Award the reference Number is EU-121 and for the Lighthouse enthusiasts the WLOTA reference is 1935.

There may be some activity by individual team members either side of the contest using their own calls with the EJ prefix. All contacts will be very welcome Whether you are a contester or not.

SEARG Visit to EI0MAR Museum

Members of South Eastern Amateur Radio Group will visit the Radio Museum at Howth Martello Tower on Saturday the 17th of July. If anyone would like to join us, please drop a line to Francis EI5GOB at "ei5gob at gmail dot com". Francis can also be contacted on his mobile at 087-7709388

Please note, this is open to non-members. For further information, visit www.searg.com

---

Bush valley Amateur Radio Club special event

Bush valley Amateur Radio Club will be on the air on July 24th from its home village of Dervock in County Antrim, Northern Ireland.

They will be running a Special Event Station from the Village Fun Day, commemorating the birth of Kennedy Kane McArthur, a son of the village, who immigrated to South Africa, competed in the Olympics of 1912 at Stockholm, and won the marathon.

The club will be using the special event callsign GB0KKM for the day. A special QSL card will beavailable.

OSCAR News archive CD

OSCAR News is the official journal of the Amateur Radio satellite organization AMSAT-UK, all 47 issues published from 2000-2009 are now available on CD.

Containing more than 2000 pages of information about amateur satellites ranging from homebrew electronics projects to scientific papers, this archive offers an intriguing insight into the development of amateur radio satellites during a fast moving decade.

More details can be found on the Amsat UK website, including a link for purchasing the CD

AMSAT-UK http://www.uk.amsat.org/

FUNcube Frequencies Announced

The AMSAT-UK FUNcube CubeSat project is intended for launch into a Low Earth Orbit (LEO). In addition to the satellite, the project includes the development of simple receivers and display software for use in schools.

FUNcube is designed to carry a 70cm to 2m linear transponder for SSB/CW communications along with a beacon carrying telemetry and data for educational demonstrations from space. It is expected to be completed by Autumn 2010. A submission for frequencies was made to the IARU Amateur Satellite Frequency Coordination panel who has announced these coordinated frequencies for FUNcube.

Inverting linear transponder: Uplink 435.080 - 435.060 MHz Downlink 145.960 - 145.980 MHz Beacon: 145.955 MHzCW and BPSK

Further information on this exciting UK Amateur satellite project can be found on the FUNcube website.

FUNcube http://www.funcube.org.uk/

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

Rallies

For further details on Rallies please see www.irts.ie/rallies

Ohio/Penn DX Bulletin No. 967
The Ohio/Penn DX PacketCluster
DX Bulletin No. 967
BID: $OPDX.967
July 12, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W1ASB, KH2AR/W4, NG3K & ADXO, N4AA & QRZ DX, K5YY, K7CWQ, K8YSE, W8GEX (60m News), ND9M/VQ9JC, W0SD, 9A2JK, AT International, CT1EHX, DL7MAE & The DX News Letter, DX World.Net, F5NQL, F6AJA & Les Nouvelles DX, HP1AC, HS0ZCW, I1JQJ/IK1ADH & 425 DX News, IT9EJW, LA4FPA, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA0U, TA1HZ, VE3LYC, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VK3PC for the following DX information.

*** SPECIAL NOTE FROM EDITOR: This week's bulletin was very difficult to put together since I had to do it remotely from an EZ-Chair in my living room. Operation on my knee on Thursday was worse than expected. I am currently wearing an immobilizer on my right leg and "trying" my best to move around on crutches without putting weight on the right leg. NOT EASY. Hopefully, the immobilizer will be removed late Wednesday.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-July, through Sunday, 11th-July there were 207 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S0, S5, SM, SP, ST, SU, SV, SV5, SV9, TA, TF, TG, TI, TK, TL, TN, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V5, V8, VE, VK, VK9N, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B50, CYPRUS. Alan, 5B4AHJ, will celebrate his 50th anniversary as a licensed radio amateur on October 25th. To celebrate, Alan will be active as 5B50J between October 25th, for one year until October 25th, 2011. Activity will be on CW and SSB. QSL via 5B4AHJ and LoTW.

5R, MADAGASCAR. Franck, F4DBJ, will once again be active as 5R8HT from Ivato between September 5th and November 28th. Activity will be on 80/40 meters (using a W3DZZ antenna) and on 20/15/10 meters using a vertical antenna and only using 100 watts. QSL via his home callsign.

9A10, CROATIA. Look for special event station 9A10P (Nine Alpha ONE ZERO Papa) to be active through the end of the year to celebrate the city of Djurdjevac. A special QSL will be issued, and all of the QSOs will be confirmed automatically via the Bureau.

9H, MALTA. Operators Olaf/DL4HG and Holger/DL5XAT will be active from Gozo Island (EU-023) between November 23-30th. They plan to be active as 9H3TX during the CQWW DX CW Contest (November 27-28th) as a Multi-2 entry. They will be using only 100 watts and vertical antennas. QSL via DL5XAT.

9Q, DEMOCRATIC REPUBLIC OF CONGO (Special Event). If you missed working Patrick, ON4HIL, as 9Q50ON this past week, don't worry. Patrick will help the locals in Kinshasa to get their club station on the air to activate and assist them in making their first QSOs as 9Q50AR. This is another special event callsign to celebrate the 50th anniversary of the independence of the Democratic Republic Congo. This callsign will be aired by different local operators until the end of 2010. It is suggested to PLEASE be patient with these operators as some may not be skilled enough to handle huge pile ups. A QSL Manager is expected to be announced soon.

C5, THE GAMBIA. Members of the Czech and Slovak OM0C Contest Crew have announced another DXpedition to The Gambia to take place between November 18th and December 1st. They plan to renew the callsigns from their previous DXpedition, C50C or C52C used in The Gambia 2007, the greatest Slovak expedition of its kind ever. The special callsign C5A will be reserved for the CQWW DX CW Contest. The team members of The Gambia 2010 DXpedition are: Rich OK8WW/OM2TW, Jiri/OK1RI, Joe/OM5AW, Norbert/OM6NM, Roman/OM2RA, Jiri/OK1DO, Lada/OK1DIX, Petr/OK1FFU and Vlada/OK1NY. For more details and updates, visit their Web at: http://www.om0c.com/?Gambia_2010_-_C5A

CS29, PORTUGAL (Special Event). Look for special event station, CS29MR, to be on the air between July 12-18th, to celebrate the 29th International Motorcycle Concentration Faro. Activity will be on 80/40/30/20/17/15/12/10/6 meters using CW, SSB and RTTY. Operators mentioned are: Jose/CT1EHX, Joao/CT1FNT, Toze/CT1GFK, Goncalo/CT1GPQ, Miguel/CT1IUA, Rui/CT2IHP, Carlos/CT2HTN and Pedro/CT2JMW. QSL via CT1EHX. More information on QRZ.com.

DU, PHILIPPINES (Update). Gerard, F2JD, who is back to Manilla for the next 5 months or so, was signing DU1/G0SHN, but has renewed his licence and is now signing DU1/F2JD. He plans to be active on all bands and modes. He will also try to activate some of the IOTA islands while there. QSL via F6AJA. The log will be available online at: http://lesnouvellesdx.fr/voirlogs.php

DX0, SPRATLY ISLANDS (Update). Jim Linton/VK3PC, DX0DX Public Affairs, reported to OPDX on July 9th: "DX0DX DXpedition 2011 Spratly Islands - Update report 10 July 2010 - (edited) The Team headed by Chris Dimitrijevic, VK3FY, continues to work towards completing a range of matters mainly related to the logistics that go with such a large and prolonged DXpedition on a remote island.
A multi-national group of up to 30 amateur radio operators from eleven countries will reach Thitu Island in the South China Sea by boat in three dedicated teams to put DX0DX on air January 6-24th, 2011.
In the past week with a change in local government leadership on the island, Chris, VK3FY, reports it has been re-assuring that the level of support and encouragement from officials remains strong.
The appointed DX0DX QSL Manager is Bob Schenck, N2OO, who has a very good track record in handling the QSLing for more than 100 DXpeditions.
In early online polling on the DX0DX website www.dx0dx.net of the DX community on the mode that DX0DX is wanted was fairly evenly divided between SSB (37%), CW (35%) and RTTY (28%), and there's an even spread of band preference 160m to 10m.
So far the VHF & UHF bands rate poorly, but undoubtedly when DX0DX has propagation it will be in great demand. The chosen HF, VHF & UHF frequencies appear on the DXpedition website. For those interested in 6m, a propagation beacon will run on 50.090MHz when the band is closed.
With six months to go before DX0DX gets on air, Chris, VK3FY, reports that steady progress is being made to seek further sponsorship and funding support. It is hoped more announcements will be made in coming months.
To date the corporate sponsors are ICOM America, SteppIR, Spiderbeam, WX0B Array Solutions, Ham Radio Outlet, and Heil Sound. It is hoped to be able make more announcements in coming months.
The DX0DX Team acknowledges the financial support already received from individual radio amateurs Brad/WA6JJB, Paul/N6PSE, Marc/DO4DXA, Maurice/ N4LZ, Vic/W4VIC, Ken/N5TY, Allan/VK2CA, Paul/VK2HV, Scotty/KG9Z and Clay/K7HC.
Support has also been given by the IARU Region 3 member society Philippine Amateur Radio Association (PARA), DXWORLD.NET, and ClubLog.ORG."

HS0, THAILAND. Look for HS0AC to be on 6 meters for the CQ World Wide VHF Contest (July 17-18th).

I3/I5, ITALY. Alain, F5LMJ, will be I5/F5LMJ from Oscane between July 17-24th and I3/F5LMJ from Venetia until July 31st. He will be mostly on CW and the Digital modes during his evenings or early mornings operating on 80-10 meters. QSL via his home callsign or LoTW.

IOTA NEWS.....
AS-139. You only have a few more days to work Xizhu, BH7NLD, as BH7NLD/7 from Weizhou Island, in the Guangxi Autonomous Region Group. He is expected to be there until July 13th. Activity takes place between 0200-1400z on the following suggested frequencies: 7055, 14260, 21200, 28460, 29600 (FM) and 50110 kHz. He will run not more than 10 watts using an IC-703 Transceiver and a 10 meter GP antenna. QSL direct to his home callsign with SASE or IRC. Visit his Web page at: http://bh7nld.snailtrail.org

AS-159. Ozer, TA2RC, will be active as TC0T from Kefken Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Mixed/24HR entry. He will use a full size tribander and low band verticals. QSL via TA2RC. If any support, category may be Multi-Op/High-Power with a team callsign.

EU-048. Jean Marc, F5SGI, will be active as F5SGI/p from Belle Ile en Mer between July 17-27th. Activity will be mainly CW and also include the RSGB IOTA Contest (July 24-25th). QSL via his home callsign, direct or by the Bureau.

EU-056. Erling, LA4FPA, will be active from Vigra Island between July 18th and August 2nd. Activity will be on HF (20/10 meters) and 6 meters. He will also be active on the birds (FO-29, AO-51, HO-68, and possibly VO-52). Grid Locators are JP22 and JP32. He will try to be on as many passes as possible. QSL via his callsign.

EU-064. Members of the Provins ARC (F6KOP) will once again be active as TM7C from Noirmoutier Island during the next RSGB IOTA Contest (July 24-25th) as a Multi-Op/Mixed/24H/Island/Low-Power entry. Operators mentioned are: Bernard/F9IE, Frank/F4AJQ, Terry/F4TTR, Gaston/F8IJ, Sam/F6AML, John/F5VHQ, Bruno/F5AGB and Maurice/F5NQL. The TM7C team hopes to be World Champion for the 5th time. QSL Manager is Flo, F5CWU.

EU-068. Operators Nikola/YT2WW, Michel/F1SRC, Jean-Francois/F6DZD, Remi/F0GHK, Alain/SWL and Bastien/F4EYQ will be active as TM5KD from Sein Island between July 22-27th. Activity will include the RSGB IOTA Contest (July 24-25th). Look for them to have operations on CW, PSK31 and VHF activities outside of the contest. QSL via F5KKD. For more details and updates, go to: http://iota2010.crxcluster.com

EU-121. Members of the Galway Radio Experimenters Club (EI4GRC) and the Shannon Basin Radio Club (EI2SBC) will be on the air from Inishbofin Island for the RSGB IOTA Contest using the callsign of EJ3Z. Inishbofin is a small island 9KM off the west coast (53.37 North - 10.14 West) Ireland. On the days leading up to the contest, members will be active using their own callsigns on HF and VHF. Also watch out for EJ4GRC. Inishbofin's Grid Square is IO43vo. Operators mentioned are: EI9HX, EI4CF, EI6GGB, EI2EO, EI3HA, EI6IB, EI8IH, EI7JK, EI5GT, EI3ER, EI7DMB, EI4AL

and EI2II. More information on the island is available on:
http://www.inishbofin.com

EU-146. Operators Peter/ON4TO, Ronny/ON6CQ, Noel/ON4APU and Gianni/ON3TO
will be active as PA/OQ4T from Schouwen Duiveland during the
RSGB IOTA Contest (July 24-25th). QSL via LoTW or by the Bureau
via ON4TO.

EU-166. Operators Afio/IT9EJW, Giovanni/IT9GAC, Francesco/IT9JQY,
Andrea/IT9RKR, Sebastiano/IT9RYJ, Eugenio/IT9VKY, Eugenio/
IW9BCW, Davide/IW9GUR, Angelo/IW9HLM and Andrea/IW9HQP will
will be active as IT9EJW/P from Lachea Island (IIA CT-002)
during the RSGB IOTA Contest (July 24-25th). QSL via IT9EJW.
For more detailed information, go to:
http://www.it9ejw.it/lachea

NA-014. Operators Kevin/VE9MY and Linda/VE9GLF will be active from
Barnes Island during the RSGB IOTA Contest (July 24-25th)
as a Multi-Op entry. This is a new CISA. QSL via their home
callsign.

NA-083. Operators Eric/WG3J, Jeff/N3QO, Harry/K3HVC, Will/KD3FA,
Nicholas/N3NAH and Tom/W4NGW will be active as K3I from
Tangier Island (grid FM-27), VA., in the Chesapeake Bay
during the RSGB IOTA Contest (July 24-25th) as a Multi-Op
entry. QSL via N3QO, LoTW and eQSL.

NA-136. Adam, W1ASB, will be active as W1ASB/P from Shea Island during
the RSGB IOTA Contest (July 24-25th). Activity will be on 80-10
meters. Look for more possible information on QRZ.com.

NA-139. Stan, N2US, will be active as N2US/3 from Assateague Island
during the RSGB IOTA Contest (July 24-25th) as a Single-Op/
12 HR/Mixed/Low-Power entry. Operations will take place from
the Maryland side/no Lighthouse. QSL via LoTW, direct or by
the Bureau.

NA-143. Leslie, AD5WB, will active from Galveston Island in the Texas
State East Group during the RSGB IOTA Contest (July 24-25th)
as a Single-Op/All-Band/Phone/12HR/Fixed-Station/High-Power
entry. QSL via LoTW, EQSL or direct.

NA-208. After his eventful trip to East Pen Island (NA-231), Cezar,
VE3LYC, will travel again to the Canadian Arctic, this time
attempting to activate the Nunavut (Kitikmeot Region) East
IOTA Group, NA-208 (CQ Zone 2). This group has only been on
the air once, 15 years ago, and is on the Most Wanted List,
in demand by 89% of the chasers. For this project Cezar retained
the services of local guides and applied for VY0X callsign,
aiming to operate for up to 3 days, between approximately
August 11-14th. The island he will operate from will be decided
on site, to ensure unobstructed propagation to various regions
around the world. Cezar reminds everyone that weather conditions

and safety concerns can affect the outcome of this project.
At this time he is looking for donors who understand and
appreciate the nature of his attempt and wish to join in the
effort. Support is welcome via PayPal at: tiberius.trifu@gmail.com

OC-066. Alain, FO5RH, is expected to once again be active from Tatakoto
Island, Tuamotu Archipelago, French Polynesia, starting July
11th. He will operate as TX5TES and stay on the island until
July 25th. This is to coincide with a total solar eclipse which
will be best seen over the Pacific that day. QSL via F6CTL.

K7, UNITED STATES (Satellite Grids to be Activated!). Loren, K7CWQ, will
be camping at Cultus Lake, Oregon, between July 10-16th and will be
activating grid square CN93. He states that he will try to work as many
passes as he can on AO-51, AO-27, SO-50, SO-67 and HO-68. Please advise
him via E-mail if you need a card at: lorenrasmussen@msn.com

KH6BZF PROPAGATION FORECAST/REPORT (For July 12-18th)....
Jul 12 AN-HN SOLAR REFERENCE KEYS
Jul 13 HN-AN --------------------
Jul 14 AN BN - Below Normal
Jul 15 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 16 AN LN - Low Normal
Jul 17 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 18 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

PACIFIC TOUR (Correction/Update). Bodo, DL3OCH, will be in the Pacific
from the following location and will be using his stateside callsign.
Bodo informs OPDX that his activity will be on 80-6 meters (depending
on conditions), mostly on CW and possibly some RTTY and PSK31, using an
IC-7000 with an amp and beam antennas. His tentative schedule is as
follows: August 1-7th - Guam; callsign KH2/KT3Q
August 7-14th - Marianas Island; callsign KH0/KT3Q
QSLs for this activity are only via DL3OCH or HB9EHJ. Do not send QSLs to
his U.S. address. It might take a year until he receives them. Online logs
(updated daily) will be available at: http://www.clublog.org
QSOs will be uploaded on LoTW in December.

PJ4, NETHERLANDS ANTILLES (Press Release). "The W7XU team of Ed/W0SD,
Doc/W7XU, and XYLs Edith/W0OE and Holly/N0QJM and Johan/ON4IQ are headed
for Bonaire (SA-006 and WLOTA L1279) for the "2011" 6 meter sporadic E
season DXpedition. It is expected that this will be a new DXCC entity by
then. The operation is scheduled from mid-June to July 5th, 2011. Most
of the plans have already been completed."

QSL INFO AND NEWS.....
ZX8W (SA-060) logs are now available online at:
http://www.clublog.org/logsearch/ZX8W

QSLS VIA LoTW: 3D2KJ, F5CQ, FO8RZ, GJ4FDM, IR4M, IT9MUO, JT5DX, KG6DX, KH2L, KP2M, LP2F, NP2KW, P49Y, RA0FU, TF3PPN, W3LPL, YL5T and YN2GY

QSLS RECEIVED VIA MAIL: 3W6C, 4Z4UR, 5B/UT0U, 6W/HA0NAR, 6Y3Z, A92GR, CR1Z, E21YDP, EW2MA, JA6ZPR, JY4CI, K5S, LZ9W, OA4TT, S57DX, SG3U, TX3A, V84PMB, V85/JJ8DEN, VQ9RD and YI9PSE

QSLS RECEIVED VIA THE BUREAU: 5K4T, 5K8T, FO/DJ7RJ, TO8YY, V31YN/P and YW8AJ

TC90, TURKEY (Special Key). A group of Turkish radio amateurs from TRAC Manisa Branch will be working as TC90AA to commemorate the 90th anniversary of "Anadolu Ajansi". Operations will take place during the month of July, 2010. The "Anadolu Agency" (AA)(Turkish: Anadolu Ajansi) is the Turkish state news agency commissioned with producing news releases pertaining to the country. The agency was set up on April 6, 1920, by Mustafa Kemal Ataturk, the founder of the Turkish Republic during the Turkish War of Independence, and is the biggest news agency of Turkey. During July 2010, TRAC Manisa Branch will be operating on all HF bands using CW, SSB and BPSK31 modes during the celebration. The main operators will be: Urcun/TA0U (SSB), Tevfik/TA1HZ (PSK), Serkan/TA2JN (SSB), Mehmet/TA3EV (SSB/PSK), Nuri/TA3X (CW), Bahattin/TB3BO, Hamdi/TB3GA and Turgay/TB3IT. QSL via the Bureau or to TA3KO Manisa Branch. More details are available on QRZ.com.

TI, COSTA RICA (Youth DX Adventure 2010). Operators from Ohio, Kansas and Colorado will be heading here between July 15-19th, as a team of youth operators and guardians to be on the air. This DX Adventure was created to give young hams an opportunity to experience HF-DXing from the other side of a pileup, learning logging, good operating skills, propagation, and a great "what I did this summer" story when they return to middle and high school this fall. Please listen for, work, cluster spot, and support this effort to mentor our youth in amateur radio operating/DX'ing. The team will be on all bands, 160-6 meters and most modes (CW, SSB, RTTY and PSK). All operators will be signing TI5/homecall. They will be attempting to operate 2 stations at all times. Please QSL via their home callsign w/SASE or SAE if overseas. eQSL and LoTW will be at the discretion of the individual operators as not all use these services. This and future youth team groups depend on your club, organization, and individual donations to make this great program an annual event. For more details and info on the operators, visit: http://www.qsl.net/n6jrl

TK, CORSICA. Patrice/F5RBB and Mireille F0FRL will be active as TK/homecall between September 12-25th. Patrice will be active on 80-10 meters using SSB and the Digital modes, while Mireille will be on SSB on 2 meters.

V3, BELIZE (Reminder/Update). Operators San/K5YY (V31YY), Bill/W5SJ (V31SJ) and Bob/W5UQ (V31UQ) will be active from Placencia (Grid EK56) in south Belize between July 12-19th. Activity will be on the HF bands but also focused on the CQ VHF Contest. They plan to look for EU and AS during the

week of operation, but also for USA stations that might need a new band country. San (V31YY) informs OPDX that he will concentrate on 60m at the top of the hour after sunset each night and hopes to mainly listen for EU and AS on 17m and 30m. Bill (V31SJ) will concentrate on 6m during the CQ VHF Contest and along with Bob, (V31UQ) will operate and follow propagation paths. QSL V31YY via K5YY at the QRZ.com address. QSL V31UQ and V31SJ via W5JAY. See QRZ.com Web site for further information under each callsign.

VA3, CANADA (Special Event). Once again the members of the Georgian Bay Amateur Radio Club (GBARC) will activate special event station VA3FPI from Flower Pot Island between July 31st and August 2nd. Reference numbers are: Canadian Island ON005, Light House CAN181, Grid Square EN95 and WLH 0763. Activity is usually on 80/40/20 meters using CW and SSB. QSL via address on QRZ.com.

VQ90, CHAGOS ISLANDS (Special Prefix). Jim, ND9M/VQ9JC, from Diego Garcia (AF-006) informs OPDX that "I've received a temporary license for what's turning into an annual special prefix operation. I'll be signing VQ90JC (nine zero) from July 10-25th, and will participate in both the IARU Radiosport and IOTA Contests, and will be on all bands (if open) including the satellites. This will be my fourth special prefix callsign. All operation will have to fall outside of my normal work hours and will typically be 1200-1730z, although I might be able to squeeze in some extra time outside those hours." QSL via his home callsign, ND9M.

ZD8, ASCENSION ISLAND. Marko, N5ZO, will be active as ZD8O during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via OH0XX.

DXNL 1684 - Jul 14, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

DU - PHILIPPINES
Like announced in DXNL 1680 Gerard,F2JD, will stay in Manila until
December. He had to renew his licence so he didn't show up as DU1/G0SHN
but is now active as DU1/F2JD. QSLs via F6AJA, direct or via bureau.

FO - FRENCH POLYNESIA, OC-066
Alain,FO5RH, is using the call TX5TES from Jul 11-25 (including the
IOTA Contest). TES stands for "Totale Eclipse Solaire" which took place
in the South Pacific on Jul 11. The QTH of Alain is Tatakoto (OC-066).
QSLs via F6CTL.

GU - GUERNSEY, EU-114
Frank,MU/PA4N, is working from Guernsey (EU-114) mostly in CW but also
in RTTY and SSB on 160m-6m till Jul 19. QSL via bureau to his homecall.

IS0 - SARDINIA, EU-024
Gabriel,EA3AKA, John,EA3GHZ, Enrique,EA5EOR, and Dina,EC5BME, are going
to activate IS0E from Sardinia (EU-024) with two stations in SSB and CW
on 80m-10m from Jul 16-24. QSLs via bureau or direct to EA5KA.
More details can be found on: http://is0e.dxciting.com

P4 - ARUBA, SA-036
Jim,P4/PG4DX, will work on all bands from Aruba (SA-036, WLOTA LH-0033)
between Jul 18 and Aug 6. You will find Jim near the IOTA frequencies.
QSL via bureau or direct to his homecall.

S7 - SEYCHELLES, AF-024
Marq,CT1BWW, will show up as S79BWW from the Inner Islands (AF-024,
World Flora Fauna, WFF-004) from Jul 17-31. Activities will take place
in CW, SSB and RTTY on 80m-10m (split!). His preferred frequencies are:
CW - 3507/3527, 7050/7055, 10117/10119, 14006/14054, 18084,
21021/21054, 24897, 28007/28027 kHz
SSB - 7060 (QSX up 7200 for NA), 14145/14260, 18140, 21260, 28477 kHz

RTTY - 10137, 14080, 21080, 24977 kHz
QSLs via bureau or direct to CT1BWW.
Find more information online at: http://www.ct1bww.com/s79bww
He will be accompanied by Carlos,EA2RC, who will sign S79SAL.
QSLs for Carlos also via EA bureau or direct to EA2RC.
His homepage can be found at: http://www.gdgdxc.net/s79sal

TF - ICELAND, EU-071
Three members of the Azores IOTA contest team together with TF8GX will run the IOTA contest 2010 from Vestmannaeyjar Island (EU-071) located southwest of Iceland. Franz,TF/DF6QV, his XYL Ulla, Juergen,TF/DJ2VO, and Lutz,TF/DL9DAN, with Sabine,TF/DO4YSN, will activate the island before and after the contest. They will work with two stations in CW, SSB and digital modes on 10m-160m from Jul 18-27. During the contest they will sign TF7X together with Gulli,TF8GX.
All QSL routes can be found at TF7X on QRZ.com.
More information is available at http://www.to-mk.com/neu

TI - COSTA RICA
"Youth DX Adventure 2010 Costa Rica" is the name of a project created to give young hams an opportunity to experience DXing. A team of young operators and experienced OPs will be active with two stations signing TI5/homecall in CW, SSB, RTTY and PSK on 160m-6m from Jul 15-19. If this project is successful it may be repeated in the future. Following young operators will take part: Mitchell,KDF8JRS (14 years), Duncan,KU0DM (no age), YL Christi,KD8DGL (15 years), YL Andrea,KD8FNY (no age), and Rachel,KD8FOB (no age). Their trainers are Kevin,W8KJ, Mike,KC8GLE, Wynn,W6CDR, Brian,KC0BS, and Robert,KD8FWQ.
QSL cards should be sent to their homecalls, some OPs will confirm also via LoTW or eQSL. Listen for the OP's instructions!
Their website is: http://www.qsl.net/n6jrl

XT - BURKINA FASO
HB9CVC, HB9HLV and HB9EOU of the "VHF DX GANG" (http://www.hb9eme.ch) plan to make 20.000 QSOs as XT2EME in SSB, CW and PSK on 80/40/20/17/15/12/10/6m from Jul 15 and Aug 2. The QSL manager is HB9EOU.
See also: http://xt2eme.cq-dx.org

3A - MONACO
Ennio,3A/IW1RBI, is working "holiday style" in SSB and digital modes on several bands from Jul 12-25. QSLs direct or via bureau to IW1RBI.

5V - TOGO
Franco,I1FQH, will sign 5V7DX from Kpalime Village in central Togo from Jul 15-30. He works with a Spiderbeam on 20-10m and a homebrew vertical on 40m and 30m. QSL via bureau or direct or LoTW to his homecall.

FRANCE, SPECIAL EVENT STATIONS
TM5RDL is active until Jul 18. He does not only celebrate the French national holiday (Jul 14) but also Claude-Joseph Rouget de Lisle, the author of the French national hymn. The special QSLs are donated by the city of Lons-le-Saunier, where Rouget de Lisle was born 250 years ago.

QSL via F5SJB.

TM8OU is celebrating the 50th anniversary of the Radio Club d'Albert
from Jul 16-30. QSL via F5KOU.

PORTUGAL, SPECIAL EVENT STATION
CS29MR is working in SSB, CW and RTTY on 80m-6m from Faro during the
"29th International Motorcycle Rally" from Jul 12-18. QSL via CT1EHX.

TAIWAN, SPECIAL EVENT STATIONS
Taiwan is celebrating its 100th anniversary. For this event there are
two special event stations on the air: BP100 (QSL via BX4AQ) from
Jul 10,2010, until Dec 31,2011, and BV100 (QSL via BV2KI) from Oct 10
until Dec 31,2011. More information about the stations and the special
award can be found at: http://www.bv100.tw

TURKEY, SPECIAL EVENT STATION
TC90AA will be active throughout the month of July. This callsign
stands for 90 years "Anadolu Ajansi", the Turkish news agency.
QSL via bureau or direct to TA3KO.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The special event station VE7TUB will be QRV from the World Champion-
ship Bathtub Race taking place in Canada on Jul 24/25.

The ARES E-Letter

Published by the American Radio Relay League
**********************************************

July 14, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY
```

Great news this month for our Flagler County ARES® program: East Coast District Emergency Coordinator Mike Lee, WB6RTH, announced that Robbie Creal, KG4HUF, has been appointed as the new Emergency Coordinator, filling a vacancy of almost a year after the sudden departure of the former office holder.

```
Creal is the perfect choice, coming to the position with a lifelong
career in emergency services, having recently retired as the Chief of
the Flagler Beach Fire Department. He is well known and respected by
the local amateur community and county government officials. Creal has
most recently served as the primary coordinator for Flagler SKYWARN.
```

Reconstruction and revitalization of the Flagler ARES® program will be Creal's first priority. Lee said "Given his stature and the respect that he has earned among the amateur community and Flagler County officials, I am confident that he will quickly have his team at full capacity for the current hurricane season. As District Emergency Coordinator for Flagler and Volusia counties, I encourage operators to give Robbie their full support."

```
National Multiple Sclerosis (MS) MS-150
<http://www.nationalmssociety.org/raceMap.aspx> Bike Ride Support
```

Reports on regional ARES® communications efforts in support of MS-150 bicycle rides have appeared in recent issues, and for good reason: The events are superb platforms for ARES® training and experience -- money in the bank for major disaster responses.

The MS-150 event in St. Johns, Flagler, Clay and Volusia counties here in the ARRL Northern Florida section this year will be held October 2-3, and will be using ARES® resources from the Crown and East Coast Districts. Doug Carter, N4FPS, and Phil McElrath, K5BBC, attended the coordinating committee meeting as part of our offer to bring significant ARES® resources to bear on this year's event.

Changes will be implemented this year: Ride sponsors and hosts can expect a very robust, structured, NIMS-style coordination and chain-of-command before, during and after the event. Pre-event training will include a complete dry run, as well as table-top exercises. The bike route is known and ARES® leaders will be evaluating repeater coverage (both by mobile and hand-held units) in the next few weeks. Both analog and D-STAR technologies will be employed. Temporary repeaters will be installed and tested for weeks in advance of the event.

The event will be a model for how we serve special events and disasters in the future - planning, coordination and chain-of-command in a professional-level response. The goal is to commit in excess of 40-50 operators for each of the two days of the event, recruited from the entire area. It will require a massive coordination effort, and sign-ups will be taken in the next few weeks.

==> PENNSYLVANIA OPS SWITCH FROM DRILL TO EMERGENCY MODE

Just two days before the start of Field Day, Amateur Radio operators in south central Pennsylvania were manning their positions for a regularly scheduled bi-annual exercise involving the Peach Bottom Atomic Power Station located on the Susquehanna River. The drill is required as part of the licensing process for the power plant.

"Nuclear power plants have got to do well in emergency planning as part of their licensing requirements", said Daniel Sullivan, KO1D, Eastern Pennsylvania ARES® District 5 Emergency Coordinator. "For hams to shine in that setting is more important than Field Day to show community or agency leaders within the public safety community what we can do when we apply ourselves."

Many of the Amateur Radio operators participating in the drill had been involved with previous drills and most thought they knew what to

expect. However, Mother Nature injected severe weather along with National Weather Service issued tornado and severe thunderstorm warnings. Within 15 minutes of the warnings being issued, Lancaster County ARES® EC Ron Small, WB2OOB, and Lancaster County RACES Officer Chris Bunting, K1CWB, were reporting that communications went down just before the drill began and remained out during the drill in some municipalities due to storm damage to the telecommunications infrastructure.

Amateur Radio operators who were pre-positioned to support the drill integrated SKYWARN operations into the drill's RACES net. In Drumore Township, Lancaster County, Small became the only reliable communications at the municipal EOC when commercial communications networks went down. He reported that fax and telephone were intermittent and other communications systems were not operational due to the storms.

Bunting said he heard the weather alert on the local repeater. "When I heard a tornado warning being broadcast for Southern Lancaster County, I decided that we must start a "hybrid net" and start SKYWARN operations while preparing for the Peach Bottom drill." When the first operator arrived at Lancaster County EOC, he set up net control, and began the SKYWARN net. Bunting announced that this would be a hybrid net, looking for weather reports from operators in the field. He immediately received a report of "golf ball sized" hail in the southern end of the county. This information was passed on to Randy Gockley, the Lancaster County Emergency Management Coordinator, who in turn contacted the National Weather Service. Meteorologists at the weather service indicated that there was a strong possibility of a tornado in the southern end of the county.

Acting quickly, Gockley decided to activate the emergency warning sirens in the southern part of Lancaster, to warn civilians of the impending danger. Net control immediately notified all stations that this would be occurring, and the RACES personnel at each municipal EOC notified the staff. For some EOCs, this was the only method of communication to let them know why the sirens were sounding, as there were power outages and telephony outages throughout the area. RACES operators continued to pass on vital storm information to net control until the storms had passed.

The NWS confirmed that an EF-0 tornado occurred near Hershey, home of Hershey chocolates and a large amusement park. Winds reached 80 miles per hour. Damage ranged from downed trees to roofs ripped off of several homes. The severe storm uprooted trees and knocked down power lines as it continued towards Philadelphia.

Drill Finally Starts

The Peach Bottom drill quickly started after the threat of severe weather passed; however, telecommunications and power outages were still affecting multiple EOCs. Part of Lancaster County's RACES

pre-planning involved making sure all operators have battery power/generator, radios, power supplies and antennas with them, and to be prepared to operate independently of any infrastructure in place. In this case, the pre-planning paid off, as all stations were operating regardless of the power outages at the municipal EOCs. Many locations were having problems sending or receiving faxes, phone calls, and power. RACES maintained the constant contact needed to play out the drill. Near the end of the drill, Randy Gockley, EMC Lancaster, stated that "RACES was a godsend tonight."
York County operators did not report any weather impact on their ARES®/RACES and SKYWARN operations. They did suffer severe weather and at least one fire was reported during the storms, which did impact the drill. At one EOC almost everyone left to fight fires. The EOC was then staffed by four hams. Drill observers provided good feedback on the hams' ability to adapt to the situation. Alan Frame, WB3FTD, said power went out at two local EOCs where hams were stationed.

Drill Was "Quiet"

In Fawn Township, York County, EOC staff members commented that the drill seemed quiet and slow. It was brought to their attention that most of the communication was done by the radio amateurs (who were in another room) and via fax. The telephones were not ringing off the hook. Most of the Amateur Radio communications was sent/receive via FLDIGI <http://www.w1hkj.com/Fldigi.html> using BPSK250. Jack Dellinger, N3BQB, explained "We would receive the message and cut/paste it into Notepad to print. We have also developed a program that allows text entry in the format used by York County ISC-213 format. We had 100% perfect copy on all messages. The County EOC and two local EOCs were active on digital modes."

Kudos

Pennsylvania Emergency Management Agency (PEMA) officials thanked the radio amateurs for a job well done. "The professionalism and actions of all the volunteers involved," said Chris Snyder, Acting Commonwealth Auxiliary Communications Systems Coordinator, "clearly demonstrate the value they bring as a communications resource to the emergency management community."

Henry C. Tamanini, Chief, Technological Hazards Division, of PEMA's Bureau of Strategic and Operational Plans said "Your dedication to providing valuable emergency communications was certainly proven when Mother Nature transitioned the majority of the exercise area/Emergency Planning Zone from the exercise mode of the nuclear power plant to the real-world mode."

Mike Brulo, KB3RRV, a Harrisburg area SKYWARN member and net control operator, shot video
<http://www.accuweather.com/blogs/weathermatrix/story/33092/possible-tornado-during-severe-thunderstorm-in-pennsylvania.asp>
from his car and e-mailed the following: "I was in Campbelltown, the

hardest hit area. Brett Thackara and I are thinking this was a tornado.
Be sure to watch my video and read this story." - Thanks, Bob Josuweit,
WA3PZO, Philadelphia, PA

==> ARES® DIGEST

WX4NHC at the National Hurricane Center, the VoIP Hurricane Net and the
Hurricane Watch Net activated at 8 AM on Wednesday, June 30, in
response to storm Alex. Info here
<http://www.arrl.org/news/wx4nhc-voip-weather-net-and-hurricane-watch-net-activated-for-hurricane-alex>.

Florida (Hernando County) Emcomm Classes Scheduled

The Hernando County (Florida) ARES® organization will be holding its first set of training classes at The Senior Enrichment Center of Oak Hill Hospital, 18900 Cortez Blvd (Route 50) in Brooksville, July 26, starting at 7 PM. The curriculum will consist of NTS traffic handling, making a short term Go-Kit and what is needed for longer term deployments, and new requirements for working at a shelter in Hernando County.

The class is open to all amateur operators and anyone, in or out of the area, interested in emergency communications. If needed, another session of the class will be held at a later date. Refreshments will be provided by Hernando County ARES®. Pre-register by contacting Alan McGrew, KC4MTS <kc4mts@bellsouth.net>, EC Hernando County ARES®, by e-mail or by telephone (352) 683-7264. Registration cut off is July 24.

==> TWO NEW PA EVENTS ENCOURAGE HAMS TO HONE SKILLS FOR EMCOMM OPS

A new Pennsylvania FM Sprint and a new Pennsylvania county hunter award
have been announced by the Holmesburg Amateur Radio Club (HARC) of
Philadelphia, events that will promote on-the-air activity among new
hams and emcomm operators.

The Pennsylvania FM Sprint will be held Saturday, February 26, 2011
from 7 - 11 PM. Hams will exchange a contact number and zip code on 6
meters, 2 meters, 222 MHz, and 440 MHz using FM simplex frequencies,
workhorse frequencies and mode for emcomm ops.
This is believed to be the first statewide FM Sprint in the country.
In the past few years there has been a growth of FM simplex contest
activity in Pennsylvania. According to Rich Shivers, AB3EO, Sprint
coordinator, the Sprint will give the operator the opportunity to see
how far his/her signal will travel without the use of a repeater. It
can be a learning experience and a fun, fast contest with equipment
that most hams have.

In addition HARC is now sponsoring the Pennsylvania "67" Challenge.
This county hunter certificate is open to all amateurs. Hams can use
any band or mode to make a real time contact with Pennsylvania's 67
counties. Hams may work towards the Challenge by working 20, 40, 60, or
67 counties and receive a certificate at each of the four levels.

Besides HF contacts, Bob Josuweit, WA3PZO, explains that repeaters, D-STAR, Echolink, and IRLP modes are valid contacts as long as a radio is used by both operators. HARC is encouraging all hams to get on the air. Complete rules and information on both events can be found at the Club's Web site <http://www.harcnet.org/>.

==> HAITI EARTHQUAKE DISASTER: ANYTHING GOES IN AN EMERGENCY?

The rules for the Amateur Radio Service don't say "in an emergency, anything goes." They say that in an emergency and no other services are available that Amateur Radio may be used to resolve an immediate threat to life or property. That's a big difference from opening up radios to out of service operations, etc, allowing other services to use the amateur bands. The starting point is that it is not legal under Part 97.113 to retransmit signals from other radio services on the amateur bands. So while other services may want to "plug" the amateurs into their "black boxes" for interoperability, it isn't legal to do the reverse on the amateur bands.

It is also significant to note that the US rules are very precise about when Amateur Radio can be used. Simply put, you use it to alleviate a specific life/death situation. It is not intended to be used for extended periods of time when other radio services are functioning and available again. It isn't an "overflow" service to "ease" traffic on other frequencies.

As far as what they did in Haiti -- I don't know how they reprogrammed radios for use in other services, but I do know that there were problems with some of the type of traffic passed. There were times when "routine" emergency traffic was being sent via Amateur Radio. An example was a message where a well-meaning ham got another radio service station to operate on the amateur bands without authorization because in the ham's mindset "it's an emergency." The content of the message was "supplies were running low" in a particular town. Under the circumstances, supplies were running low everywhere: the entire country was having problems.

An analogy used in this discussion has been "the boat has to be sinking, water coming over the transom, no other radios are working and you better be able to explain how you survived." A bit Draconian perhaps, but it illustrates the point that a lot of what is transmitted as "emergency" traffic may not really be such -- and the amateur has to make a reasoned decision on the message. There is a difference between "emergency" (we need an Air-Evac helicopter for a patient who is in severe trauma) and "emergency" H&W traffic (we have 20,000 people in our town who need food and water.) It is a hard lesson, but a valid one to ponder.

The bottom line is, in a true emergency the FCC regulations would permit out of band operation: Section 97.405 says "(a) No provision of these rules prevents the use by an amateur station in distress of any means at its disposal to attract attention, make known its condition and location, and obtain assistance. (b) No provision of these rules

prevents the use by a station, in the exceptional circumstances
described in paragraph (a) of this section, of any means of radio
communications at its disposal to assist a station in distress."

The Haitian government may have relaxed their rules for their specific
circumstances. The FCC would probably do so, too, in a similar
situation here, and 97.405 would allow "any means" (including the use
of our radios tweaked for other services) for mitigation of the
immediate/imminent threat. -- Dan Henderson, N1ND, Regulatory
Information Manager, ARRL

==> WEB SITE OF THE MONTH: STORMPULSE <HTTP://WWW.STORMPULSE.COM/>

With the onset of the first storm of the year, I would like to
recommend an excellent Web site for tracking purposes: StormPulse
<http://www.stormpulse.com/>. This is the best site of its kind I've
seen. Please pass this along to anyone you think would be interested.
-- John Reynolds, W4IJJ, Regional/State Communications Officer,
American Red Cross, Florida

==> AMATEUR RADIO FEATURED ON NHC'S NEW HURRICANE PREPAREDNESS WEB SITE

In April, the National Hurricane Center (NHC
<http://www.nhc.noaa.gov/>) debuted a new Web site
<http://www.weather.gov/os/hurricane/index.shtml> dedicated to
hurricane preparedness. The site explains that a lack of hurricane
awareness and preparation are common threads among all major hurricane
disasters, and that by knowing your vulnerability and what actions you
should take, you can reduce the effects of a hurricane disaster. One of
the tools that the NHC mentions on its Web site is WX4NHC
<http://www.wx4nhc.org>, the Amateur Radio station located at NHC
Headquarters in Miami, Florida. In speaking about the WX4NHC volunteer
ham radio operators, the NHC notes that "formal Amateur Radio activity
at the National Hurricane Center was initiated in 1980 and has been an
important source of real-time weather observations before, during and
after hurricane landfalls. Dedicated ham radio volunteers work at NHC
during storm events to help provide NHC meteorologists with very
important data that is used in the hurricane warning process. Please
visit www.wx4nhc.org
<http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fwww.wx4nhc.org%252F>
for a more detailed history of the WX4NHC ham radio service." WX4NHC
Assistant Coordinator Julio Ripoll, WD4R, said he hopes that this
updated NHC Web page "will help promote public awareness about Amateur
Radio and more activity from the Amateur Radio community during this
hurricane season." - ARRL Letter

==> SUMMER READING LIST SUGGESTION

>From the weekly DHS Newsletter web publication:

http://www.emergencymgmt.com/safety/Amateur-Radio-Operators-Communications.html
-- Thanks, James Burrough, N5DTT <jandpburrough@sbcglobal.net>,
Bellaire, Texas

==> LETTERS

Thanks for the tips (last issue) on being ready. It can't be emphasized enough. For years I was a Search and Rescue (SAR) Coordinator and I had to deal with some teams who arrived on site to begin their task but who were not prepared to self-sustain if needed. (At least one day's meals, cold prep instead of needing heat, and clothing to match the weather conditions are a minimum). In more than one case I had to refuse to let them participate.

Over the years, the New Mexico SAR groups have learned to claim only one field of expertise and then they are assured of being called when that expertise is needed. Each year we have a meeting at Philmont Scout Ranch in the northern part of the state where all of the teams gather and we help them get ready to be called when needed. These same people are the ones who get called in almost any emergency so this is a double benefit. - Bob Skaggs, KB5RX, New Mexico SAR

Code of Conduct

I think the ARES® Code of Conduct presented in the last issue is an excellent idea, especially in emergencies where stress can overrun our natural benevolent natures. I would like to include a modified version of the Code in my local District EMCOMM plan. -- Rik Chapman, K5RIK, District Emergency Coordinator, District 8, South Texas; District 62, RACES Radio Officer Unit 62

On Personal Preparedness

In your "Final" in the last issue, you stated: "But, I, as well as every radio amateur and citizen in the state also have an obligation for personal preparedness, and planning. Here is what I've done so far for personal readiness: stocked my closet with one case each of canned fruit, mixed vegetables, and baked beans; pasta, instant rice, and about 30 gallons of fresh drinking water." If your drinking water is in those one gallon jugs from the local supermarket, make a note to remove them from your storage area at the end of the hurricane season. Otherwise, they will burst open and ruin a lot of your personal property. They are made of very thin plastic and this happened to my next door neighbor!

Also, you stated, "I've laid in a good supply of extra batteries, flashlights, candles, cat food, cat litter, gasoline in extra tanks." Please don't tell me you are storing gasoline in your home. That is dangerous. And also, if the gasoline is stored on your property (not indoors) there is a legal limit on the amount you can store. -- Carl Zelich, AA4MI, Chuluota, Florida

==> "UNIT READINESS" IN SOUTH TEXAS

Since taking over as the Emergency Coordinator for the South Texas Section District 14 ARES® Southwest Unit in April, Dr. Chris Hasse, W5OIL, has hit the ground running. Establishing increased unit readiness as a primary goal for the Southwest Unit has necessitated

some operational and administrative reorganization, according to Hasse. He has restructured the Unit's leadership by appointing new Assistant Emergency Coordinators (AEC) and reassigning others. He has updated the Southwest Unit's Emergency Plan and Operations Manual, and has modified the training net procedures for increased efficiency.

With only three or four days notice, Hasse announced an 8 AM Saturday morning meeting at a local Park and Ride location. All of the Unit's AECs were strongly encouraged to attend, and all members of the Southwest Unit were invited. The Unit AECs were requested to discuss their preparedness for deployment, and describe their portable and mobile equipment.

The event, held on a black top parking lot on a hot and humid South Texas morning, was much more than just showing up with a hurricane preparedness "go-kit." Most of the participants did have their go-kits with their subsistence and personal items, and these were displayed and discussed. But there was more: the Southwest Unit leadership, and other members, actually set up their portable stations and demonstrated how

Assistant ECs with mobile rigs lined up at start of program. Each AEC explained their rigging and how they set-up for portable operations. (photo Kerry Mallory, AE5JY, District 14 ARES Southwest Unit Logistics AEC)

they would operate when deployed. Also, the team reviewed their mobile communications equipment and capabilities including VHF and UHF voice communications and a digital e-mail system called "Airmail," which uses radios to send e-mail in place of a traditional landline and Internet connection. There were several new ARES® members and some new hams that were able get an up close and personal look at a wide range of different portable and mobile communications set-ups.

Hasse has repeatedly emphasized the need for esprit de corps within the Unit and the need for members to become acquainted and familiar with each other, and each other's operational capabilities. This meeting brought the group closer as a functional team, and emphasized ongoing collaboration and teamwork. All present commented favorably on the meeting format. -- Del Partridge, W5QQ <Inapeartree.del@gmail.com>, South Texas District 14 ARES® South West Unit PIO

==> K1CE FOR A FINAL

On the subject of proper use of Amateur Radio as discussed above, and during the recent protracted discussion on drills versus business communications, I was reminded of something a veteran FCC staffer (who shall remain nameless, but with whom I worked closely with over many years in the 80's and '90s), repeatedly told me when these types of questions came up: "To the FCC, it looks like public safety agencies do not have enough frequencies since they turn to Amateur Radio for their communications needs, and it seems that Amateur Radio has an abundance of frequencies amateurs are happy to turn over to public safety service

use, so perhaps we should just give Amateur Radio's frequencies to the public agencies." Food for thought.

And finally, I can't tell you how happy I am that we have a new Emergency Coordinator here, after all we have been through. Congratulations to Robbie Creal, KG4HUF, and also to DEC Mike Lee, WB6RTH, our district's fantastic "Change Agent." Thanks, Mike, and Robbie!

See you next month! 73, Rick K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MOST WANTED SQUARES & DXCCs & MMMonVHF SPRINT CONTEST **

Just in advance of the active meteorscatter time of the year (with
gd EME condx and the MS showers Aquariids & Perseids) we would like
to remember that these services are only as good as YOU (as the
USER) are doing UPDATES at our different sources... As well it will
be very helpfull in the MMMonVHF and DUBUS 144 MHz Meteorscatter-
Sprint Contest 2010 (http://www.mmmonvhf.de/ctest.php) which
will be in contest period 2010: Date: 12./13. August 2010
Time period: 12.00hrs till 13.August 2010 12.00hrs UT

Please do yourself and all of us the favour and check and update
periodical the following links and tools:
eMWS (MOST WANTED SQUARES) >>> www.mmmonvhf.de/emws.php
MWDXCC (MOST WANTED DXCC) >>> www.mmmonvhf.de/dxcc.php
and if you hear or plan yourself a trip and/or any activity use:
INPUT of VHF-ACTIVITIES >>> www.mmmonvhf.de/newsuser.php
INPUT of UPDATES to NEWS >>> www.mmmonvhf.de/newsuserup.php
Thanks in the name of all USER of MMMonVHF and the team which is
always trying to pass you as soon as possible the latest News...

** NEWSLETTER of MMMonVHF **

As you noticed we attempt to distribute our Newsletter one or two
times per week. We often have Mails bounced due to SPAM Filters
and SPAM protection of providers. Special the provider of LIST.RU
and MAIL.RU will have that protection problem each 4-5 month and
we do get all mails back which use that Mail adress! So if you do
not get the ordered NEWSLETTER minimum one time a week you might
have a look for any other solution of email adress! Send us a info
via the Contact Form (http://www.mmmonvhf.de/kontact.php) and we

will keep an eye on that or change the settings...

** The 144 MHz EME NewsLetter **

Since 2003 DF2ZC publishes the 144 MHz EME NewsLetter. This is
a free service for the EME community. Bernd, DF2ZC, informed us
that the latest edition of the EME-Newsletter is now available
at: http://www.df2zc.de/newsletter - EMENL201006 [1.085 KB] 73
SOURCE: tnx to Bernd, DF2ZC to MMMonVHF

** AO, AM, AN: Spain World Cup Champion, authorized **

>From 12 to July 31, 2010 any Spanish ham may use this special
prefix, if desired, to show the world his joy and support to our
athletes, who have reached the pinnacle of football and class
effort until the last moment, showing far as we can working
together. An example for all disciplines. So DGTel today confirms
the request made by EA Digital Federation, which thus saves the
individual requests avalanche was coming. Period of use: over 12
to July 31, 2010 (inclusive) and remained unchanged mark
the rest of the amateur radio operator assigned permanently.

Trip to EN55 and EN56 de N9LR - LATEST NEWS from Larry, N9LR,
dated 2010-07-13: I am in EN56 and 55. The meteors have been good
to me. Have made 100% of my skeds including 2 meters. Will be
active between 1100Z and 1300Z on 50,260. I will be in EN55 on
7-14-10 working a sked at 1100Z on 144.130 then I will QSY to
140 and call CQ. At 1315Z I will QSY to 50.260. If you need
these grids give me a call if you hear me. FSK 441 LR 1st sequence
Still waiting for some Es on 6 and tropo on 2. Point your antennas
this direction. 73 SOURCE: Larry, N9LR via VHF-Reflector

KH0/KT3Q qrv 2m, 70cm and 23 cm from North Mariana Islands
(KH0) on EME. I am going to activate another nice DXCC via EME.
As I am currently in Taiwan, I am preparing an EME activity on
North Mariana Islands. I will be on Saipan 07.-14.August to check
out the locations and see what equipment on the island could be
already usefull. During that time you can hear me on HF bands.

KH2/KT3Q qrv on 23 cm from KH2 on EME
On the way to my KH0 activity and maybe on the way back, I will
do some QSOs from KH2 on 23cm. I wont have more time for other
bands and I think there is not really a need for that. KH2 has
been on the moon already, except on 23cm. Make sure you mark these
days on your calendar that you dont miss this activity...

Working K5QE on 2M EME in the CQ WW VHF contest
Hello to everyone in the EME community. This year, the CQ WW VHF
Contest will be held July 17th and 18th. The contest begins at
1800Z on Saturday and ends at 2100Z on Sunday. We want to work as
many EME stations on 2M as possible to increase our grid count.
Please help us with this event by working us on JT65b or CW.
The moon rises here at 1800Z Saturday, July the 17th(=1:00PM CDST
on Saturday), the same time as the contest begins. Because of that
we will have to operate EME and tropo at the same time. Please be
understanding of this problem. At 1800Z, we will start EME
operations using JT65b on a frequency of 144.142MHz and we will
take SECOND sequence. If we hear a CW caller, we will immediately
switch to CW. If you are EME capable,please try to work us off the
moon. All new multipliers gratefully appreciatated. Read all and
more in detail at: http://www.mmmonvhf.de/latest.php?id=3400
SOURCE: Marshall, K5QE direct to MMMonVHF

2M EME from EM96 in CQ WW VHF CONTEST
I wanted to let you know that *EM96* will be active again this
Saturday on EME during the CQ WW VHF CONTEST. We will be using the
Call *W4MW *. We will be on *144.146* CQing as often as we can
before EU moonset. Maybe we can pick up a few more that need *EM96*
and want a new initial with W4MW. We will not have internet access
and cannot respond to any query on the page. Please check
livecq144.com and maybe spot us on the EME pages...
SOURCE: tnx to Joe, KI4TZ direct to MMMonVHF

** DXCC: W ; Square: DM23 **

Hi Friends! I will be operating in DM23 this weekend in case
anyone needs that one. Will try some random calls as well on
260 with U or D listening indicated in the CQ. Open for skeds
KW to 8el at 20 feet or so. QTH is 97 feet BELOW sea level but
MS guys dont care about that, huh?! hihi 73
SOURCE: Dennis, K7BV via WSJT Reflector

** DXCC: W ; Square: DM68-DM67-DM77-DM78-DM87-DM88 **

I will be Rover in the CQ WW VHF Contest next weekend. Saturday I
will operate rover from Gunnison (Colo.) - through Monte Vista -
Alamosa - Walsenburg - and on into Pueblo. DM68 - DM67 - DM77 -
DM78. Sunday will be my 'normal' Sunday route: DM78 - DM77 - DM87
DM88 out in Otero County - with the greatest focus (time) on
DM87+DM88. Current plans (Hah!) are at:
http://jonz.net/W3DHJ/vhfrover_plans.html
SOURCE: Jonesy, W3DHJ via VHF-Reflector

** DXCC: W ; Square: EM84 ; Start: 2010-07-17 **

W4NH will be operating in the CQ WW VHF Contest
(http://www.mmmonvhf.de/latest.php?id=3157) next weekend from
EM84ao. We will be using our usual arrays of stacked beams and
1kw TX power on 6 and 2 meters. We will be operating WSJT (FSK441)
on both bands starting around midnight until 8 AM local time.
If you would like to make a schedule just let me know. 73
SOURCE: Jim, W4KXY via VHF Reflector

** DXCC: W ; Square: EM96 ; Start: 2010-07-17 **

W4VHF will be active for the entire CQ WW VHF Contest
(http://www.mmmonvhf.de/latest.php?id=3157) next weekend from
a 3200' mountaintop in southwestern Virginia (EM96). This will be
a Multi-Op entry, e.g. operators are K4MQG and W4VHF. The
team will be QRV on both 6M and 2M--all modes.
SOURCE: W4VHF via VHF Reflector

** DXCC: W ; Square: FM19 ; Start: 2010-07-17 **

Hello to all on thel list, Dave N3XUD, Bill N3KKM (Daves Dad) and
Brian ND3F will be operating from Brian's QTH in Mt. Airy, MD,
FM19jr we will be running multi-op for the 2010 CQ WW VHF Contest
this weekend. Call: N3IQ Location: FM19jr Equipement: 6M- KW/6 el
at 120' - 2M- KW/19 elements at 110' and 4x 5 elements LVA fixed
NE. We are taking skeds from ROVERS as well as WSJT skeds.
Send to: n3xudfm19"at"gmail.com WSJT is new for us so if any one
wants to offer some pointers off list that would be great. We look
forward to working everyone on both bands.
SOURCE: Dave, N3XUD via VHF Reflector

** DXCC: W ; Square: FN44 ; Start: 2010-07-17 **

N1JEZ will be active from FN44 next weekend during the CQ WW VHF
(http://www.mmmonvhf.de/latest.php?id=3157). I'll be joined by

N1MJD and KT1VT. Here's hoping 6 meters is open. We'll be running
the usual kW on 6 into 5 el and 650 watts or so on 2M.
Hope to work you! 73 SOURCE: Mike, N1JEZ via VHF Reflector

** BD5RV/4 willing to be qrv 6m EME **

Guys, I am in Wuxi, PM01en these days, equipped with 100w output
on 6m and a 7ele Yagi (boom length 6m), fixed elevation(=0) and
rotatable AZ. Let me know if you are interested in trying moon
bounce. SOURCE: Michael Chen, BD5RV/4 via MoonNet

** EX 6m EME DXPEDITION **

UN8GC and EX8MLT are considering another 6m EME DXpedition to MN82
(the same location as last year). The call would be EX6EME, and
they would have a kw and manually elevated 6M8GJ yagi again.
They would operate JT65A mode and are capable of working anyone
with an amplifier and a good yagi with ground gain on their moon
rise or moonset. If there is still enough interest from stations
that they missed last time, they will plan to go during the prime
EME cndx during the middle of August. Please contact Mike directly
and let him know if you are interested so they can decide if it is
worth them undertaking the risk and expense of such a DXpedition:

** EU-091 qrv in the iota contest 2010 **

Multioperator, low power, mixed. Op. : IK7JWX, IK7UXW, IW7EFC,
I7ZTM, IZ7ATN, I7PXV. Isolotto Traversa (Pedagne group) :
i.i.a. BR-009, iota EU-091, lighthouse w.a.i.l. PU-028 & a.r.lh.s.
ITA-175 & w.l.o.t.a. L-005, loc. JN80xp. Before and outside the
contest, some operator will be active on WARC, VHF, UHF, 6m..
SSB (Psk31, Rtty). 73 SOURCE: Fred, IK7JWX direct to MMMonVHF

** CS29MR DX News **

Will be active special callsign CS29MR for 29th International
Motorcycle Concentration Faro, in the period 12-18 July this year
since the enclosure of the concentration. The operators are:
CT1EHX - Jose, CT1FNT - Joao, CT1GFK - To-Zee, CT1GPQ - Goncalo,
CT1IUA - Miguel, CT2IHP - Rui, CT2HTN - Carlos, CT2JMW - Pedro,
let's be active in the bands of 6, 10, 12, 15, 17, 20, 30, 40 and
80 meters in SSB, CW and RTTY. QSL via CT1EHX. More information
on QRZ. 73 SOURCE: Miguel, CT1EHX via GOTO List

** XT2, BURKINA FASO (IK92) **

XT - Andre HB9CVC (XT2CVC), Ludo HB9EOU (XT2LW) and Pierre-Andre HB9HLV (XT2HLV) from the VHF DX Gang (HB9EME) will be active as XT2EME from Ouagadougou, Burkina Faso from 15 July to 2 August. They will operate SSB, CW and PSK on 80, 40, 20, 17, 15, 12, 10 and 6 metres. QSL via HB9EOU. Proceeds from QSLling and donations will be given to "La Maison du Coeur", the orphanage the group will operate from. Further information is available on the ex pedition's website at http://xt2eme.cq-dx.org
SOURCE: David, BRS25429 via UK Six Metre Group Announcement

** 5V7DX from Kpalime (JJ06) in Togo **

Franco, I1FQH will be active as 5V7DX from Kpalime, Togo on 15-26 July. He plans to operate SSB and CW on 40-10 metres plus 6 meter - QSL via home call, direct or bureau, and LoTW.
SOURCE: The Daily DX

** Activity from PJ4 **

The W7XU team of W0SD, W7XU,and xyl's W0OE and N0QJM and Johan ON4IQ are headed for Bonaire PJ4 for the "2011" 6 meter sporadic E season dx-pedition. It is expected this will be a new DXCC entitity by then. The operation is scheduled from mid June to July 5th 2011. Most of the planning has already been completed. Please mark these dates on your calendar and pass the word.
SOURCE: W0SD, W7XU, ON4IQ via UK Six Metre Announcement

** TF on 6m EME! **

It is with great pleasure that I welcome TF3CY to EME! Tonight he went out to the shoreline on a DXpedition with his homebuilt 10 ele YU7EF 6m yagi and worked W1JJ and me during his moonset. 6m EME cndx today were excellent - Degradation was -1.2 dB and the Kp was under 2 ;-) I will post a photo on my web page as soon as I receive one. Gud DX and VY 73, Lance
SOURCE: Lance, W7GJ via MoonNet

** IG9/IW2NEF from Lampedusa on 50 MHz **

Flavio, IW2NEF will be active as IG9/IW2NEF from Lampedusa (AF-019) on 18-30 July. He will operate holiday style on 40-6 metres and will take part in the IOTA Contest. QSL via home call, direct or bureau. SOURCE: [TNX IW2NEF] via 425 DX News #1001

** XW1B QRV from Vientiane (Grid Loc. OK17) 50 MHz **

Bruce, XW1B will be QRV from Vientiane (Grid Loc. OK17), Laos, on 9-21 July 2010. Activity will be on all bands with an emphasis on 6 meters using CW. QSL direct to E21EIC.
SOURCE: [ARRL DX News] ICPO Bulletin (08 - 16 July 2010)

** IOTA Activity from EU-056 6m and SATï¿½s **

IOTA EU-056. Erling, LA4FPA, will be active from Vigra Island between July 18th and August 2nd. Activity will be on HF (20/10 m)

and 6 meters. He will also be active on the birds (FO-29, AO-51,
HO-68, and possibly VO-52). Grid Locators are JP22 and JP32.
He will try to be on as many passes as possible. QSL via his call
sign. SOURCE: Ohio/Penn DX Bulletin #967

** TI, COSTA RICA (Youth DX Adventure 2010) **

Operators from Ohio, Kansas and Colorado will be heading here
between July 15-19th, as a team of youth operators and guardians
to be on the air. This DX Adventure was created to give young hams
an opportunity to experience HF-DXing from the other side of a
pileup, learning logging, good operating skills, propagation, and
a great "what I did this summer" story when they return to middle
and high school this fall. Please listen for, work, cluster spot,
and support this effort to mentor our youth in amateur radio
operating/DX'ing. The team will be on all bands, 160-6 meters and
most modes (CW, SSB, RTTY and PSK). All operators will be signing
TI5/homecall. They will be attempting to operate 2 stations at all
times. Please QSL via their home callsign w/SASE or SAE if overseas
eQSL and LoTW will be at the discretion of the individual operators
as not all use these services. This and future youth team groups
depend on your club, organization, and individual donations to make
this great program an annual event. For more details and info on
the operators, please do visit: http://www.qsl.net/n6jrl

+ FCC RULES THAT AMATEURS MAY PARTICIPATE IN NON-GOVERNMENT-SPONSORED
DRILLS BY EMPLOYERS

In a Report and Order (R&O
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.pdf>)
released Wednesday, July 14, the FCC stated that under new guidelines,
amateurs employed by non-governmental agencies, such as hospitals, may
participate and operate in drills sponsored by their employer.
Specifically, the FCC will now permit Amateur Radio operators "to
transmit messages, under certain limited circumstances, during either
government-sponsored or non-government sponsored emergency and disaster
preparedness drills, regardless of whether the operators are employees
of entities participating in the drill." More information will be
posted on the ARRL Web site.

==> + ARRL BOARD OF DIRECTORS HOLDS SECOND 2010 MEETING THIS WEEKEND
```

The ARRL Board of Directors will hold its 2010 Second Meeting July 16-17 in Windsor, Connecticut. Directors, Vice Directors and ARRL Board Officers will be in attendance, including three Vice Directors who will be at their first Board meeting: Rod Blocksome, K0DAS, of the Midwest Division, Kent Olson, KA0LDG, of the Dakota Division and Grant Hopper, KB7WSD, of the Northwestern Division. The Board will also be welcoming Rod Stafford, W6ROD, in his new capacity as IARU Secretary, as well as Radio Amateurs of Canada President Geoff Bawden, VE4BAW.

The meeting will be preceded on Thursday, July 15 with meetings of the Administration and Finance Committee and the Programs and Services Committee. The Administration and Finance Committee is chaired by Northwestern Division Director Jim Fenstermaker, K9JF. This committee studies, advises and makes recommendations for all administration and financial matters of the League, including recommending the annual budget to the Board, making recommendations in regard to staff management and monitoring investment of ARRL funds. The Programs and Services Committee, headed by Atlantic Division Director Bill Edgar, N3LLR, studies, advises and makes recommendations for all programs and services the League provides, including operating activities and the Field Organization.

At its January 2010 meeting, the ARRL Board of Directors decided to make the agendas of Board and Executive Committee meetings available on the ARRL Web site. The agenda for the 2010 Second Meeting is available here <http://www.arrl.org/files/media/News/July%202010%20agenda.pdf>. Per the Articles of Association <http://www.arrl.org/arrl-articles-of-association>, the ARRL Board of Directors meets twice a year, in January and July.

==> + ARRL WEST GULF DIVISION VICE DIRECTOR JOHN THOMASON, WB5SYT, RESIGNS POSITION

On Sunday, July 11, ARRL West Gulf Division Vice Director John Thomason, WB5SYT, of Edmond, Oklahoma, submitted his resignation to ARRL President Kay Craigie, N3KN. Thomason told President Craigie that by resigning, he will be able to "devote my energy to serve my family, employer and health." Craigie accepted the resignation with regret and then informed West Gulf Director Dr David Woolweaver, K5RAV. Previously the Oklahoma Section Manager, Thomason was appointed Vice Director in January 2009 <http://www.arrl.org/news/j-john-thomason-wb5syt-appointed-west-gulf-division-vice-director> after Dr Woolweaver moved up to the Director position upon the retirement of Division Director Coy Day, N5OK <http://www.arrl.org/news/coy-day-n5ok-resigns-from-arrl-board-of-directors>. The Director and Vice Director positions in the West Gulf Division -- as well as the Pacific, Rocky Mountain, Southeastern and Southwestern Divisions -- are up for election this year.

==> + FIRST HALF OF 2010 SEES UPSWING IN NEW AMATEUR RADIO LICENSEES

With more than 18,000 new Amateur Radio licenses issued in the first half of this year -- 18,270 to be exact -- 2010 is shaping up to be a banner year for Amateur Radio. So far, the number of new licenses issued by the FCC in 2010 is outpacing the January-June 2009 totals by almost 8.5 percent; at this time last year, the FCC had issued 16,844 new licenses. As of June 30, 2010, there are 694,346 licensed Amateur Radio operators in the US, an almost 1 percent rise over all of calendar year 2009. Broken down by license class at the end of June 2010, there were 16,299 Novices, 342,064 Technicians, 154,284 Generals, 60,059 Advanced and 121,640 Amateur Extra licensees . Read more here <http://www.arrl.org/news/first-half-of-2010-sees-upswing-in-new-amateur-radio-licenses>.

==> + ARRL RECOGNIZES: FRED FISH MEMORIAL AWARD #2 GOES TO TEXAS HAM

Llewellyn "Pat" Rose, W5OZI, of Junction, Texas, is the recipient of the Fred Fish Memorial Award (FFMA) #2. Thanks to a recent Grid DXpedition by Russ Dwarshius, KB8U, of Ann Arbor, Michigan, Rose earned FFMA #2; FFMA #1 was awarded posthumously to Fred Fish, W5FF, himself. The ARRL Awards Branch received and approved Rose's QSL for his last-needed grid -- CM79 in California -- on July 8, 2010.

The Fred Fish Memorial Award was created in honor of Fish, a legendary VHF+ operator who became the first amateur to work and confirm all 488 Maidenhead grid squares within the 48 contiguous United States on 6 meters. Rose is the first amateur to duplicate Fish's feat. The FFMA will be awarded to any amateur who can duplicate Fish's accomplishment. Read more here <http://www.arrl.org/news/fred-fish-memorial-award-2-goes-to-texas-ham>.

==> + HONORING THE BEST: THE ARRL'S A-1 OPERATOR CLUB

First organized in May 1933, the ARRL's A-1 Operator Club has a proud history and occupies an important place in Amateur Radio tradition. By early 1934, the roster of recognized A-1 operators had swelled to more than 400; by the end of 1938, to 1000. As of mid-2010 there are more than 6000 members of this special club! Then, as now, nominations were not made lightly; through the years, recognition as an A-1 Operator has represented an unsolicited acknowledgment of one's high standing among one's peers. Read more here <http://www.arrl.org/news/honoring-the-best-the-arrl-s-a-1-operator-club>.

==> INTERNATIONAL PERSPECTIVE: WRTC 2010 WINNERS ANNOUNCED

Broadcast live over the Internet on Monday, July 12, WRTC Judge David Sumner, K1ZZ -- on behalf of Chief Judge Mike Klokov, UA9PM, and the Judging Committee that included Nodir Tursoon-Zadeh, EY8MM, Roger Western, G3SXW, and Don Field, G3XTT -- announced the winners of the 2010 World Radiosport Team Championships (WRTC <http://www.wrtc2010.ru/>) in Moscow, Russia:

- Gold Medal (First Place): The R32F Team, consisting of Vladimir Aksenov RW1AC, and Alexey Mikhailov, RA1AIP, of Russia, with 4,098,162 points.

- Silver Medal (Second Place): The R33A Team, consisting of Tonno Vahk, ES5TV, and Toivo Hallikivi, ES2RR, from Estonia, with 4,084,889 points.
- Bronze Medal (Third Place): The R33M Team, consisting of Dan Craig, N6MJ, and Chris Hurlbut, KL9A, of the United States, with 3,942,904 points
- Best SSB score: The R33A Team. At least 35 percent of their contacts must have been on CW.
- Best CW score: The R33L Team, consisting of Yuri Onipko, VE3DZ, and Yury Romanov, VE3XB, of Canada. At least 35 percent of their contacts must have been on SSB.
- Highest multiplier: The R33A Team with 389 multipliers.

Congratulations to all 48 WRTC teams! A complete list of teams and their scores can be found here <http://www.arrl.org/attachments/view/News/53255>. According to WRTC officials, the location of the 2014 WRTC will be announced shortly; groups in two countries -- the United States and Bulgaria -- have submitted letters of interest to host the 2014 event.

==> INTERNATIONAL PERSPECTIVE: SPAIN EXTENDS AMATEUR PRIVILEGES ON 70 MHZ

The Union de Radioaficionados Espanoles -- Spain's IARU Member-Society -- announced that the Secretar&#65533;a de Estado de Telecomunicaciones y para la Sociedad de la Informaci&#65533;n (Spain's equivalent to the FCC) has extended temporary privileges on the 70 MHz band (4 meters) to hams in that country. In 2008, hams in Spain were granted 70 MHz privileges for six months. Spanish amateurs may now use 70.150-70.200 MHz, with a maximum of 10 W; the average power of emission outside the authorized band should not exceed 25 microwatts. Read more here <http://www.arrl.org/news/spain-extends-amateur-privileges-on-70-mhz>.

==> + SOLAR UPDATE

Tad "The river glistened like a path of diamonds in the Sun <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/>" Cook, K7RA, reports: Two new sunspot groups this week provided increased solar activity. The average daily sunspot numbers this week rose 2.9 points to 18.9, and the average daily solar flux was up 6.4 points to 79.2. The predicted solar flux for July 15-21 is 80 on each day. The predicted planetary A index for July 18 is 8, followed by 5 for each day through July 22. The next rise in the planetary A index is July 23-25, when it is predicted to be 18, 12 and 10. On Wednesday, July 14, there was an interruption at in the portion of the STEREO image that faces Earth <http://stereo.gsfc.nasa.gov/>, but by early Thursday morning it was restored. Due to movement of the STEREO craft, as the gap closes on the far side, a new one facing Earth will begin in January 2011. Eventually, the two spacecraft will work their way around the Sun and return to their original position by 2024. Currently, the outlook for the near term looks good for HF propagation, with low

geomagnetic indices and some moderate solar activity. Look for more information on the ARRL Web site on Friday, July 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' The Life and Adventures of Nicholas Nickleby <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/> (Chapter 6).

==> THIS WEEK ON THE RADIO

This week, the North American QSO Party (RTTY), the DMC RTTY Contest and the CQ Worldwide VHF Contest are July 17-18. The Run for the Bacon QRP Contest is July 19. Next week, there is another running of the NCCC Sprint Ladder on July 23. The RSGB Islands on the Air (IOTA) Contest is July 24-25 and the SKCC Sprint July 28. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for this online course session <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1718 - July 16 2010

Amateur Radio Newsline report number 1718 with a release date of
Friday, July 16, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. An appeals court strikes down the FCC's 2004
ban on indecent language broadcast on the airwaves, rule 97.113 changed
to allow employees in emcomm drills, the next Global Amateur Radio
Emergency Conference to take place this fall on the island of Curaco,
hams in Spain get called out in back to back emergency communications
exercises and Amateur Radio Newsline announces the 2010 Young Ham of
the Year. Find out whom it is on an expanded Amateur Radio
Newsline(tm) report number 1718 coming your way right now.

(Billboard Cart Here)

RADIO LAW: APPEALS COURT RULES FCC POLICY ON BROADCAST INDECENCY
UNCONSTITUTIONAL

A federal appeals court has struck down a Federal Communications
Commission policy on broadcast indecency saying that regulations
barring the use of fleeting expletives on radio and television
violated the First Amendment of the United States Constitution. This,
because they were vague and could inhibit free speech. Bill
Pasternak, WA6ITF, has the details:

--

In a unanimous decision delivered on Tuesday, July 12th the three-judge
Court of Appeals for the Second Circuit in New York said that the FCC's
current policy created a chilling effect. One that goes far beyond the
fleeting expletives at issue because it left broadcasters without a
reliable guide to what the commission would find offensive.

The appeals court emphasized that it was not precluding federal regulation
of broadcast standards. It specifically stated that it was not suggesting
that the FCC could not create a policy that was constitutional but that the
regulatory agency's current policy fails constitutional scrutiny.

The stricter policy enacted by the FCC followed several incidents that lead
to widespread public complaints. This included singer Janet Jackson's
breast baring episode during the 2004 Super Bowl Half-Time Show and
repeated instances of on the air fleeting profanity by celebrities,
including Cher, Paris Hilton and Bono. This, during the live broadcasts of

awards programs.

The Janet Jackson incident did not involve speech but it drew wide public outrage that spurred a crackdown by the FCC.

The decision against the FCC stems from a challenge by Fox, CBS and other broadcasters to the agency's decision in 2004 to begin enforcing a stricter standard of what kind of language is allowed on free, over-the-air television. Prior to 2004, the FCC consistently held that occasional, spontaneous use of certain words that were otherwise prohibited did not violate its indecency standards.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

What affect this ruling might have on ham radio and other personal service cases involving indecent language broadcast over the airwaves is hard to assess. In years past, the FCC has applied its broadcast indecency standard in personal communications matters involving ongoing violations of various rules regarding language used on the air. That said, to date no ham, CB'er or other private radio operator has ever been cited for an inadvertent one time slip of the tongue. (Adapted from published news reports)

**

RADIO LAW: FCC TO ALLOW EMPLOYEES TO PARTICIPATE IN EMCOMM TRAINING DRILLS

The FCC has adopted a Report and Order on Docket RM 10-124 that contains new and less stringent rules regarding employee participation in emergency communications training drills.

Specifically, the FCC has amend the Part 97.113 of its rules to permit amateur radio operators to transmit messages for their employers under certain limited circumstances. This includes both government or non-government sponsored emergency and disaster preparedness drills, regardless of whether the operators are employees of entities participating in an exercise.

Under the newly modified 97.113, the amount of time employees are now allowed to participate in government sponsored drills is essentially unlimited. In the case of non government sponsored drills the limitation is one hour a week and two drill sessions of up to 72 hours per year.

In making its decision, the FCC categorically refuted all comments against the rules modification. The FCC essentially stated that improvement in the public's welfare by allowing such participation in emergency training outweighs any concern within the ham community that such a rules change would erode the non pecuniary interest and not for profit status of the amateur radio service.

The Report and order was released on July 14th. It should become effective 30 days after publication in the Federal Register. The full document is on the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.pdf or http://fjallfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.doc (FCC, AH6RH)

**

RESCUE RADIO: GAREC 2010 ON CURACO IN OCTOBER

The 2010 Global Amateur Radio Emergency Conference or GAREC will be held on October 11th and 12th. The venue is the Hilton Curaco on the island of Curaco in the Netherlands Antilles.

The missions of the conference are to get amateur radio operators better prepared for emergency communications. This, by creating what can best be called universal operating practices at both national and international levels. The conference is also a place to exchange information and experiences between amateur radio operators and groups that are interested in emergency communications.

The planning for the event is progressing with the first draft program of events available from the GAREC website at www.garec.net. The program will continue to change as speakers and activities are confirmed in coming months. Registration and hotel information can also be found at the Website. (IARU)

**

RESCUE RADIO: HAMS IN SPAIN CALLED OUT IN TWIN READYNESS EXERECISES

Amateurs radio operators in Spain have been involved with two major emergency communications exercises giving them the ability to polish their operating skills while showing authorities what they can do. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

According to G0DUB, in the first of the two exercises, several teams of the Spanish Emergency Radio Network participated in the international exercise PRES EU 2010, which took place at the Madrid Barajas International Airport on June 26th. The exercise simulated an accident resulting from a plane leaving the runway on landing and crashing into a building in which radioactive substances for hospital use were stored.

This drill simulated the possibility of a large number of victims of different nationalities with differing languages and needs. It also showed the results of the activation of the corresponding Civil Protection plans in an environment of simulated radiological contamination. More than 600 Spanish emergency technicians were deployed as were several teams from eight European countries.

In the second exercise on June 27th, the Grupo de Radio Transpirenaico or G-R-T brought together radio amateurs from Spain, France and

Andorra. This, in an emergency communications exercise to demonstrate a network spanning the Pyrenees without using any existing infrastructure.

During the exercise, a chain of more than 60 amateur radio stations was established from the eastern to the western Pyrenees, alternating radio links between France and Spain in the amateur radio bands. The point to point VHF radio links were used to send and receive messages from the Mediterranean Sea to the Atlantic Ocean. The same messages were then relayed back to the starting point in a single hop using stations operating on the High Frequency bands.

The overall exercise showed how ham radio H-F and VHF links can work side by side in a communications emergency and proving that that ham radio is a very powerful alternative emergency communications asset for the first responders and other authorities.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--

The first exercise was funded as part of European Union Project called Rapid Response Capability 7. The Spanish Emergency Radio Network also known as Red Radio de Emergencia is a group of 4000 amateur radio operators which is integrated in the Spanish General Directorate of Civil Protection and Emergencies.
(IARU, G0DUB, EA4FSI)

YHOTY: CODY ANDERSON, KI4FUV, NAMED AMATEUR RADIO NEWSLINE 2010 YOUNG HAM OF THE YEAR

A 17 year old Tennessee ham generally credited with saving the life of a downed runner in a marathon has been selected as the 2010 Amateur Radio Newsline Young Ham of the Year. Mark Abramovich, NT3V, is here with the story of Cody Anderson, KI4FUV:

--

"Cody, KI4FUV, you are the 2010 Young Ham of the Year award recipient from the Amateur Radio Newsline."

"I'm really excited. Somehow I can't wait to tell everybody here."

And that was the reaction of Cody Anderson of Harriman, Tennessee when he got the news the judges had selected him for the recognition.

Cody, 17, is the son of Benny Anderson and Jane Ann Edwards. He is an honors graduate of Rockwood High School in nearby Rockwood.

Phillip Newman, KE4LSH, president of the Roane County Amateur Radio Club, based about 30 miles west of Knoxville, nominated Cody for the award.

Cody serves as vice president of the club as well as net manager and webmaster for KE4RX.org.

"I'm really involved with the ARES portion of it," Cody says. "ARES is really strong here within Roane County.

"I would be more active on HF, although I just don't have a way to get an HF antenna up. I'm pretty active on 2-meters on the local club repeater."

Cody's nomination rose to the top of the Young Ham of the Year award committee's nominee list because of a life-changing event which occurred in this young ham's life.
It was May 30, 2009 and Cody says he was manning a checkpoint at the "Run for the Child" event in Roane County.

"It was about 20 or 25 minutes in," Cody recalls. "One of the runners had went past me and I noticed he fell. I waited just a second or two, you know, to see if he got back up. Maybe he just tripped.

"And, then I noticed he didn't get back up, so I went over to him and by the time I got to him he had quit breathing and went into cardiac arrest.

"After I radioed it in, me and another one of the runners that had stopped started CPR."
Cody says he had completed that CPR training through the club just months earlier and put his knowledge to work, doing mouth-to-mouth resuscitation while the runner did the chest compressions.

Cody recalls it all happened so fast and he just reacted instinctively.

"You know it's a fairly short race and the checkpoint I was working at was one of the earlier ones," Cody says. "I actually got done before the race was over. And, I went back and as I got back to the command post, I heard over the public safety radio they were bringing in a helicopter and flying him out to another hospital."

Cody says the man survived and although his heroic actions got some attention, the experience really didn't change him.

"I don't think that fazed me at all because I believed I was just doing what was right and I wasn't in it for the recognition," Cody recalls.

First licensed in 2004, Cody is a General Class operator who, although he is not a Boy Scout himself, has been helping the Radio Club of Knoxville teach two merit badges offered each summer at the Buck Toms Scout Camp run by the Great Smoky Mountain Council.

"They get two merit badges - they get the Radio and Electronics - and we help them build a TenTec shortwave receiver kit and help them understand how it works, what the components do," Cody says. "We let them operate the radios if they want to."

Cody is heading on to Roan State Community College this fall where he's planning to get some core courses completed. He says he's then planning to enroll at Tennessee Tech where he'll major in computer science.

As to his future in ham radio, Cody says there's always room for that.

"I hope to stay as active as I am now or become more active," Cody says. "Tennesee Tech actually has a radio club.

"I believe that ham radio is what's helped me learn a lot of my technical knowledge now and even computer skills and things like that, working with digital modes and other things.

"I really hope that I can stay as active as I am now and continue to learn with it."

Once again, congratulations to Cody Anderson, KI4FUV, Amateur Radio Newsline's Young Ham of the Year.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Cody Anderson, KI4FUV, will receive his award at the 2010 Huntsville Hamfest slated for the weekend of August 21st and 22nd at the Von Braun Center in Huntsville, Alabama. We hope to see many of you there. (ARNewsline(tm))

**

ENFORCEMENT: UNLICENSED FLORIDA BROADCASTER ISSUED $10000 NAL

The FCC has issued a $10,000 Notice of Apparent Liability to Christopher M. Myers of Lauderhill, Florida. This, for apparently willfully and repeatedly violating Section 301 of the Communications Act by operating an unlicensed radio transmitter on the frequency 95.9 MHz.

According to an FCC release, back on August 14, 2008, the Enforcement Bureau's Miami Office issued a
Notice of Unlicensed Operation to Myers for operating an FM broadcast station from his residence on 91.7 MHz without a license. The notice warned him that continued operation could subject him to further enforcement action.

On July 21, 2009, in response to a complaint that Myers was now operating an unlicensed station at his residence in Lauderhill, Florida, agents from the Miami Office used direction-finding to locate the source of broadcast transmissions on the frequency 95.9 MHz. It was traced to the same building from which Myers previously operated an unlicensed radio station on 91.7 MHz. In the ensuing months the FCC says it received continued complaints regarding this operation.

On March 7, 2010, the agents from the Miami Office inspected the unlicensed station, which was located in a condominium unit owned Myers. The agents observed a coaxial cable that connected a roof-mounted antenna on the condominium building to an FM radio transmitter operating on the frequency 95.9 MHz located inside Myers's condominium unit. The agents also observed
that Christopher Myers was the only person present inside his unit at the time of the Commission's inspection.

Now, based on the evidence before it, the FCC finds that's Christopher M. Myers apparently willfully and repeatedly violated Section 301 of the Act by operating radio transmission equipment on 95.9 MHz without Commission authorization. Therefore he is being assessed $10,000 which is payable within 30 days of the July 12th release of the order. Myers also has the option to file an appeal. (FCC)

**

EMERGING TECHNOLOGY: WORKEDGRIDS FREEWARE AP FOR GRID SQUARE CHASERS

WorkedGrids is a freeware Windows application that displays a map showing Amateur Radio grid squares contacted and logged using a third-party logging program. The app was developed by VE2ZAZ, and uses colors to display information on a per-band basis. Up to four bands can be displayed concurrently. For its input, the program reads the plain-text ASCII log files generated by most logging programs. The file is read at a set interval and the worked grid squares on the map are updated in a dynamic way as the contest progresses and the log file is periodically saved. WorkedGrids can be downloaded from tinyurl.com/24okrtm. (VHF Reflector)

**

THE SOCIAL SCENE: QUARTZFEST TESTING DATE CORRECTION

The organizers of the 2011 Quartzfest in Quartzsite Arizona say that a ham radio exam session listed on the ARRL Website for Saturday, July 17, 2010 is a mistake. Posting to QRZ.com, Steve, KO4QT, and Linda, KI6JUD, Weed say that Quartzfest 2011 is scheduled to take place this coming January from the 23rd to the 29th. Exam dates are the morning of January 24th for the Commercial Radio Telephone and Telegraph test. Amateur radio exams will be administered will take place the morning of January 25th. The Weed's say that they have contacted the ARRL and there should be a correction at the ARRL website, likely by the time this newscast goes to air. More on the 2011 Quartzfest is on-line at www.quartzfest.org. (QRZ.com)

**

NAMES IN THE NEWS: JOHN THOMPSON, WB5SYT, RESIGNS AS WEST GULF ARRL VICE DIRECTOR

Some names in the news. First up is ARRL West Gulf Division Vice Director John Thomason, WB5SYT, of Edmond, Oklahoma, who has submitted his

resignation to ARRL President Kay Craigie, N3KN. In his July 11th letter, Thomason told Craigie that by resigning, he will be able to devote his energy to serve his family, employer and health.

Former ARRL President Joel Harrison, W5ZN, appointed Thomason in January 2009 as Vice Director. This, after David Woolweaver, K5RAV, moved up to the Director position upon the retirement of then Division Director Coy Day, N5OK.

The Director and Vice Director positions in the West Gulf Division along with those in the Pacific, Rocky Mountain, Southeastern and Southwestern Divisions are up for election this November. (ARRL)

**

NAMES IN THE NEWS: 5B4AHJ CELEBRATES 50 YEARS IN HAM RADIO

Alan Jubb, 5B4AHJ, will celebrate his 50th anniversary as a licensed radio amateur on October 25th. To commemorate the event, he will use the special Cypress call 5B50J beginning this October 25th and continuing for a year. Listen out for him on CW and SSB. QSL via 5B4AHJ, direct or via Logbook of the World. (Various)

HAM RADIO IN SPACE: ISS RANDOM CONTACTS BACK

After a seemingly long period when the astronaut and cosmonaut hams on board the International Space Station seemed only to be making pre-planned contacts with schools, random contacts are back. For several days last week, Colonel Doug Wheelock, KF5BOC, took to the air from the orbital outpost to talk to hams around the globe. Here's a time compressed sample as supplied to us by Scott Avery, WA6LIE:

--

Actual contact audio from NA1SS - Hear it in the MP3 version of this weeks newscast available for download from www.arnewsline.org.

--

That recording was made on July 11th. Among the other stations Wheelock is known to have worked are since activating ISS station NA1SS were KD5DCB and PD0RKC to name only a few. (ARNewsline(tm) with audio from WA6LIE)

**

WORLDBEAT: IARU REGION 1 UPDATING PUBLISHED BANDPLAN DATA

Region 1 of the International Amateur Radio Union is looking for help to keep their records up to date. They have asked that member societies update or verify the spectrum privileges, especially for 600, 60, 6 and 4 meters. This based on the recent ham radio allocation changes that have taken place in some nations.

The currently published spectrum privileges each country in Region 1 is on line at www.iaru-r1.org. To see them simply click on Spectrum and Band Plans on the left hand side of the page (GB2RS)

**

WORLDBEAT: IRELAND ISSUES NEW CALLS TO AMATEUR RADIO EMERGENCY NETWORK

Ireland's telecommunications regulator ComReg has issued a new set of call signs for use by that nations Amateur Radio Emergency Network. The three calls are EI0AC, EI0EC, and EI0NC and supersede any callsigns issued in the past. The new calls are available for use during training and emergency nets as directed by Ireland's National Coordinator. (IRTS)

**

TECHNICAL CORNER: ARRL & TAPR DCC CALL FOR PAPERS

Technical papers are solicited for presentation at the 29th Annual ARRL and Tucson Amateur Packet Radio Digital Communications Conference to be held September 24th to the 26th near Portland, Oregon. Papers will be published exactly as submitted and authors will retain all rights. The submission deadline is July 31st and you do not need to attend the conference to have your paper included in the Proceedings. Papers go to Maty Weinberg, in care of the ARRL, 225 Main Street, Newington, Connecticut, 06111or by e-mail to Maty (at) arrl (dot) org. (WB8IMY)

**

HAM RADIO IN SPACE: INDIA LAUNCHES TWIN HAM RADIO SATELLITES

Two more ham radio satellites are in space and on-orbit. VU2WMY reports that StudSat and TISat were launched successfully early Monday morning, July 12th. StudSat and TISat were aboard the Indian Space Research Organization's Polar Satellite Launch Vehicle PSLV C15. They were successfully separated from it and are in a 640 Km orbit. Their respective beacons frequencies are 437.861 and 437.305 MHz. Video of the launch is on line at tinyurl.com/29ukc4l (Southgate)

**

HAM RADIO IN SPACE: SO-67 OPERATIONS SUSPENDED DUE TO COMPUTER GLITCH

Meantime some on-orbit problems for South Africa's Sumbandilasat SO-67 ham radio bird. Due to the erratic operation of the onboard computer, operations of SO-67 have been suspended while the ground station

investigates the problem. Speculation is that recent changes in the software that operates the amateur payload could be the cause. South Africa Amsat says that it will advise the world amateur radio community when SO-67 operation will be resumed. (SA AMSAT)

**

ON THE AIR: PORTUGAL

On the air, word from Portugal comes word that special event station CS29MR will operate from July 12th to the 18th. This to celebrate the 29th International Motorcycle Concentration Faro. Operations will be on 80 through 6 meters using CW, SSB and RTTY. More information can be found on QRZ.com. (Southgate)

**

ON THA AIR: CROATIA

On the air, keep an ear open for Croatian special event station 9A10P to be active through the end of the year. This, to celebrate the anniversary of the city of Djurdjevac. A special QSL will be issued, and all QSOs will be confirmed automatically via the bureau. (OPDX)

**

ON THE AIR: DEMOCRATIC REPUBLIC OF CONGO

And if you missed working ON4HIL as 9Q50ON, I the Democratic Republic of the Congo, don't worry. Patrick will help the locals in Kinshasa get their club station on the air and assist them in making their first QSOs as 9Q50AR. This is another special event call sign to celebrate the 50th anniversary of the
independence of the Democratic Republic Congo and will be used by different local operators until the end of the year. A QSL Manager is expected to be announced shortly. (OPDX)

**

DX

In DX, members of the Czech and Slovak OM0C Contest Crew have announced another DXpedition to Gambia to take place between November 18th and December 1st. They plan to renew the callsigns from their previous 2007 operation as C50C or C52C. The special call sign C5A has been reserved for use during the CQ World Wide DX CW Contest. For more details and updates, visit their Website at tinyurl.com/334e79q

F4DBJ, will be active as 5R8HT from Madagascar between September 5th and November 28th. Operations will be on 80 through 10 meters. QSL via his home call sign.

DL4HG and DL5XAT will be active from Gozo Island between November 23rd and the 30th. They plan to be active as 9H3TX during the CQ World Wide DX CW Contest as a Multi-2 entry. QSL via DL5XAT.

F2JD is back to Manilla for the next 5 months or so and is now signing portable DU1. He plans to be active on all bands and modes during his stay. He will also try to activate some Islands on the Air while there. QSL via F6AJA.

Lastly, F5RBB and F0FRL will be active stroke TK between September 12th and the 25th. F5RBB will operate on 80 through 10 meters using SSB and some of the digital modes, while F0FRL will be on 2 meters using SSB. QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: A GENDERLESS BATTERY YOU VCANT PUT IN WRONG

And finally this week, ever put a new battery into a radio or flashlight and wonder why it does not work. So you take it out and realize you have it in backward? Well that might not be a problem much longer as we hear from Jim Linton, VK3PC

--

Just how hard can it be to load batteries into devices and get the polarity correct?

Well, apparently this very simple task is just beyond some people, who we will describe as being Polarity-Agnostic, or call a spade a spade, they're battery bunglers.

So prevalent is this lack of skill that Microsoft and Duracell have identified it as an untapped market, and created batteries that have both positive, you know that's the one with the plus sign, and negative or hyphen, at both ends.

This bipolar set-up of terminals is subject to a patent entitled 'Eliminating Incorrect Battery Placement'.

The InstaLoad technology is a brilliant, basic mechanical solution without electronic components or circuitry. Already it has found application in hearing aids, torches and soon to follow will be a host of gadgets presumably the Duracell Energizer Bunny.

I'm Jim Linton VK3PC.

--

Microsoft has already been granted a patent on the new gender-less battery terminal configuration. More about how it works is on line at tinyurl.com/2g9onmc (WIA News)

CODY ANDERSON, KI4FUV, NAMED RECIPIENT OF THE 25TH AMATEUR RADIO NEWSLINE "YOUNG HAM OF THE YEAR" AWARD

Cody Anderson, KI4FUV, A 17 year old radio amateur from Harriman, Tennessee, whose quick thinking likely saved the life of a downed runner in a 2009 marathon, has been named as the 2010 Amateur Radio Newsline Young Ham of the Year. This marks the 25th anniversary of the Young Ham of the Year Award program.

Cody is the son of Benny Anderson and Jane Ann Edwards. He is an honors graduate of Rockwood High School in nearby Rockwood, Tennessee.

At age 11, Cody became interested in radio communications after hearing a VHF ham QSO on a scanner. He was encouraged by his grandparents and stepfather to pursue this interest, and was directed to an Oak Ridge, Tennessee club where he first tested for his Technician ticket in June 2004. He upgraded to General in June 2007 at the Buck Toms Scout Camp run by the Great Smoky Mountain Council.

Since his earliest days as ham, Cody has been an ambassador of and a mentor within amateur radio, and has used it in public service most of his teen years. Phillip Newman, KE4LSH, president of the Roane County Amateur Radio Club, based about 30 miles west of Knoxville, nominated Cody for the award. He says that Cody serves as Vice President of the club as well as Net Manager and Webmaster for the club's cyberspace home located at www.KE4RX.org.

"I'm really involved with the ARES portion of it," Cody says. "ARES is really strong here within Roane County.

"I would be more active on HF, although I just don't have a way to get an HF antenna up. I'm pretty active on 2-meters on the local club repeater."

Cody's nomination rose to the top of the Young Ham of the Year Award committee's nominee list because of a life-changing event which occurred in this young ham's life.

It was May 30, 2009 and Cody says he was manning a checkpoint at the "Run for the Child" event in Roane County. Cody recalls that it was about 20 or 25 minutes into the race when a runner suddenly went down:

"One of the runners had went past me and I noticed he fell. I waited just a second or two, you know, to see if he got back up. Maybe he just tripped.

"I noticed he didn't get back up, said Cody. So I went over to him and by the time I got to him he had quit breathing and went into cardiac arrest.

"After I radioed it in, me and another one of the runners that had stopped started CPR."

Cody says he had completed that CPR training through the club just months earlier and put his knowledge to work, doing mouth-to-mouth resuscitation while the runner did the chest compressions.

Cody recalls it all happened so fast and he just reacted instinctively.

"You know it's a fairly short race and the checkpoint I was working at was one of the earlier ones," Cody says. "I actually got done before the race was over. And, I went back and as I got back to the command post, I heard over the public safety radio they were bringing in a helicopter and flying him out to another hospital."

Cody says the man survived and although his heroic actions got some attention, the experience really didn't change him.

"I don't think that fazed me at all because I believed I was just doing what was right and I wasn't in it for the recognition," Cody recalls.

In addition to public service events like the "Run for the Child" marathon, Cody has also responded to ARES activations for numerous shelter openings in the Roane County area. He has also helped provide emergency communications during such disasters as the Tennessee Valley Authority Ash Spill that gained national attention in 2008.

Cody has been helping the Radio Club of Knoxville teach two Scouting merit badges offered each summer at Camp Buck Toms:

"They get two merit badges - they get the Radio and Electronics - and we help them build a TenTec short-wave receiver kit and help them understand how it works, what the components do," Cody says. "We let them operate the radios if they want to."

Cody has also assisted with Information Technology projects for his radio club and ARES group. This includes a link to a D-Star gateway during ARRL Field Day and during local events. It is also available to prepare for the use of digital communications in a real emergency.

Cody is heading on to Roan State Community College this fall where he's planning to get some core courses completed. He says he's then planning to enroll at Tennessee Tech where he'll major in computer science.

As to his future in ham radio, Cody says there's always room for that:

"I hope to stay as active as I am now or become more active," Cody says. "Tennessee Tech actually has a radio club.

"I believe that ham radio is what's helped me learn a lot of my technical knowledge now and even computer skills and things like that, working with digital modes and other things.

"I really hope that I can stay as active as I am now and continue to learn with it."

Award Ceremony

The 2010 Amateur Radio Newsline(tm) "Young Ham of the Year Award" will be presented to Cody Anderson, KI4FUV, on Saturday, August 21st at the Huntsville Hamfest in Huntsville, Alabama. As the 2010 "Young Ham of the Year," Cody will receive -- courtesy of Vertex-Standard -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat him to an expense-paid week at Spacecamp Huntsville, and will present Cody with a variety of CQ products. Amateur Radio Newsline(tm) will provide Cody with a commemorative plaque at the award ceremony. Once again, the cost of year's plaque has been underwritten by Dave Bell (W6AQ), President of DBA Entertainment Inc., Hollywood, California. Heil Sound Ltd. will also be presenting Cody with a ham radio related gift.

The presentation of the award as a regular feature of the Huntsville Hamfest has been made possible through the generosity and kindness of the event's Planning Committee and the good offices of Huntsville Hamfest Association Vice President Charlie Emerson, N4OKL. (See http://www.hamfest.org)

This year's award ceremony will be hosted by Bill Pasternak, WA6ITF and Don Wilbanks, AE5DW, of Amateur Radio Newsline(tm) along with representatives of corporate underwriters Vertex-Standard and CQ Communications, Inc.

Award Program Background

The Amateur Radio Newsline(tm) "Young Ham of the Year" award (formerly the Westlink Report Young Ham of the Year Award) has been presented annually for the past 25 years to a licensed radio amateur (Ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the

art in communications through the Amateur Radio hobby/service. A website with full information on the award program and background material is located at http://www.arnewsline.org.

Award Sponsors

The award program is jointly sponsored by the Los Angeles, California-based Amateur Radio Newsline(tm) with corporate support from Vertex-Standard Corporation of Cerritos, California and CQ Magazine of Hicksville, NY.

Since 1976, the Southern California-based Amateur Radio Newsline(tm) and its predecessor, the Westlink Radio Network, have been providing radio amateurs around the world with up-to-the-minute news at no cost to them. Amateur Radio Newsline(tm) also co-sponsors with the Quarter Century Wireless Association the "Roy Neal, K6DUE, Amateur Radio Mentoring Project" that serves as a clearinghouse to match radio amateurs in need of educational assistance on the hobby with those able to aid them. (See http://www.arnewsline.org)

The award's two major corporate underwriters are world leaders in their respective areas of Amateur Radio product support.

Vertex-Standard Corporation, which has been a corporate underwriter since the inception of the award program in 1986 is considered the trailblazer in the design, manufacture and distribution of high quality Vertex-Standard commercial two-way radio, monitoring and air-band communications equipment along with its Standard Horizon marine electronics line and Yaesu brand Amateur Radio equipment. The Yaesu name is known world-wide among ham radio aficionados and is synonymous with premium quality ham radio gear. (See http://www.vertexstandard.com)

CQ magazine and its sister publications, CQ VHF, Popular Communications and WorldRadio Online, are published by CQ Communications, Inc., and are considered the trend-setting publications serving today's modern radio amateur. (See http://www.cq-amateur-radio.com)

Past Recipients

Past recipients of the "ARNewsline Young Ham of the Year Award" include Shawn Alan Wakefield, WK5P, of Bartlesville, OK (1986); David Rosenman, KA9PMK, of Muncie, IN (1987); Jonathan Binstock, NK3D, of Potomac, MD (1988); Erin McGinnis, KAOWTE, of Topeka, KS (1989); Mary Alestra, KB2IGG, of Staten Island, NY (1990); Richard S. "Sammy" Garrett, AAOCR, of St. Louis, MO (1991); Angela (Angie) Fischer, KBOHXY, also of St. Louis (1992); Kevin Boudreaux, N5XMH, of New Orleans, LA (1993); Allison Daneen Zettwoch, KD4CKP, of Louisville KY (1994); Adam Weyhaupt, N9MEZ, of Alton IL (1995); Toby Metz, KB7UIM, of Boise ID (1996); Brian Mileshosky, N5ZGT, of Albuquerque NM (1997); Richard Paczkowski, Jr., KF4BIA, of Edgewater, FL (1998); Michelle Swann, KE4EZI, of Warner-Robins, GA (1999); Christopher Arthur, KT4XA, of Russelville, AL (2000); Patrick Clark, KC8BFD, of Elkwood, WV (2001);

Josh Abramowicz, KB3GWY, of Reading, PA (2002); Jay Thompson, W6JAY, of Santa Ana, CA (2003); Andrea Hartlage, KB4IUM, of Grayson, GA (2004), Rebekah Dorff, WG4Y, of Hoover, AL (2005), Catherine Ferry, NC8F, of Streetville, OH. (2006), Grant Morine, W4GHM, of Wilmington, NC (2007), Emily Stewart, KC0PTL, of Leavenworth, KS. (2008), Andrew Koenig, KE5GDB of Houston, TX. (2009).

AUSTRALIA FOR WEEK COMMENCING JULY 18 2010

WIA Centenary Update

WIA Supported Centenary Activity - update

On this broadcast last week we announced that Science Alive 2010 on the
7th and 8th of August in Adelaide will have a WIA Centenary themed radio
and communications display.

Those attending this popular science orientated public event in the Goyder
Pavilion, Adelaide Showgrounds, Wayville, will get to see the amateur

radio display and talk to its organisers Adrian Snell VK5ZSN, Paul Hoffman VK5PH and Paul Schulz VK5FPAW.

Now this week the WIA Centenary Committee announces that it has endorsed:

'The Super Springtime in VK6 - a collaborative amateur radio promotional initiative during September by Western Australia Repeater Group, Western Australia VHF Group, WICEN in WA and the Scout Communication And Technology Team.'

This does include use of the VK100WIA callsign for a total of nine days at the Royal Perth Show and also the Wireless Hill Museum.

Congratulations to all involved for combining their efforts. It should be a huge success in showing off the wonderful world of amateur radio to the general public and encouraging more to become radio amateurs.

VK100WIA takes a step back in time

A very successful time was had last weekend by the Sunraysia Radio Club at the tri-annual Junction Rally where the Murray and Darling rivers meet in Wentworth.

Vintage tractors and steam engines popped and chugged, while paddleboats cruised the rivers with organisers recording more than 3,000 visitors at the event.

VK100WIA was put on air and the atmosphere of the rally could be heard in the background during many of the QSOs made by operators from the Sunraysia Radio Group, with President Garry VK3KYF declaring it a great effort by all involved.

Operating conditions were tough due to electrical noise at S9+ on occasions at the rally site.

Hundreds of people including several visiting radio amateurs stopped by to talk, learn about the Centenary of Organised Amateur Radio in Australia and view a display of vintage radio items.

In fact Garry VK3KYF and Ray VK3HSR had to interrupt their VK100WIA operation on numerous occasions to talk with keenly interested visitors and hand out the popular "Calling CQ" pamphlets.

Good publicity was obtained, again using the WIA Media Kit, for the Wireless Institute of Australia, the Sunraysia Radio Group and amateur radio generally. This included coverage in the Independent Star online newspaper and a mention on a local TV news sessions.

And the club went that extra step to put VK100WIA outside the hours of the Rally by operating it from the home QTH?s of members, notably Aub VK3QD at Swan Hill last Monday, and ended up with a three-day log of 263 contacts.

It was another successful WIA Supported Centenary Activity ? congratulations to the Mildura based Sunraysia Radio Club.

The Ipswich and District Radio Club to make Mayoral presentation

Coming on top of its recent roster slot with VK100WIA is news from Club President Mike Charteris VK4QS of even more planned activity.

A special presentation to be made soon by the club to the Mayor of Ipswich, Paul Pisasale, of a VK100WIA Polo shirt, during a morning tea at the club house to thank the five club members who put the special callsign on air.

This will be a good photo opportunity for the two Ipswich newspapers.

Also being invited are Ipswich Councillors Paul Tully VK4FPGT and Andrew Antoniolle, who is a club Honorary Vice President, along with WIA Vice President Ewan McLeod VK4ERM.

Mike VK4QS advises that the club is compiling local Ipswich amateur radio history from the 1920s to today.

Another fine example of the support and involvement of WIA affiliated clubs for the Centenary celebration.

Gympie Communications & Electronics Group last week had its turn at operating the VK100WIA call-sign.

Greg, VK4VBU and Bob, VK4MR were the two main operators over the three day period with CW contacts also made by Alan VK4EAB. Alan kicked off the VK100WIA call on CW shortly after 00:00 UTC on the 7th of July. The timing for the group turned out to be a little tricky as we had a couple of members with HF stations away at the time but luckily Greg's brand new standard call-sign came through on the afternoon of the first day.

Bob, VK4MR returned in the nick of time and made a concentrated effort to really clock up the contact count. The final tally is around 200 contacts for the Gympie Group including the CW contacts and a few incoming IRLP calls.

WIA Centenary Award

More have been claimed and issued during the past week. Congratulations on this achievement goes to Vincent Henderson VK7VH, John Mullin VK3FJHM, Geoff Atkinson VK3TL and Noel Ferguson VK3FI.

On last week's broadcast we announced that John Fisher VK3DQ gained the first certificate, Heidi Tobin VK3FHID second and third Jean Fisher VK3VIP.

And the second award certificate for a DX station, and the very first from the USA goes to Jerry Fuller W6JRY of Forest Ranch, California. The first DX station to qualify was Masami Shinhaze JF6CHY of Japan.

A quick look at the VK100WIA online log shows that many others have already made sufficient contacts or will soon do so, to qualify for the WIA Centenary Award.

Check out the rules and how to make a claim are published on the WIA website.

Why not get a certificate to display in your radio shack as confirmation of having celebrated the Centenary of Organised Amateur Radio in Australia.

Looking ahead at the VK100WIA roster

On Monday the 19th through to Wednesday the 21st of July the Moorabbin and District Radio Club will be operating the special callsign.

Its radio museum, one of Australia's most comprehensive dedicated amateur radio museums in Australia, at the Combined Club Rooms in Turner Road Highett, will be open to the public.

After hours club members will put the callsign on air from their home QTH's.

ALARA is rostered on Thursday 22nd July through to Saturday the 24th. It will put VK100WIA on air from various locations.

These will include transmissions through the Melbourne Digital Amateur Television repeater VK3RTV, and on the Saturday 1000 to 1200 UTC originating from VK5, it will be on ALARA's 35th Birthday Net 3.588 MHz plus or minus QRM.

On Sunday the 25th through to Tuesday the 27th the Townsville Amateur Radio Club will be operating from the SES Headquarters in Green Street, West End.

And does the Townsville Amateur Radio Club have a great storyline for its local media! Australia's first known occasion when radio amateurs provided emergency communications occurred in Townsville.

And rounding off the VK100WIA roster for July are the Frankston and Mornington Peninsula Amateur Radio Club and the Hills Amateur Radio Group -more about them next week.

HAMS ACROSS AUSTRALIA.

VK1
vk1 local news email broadcast@vk1.wia.ampr.org and ask for subscription.

This month, two presentations, Andrew VK1DA will be talking about his recent trip to Dayton Ohio followed by a presentation and demonstration of VK1RWN the new DSTAR repeater for Canberra.

Tony VK1VIC and Bruce VK2MIB will be presenting a top to bottom inside out front to back presentation on how to use the system and how it was built and is operated.

Feel free to go along, enjoy a warm cuppa sit back and enjoy this months meeting.

Don't forget to check the QSL cards out as the WIA have been busy busy getting them out and about for all the contacts thus far.

So 28 July commencing at 1930 or 7.30pm which ever you prefer... Mt Mugga Scout Hall...

VK4 SILENT KEYS @ 2009 - 2010 QAC YEAR

VK4BEL Bernie Leech (ex vk4bel) 13/05/2010 Advised by Vk4jdf John.
VK4WZ George Nelson JUNE 2010 Advised by Herb Collie.
VK4APQ Keith Haverfield July 12 2010 Advised by Gavin VK4ZZ

Keith Haverfield VK4APQ went Silent Key on Monday 12th July at 0240UTC in Bundaberg.

In advising The TARC news desk of Keith's passing, current Bundaberg Amateur Radio Club President Rusty McGrath VK4JM expanded further on some of Keith's contributions to Amateur Radio -

Keith was a past President and club stalwart being instrumental in constructing the present Transmission Tower on Mt Goonaneman.

He began with chasing up Military tower sections & specifications in 1983 and saw the project completed in 1985. The Tower has provided a legacy for the Club which has lasted 25 years and will hopefully remain for another 25.

On behalf of the Management Committee and Club Members of the Bundaberg Amateur Radio Club Rusty extended sincere sympathies to XYL Gaynor VK4FGAY and family and advised that Gay is holding up well with family members providing vital support in her time of need.

Keith and Gay travelled extensively over the years and made heaps of friends along the way. They were regulars at many of the North Queensland Amateur Radio Conventions and had a real liking for a month or two stay at the legendary Groper Creek until a decline in health limited their travels.

Keith's funeral was held at Bundaberg Friday 16th July.

All friends, past and present who attended sent Keith off in exemplary fashion.

Vale Keith Haverfield VK4APQ SK

Welcome to Qnews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Over the past few years the internet has become the ubiquitous contact point for the majority of people. We lost the telegram and the price of postage has just risen even although delivery times are slower in areas such as where I live. I suppose that I can't complain because I have been able to use the internet to deliver messages, DX when the bands have been dead and obtain equipment for my station as well as research many things without going to a library.

Those businesses serving the amateur radio market are very savvy to the power and speed of the internet and questions are usually very promptly answered. The down side is that the ham fest gatherings are finding it harder to attract commercial displays as the competition has sliced profit margins very low.

I have recently been gathering information on a particular item that I need to buy - but not AR related. This is a major sector of the Australian retail economy whose figures feed into the Consumer Price Index. A search of the range brings pages of results all with "contact the dealer" tags. Unlike our niche AR traders, these players ignore contact via email and telephone and they are ignoring customers.

I suppose the moral is to support your local amateur radio supplier as he is giving good service in the e-commerce world.

I'm Geoff Emery and that's what I think, how about you?

CLUBBING -

GLADSTONE AR CLUB "Radioactive".
IRLP Node 6246
President John Hinde VK4JWH
gladstone_ar_club@yahoo.com.au

G'day from Mark VK4XMC.

The Gladstone Amateur Radio Club would like to invite fellow Hams to give our recently restored IRLP node 6246 a try.

For locals this can be accessed on our town UHF repeater 438.050 MHz, no tone required.

This was made possible thanks to the good work of Rob VK4TW, Paul VK4XPB and Mick VK4FMCF, plus generous financial donations from our members and a surplus PC donated by Queensland Alumina Limited for the project.

Hope to hear you soon on node 6246.

73's from Mark VK4XMC

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

Last week the Gympie Club had its turn at operating the VK100WIA call-sign. Greg, VK4VBU and Bob, VK4MR were the two main operators over the three day period with CW contacts also made by Alan VK4EAB. Alan kicked off the VK100WIA call on CW shortly after 00:00 UTC on the 7th of July. The timing for the group turned out to be a little tricky as we had a couple of members with HF stations away at the time but luckily Greg's brand new standard call-sign came through on the afternoon of the first day. Scrambling to repair an antenna and organise a radio (that could now be run on full power), Greg was able to get the ball rolling on SSB on the HF bands. Despite being heckled on-air for his compromised antenna on some bands he persevered and made several VK and DX contacts - a good effort indeed.

Bob, VK4MR returned in the nick of time and made a concentrated effort to really clock up the contact count. The final tally is around 200 contacts for the Gympie Group including the CW contacts and a few incoming IRLP calls.

Members operated from their home QTH as the Gympie Group is still looking for suitable clubrooms. The Gympie Regional Council has offered the Club a choice of three buildings but unfortunately, they are just too far out of town to be practical. This is however a positive move from Council and is appreciated by the group. As there still appears to be no new tenants in the old QR buildings, GCEG are again pursuing Queensland Rail but now combined with the Valley Rattler in an attempt to make some progress towards taking over the buildings. Being centrally located and with good elevation for radio, they are still considered to be the most suitable.

For Gympie Area News, I'm Trevor Taege, VK4BAT

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
http://ipswichdistrictradioclub.webnode.com/

Hi, I'm Mike VK4QS, President of the Ipswich & District Radio Club.

Last Saturday night saw four of our members saddle up for the annual VK4JF, "Jack Files 80m Contest". Band conditions where very good indeed, resulting in mostly 5x9 reports throughout the whole six hours of the contest. Contacts ranged from local VK4's, the focus of the contest itself, to as far a field as the land of the long white cloud.

ZL's in particular where a definite highlight of the evening, with reception being in the order of armchair copy.

By the stroke of midnight it was all over for another year, with many operators exceeding one hundred contacts and above. I would like to thanks John Spooner, VK4AJS for his efforts in organising this 80m contest in memory of Mr. Jack Files, a devoted WIA Member of many years standing.

In other news from Ipswich, we would like to bring to your attention the up and coming, "Flight Centre Cycle Epic" which begins on Saturday the 21st of August 2010. Each year the Ipswich Club members volunteer both their time and equipment to provide emergency radio communications.

The country over which the event is run see the riders endure some very harsh terrain indeed. Thus the call for help beckons to all those amateurs who feel so inclined to give of their time for this very worthwhile event. for further details, please feel free to contact VK4IE, Mr John Edwards by email jkedw@bigpond.com

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF with news from the Redcliffe AR Club.

Next Monday's Technical Talks will be given by James, VK4TJF, about how the QSL system works and working DX stations. This should clear up the mysterious QSL card that appears and what should I do to send to acknowledge it. This should be a very informative talk so join us at the club house about 8 pm for the information.

Would you like to go to the Dayton Hamfest in 2011, Mal VK4UMS is planning to lead a small group from Queensland and you can join him for the biggest HamFest in the world. If you want to go please contact Mal via the club's email address of call him on the Redcliffe 2 metre for further details.

Charles VK4BTC reports that the ceiling of the communications caravan has been removed again to install solar panel bolts. Charles leads a very small team who meet every Saturday morning at his place to work on the caravan. If you have time they would like some assistance... Please talk to Charles VK4BTC if you are able to help.

The club will be part of the VK100WIA - 100 years of amateur radio. Kev VK4UH will take the lead on this project dates 30/8/10 - 1/9/10. The event can be run from anywhere even from members homes... It is planned that the club make contacts on the Monday night & Wednesday group & ask if others would like to operate in the gaps either at the club or from home... Please talk to Kev VK4UH if you would like to be take on a window of time.

RD contest 14th &15th August. James VK4TJF, Scott VK4FLAE & Shaun VK4FY will take the lead for this event. Camping will be available at the Murrenbong site for those who wish to stay over night.

David VK4DC reported on the recent GippsTech weekend. 3 members went & by all reports a most informative weekend ensued. Peter VK4EA has a copy of the 2009 briefs... Please see him should you wish to see the topics.

For Sale. If any one needs a 40m 2 element 40m yagi antenna the club has one which is surplus to our needs. If anyone is interested pleas contact Peter VK4TAA, the club secretary.

The club runs trivia on 438.325 on Wednesday night at 7.30pm. Everyone is invited to join in. The usage of the 70cm repeater is low and others will see our bandwidth as commercially useful to them. If we don't use the band we will lose it. So come and join us each Wednesday night for 1 hour of fun and entertainment on the Redcliffe 70 cm repeater on 438.325 and don't forget the 91.5 CTCSS tone.

So until next time, for Redcliffe club, I'm Ray VK4CF.

SUNSHINE COAST
Maleny VK4RSC 146.850 and 438.075 VK4RSN 53.7
Noosa Heads VK4RSL 146.825 and 438.175

Recently Guest Speakers at General Meetings have been club members describing how they got into Amateur Radio. This has been very interesting and shows the different paths some of us have taken to get into the hobby.

Sunday BBQ

Today the club is open for the monthly BBQ social meeting. After the news has finished there will be a fox hunt for people to test their skills against the wily fox. Leicester VK4ALH is in charge of hiding the fox and advises you will need a car as its not going to be within walking distance.

VK100WIA

SCARC has use of the VK100WIA callsign on 8th through to 10th of September this year. This is leading up to the annual Sunfest that will be held in the same location as the past few years at the Woombye School of Arts building in the main street of Woombye

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

MP visits ZL3 Radio Buildathon

As part of CCC Kidsfest 2010 www.kidsfest.co.nz, the 2nd in a series of three ZL3 Radio Buildathons was held in Burnside, Christchurch, New Zealand July 8.

Designed to introduce electronic construction and amateur radio to Christchurch youth, an enthusiastic group of 15 builders completed their AM Broadcast radio receivers in record time. All worked!

Builders also came from as far away as Timaru and Hamilton NZ, plus Asia and Egypt.

Nicky Wagner MP was presented by David Searle ZL3DWS with a wide ranging History of Amateur Radio in NZ written by Ian Dougherty.

She then spent an hour meeting the children and local radio amateurs who gave of their time to ensure each radio worked!

A total of 44 parents, children and radio amateurs joined in the fun, sponsored by the Christchurch City Council, NZART Radioscience Education Trust Inc, N Z Vintage Radio Society Christchurch and Branches 05, 56, 68 of NZART and C.A.R.D.S.

To learn more about the public service of Amateur Radio in NZ visit nzart.org.nz

Taking amateur radio into the classroom

Primary school students are being shown aspects of amateur radio by members of the Orange and District Amateur Radio Club in Central West New South Wales.

As part of the club's celebration of the Centenary of Organised Amateur Radio in Australia, which we reported on last week's broadcast, now comes news that club members have been visiting the Glenroi Heights Public School.

Year five and six class teacher Rachael Livingstone says her students have been learning basic Morse code and new construction skills.

The boys and girls are enjoying learning something new. Orange and District Amateur Radio Club member Ross Wilson VK2ER has been teaching the code and they able to communicate using it.

While Richard Morrison VK2SON has been conducting the weekly classes on electronics and soldering.

First starting out with small projects to learn the skill of soldering, they have recently built a radio transmitter.

This training will continue for the rest of this year and sounds like a good model that could be picked up by other radio clubs around Australia.

CAN I HAVE AMATEUR RADIO FOR $1000, ALEX?:

YOUNG AMATEUR MAKES HER MARK ON JEOPARDY!

For hams who are fans of the television quiz show Jeopardy! where contestants have to answer in the form of a question the July 6 show in the USA was a real treat:

Andrea Salt, KE7OPV, of Arizona, was a contestant.

But what makes Andrea's time on Jeopardy even more special is that she is only 13.

All that week, Jeopardy! hosted their annual Kids' Week.

To be eligible to participate in Kids' Week, all contestants must be between the ages of 10-13 and pass an online test consisting of 30 questions. The questions cover a variety of categories and the kids must answer each question within 20 seconds.

And yes, speling dus kount!

For those with pay for view in VK, no doubt Andrea will fast be approaching 17 by the time we get to see it out here! HiHi

NOV 20-21 WIA Spring VHF-UHF Field Day
John Martin VK3KM tac@wia.org.au

Good Morning Trent Vk4ti here..

Vox or Ptt ?? What is better in a contesting environment ??
In multi op stations the use of keyed mikes and headsets is all but mandatory.

By using a full headset you free up the hands to operate a PC , radio, or hand log.. Most modern rigs offer a single plug for PTT Speaker and Mike

so it is very easy and neat to wire up your rig to take all three and make your contesting much easier.

Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager. Just to reiterate Due to some unforeseen circumstances, the Rules and my introduction to the 2010 Remembrance Contest, failed to make it into the July Amateur radio Magazine.

If you need a copy of these rules you can log onto wia.org.au

At the bottom of the RD Contest page is a link to download a PDF copy of the Rules and my introduction, or you can email me at rdlogs@wia.org.au and I can send a copy of both (if required) in PDF format.

Basically, there has been NO changes since last year, however, as this is the WIA's Premier Annual Contest, I like to get the rules published each year.

Today Sunday the 18th July and as this news goes to air, you have about 4 weeks to check with your local Club to see if they are going to participate and your equipment, Antennae's, logs sheets, and Logging Software are up to date.

As I record this segment I have just had a short time to assemble of the RD Contest page, printable log sheets, declarations, etc. over the next couple of weeks I hope to be able to make available these documents, they will be at the bottom of the RD Contest page, as a downloadable documents.

Until next week.

Strong growth for International Lighthouse and Lightship Weekend

There's no stopping this popular annual event held each August with demonstrated interest by radio amateurs around the world continuing to grow.

While there are regulars who have participated in the weekend for the past decade, a strong trend is the registration of virgin or never before activated lighthouses.

Only going to prove there are plenty of lighthouses for anyone wanting to give this fun event a try.

An example is Australia with 10 of its 42 registrations so far this year being virgin lighthouses in VK2, VK5, VK6 and VK7.

With only four weeks to go to the International Lighthouse and Lightship Weekend the 21st and 22nd of August, the progressive tally is 250 registered with many for the first time.

Germany with 43 registrations is just ahead of Australia on 42, followed by the USA 29 and England 25.

Organisers of the Event, the Ayr Radio Club of Scotland GM0AYR are expecting a late rush of on-line registrations to the website ILLW.NET from radio amateurs in the more than 30 participating countries.

DX0DX DXpedition 2011 Spratly Islands

The Team headed by Chris Dimitrijevic VK3FY continues to work towards completing a range of matters mainly related to the logistics that go with such a large and prolonged DXpedition on a remote island.

A multi-national group of up to 30 amateur radio operators from eleven countries will reach Thitu Island in the South China Sea by boat in three dedicated teams to put DX0DX on air 6-24 January 2011

A recent change in local government leadership has occurred on the island and Chris VK3FY reports it has been re-assuring that the level of support and encouragement from officials remains strong.

The appointed DX0DX QSL Manager is Bob Schenck N2OO who has a very good track record in handling the QSLing for more than 100 DXpeditions.

In early online polling on the DX0DX website www.dx0dx.net of the DX community on the mode that DX0DX is wanted was fairly evenly divided between SSB (37%), CW (35%) and RTTY (28%), and there's an even spread of band preference 160m to 10m.

So far the VHF & UHF bands rate poorly, but undoubtedly when DX0DX has propagation it will be in great demand. The chosen HF, VHF & UHF frequencies appear on the DXpedition its website. For those interested in 6m, a propagation beacon will run on 50.090MHz when the band is closed.

With six months to go before DX0DX gets on air, Chris VK3FY reports that steady progress is being made to seek further sponsorship and funding support. It is hoped to be able make more announcements in coming months.

To date the corporate sponsors are ICOM America, SteppIR, Spiderbeam, WX0B Array Solutions, Ham Radio Outlet, and Heil Sound. It is hoped to be able make more announcements in coming months.

The DX0DX Team acknowledges the financial support already received from individual radio amateurs Brad WA6JJB, Paul N6PSE, Marc DO4DXA, Maurice N4LZ, Vic W4VIC, Ken N5TY, Allan VK2CA, Paul VK2HV, Scotty KG9Z and Clay K7HC.

Support has also be given by the IARU Region 3 member society Philippine Amateur Radio Association (PARA), DXWORLD.NET, and ClubLog.ORG

DX0DX Public Affairs, Jim Linton VK3PC

ON THE AIR: THE 5K200, COLOMBIA SPECIAL EVENT

On the air, keep an ear open for what are being called duly authorized members of the Colombian Radio Amateur Association to be active as 5K200LR throughout 2010. This is a special event call to celebrate the bicentennial and independence of Colombia. QSL electronically via Logbook of the World or direct to HK3LR.

A quick note in to say that "TIsat-1 beacon is being heard".

The 437.305 MHz CW beacon of TIsat-1, has been heard sending
'HI HI HI TISAT K'

Details of modes and scheduling can be found at wia.org.au and

qdg.com.au

Alan VK4NA tells us 3 Brisbane area clubs met to improve Amateur Television

Held at the home of Richard VK4XRL on Saturday July 10 to look at combining
the resources of clubs in improving ATV repeaters in the greater Brisbane area.

South East Queensland ATV group, Brisbane Digital ATV group and Queensland
Digital Group

The BDATV group and SEQATV group each running ATV a few hundred metres of each
other North West of Brisbane at Ocean View.

Those present agreed that combining equipment and sites is in the best
interests of all ATV operators in Brisbane.

VK4RKC is now transmitting Digital ATV on 428.5 MHz. Both 1250 FM and DATV are
being received.

The *preferred* choice of frequency should be 442-450 as they expect to loose
420 to 430 MHz in the future.

As a result of the ACMA's re-structuring of the UHF Bands, it may be that
commercial users will move into 440 - 450 MHz 'on a temporary basis', subject
to agreement from the Department of Defence.

Shifts are to occur before Dec 2012.

This is more likely to occur in high density areas such as Capital Cities.

The meeting decided that at this stage, to plan to use a repeater output of
446.5 MHz the Australian standard digital with two output streams.

Inputs of 1250 MHz and 1283 MHz FM will be the minimum receive requirement.

ESA COLUMBUS AIS SYSYEM ANTENNA BUILT BY HAM

SpaceDaily.com reports that the European Space Agency's Columbus module maritime Automatic Identification System or AIS aboard the International Space Station was switched on. The A-I-S antenna, mounted externally on the Columbus module, was fabricated by AMSAT and ARISS member Lou McFadin, W5DID and the United States ARISS team.

The group has also constructed a nearly identical amateur band antenna for ARISS operations that will be used when the Ericsson amateur radio gear is activated in early 2011.

And how well does the new antenna work? The European Space Agency reports receiving more than 90,000 Class A AIS messages during a 14 hour test. This generated a global view of maritime traffic as the ISS orbit crosses all major shipping lanes.

A POSSIBLE BONUS SHUTTLE MISSION

The July 2 UniverseToday.com newsletter reports that NASA announced new target dates for the final two or maybe three shuttle missions. STS-133 is now aiming for November 1 at approximately 4:33 p.m. EDT for the final flight of shuttle Discovery,. STS-134 will happen on February 26, 2011 at around 4:19 p.m. EST for shuttle Endeavour's last launch.

However there's now word for the potential of a bonus mission titled STS-135.

If approved by Congress, it would launch sometime in August 2011. The latest word on that was that NASA officials hope the decision on whether or not to fly STS-135 would be made sometime this month.

WW SPECIAL INTEREST GROUPS --- Internet Linking of Repeaters

VK4's Gladstone Amateur Radio Club would like to invite fellow Hams to try restored IRLP node 6246. For locals this can be accessed on your town UHF repeater 438.050 MHz.

http://groups.yahoo.com/group/Optical_DX/

July Presentation Constructor's Night - Optical Transceivers Abound

There are now 20 more optical transceivers in Southern Tasmania and even two on their way to VK5 for their science fair!

It was fantastic night with a full house of constructors all eager to get into building their transceivers. Even a few guests along in young Sam who is Patrick VK7FPJB's cousin and dare we say it ..... young Sean who came along with Ben VK7BEN.

All the kits that were started on the night were finished and they got them all working and tested. Mike VK7MJ brought along his test transmitter and Justin VK7TW brought along his big optical transceiver to send and receive a signal along with a range of lenses both traditional and Fresnel and reflectors to demonstrate how the lens or reflector provides gain and increases the distance that can be worked.

>From the feedback it was wonderful night and they will certainly be planning another for next year.

Global Amateur Radio Emergency Communications Conference 2010

The role of amateur radio following the devastating earthquakes in Haiti and Chile and the lessons learnt during those major disasters, will be

discussed at GAREC 2010.

The Global Amateur Radio Emergency Communications Conference, GAREC, with the theme of 'Learning through practicing', will be held on Curacao in the Netherlands Antilles on the 11th and 12th of October.

The event is being organised in cooperation with the Dutch Amateur Radio Emergency Service and Holland's International Amateur Radio Union member society, VERONA .

The GAREC 2010 draft agenda includes attendance by International Telecommunications Union Secretary General, Dr Hamadoun Tour&#65533; HB9EHT and from the ITU's EmComm focused Development Bureau, Dr Cosmas Zavazava.

Also on the agenda are discussions on the future role of the Amateur Radio Service in EmComms, how to organise an exercise, message forwarding and technical solutions.

GAREC continues its mission of enabling the effective inter-change of information and experiences between all radio amateurs and groups that are interested in emergency communications.

Presentations from its past conferences and details of GAREC 2010 can be found on its website www.garec.net

(IARU Region 3, Chairman, Disaster Communications Committee, Jim Linton VK3PC)

Successful end to the World Cup for Region 1

Aside from the obvious success on the pitch for that Region's football teams, the Soccer World Cup final also marked the end of a one-month standby period for HAMNET, the Emergency Communications Group of South Africa.

For the duration of the tournament, HAMNET members have been ready to provide communications links from the Joint Communications Centre to anywhere where communications have been needed should there have been an incident at the event.

This was no easy task with ten venues spread across the country along with many more training grounds, fan parks or other places where the thousands of tourists or fans may have gathered.

The event has been an excellent exercise in preparedness. With much gained and nothing lost. HAMNET now has two emergency units at their disposal now with one designed into a flight case in such a way that it contains just about everything one needs in a field or ops room situation. Everything is neatly contained in the case and all the plugs are ready to be connected the antennas, power supply etc that may be needed for the occasion.

Congratulations to HAMNET and South Africa for an excellent tournament.

GB2RS NEWS

Sunday 18th July 2010

The news headlines

Team UK 9th in World Radiosport Team Championship

GB4FUN at Bedford River Festival

Get set for IOTA contest

The World Radiosport Team Championship was held near Moscow last weekend. The winners were the Russian team, operated by RW1AC and RA1AIP. Team UK achieved 9th place. This is an excellent result for the UK team, the best position ever. Team members Dave, G4BUO and Andy, G4PIQ used the specially allocated callsign R37M. The championship takes place every few years in a different country and 48 pairs of participants from many countries take part. Teams use the same power and identical antennas. The stations are also geographically close to each other in an attempt to level the playing field as much as possible, so that the winners can truly be said to be the best contesters in the world. Congratulations to Dave and Andy on their achievement.

Bedford & District Amateur Radio Club will be operating the GB4FUN demonstration vehicle at the Bedford River Festival on 17 and 18 July. All of the vehicle's demonstration equipment will be on display and members of the Bedford club will be enthusiastically explaining amateur radio to visitors. Bedford River Festival is a major event and attracts many thousands of visitors. Full details of the Festival are online at www.bedfordevents.co.uk/river_festival.asp.

The RSGB's flagship event, the Islands on the Air Contest, takes place over the weekend of 24 and 25 July. This is a major international contest, but its friendly atmosphere is also appreciated by less-experienced entrants. To encourage UK participation, particularly from newcomers, the RSGB Contest Committee is offering a Participation Certificate. The requirements are not stringent and details can be found on www.rsgbcc.org/hf. There you will also find tips on equipment, aerials and operating technique.

New digital mode ROS has been making waves around the world but it seems that development may have been stopped. The software's author, Jos&#65533; Alberto Nieto Ros, announced recently via his website that he was upset by derogatory comments posted on various news groups. He said he felt it was not worth evolving the software further and that version 1.0 would

be the last.

Indian student satellite Studsat was successfully launched on Monday 12 July aboard an Indian polar satellite launch vehicle, PSLV C-15. Four larger commercial satellites were on the same flight. The cubesat carries low power beacons on 437.861 and 437.305MHz.

The Spanish radio regulator has announced an extension to 4m privileges for EA amateurs. The segment 70.150 to 70.200 MHz can now be used by all Spanish amateurs until July 1st, 2011.

The 25th AMSAT-UK International Space Colloquium will be held on the weekend of 31 July to 1 August at the Holiday Inn Hotel, Guildford, close to the University of Surrey. The event is open to all radio amateurs and SWL's. GB4FUN will be on site for the duration of the colloquium and there will be satellite operation demonstrations as time and satellite passes allow. AMSAT-UK and individual members contributed the amateur satellite equipment in GB4FUN. Details of the Colloquium are at www.uk.amsat.org/colloquium. If you can't attend in person, you may like to know that proceedings will be streamed on the internet by the British Amateur Television Club. To view the stream visit www.batc.tv and click on the live events button.

A European Emergency Radio Conference is being organised in the German town of Gross-Gerau for the weekend of 24 to 26 September. Known as EuREC-DL, the conference aims to bring together radio amateurs and emergency services to show how the two groups can work together to increase the resilience of their communications. The conference is supported by the German Red Cross and more information can be found at www.eurec-dl.de.

Ireland's national society IRTS is negotiating with the country's regulator ComReg to secure special high power licences for use during specified contests. ComReg has asked IRTS to compile a list of amateurs who would be interested in obtaining such a licence.

And now for the details of rallies and events for the coming week

The 2010 McMichael Amateur Radio Rally and Car Boot Sale takes place today, Sunday 18 July, at Reading Rugby Club, Sonning Lane. The B4446 is just off the A4 at Sonning; for satnav users the postcode is RG4 6ST. Admission is ?2 and gates open at 9.30am. There is a large car boot area and plenty of free parking for buyers, as well as a snack bar and licensed bar. Traders have an indoor area and there will be demonstrations and displays by special interest groups. Martin Lynch & Sons will be holding their annual Summer Party at the event. Details from Pete, G8FRC, on 01189 695697.

QRP in the Country is a new event that is being held on Sunday18 July at the farm of Tim Walford, G3PCJ, at Long Sutton, Langport, Somerset TA10 9NJ. Entry is free and homebrew radio is the theme. The gates opens at 10am. In the event of poor weather, all will be under cover in the cattle sheds. More information from Tim Walford on 01458 241224.

Also on Sunday18 July, the Macmillan Northampton Hamfest takes place at Roade Village, Northamptonshire. There is no entry fee, no traders fee, only a request for donations to Macmillan. All refreshment monies will go to Macmillan too. Contact G6NYH on 01604 234333.

On Sunday 25 July the Horncastle summer rally takes place at Horncastle Youth Centre, Willow Road, Horncastle, Lincolnshire LN9 6DZ. Details from Tony, G3ZPU, on 01507 527835.

Also on Sunday 25th is the Colchester Radio Amateurs annual rally at St Helena School, Sheepen Road, Colchester CO3 3LE. Opening at 10am, there will be traers, a car boot sale, bring and buy and special interest groups. For more information contact Brian on 01206 822547.

Now for the news of special events

Special event station LY2010LRMD will be operating continuously on 23 to 25 July from the Lithuanian National Camping Hamfest. Details at www.lrmd.lt/saskrydziai_en.htm.

GB2CPS will be operating on 80 metres to 70cm from Castle Point Show today, Sunday 18 July.

The War and Peace Show in Kent from Wednesday 21 to Sunday 25 July sees GB4WP operating on 80, 40, 20, 2 metres and 70cm.

Other special event calls authorised this week include GB2QV, Queen Victoria, GB5HHD for Huey Helicopter Day, GB0YD for Yorkshire Day and GB4SBS for Second Bracknell Scouts. Details of many of these stations are in the current issue of RadCom.

And now the HF DX news compiled from 425 DX News and other sources

9A10P (Nine Alpha ONE ZERO Papa) - special event station will be active through the end of the year to celebrate the city of Djurdjevac. A special QSL will be issued and all of the QSOs will be confirmed automatically via the bureau.

Members of the Dalkey Island Contest Group will be on Clare for the IOTA Contest over the weekend of 24 to 25 July. The callsign will be EJ1DD and the operators are Paul, EI2CA, Peter, EI7CC, Sean, EI7CD, Seamus, EI8BP, Ger, EI8CC and Aiden, EI8CE. QSL Manager is EI7CC. The IOTA reference is EU-121 and for the lighthouse enthusiasts the WLOTA reference is 1935.

Strumble Head DX and Contest Group are activating Ramsey Island, IOTA reference EU-124, using the club call MC0SHL. They will be on the air from 22 July through to 26 or 27 July, depending on the tides. During the IOTA contest they will sign MW9W. Three stations will be on the air, mostly SSB but with some RTTY and CW too. All QSL requests should go via the team manager M0URX, see www.m0urx.com.

Now the contest news

Low Power Field Day takes place on Sunday 18 July. Using appropriate and efficient antennas is key to success, because with low power you need to direct as much as possible of your RF at the right angle for the kind of distances that you can expect to work. Most QSOs take place around Britain, but on 40m in particular the Continent will be worked. Of course you'll need a good pair of ears for this event, because the signals from some competing stations will be extremely weak. There are four sections to enter, two for portables and two for fixed stations, with a total of three trophies to be won. Starting at 0900 and ending at 1600UTC, it's CW only and the exchange is signal report, serial number and power.

The 70MHz Trophy on also the 18th. Traditionally this event was held in August, but it has now been brought forward by a month to bring it into the Sporadic-E season. With the band available to an ever-increasing number of countries, last year just under 200 stations from twelve countries appeared in the logs. Compare this to ten years earlier, when nobody's Best DX was outside of the UK. The number of entries received has remained remarkably steady though, with 31 in 1999 and 36 in 2009. Running between 1000 and 1600UTC, all modes may be used and the exchange is signal report, serial number and locator.

The Worked All Britain QRO 2m Phone contest takes place on Sunday 18 July between 1000 and 1400UTC. Multipliers are WAB squares and DXCC countries. You don't have to be a member of the award scheme to partake or give points away. Using all modes in the 2m band the exchange is signal report, serial number and WAB square.

Tuesday 20 July sees the UHF UKAC from 1900 to 2130 UTC. Operation is all mode on 23cm and 13cm; RST, serial number and locator form the exchange.

The RSGB's flagship event, the Islands on the Air Contest, takes place from 1200 to 1200 on 24 to 25 July. Operating modes are CW and SSB and all contest bands from 80 to 10m can be used. The exchange is RST, serial number and IOTA reference.

And now the solar factual data for the period from the 5th to the 11th of July, compiled by Neil Clarke, G0CAS on the 12th of July.

The large single spot mentioned in last weeks continued to rotate across the solar disc until the 8th when it rotated out of view. Interestingly, this is the first sunspot group to transverse from one limb to the opposite limb of the solar disc this year. On the 9th a medium sized sunspot group rotated into view, this was more magnetically complex and on the 8th and the 9th produced C class solar flares which increased solar activity to low levels. Also this group was responsible for the increase in solar flux levels, increasing from 73 units on the 5th to 83 units by the 10th. The average was 77 units. The 90 day solar flux average on the 11th was the same level as last week at 75 units. X-ray flux levels increased from A4.5 units on the 5th to B1.8 units by the 10th and the average was A9.2. Geomagnetic activity was quiet every day and the average was Ap 4 units. Solar wind data from the ACE spacecraft

saw solar wind speeds decline from 520 kilometres per second on the 5th to 250 by the 10th. Particle densities were low throughout. Bz varied no more than minus 6 and plus 5 nanoTeslas, all the solar wind parameters are what we would except with a quiet geomagnetic field.

And now the solar forecast. This week the quiet side of the Sun will be rotating into view later in the week. Solar activity could be at low levels at first but later in the week decline to very low levels. Solar flux levels are expected to be in the 80's at first but by next weekend have declined back into the 70's. Geomagnetic activity is expected to be at quiet levels until later in the week when a recurring coronal hole is expected to arrive and last for most of the weekend. The disturbance is not expected to be too strong. MUFs during daylight hours at equal latitudes are expected to be 19MHz for the south and 16MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 18MHz. The optimum working frequency with a 90 per cent success rate will be about 14MHz. The best time to try this path will be between 1600 and 2200 hours. Sporadic-E is expected to take place most days and during any large intense openings then openings could still take place on 144MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

NEWS FOR THE MIDLANDS

On Sunday 18 July Kettering & District Amateur Radio Society is having a social meet from 10am. Details on the web at http://kdars.co.uk.

On Monday 19 July Gloucester Amateur Radio & Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 19 July South Birmingham Radio Society is holding a committee meeting. Contact Don, on 0121 458 1603.

On Monday 19 July Welland Valley Amateur Radio Society is having a DF hunt. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 20 July Derby & District Amateur Radio Society has a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 20 July Kettering & District Amateur Radio Society is on the air from 7 to 9pm. Details on the web at http://kdars.co.uk.

On Tuesday 20 July Loughborough & District Amateur Radio Club is having a 2m DF hunt, using the new rules. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 20 July Wythall Radio Club is having a homebrew night. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 21 July Bolsover Amateur Radio Society is having a general CW talk and practice night for anyone interested in Morse. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 21 July Kettering & District Amateur Radio Society is having a gentleman's group afternoon. Details on the web at http://kdars.co.uk.

On Wednesday 21 July Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 21 July Midland Amateur Radio Society is on the air and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 21 July Telford & District Amateur Radio Society is having a walking fox hunt on 2m with G3JKX as fox. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 22 July Kettering & District Amateur Radio Society is having a training night. Details on the web at http://kdars.co.uk.

On Thursday 22 July RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. Details from Judy Rowlands, on 07544 456422.

On Friday 23 July Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777363.

On Friday 23 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 24 July Lincoln Short-Wave Club is putting G5FZ on the air and doing jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 24 July Wythall Radio Club commences its Foundation Course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Sunday 25 July Kettering & District Amateur Radio Society is having a social meet from 10am. Details on the web at http://kdars.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Sunday 18 July Hornsea Amateur Radio Club is taking part in low power field day from 9am until 4pm. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 19 July Angel of the North Amateur Radio Club is having a talk on software defined radios by Bill Gleave, G8YWK. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 19 July Hornsea Amateur Radio Club starts setting up for IOTA. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 19 July Scarborough Amateur Radio Society is having a talk on the semi auto ATU by Ger Akse, G0UVR. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 19 July Sheffield Amateur Radio Club is having its summer fox hunt. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 19 July Workington and District Radio and IT Group is having a talk on vertical antennas by Steve, G0MTD. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Tuesday 20 July Chester & District Amateur Radio Society is having a radio operating evening. Details from Barbara Green on 07957 870770.

On Tuesday 20 July Halifax & District Amateur Radio Society invites members to talk about their favourite pieces of equipment. Contact Anthony Vinters, on 01422 822636.

On Tuesday 20 July Morecambe Bay Amateur Radio Society holds its construction competition. For more information contact Martin Hazel, M0ZIF, on 01524 848193.

On Tuesday 20 July Otley Amateur Radio Society is having a general shack night. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 21 July Hornsea Amateur Radio Club is having a fox hunt. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 22 July Brigg & District Amateur Radio Club is having a radio and general knowledge quiz with Fred, G0AOJ. Details from John, 2E0III, on 01652 632938.

On Thursday 22 July Hornsea Amateur Radio Club is taking part in the 80m Club Data Contest, home stations. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 22 July Preston Amateur Radio Society is on the air. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 22 July South Manchester Radio and Computer Club is having a talk on the theory of wireless by Ron, G3SVW. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 22 July Wakefield & District Radio Society is having a radio quiz with Dave, G4CLI. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 23 July East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 24 July Hornsea Amateur Radio Club commences its weekend event for the IOTA contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Saturday 24 July Otley Amateur Radio Society is taking part in the IOTA Contest. Contact Paul, 2E0PAK, on 07768 996370.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 20 July Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 21 July West of Scotland Amateur Radio Society is working on construction projects and license training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 22 July Aberdeen Amateur Radio Society Club is closed. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 23 July West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle and quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Saturday 24 July Cockenzie & Port Seton Amateur Radio Club RSGB IOTA Contest from the Island of Tiree. More information from Bob, GM4UYZ, on 01875 811 723.

On Saturday 24 July West of Scotland Amateur Radio Society weekend event IOTA Contest from Rhum. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH-EAST and EAST ANGLIA

This man has gone so far as to use the name (and post over it) of the daughter of an Amateur Radio operator who held his disabled, beloved, five year old daughter as she breathed her last while her father was holding her. (this is an aside, but shows the mindset of the spammer) Such cruelty is unforgivable and inhumane, though not necessarily a ToS violation of your policy. He uses her name as Tayleor Robesin.

Searches have determined that the abuser is indeed one Mark Morgan from Chassell, Michigan. He posts via Hughes.net.

SARL NEWS - SUNDAY 18 JULY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with deep regret that we must announce that two radio amateurs became silent keys recently. They are: Don, ZS6ABC, on the 9th July and Fanna Botha, ZR6FPM, on the 15th July. We extend our sincere condolences to their relatives and friends.

(PAUSE)

In the news today:

RADIO AMATEUR EXAMINATION PROCESS STREAMLINED

CONTESTING SIMPLIFIED

GAREC 2010 ON CURA&#65533;AO IN OCTOBER

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

RADIO AMATEUR EXAMINATION PROCESS STREAMLINED

The Council of the SARL has streamlined the Radio Amateur Examination Process in order to deliver the results and call signs to successful candidates faster. With immediate effect candidates can only enter for one examination, in other words for the class A or Class B. It will no longer be possible to write both examinations at the same time. The closing date will be strictly adhered to. No late entries will be accepted. "It will be necessary that candidates submit all documents as set out in the RAE guidelines published on the web including the HF assessment", said SARL RAE Manager, Mark Zank, ZS6YES. A candidate

who's Registration is incomplete by the closing date will not be able to write the examination and not receive an examination number.

"While it may sound harsh, the reality is that it is the few candidates who do not comply with the guidelines who delay the callsign and licensing process of all the other candidates as was experienced with the May examination", Mark said. Ensuring that all documentation is received by the entry deadline will also assist ICASA in speeding up the licensing process.

"In future successful candidates will receive their callsign with the results and they will be able to go on the air immediately. The SARL will also issue certificates to all successful candidates and will engage with Echolink administrators to recognize the SARL certificate as being fully licensed. "This process can only be successful if clubs assist candidates to do their HF assessments before the examination closing date", Mark said.

THERE WILL BE A BUZZ AROUND IN CAPE TOWN NEXT SATURDAY

Call it a buzz or a noise, whatever you like, it is a demonstration of D-Star, the digital revolution hitting amateur radio. It is all happening at the SARL Radio Technology in Action 2010 at the Cape Peninsula University of Technology on Saturday 24 July. Registration starts at 08:15. Get the full programme on www.sarl.org.za, click on rta and down load the PDF file. You can also send a request to www.rta.org.za with RTA CT in the subject line and a copy will be mailed you.

The programme includes presentations by the Hermanus Magnetic Observatory, and Multisource. Learn more about Digital Signal processing and Amateur Radio Direction Finding and visit the laboratory where South Africa's first CubeSat is being built. Entrance is R50 including refreshments and a ticket in the attendance draw sponsored by RS. Students and learners attend free. Just get there!

The ARRL 2010 Handbook and the ARRL antenna book will be available at the RTA in Cape Town. You are advised to pre-order and collect the book at the RTA. Get details from www.amateurradio.org.za.

COMPETITION NEWS

Results of the Top Band contest held from the 17th June 2010 to 20th June 2010

A total of 10 logs were received. Stats from the 10 logs received show that at least 52 call signs were active but why were only 10 logs submitted?

Problems encountered with the logs were incorrect RST reports and wrong frequencies. Please read the rules of the contests.

1st ZS6YI - Gary Immelman 143 points 2nd ZS6GRL - Geoff Levey 137 points 3rd ZS6PVT - Phillip van Tonder 110 points

The full results will be published on the forum and in HF Happenings.

CONTESTING SIMPLIFIED

Over the next few weeks, SARL Contest Manager Geoffrey Levey will highlight details of the up and coming contests. This week SARLNEWS focuses on the SARL HF Contests.

The aim of the SARL HF Phone Contest is for participants to contact as many amateurs in Southern Africa as possible on the 20, 40 and 80 m bands. The HF Phone contest takes place on Sunday 1 August 2010 from 13:00 to 16:30 UTC. The following frequencies may be utilized - 14,125 to 14,350 MHz; 7,060 to 7,100 and 7,130 to 7,200 MHz; 3,603 to 3,650 and 3,700 to 3,800 MHz.

There are four categories of participation - a) Single Operator Single Band; b) Single Operator All Band; c) Multi Operator Single Band or d) Multi Operator All Band. The exchange is a RS report and a consecutive serial number starting at 001. A multi-operator station transmitting on several bands simultaneously may at their discretion use separate number sequences for each band.

Each contact counts 1 point, each call area worked on each band counts 2 points and each station contacted on all three bands counts 2 points. Contacts with stations outside these areas are allowed, QSO points may be claimed but no zone or three-bander points may be claimed. More details including the call areas are available in the contest manual. Download it from www.sarl.org.za and select contests in the left hand column.

There are trophies and certificates awarded for the highest overall score as well as the highest score on a single band. Logs must be submitted within 15 days to the Bloemfontein Radio Amateur Club, Box 12104, Brandhof, 9324 or sent by e-mail to zs4bfn@netactive.co.za. The closing date for the log submissions is 16 August 2010.

Participants under 19 years old and participants over 18 years old will take part in two separate draws for a 2010 ARRL Handbook and an ARRL Antenna book respectively.

Get those antennas in order and get radio active in the SARL HF Phone contest on 1 August.

BOLAND 40 METRE SPRINT NEXT WEEKEND

The aim of the Boland ARC 40 metre Sprint is a fun activity to promote contacts on 40 metres between radio amateurs in Southern African countries. The Sprint runs from 13:00 to 16:00 UTC on Sunday 25 July 2010. Radio amateurs can participate as fixed or mobile stations, mobile stations include field stations and portable stations. The exchange is your call sign, a RS report and the year in which you were first licensed. Full details on www.zs1BAK@bark.org.za.

The next SARL 80 m Club Contest is on the air on Wednesday evening 28 July from 17:30 to 18:30 UTC. This is a phone contest and the exchange

is a RS report and a consecutive serial number starting at 001. Which club will have the most participants?

To celebrate National Women's Day on Monday 9 August, the SARL YL Sprint will be on the air on 40 metres from 09:00 to 10:00 UTC. The exchange is a RS report and YL or OM. Contacts between YL stations are worth 5 points; contacts between YL and OM stations are worth 3 points and contacts between OM stations are worth 1 point.

The rules for these contests are available in the 2010 SARL Contest Manual.

Join Geoffrey and Derek tonight as during the intecnet they will discuss contests and contesting. Intecnet is on the air at 19:30 CAT on various repeaters and on HF on 3 718 kHz.

GAREC 2010 ON CURA&#65533;AO IN OCTOBER

The 2010 Global Amateur Radio Emergency Conference or GAREC will be held on 11 and 12 October on the island of Cura&#65533;ao in the Netherlands Antilles.

The missions of the conference are to get radio amateurs better prepared for emergency communications. This, by creating what can best be called universal operating practices at both national and international levels. The conference is also a place to exchange information and experiences between radio amateurs and groups that are interested in emergency communications. SARL Hamnet will be represented at this important meeting. In August 2011 the SARL will host GAREC 2011 in South Africa.

The planning for the event is progressing with the first draft program of events available from the GAREC website at www.garec.net. The program will continue to change as speakers and activities are confirmed in coming months. Registration and hotel information can also be found at the Website.

CLUB NEWS

The Centurion Radio Amateur Club held a very successful Annual General Meeting on Saturday 10 July 2010 at the Scout Hall in Wierda Park. The following Committee members were elected:

Chairman: Pam Momberg, ZS6APT; Vice Chairman: Ben Booysen, ZS6BTB; Secretary: Sakkie Schoonraad, ZS6IJS; Treasurer: Pam Momberg, ZS6APT; Technical Coordinator: Pieter du Toit, ZR6ZDT.

The Club thanks the outgoing committee and chairman for their good work during 2009-2010.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 087 is starting to slowly shrink in size. The

effective sunspot number is expected to be less than 15 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the afternoon till sunset. During sunset it will be good towards Europa. Contacts with the USA are still challenging. Contacts with Australia are possible on 40 m after sunset. Contacts with Brazil and South America are challenging.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Local conditions are going to be good during the day time on 40 m. With the change of season 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in noise levels 80 m is best for the shorter distances and also during the early mornings and late afternoons and evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 July - Intechnet tonight at 19:30 on competition matters; 23 - 24 July - Preparation and launch of the HABEX balloon project; 24 July - RTA symposium in Cape Town; 25 July - Boland ARC 40 m Sprint 13:00-16:00 UTC; 28 July -SARL 4th 80 m Club Contest 17:30-18:30 UTC; 1 August - SARL HF Phone Contest 13:00 to 16:30 UTC; 2 August - Closing date for PIC course in Pretoria on 14 August; 2-7 August - National Science Week at Sci Bono and ZS6SCI on the air from 09:00 till 14:00 CAT; 9 August - SARL YL Sprint on 40 m 09:00 to 10:00 UTC; 12 - 14 August - International EME Conference, Dallas, Texas; 14 August - PIC course in Pretoria; 16 August - Logs for SARL HF phone competition must be in.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

Debby Says...

Membership promotion for Branches

At Council's face to face meeting in Auckland, it was agreed that a membership drive needs to be implemented and the sooner the better.

The closest people to the coal face are branch members and you all, are, have been or will be one, of these people. You are aware of your community and it's people and probably the best informed of what will work to encourage new candidates and members to the Association.

In recognition of branches encouraging new members to the Association, and for every new member's application submitted BY A BRANCH, the branch will be refunded half the annual subscription of the new member on receipt of that application. This applies only to one whole years subscription of $95 and cannot be used in conjunction with a new amateurs application for a call sign, as they will automatically receive one-year subscription free.

The definition of a new member to the Association is one who has never been a member nor belonged a period of 5 years or more.

If you need more information on this, please do not hesitate to contact either your Council representative or myself.

Subscriptions for 2011

Included in the next issue of Break In, due out at the beginning of August, you will receive your annual subscription invoice.

Please pay this by the end of November 2010 to be eligible for the $15 rebate, or alternatively if you are wanting to make regular payments, please contact me for details on what you need to include in your payment reference details.

Please remember anyone wishing to pay monthly does not qualify for the early payment rebate.

Talk soon...Debby ZL2TDM

ZL3 Buildathon Christchurch

ZL3 Buildathon Christchurch events will be held Thursday July 8th and Thursday July 15th as part of the CCC Kidsfest.co.nz holiday programme at Kendal School, Kendal Avenue, Burnside, Christchurch, 8:30am for a 9am start.

Fifteen Christchurch kids 10-14 years will be building AM radio kitsets and they'd welcome some local hams to guide soldering and assembly.

If you could spare just a morning, please call David Searle 03 358 2424 or

e-mail zl3dws@nzart.org.nz today.

More info at:

http://sites.google.com/site/zl3buildathon/

RSM Call Book Database is on The NZART Website

The NZART Administration Liaison Officer, Don Wallace ZL2TLL, has obtained a pre-Call Book copy of the RSM Call Book Database that is on the NZART Website, but sadly not to stay ED.

The purpose of this is to give people the ability to check their own and their friends listings and for the person with the entry in error to get in touch with RSM to correct any errors. This will then give us a more accurate Call Book.

Details can be updated either online at:

http://www.rsm.govt.nz/smart-web/smart/page/-smart/WelcomePage.wdk

(you will need your log in details) or by phoning RSM on 0508 776 463.

For Silent Keys, there is a form available at

http://www.nzart.org.nz/policies/2006-callsign-removal-form.html

and this can be filled in and posted to Debby at HQ (PO Box 40-525 Upper Hutt 5140) with relevant supporting documentation by a person authorised to do so.

For further information, please see the help files online at:

http://www.nzart.org.nz/call-book/index.html

or contact RSM as above

Tony Case ZL1UD

Northern District Council Member

Petition to Prohibit AR DV & Internet Access in France

For all European Citizen.

Please fill in your personal information, to participate to our Petition. This petition is open for all European people (Art. 194). DR@F French society will present it to European Parliament in name of all people who signed it.

Our complaint make reference following facts:

1) ARCEP French Local Regulator Authority doesn't apply European Directive 1999/5/CE, as "radio equipment and telecommunications terminal equipment and the mutual recognition of their conformity", but for national security reason to prohibit Amateur Service Operators in France to use Digital Voice and Internet Access for experiment and individual training and doesn't respect Annex I, ham-radio operator that are building their own radio aren't regarded by this law.

2) ARCEP French Local Regulator Authority don't respect Directive 2009/140/CE art. 1 - paragraph b) about fundamental right to access to Internet Services from final users.

With thanks to NZART Monitoring Service (MS) Officer, John ZL1GWE

FCC Archive Has ZL Information and a Frequency Standard 1930 Style

Dear Jamie,

You may find the following link interesting enough for NZART web page:-

http://www.fcc.gov/ftp/Bureaus/Mass_Media/Databases/documents_collection/300430.pdf

At pages 21 to 23 inclusive the FCC lists (as Australians!) ZL amateur and experimental callsigns as at April 1930.

As a bonus, on part of page 23 and over to page 24 it gives a detailed description of a frequency standard, early 1930s style.

(How I found this was that a new licensee asked about the history of Auckland Grammar radio club, with the clue that the science master had the surname of Salt.I recognised this as Gordon (G McB) Salt.He later became NZART President 1960-1962.

G McB Salt plus Google produced the above link, but I had to click over all pages to find the actual entry.Included in the list of callsigns are ZL1AA (then Norm Edwards, now Auckland Branch), ZL1FZ (Auckland Grammar club) and ZL1XI (Auckland University club)

Please use this information or pass it on as you see fit.

Comment: The significance of radio science in New Zealand education seems to have faded over the years.

73 de Selwyn Ross ZL1BRC

zl1brc@nzart.org.nz

Thank you Selwyn for the interesting find. I have extracted the pages from the pdf file and these can be found at:

Extract from a FCC archive docuument:

First Half of 2010 Sees Upswing in New Amateur Radio Licenses in The USA

With more than 18,000 new Amateur Radio licenses issued in the first half of this year -- 18, 270 to be exact -- 2010 is shaping up to be a banner year for Amateur Radio. So far, the number of new licenses issued by the FCC in 2010 is outpacing the January-June 2009 totals by almost 8.5 percent; at this time last year, the FCC had issued 16,844 new licenses....

CO2 and Collapsing Thermosphere . . . ? Hmmm . . . Might be of Interest

If indeed CO2 does have an influence, would methane also have an influence, and if so, would the Gulf disaster releases of methane, plus the Siberian traps releases of methane due to global warming . . . create something more . . . ?? Seems to be opportunity for scientists to investigate further . . .
bob g

A Puzzling Collapse of Earth's Upper Atmosphere

July 15, 2010: NASA-funded researchers are monitoring a big event in our planet's atmosphere. High above Earth's surface where the atmosphere meets space, a rarefied layer of gas called "the thermosphere" recently collapsed and now is rebounding again.

Image not shown here ED

Layers of Earth's upper atmosphere. Credit: John Emmert/NRL. [larger image]

"This is the biggest contraction of the thermosphere in at least 43 years,"says John Emmert of the Naval Research Lab, lead author of a paper announcing the finding in the June 19th issue of the Geophysical Research Letters (GRL). "It's a Space Age record."....

DX Bulletin No. 968
BID: $OPDX.968
July 19, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, WO2N, W2VU, NG3K & ADXO, WP3GW, N4AA & QRZ DX, W5JON, K6LSN, K7BV, K8YSE, W8GEX (60m News), 9A2JK, AT International, DL7MAE & The DX News Letter, DX World.Net, EA3RKR, F6AJA & Les Nouvelles DX, HA0HW, HP1AC, I1HYW, I1JQJ/IK1ADH & 425 DX News, LZ1BJ, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM3CVM, UN6QC, UR5BCP, VA3RJ & ICPO, VE3ZIK, VHF-DX-Portal (MMMonVHF) for the following and YU3MMM DX information.

*** EDITOR'S STATUS: This week was little better. The immobilizer was removed from my right leg and changed to a hinged brace (a lot smaller and more comfortable). However, still have to use crutches and can not put weight on the right leg. I got to see the knee at the doctor's office and it looks good and healing well. I am learning how to move around more on one leg, but it is still NOT EASY. I am starting to get braver/better going up and down the stairs, but not too often. Each day seems to get better. Thanks to the many well wishers.... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11th-July, through Sunday, 18th-July there were 211 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

6W, SENEGAL. Gerard, F5NVF, will be active as F5NVF/6W between October 25th and November 1st. Activity will be on CW on the HF bands. No other details were provided. QSL via his home callsign.

9H3, MALTA (Update). A group of Italian operators will be active as 9H3Y from Gozo Island (EU-023) between July 24-31st. Activity will include the RSGB IOTA Contest (July 24-25th). Operators mentioned are: Marcello/IT9ABY, Peter/IT9WKU, Delly/IT9ZRU, Antonella/IW9HJT and possibly others. QSL via IT9ABY, prefered direct and Bureau accepted. They now have a Web page at: http://www.9h3y.it

9A10, CROATIA (Special Event/WFF Op). Look for special event station 9A10P/P (Nine Alpha ONE ZERO Papa / portable) to be active from a protected geographical-botanical reserve "Djurdjevacki Pijesci", also known as "Croatian Sahara", (9AFF-032) on July 25th. All of the QSOs will be confirmed automatically via the Bureau. For more info about the "CROATIAN FLORA FAUNA Program", see: http://www.9aff.com

9X, RWANDA. Tom, DL2RUM, will be back in Kigali this week for business. He hopes to receive his license on Wednesday, July 21st. Tom's callsign 9X0TL was assigned to him. This is not a dedicated DXpedition, so activity will be limited to his spare time. He states that there will be interruptions in his activity (6-8 days each), but he will be there until the end August or the beginning of September. Operations will be on 80-6 meters using CW, SSB and RTTY. Equipment: K3 w/600 watt solid state PA, Butternut HF-9V, HB9CV (6m) and wire antennas. QSL via DL2RUM. More info and an online log will be available at: http://dl2rum.de

A SUPERIOR GRIDS EXPEDITION. John, K8YSE, will be activating multiple grids around Lake Superior on the FM and Linear satellites beginning around August 2nd. He plans to operate from the following grids: EN28-29-36-37-38-39-46-47-48-49-56-57-58-59-63-64-65-66-67-68-69-73-74-75-76-77-78-79-83-84-86-87 and EO30 in both the US and Canada. An APRS beacon (K8YSE-8) will be on during the trip and also the via ISS digi when there are no local digi's in range. There will be some operations on 6 meters including an all day effort from Brockway Mountain, Copper Harbor, MI, in EN67. See John's QRZ.com page for more details and grid map. If you have specific requests, E-mail John at his QRZ.com E-mail address. QSLs will be sent to everyone in the log. Requests/SASEs are not necessary. If you want to send an SASE, please wait until the trip has ended and include all requests in one envelope. Cards or simply a listing of the QSOs will be fine.

AM/AN/AO, SPAIN (Special Prefixes). To celebrate Spain winning the World Cup Champion, the Directorate General of Telecommunications of Spain has authorized Spanish stations to use the following special prefixed until end of July (July 31st): AM - EB distinctive prefix
AN - EC distinctive prefix
AO - EA distinctive prefix

CQ COMMUNICATIONS PRESS RELEASE. Richard Moseson, W2VU, Editorial Director, reports on July 15th: Popular Communications Launches Streamlined Website
(Hicksville, NY) -- Popular Communications magazine has launched a new and easier-to-navigate website. The updated site features a clean new look and a streamlined user interface to make it quicker and easier for visitors to find what they are looking for.
Current issue highlights include sample pages in full-color layout to give prospective readers the ability to see what the magazine itself looks like in print. Live links to Internet sites mentioned in upcoming issues' editorial content will help users further explore topics of interest. Highlights of back issues remain on the website with easier access than in the past. The site also includes contact information for editors and columnists, direct links to advertisers' websites, other CQ Communi-cations publications and an extensive collection of hobby radio links and radio club information. In addition, a direct link to the magazine's Facebook page makes it simple for readers to provide feedback and connect with other hobbyists.
"We're excited about Popular Communications' redesigned, 'reader-friendlier,' website," said Editor Edith Lennon, N2ZRW. "Its links provide value to current readers looking for additional information, as well as hobbyists who are just discovering Pop'Comm."
Popular Communications is the world's #1 magazine for scanning enthusiasts,
shortwave listeners, broadcast DXers and other radio hobbyists. It has been in monthly publication for nearly 30 years.
Pop'Comm is published by CQ Communications, Inc., which also publishes CQ Amateur Radio, CQ VHF and WorldRadio Online magazines. The new Popular Communications website may be accessed at:
http://www.popular-communications.com

GJ, JERSEY. Members of the Bristol Contest Group will be active as GJ6YB during the RSGB IOTA Contest (July 24-25th) from Jersey (EU-013, WLOTA L-0818) as a Multi-Op/Island-DXpedition entry. QSL via G3SWH, direct or by the Bureau.

IOTA NEWS.....
AS-014. Members of The Royal Omani Amateur Radio Society will be active as A43MI from Masirah Island during the RSGB IOTA Contest (July 24-25th). QSL via A47RO.

AS-017. Toshi, JO3EVM, will be active from Okinawa Honto Island between July 28-30th. Activity will be on SSB and RTTY. QSL via his home callsign.

AS-024. Toshi, JO3EVM, will be active from two islands in this IOTA group; Iriomote Island between July 27-28th and Kobama Island between July 28-30th. Activity will be on SSB and RTTY. QSL via his home callsign.

AS-053. Simon, HS0ZIB, will be active as HS0ZIB/p from Lanta Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/ 12HR/DXpedition/Low-Power entry. Activity will be primarily 20 meters SSB. Also look for activity on PSK31 (non-contest).

Please QSL direct (see QRZ.com for address details).

EU-005. Operators Gordon/MM0GOR, Graham/MM0GHM and Peter/GM7AAJ will be active as GM7A from Luing Island, Scotland, during the RSGB IOTA Contest (July 24-25th) as a Low-Power/Island-DXpedition entry. QSL via GM7AAJ (via RSGB Bureau).

EU-008. Mark, M0MMK, will be active as MM0MMK/p from the Isle of Tiree (IOSA NH04, SCOTIA DI10, WLOTA L-2232) between now and July 31st. Activity will be holiday style. QSL via his home callsign, direct or by the Bureau.

EU-016. Tibor, OM3RM, will be active as 9A/OM8A from Korcula Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/All-Band/Mixed entry. QSL via OM2VL.

EU-034. Operators Andres/ES1AN, Harald/ES1LS, Arvo/ES1QV, Toivo/ES2DJ, Juri/ES2EZ, Mart/ES2NJ and Mati/ES2QN will be active as ES0U from Saaremaa Island (LH-1401), Estonia, during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/Island-Fixed/Mixed/Low-Power entry. QSL via ES2DJ.

EU-038. Ray, PE1GUR, will be active as PA6FUN from Ameland Island (WLOTA L-1059) between now and July 25th. Activity will be on 30/20/17/12 meters using RTTY. QSL via PE1GUR, direct or by the Bureau.

EU-065. Antoine, F5RAB, will be active as F5RAB/P from Ouessant Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Mixed/Expedition/24HR/Low-Power entry. QSL via F5RAB.

EU-071. Operators Franz/DF6QV, Juergen/DJ2VO and Lutz/DL9DAN will be active as TF/homecall from the Westman Islands (WLOTA L-0976) between July 18-27th. Activity will be on 160-10 meters using CW, SSB and the Digitals modes. They will have two stations on the air. They will also be in the RSGB IOTA Contest (July 24-25th) operating as TF7X along with Gulli/TF9GX. QSL direct to KT6YL.

EU-082. Operators Nick/RA1QQ and Dima/RN3GM will be active as homecall/1 from Kildin Island between August 9-15th. Activity will be from a ligthhouse (reference number[s] not provided) which stands on the island. QSL via RA1QQ (direct is preferred). There is a possibility the operators may try to activate another island if they have more free time and money.

EU-088. Jiri, OK1DRX, will be active as OZ/OK1DRX from Laeso Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Island DXpedition/Low-Power/CW entry. QSL via OK1DRX.

EU-091. Operators Fred/IK7JWX, Paolo/IK7UXW, Tiziano/IW7EFC, Sergio/I7ZTM, Simon/IZ7ATN and Vincenzo/I7PXV will be active from Isolotto Traversa (IIA BR-009, LH WAIL PU-028, ARLHS ITA-175,

WLOTA L-005 and Grid Loc. JN80xp) in the Pedagne IOTA Group during the RSGB IOTA Contest (July 24-25th) as a (Multi-Op/ Low-Power/Mixed entry. Contest callsign was not provided. Look for activity before and after the contest. Some operators will be active on the WARC, WHF, UHF, 6m.. SSB (PSK31, RTTY).

EU-093. Operators Antonio/EA5BY, Sal/EA5DY, Juan/EA5FID, Andres/EA5GRV and Paco/EA5XC will be active as AO1DX/5 from Tabarca Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/ DXpedition entry.

EU-135. Thomas, SM3DMP, will be active as SF2CW from Stora Fjaderagg between July 20-22nd. Activity will be holiday style using a TS-570DG w/100 watts and a vertical resonant only on 30 and 20 meters. He will work mostly CW but will spend time on or around 14260 kHz as well. QSL via his home callsign.

EU-136. Gerhard, OE3GEA, will be active as 9A/homecall from Losinj (ACIA IC-116, CIA-25, IOCA CI-058, MIA MC-204, WLOTA L-4295) between July 18-24th. Activity will be on CW using low power. QSL via his home callsign.

EU-138. Ewe, SM7BHM, will be active as SM7BHM/p from Hasslo Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/ Low-Power/Phone entry. QSL via his home callsign, by the Bureau or direct.

EU-140. Operators Timo/OH6GLE, Juha/OH6XX, Kari/OH5TS and possibly others will be active as OG5A from Kuorsalo Island during the RSGB IOTA Contest (July 24-25th). QSL via OH5AD.

EU-141. Operators Reiner/DL3BRE and Harald/DL7VSN will be active as LA/DL3BRE from Vardo Island between July 23-27th. Activity will be on 80-6 meters using a beam and GP. They will also be in the RSGB IOTA Contest (July 24-25th) as a Multi-Op/CW/24HR entry. QSL via DL3BRE.

EU-150. (Update/New WLOTA) Operators Antonio/CU8AS, Arlindo/CT1EGW, Jose/CT1END, Joao Rafael/CT1BOP, Luis/CT1EEQ, Luis/CT4NH and Hermann/HB9CRV will be active as CR6W from Insua Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/DXpedition entry. They will run 100 watts and with the antenna limitations of one element per band, i.e. GPs or dipoles. QSL via CS1GDX. This be a new WLOTA reference number: 2869. Look for some activity before the contest starting July 21st. Callsigns may be CT7/CT3FN/p or CT7/CU8AS/p. For more info, see: http://www.to-mk.com/neu

EU-153. Operators Andrei/RA3WJ, Pavel/RA1OZ and Valery/RW3WW will be active as RW3WWW/1 from Shogly Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. QSL via RW3WWW.

EU-170. Look for Laszlo, 9A/HA6NL (possibly 9A0NL) and Zsolt, 9A/HA6PS, to be active again from Pasman Island (IOCA: CI-085), Croatia, between July 21-30th. They will also take part in the RSGB IOTA Contest too. QSL via operator's home callsign, by the HA QSL Bureau or direct.

EU-170. Operators Alen/9A3MA, Rolando/9A3MR, Ante/9A8RA and Zik/VE3ZIK will be active as 9A1CKL from Zirje Island (CI-151) during the RSGB IOTA Contest (July 24-25th) as a Multi-Single entry. There will be also some activity prior to contest using their own callsigns. QSL via the Bureau.

EU-174. Laci, HA0NAR, will be active again as SX8R from Thassos Island, Greece, during the RSGB IOTA Contest (July 24-25th). Before the contest he will be active on all HF bands using CW and SSB, plus 6 meters. QSL via his home callsign, by the HA Bureau or direct.

EU-181. Operators Gabriele/LZ/IK3GES, Stan/LZ1GC/1, Boyan/LZ1BJ/1 and XYL Ely/LZ1JB/1 will be active from Sveta Anastasiya Island between July 23-27th. Activity will include an entry in the RSGB IOTA Contest. They plan to use 1000 watts into a beam and wire antennas on 40/30/20/17/15/12/10 meters. QSLs are preferably via the QSL Bureau to their home callsigns.

NA-014. Operators Fred/VE1FA, Helen/VA1YL, Howard/VE1DHD, Rich/VA1CHP, Alphonse/VO1NO, Lowell/VY2OX, William/VE1MR and Lynn/VE1ENT will be active as VC9A from Whitehead Island (CISA NB-010) during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/ High-Power/DXpedition entry. Activity will be on 80-6 meters using CW, SSB and possibly RTTY. Look for activity before and after the contest between July 23-26th. QSL via VE1DHD.

NA-031. Bill, W1WBB, will be active from Aquidneck Island, RI, during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Island-Fixed/12HR/CW (possibly Mixed)/Low-Power entry. Activity will be on 80-10 meters. QSL via his home callsign, direct or by the Bureau.

NA-058. Jeff, KU8E, will be active from St. Simons Island, GA, during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Low-Power/ CW entry. QSL via KU8E.

NA-127. Operators Barry/VE1TRI and John/VE1CDD will be active as VE1TRI/P from Long Island during the RSGB IOTA Contest (July 24-25th). QSL via VE1TRI by the Bureau.

NA-197. Wayne, K9YNF, will be active as K9YNF/KL7 from Fox Island, Alaska, between August 16&#65533;20th. Activity will be on 14260 or 18128 kHz on SSB. Pilot station is K9JE. QSL via his home callsign.

IS0, SARDINIA. Operators Gabriel/EA3AKA, John/EA3GHZ, Enrique/EA5EOR and Dina/EC5BME are now active as IS0E from Sardinia (EU-024, IIA SD-001,

MIA MIS-035) until July 24th. Activity is on 80-10 meters using CW and SSB, and with two stations on the air. QSL via direct or by the Bureau to EA5KA. Visit their Web page for more information at: http://is0e.dxciting.com

KH6BZF PROPAGATION FORECAST/REPORT (For July 19-25th)....
Jul 19 AN SOLAR REFERENCE KEYS
Jul 20 AN --------------------
Jul 21 AN BN - Below Normal
Jul 22 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 23 AN LN - Low Normal
Jul 24 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 25 AN-HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MJ0, JERSEY (EU-013). Mat, F5SHQ, will be active as MJ0ASP during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Low-Power/Mixed/24HR entry. QSL via MJ0ASP.

N6, UNITED STATES (Special Event/WFF Op). Look for special event station, N6L, to be active from Lassen Volcanic National Park (WFF KFF-049, WVA-09, W6/SOTAs) between August 7-14th. This will be a Multi-Op and Portable/Mobile Op. Activity will be on the HF, WARC and VHF bands. A QSL and certificate is available. QSL via K6LSN. For more info, see N6L on QRZ.com or visit the Web page at: http://lassenbirthday.blogspot.com

OH0, ALAND ISLAND. Operators Max/DK1MAX, Miro/OM5RW, Tomi/OH2BEN, Pertti/OG2M and Marko/OH3XR will be active as OH0/homecall from Kumlinge Island (EU-002) between July 21&#65533;27th. Activity will be on 80-2 meters as well as the RSGB IOTA Contest (July 24-25th). QSL via their home callsign.

OJ0, MARKET REEF. Members of the Scandinavian Amateur Radio Teleprinter Group (SARTG) will activate the special callsign OJ0SARTG during the SARTG WW-RTTY Contest (August 21-22nd) as a Multi-Single entry. Operators mentioned are Kari/OH2BP, Charlie/SM4RGD, Jan/SM5FUG, Ewe/SM7BHM and Nils-Goran/SM7CAS. Look for activity the day before and after the contest on CW, SSB and RTTY with operators signing OJ0/homecall. QSL OJ0SARTG via SM7BHM, direct or by the Bureau.

PA10, NETHERLANDS (Special Event). Fred, PA0FAW, will use the special event callsign PA10WSF between August 2-30th. Activity is to celebrate the "World Statues Festival" in Arnhem <http://www.worldstatues.nl/> which takes place between August 28-29th. Activity will be mainly CW and the Digital modes. A special QSL will be issued and will be available via the Bureau, direct (preferred), eQSL (no LoTW), and of course SWLs 100%.

PJ7, SINT MAARTEN (Update). Joe/W8GEX and Craig/K9CT report, "Planning is well underway." Co-leaders Joe/W8GEX and Craig/K9CT were on the island this past week and have secured property for the CW and SSB stations to be located on the east and west sides of the island. These locations have clear shots to EU and NA. ICOM is providing IC7600s, and Alpha will be providing their amplifiers for this DXpedition. Four stations will be on continuously and manned by a 12 person team of experienced international operators. Logistical planning was completed for all of the equipment. Their plan is to provide a loud signal for everyone to get a new DXCC entity on 10/10/10 for 10 days. Local government, business and ham community have provided wonderful cooperation and support for their operation. More information will be available on their upcoming Web site.

QSL INFO AND NEWS.....
Dennis, K7BV, reports that all direct and Bureau QSL requests received for the following DXpeditions have been answered:
5J0BV - San Andres Island 2009-2010 operation
5J0M - San Andres Island 2008 operation
KH2/K7BV - Guam Island 2009 operation
V36M - Belize 2007-2008 operation
V31BV - Belize 2007-2008 operation
If you need a QSL, PLEASE send additional QSL requests to Dennis's new California address: Dennis Motschenbacher, 17292 Citron, Irvine, CA 92612.

MS0INT AND HB0/OU4U QSL STATUS. QSL Manager Tim, M0URX, reports that the QSL cards arrived from the printer on Thursday, July 15th. So far, MS0INT has received 1,300 log entries requests for a QSL. All QSL cards have now been completed and ready for dispatch.

QSL ROUTE CHANGE/CORRECTION. QSL TX5TES via FO5RH (not F6CTL). Jean-Michel, F6AJA, reports that someone put the wrong information on QRZ.com. Jean-Michel has now corrected it. The direct address is: Alain Claverie, BP 48 TUMUKURU, TATAKOTO Atoll, 98783, French Polynesia. You can also QSL via CORA (French Polynesian QSL Bureau).

QSLS VIA LoTW: BX5AA, CR3T, EW5A, FO8RZ, LZ7HQ, MS0INT, NH2T, R3AT, R9SA, RJ3AA, UA0FM and ZL3TE

QSLS RECEIVED VIA MAIL: 5N7M, 9X0CW, KP2/JA1BPA, PJ6/W6IZT, RW2F, T30XG, T32CI, T32MI, T32SI, T32VI, TI5XP, TX3D, V63MY, XR9JA, XU7ABN, XV2RZ and YT40E

QSLS RECEIVED VIA THE BUREAU: 3X5A, 4U1UN, 5X1GS, E77DX, FM5LD, GB0ANT, H7/AJ9C, HB9CQL, HB9TNW, IY1TTM, MD0CCE, PW2D, S57UN, TY6A, UA9CDV, UN7QF, VE3HMK (SWL) and XE1J

SI9, SWEDEN (Special Event). Special event station SI9AM from the King Chulalongkorn Memorial in Utanede, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active on July 24th. The activity is to celebrate the 10th anniversary of SI9AM. They will be looking for Thai stations on SSB around 1400z on 20 meters close to the upper end of the band. QSL via SM3CVM, direct or by the Bureau. For more inform-

ation, visit the SI9AM Web page at: http://www.si9am.se

SU, EGYPT. Gab, HA3JB, will once again be active as SU/HA3JB between September and November. He has renewed his license. Activity is planned for CW, RTTY, PSK31 and some SSB. He will also be in the CQWW RTTY Contest. QSL via his home callsign direct only with SAE to: Gabor Kutasi, H-8601 Siofok, P.O.Box 243, HUNGARY. It is suggested to PLEASE write on your QSL card your E-mail address, and you will receive an E-mail feedback. For more details and updates, visit: http://www.ha3jb.com

S7, SEYCHELLES. Jose, EA4DB, will be active as S79DB between August 3-14th. Activity will be holiday style with operations on 40-10 meters using CW, SSB, RTTY and PSK. He will be using a FT875D w/100 watts and dipoles. QSL via his home callsign.

UP44, KAZAKHSTAN (WFF Op). Operators Andrey/UN8GU, Alexey/UN9GG and Michael/UN8GC will be active as UP44Q between July 23-25th. Activity is a WFF Kazakhstan expedition to Kulsajsky National Park in the Almaty area (UNFF-008). QSL UP44Q by the Bureau to UN0GL or direct to: P.O. Box 15, 050009 Almata, Kazakhstan. For more details, see: http://un-dx.ucoz.com/index/wff_kazakhstan/0-12

UX1, UKRAINE. Members of Ternopil Amateur Radio Club will be active as UX1BZZ/p from town Pidcamin (URDA LV-08) during ethnic festival "Pidcamin-2010" between July 23-25th. Activity will be on all HF bands. Operators mentioned are: UR5BFX, UR5BO, UX1BZ, UY5BA, UY5BC, UY5BO and UY5BQ. QSL via UY5BC.

V4, ST. KITTS (Update). Jon, W5JON, will once again be active as V47JA from the Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG), hillside QTH overlooking the Caribbean Sea and Atlantic Ocean, between October 20th and November 10th. Activity will be on 160-10 meters (including 60m) using an ICOM IC-7000 w/KL-400 amp (350 watts) into a ZS6BKW design "All-Band Dipole" antenna. His operations will include the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via W5JON. Jon states, "As in the past, XYL Cathy (W5HAM) will be very busy pool side."

WP4, PUERTO RICO (Special Event). Members of the "Movimiento de Radio-aficionados de Puerto Rico" (MRPR) will have a special event station to commemorate 58th anniversary of the "Constitution of the Commonwealth of Puerto Rico" (Constitucion del Estado Libre Asociado de Puerto Rico) on July 25th, as a DXpedition style operation. They will use the callsign WP4NPC on SSB and the Digital modes on 40-10 meters between 1400-2300z. QSL via callsign.

XU, CAMBODIA. Jean, ON4JW, is once again active as XU7AJW from Sihanouk Ville until August 14th. Activity of bands/modes were not provided, but during his 2008 operation, Jean was on 80 and 20 meters SSB. QSL via his manager ON7PP or via E-QSL. To see pictures of his 2008 operation, visit: http://users.telenet.be/on4jw/XU.html

YU, SERBIA (WFF Op). Operators Mirko/YU3MMM, Miro/YT1UM and Boban/ex-YZ1KW
will be active as YU3MMM/p from the Nature Reserve "Ovcarsko-Kablarska
Flume" (YUFF-017), on Saturday, July 24th, depending on local weather
conditions. Activity will be on the HF bands, and they will operate mainly
CW and SSB using 100 watts and three element yagi and dipole antennas.
Look for them on or near the WFF frequencies. Grid locator: KN03CV. QSL
via YU3MMM, by the Bureau or direct.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 18th July 2010

World Radiosport Team Championship

The "Olympics" of amateur radio contesting is the World Radiosport Team Championship. This year's games took place, outside Moscow, during the IARU HF Contest, held last weekend. 48 teams of top contesters from around the world were in Moscow for the event. They operated under field-day conditions, with identical antennas and were limited to 100 watts output.

Each team consisted of two operators; call signs were allocated just before the contest and were not publicised until afterwards so that other radio amateurs would not be tempted to confine their contacts to their fellow nationals.

Following log-checking, the results of the championship have now been published. They show a team from Russia in first place, followed closely by an Estonian team, with a USA team in third place. The winning team had over 3,400 QSOs in the 24 hours of the contest - a good indication of what two good operators can achieve on just 100 watts!

70MHz band in Spain

The Spanish PTT has temporarily authorized the use of the 70.150 - 70.200 MHz. This segment can be used by all EA until July 1st, 2011.

Aren News

ComReg has issued a new set of callsigns for use by the Amateur Radio Emergency Network. The callsigns are available for use during training and emergency nets as directed by the National Coordinator. The three callsigns are EI0AC, EI0EC, and EI0NC and supersede any callsigns issued in the past.

AREN have SSB Nets on the 7th and 21st of each monthon 3.660 +-

---

WAI Squares Activation

Peter EI4GZB Declan EI9HQ will be out activating Squares Today the 18th July

Planned squares to be worked are Oscar 33 34 35 36 County Dublin. All squares will be activated /MM from the boat it is planned that the above squares will be activated both times during the day, on the outward and return journeys.

Bands to be used will be 20m 40m & 80m 14.268 7.068 & 3.680/760KHz SSB only + - QRM.

EJ1DD QRV from Clare Island for IOTA Contest

Members of the Dalkey Island Contest Group are again travelling to Clare Island this year for the IOTA Contest which is scheduled for the weekend of 24-25 July. The callsign will be EJ1DD and the operators are Paul EI2CA, Peter EI7CC, Sean EI7CD, Seamus EI8BP, Ger EI8CC and Aiden EI8CE.

QSL Manager is EI7CC. For the IOTA Award the reference Number is EU-121 and for the Lighthouse enthusiasts the WLOTA reference is 1935.

There may be some activity by individual team members either side of the contest using their own calls with the EJ prefix. All contacts will be very welcome Whether you are a contester or not.

EJ3Z activate EU-121 Inishbofin 24th, 25th July IOTA Contest

Members of the Galway radio Experimenters Club (EI4GRC) and Shannon Basin Radio Club (EI2SBC) will be on air from Inishbofin Island for IOTA 2010 contest using the call EJ3Z. Inishbofin is a small island 9KM off the west cost (53.37 North - 10.14 West) with the IOTA Ref EU-121. On the days leading up members will be active using their own call signs on HF & VHF also watch out for EJ4GRC. Inishbofin Grid Sq is IO43vo. More information on the island is available on http://www.inishbofin.com/

Contest Team include Pat ei9hx, Nial ei4cf, Anthony ei6ggb, Mike ei2eo, Tony ei3ha, Fergus ei6ib, Ronan ei8ih, Mark ei6jk, Des ei5gt, Tom ei3er, Adrian ei7dmb, Michael ei4al, Enda ei2ii.

Saltee Islands EU-103 EI4II and Olivier, ON4EI will be active from the uninhabited SALTEE Islands, EU-103 between July 23-25 2010, taking in the IOTA contest. Callsign that will be used will be: EJ4II.

QRV from 160-10m, CW & SSB. QSL via EI4II.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

584. rec.radio.info Posting Guidelines

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF MS Sprint Contest 2010 (World Wide MS Contest!) **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines DUBUS
and Funk-Telegramm (by Joachim, DL8HCZ) invited you to take part
in our 144 MHz Meteorscatter Sprint Contest, which took place for
the first time in the 2008 Perseid shower. The 144 MHz Meteor-
scatter Sprint Contest will take place each year on the day of the
from IMO (International Meteor Organization) announced maximum of
the Perseid shower:

2010 contest period: Date: 12./13. August 2010
Time period: 12.00hrs till 13.August 2010 12.00hrs UT

PLEASE take all rules and info of the the MMMonVHF and
DUBUS 144 MHz Meteorscatter-Sprint Contest 2010 here:
http://www.mmmonvhf.de/ctest.php
Results 2009: http://www.mmmonvhf.de/ctest2009.php

** Update 50 MHz activity in HS - Only HS0AC on Air! **

After the NTC - National Telecommunication Commission of Thailand
refused the general temporary 50 MHz license (f. VHF Contest 2010
ONLY!) for all HS Ham's, it was only allowed for the Radio Amateur
Society of Thailand's club station, HS0AC, operating on 6-meter
(50-MHz)band! 177 DX stations worked on 6m by HS0AC during CQWW VHF
contest 2010. The Radio Amateur Society of Thailand's club station,
HS0AC, operating in the 6-metre (50-MHz) band for the first time in
almost two decades and running just 10 watts to a three element
homebrew Yagi antenna, made a total of 177 DX contacts outside
Thailand during the CQWW VHF contest on July 18/19, 2010.
The operator was Joe, HS2JFW, who entered the contest in the single
operator, single band category, and this marked special
authorisation for HS0AC to operate on 6-metres by Thailand's
National Telecommunications Commission (NTC) following a formal
request from RAST. The countries worked were Vietnam, China, Japan
and Hong Kong and many reports received from the DX stations were
599. Propagation was thought to be Sporadic-E. The transceiver used
was a Yaesu FT-736-R while the antenna was a home-brew three-element
Yagi array. RAST hopes that the NTC will sanction future requests
to operate on the 6-metre band and that eventually full access will
be granted to the band in Thailand.

Max, OH0/DK1MAX qrv 50 and 144 MHz
I will be active again from the island of Kumlinge in the Alands
starting July 21st. Callsign will be OH0/DK1MAX and grid KP00jf.
We are an international group of operators from OH, OK, OM and DL.
We intend to stay until July 26th. My main focus is 6m. Looks like
we have some 2m rig with us. 100W into a 9ele. I will run FSK441
MS then. Look for us on 370.
SOURCE: Max, DK1MAX at UKSMG Announce

** DXCC: BY ; Square: OL95 ; Start: 2010-07-24 **
USE or SUBSCRIBE: http://www.mmmonvhf.de/latest.php?id=3411

Pingtan Island AS-138 (OL95) qrv HF and VHF From 24/Jul-29/Jul,
JSDXC members BA4TA, BA4RC, BA4RS, BA4RN, BA4WI, BA4RB, BA4TB,

BA4VE，BH4REQ, BH4ROO, BD4REB, BD4RPJ, BG4RQJ, BH4RLO, BD5RV will activate Pingtan Island AS-138 on HF and VHF,they will use home call/5 on HF also 6m, 2m and 0.7m EME/satellite,QSL's via homecalls.
SOURCE: tnx to Dale, BA4TB direct to MMMonVHF

Guys, I am going to activate Pingtan Island (AS138, locator OL95vn) next weekend from July 25 to 29 as BD5RV/5. EME will be included in this operation on 6m, 2m, and 70cm. On 2m band, i will be equipped with a 800W PA and 10ele * 2 yagi array. For 70cm band, I will be running with 23*2 yagi array and 75W QRP. For 6m is 100W but antenna is TBD. I'll be available on N0UK logger during the operation.
Hope to see you guys on the moon. SOURCE: BD5RV via MoonNet

** DXCC: ZL ; Square: RF65/RF43 ; Start: 2010-07-30 **
USE or SUBSCRIBE: http://www.mmmonvhf.de/latest.php?id=3418

For the MMMonVHF grid hunters ... two new grids to be activated by portable EME operations on 30 July from 20:00 UTC until moonset in ZL at about 21:30 UTC:
ZL1RS RF65 - 4 x 5 element Yagis and 500W on 144.140 JT65b 2nd
ZL4DK RE43 - 1 x 17 element Yagi and 150W on 144.123 JT65b 2nd
A little bit more info on my web site at http://www.qsl.net/zl1rs
Operation is subject to the weather (it is mid-winter in ZL!) but we will be QRV unless bad winds make it impossible to put up antennas. This will only be a short operation (primary reason is for a local meteor scatter operation), but we will be back in RF65 at least later in the year during our summer for a longer period and more serious EME operation. 73

If you had been thinking about putting up that larger antenna,
getting an amplifier for 6m, or finally getting on WSJT modes this
summer, you still have time! PSE mark your calendars now to watch
for 3D2LR the last week of September and the first week of October.
That period includes the best days of the month for 6m EME, and the
first weekend of the ARRL EME Contest. I will be looking for EU
stations on their moonrises and moonsets and will be elevating to
look for NA stations during their moonsets during the best days.
Full details and tentative operating schedule at:
http://www.bigskyspaces.com/w7gj/Fiji2010.htm
I will not have internet capability, so please follow the
instructions on the above web page, and spread out when you call!
I plan to call CQ in the first sequence JT65A mode. I will also be
looking toward the USA when aimed at the moon. Frequency will
probably be 50.190, but will be confirmed on the MMM on VHF web
page for the DXpedition: http://www.mmmonvhf.de/latest.php?id=3244
If you still are not sure when you have a window with me, please
download GJTRACKER: http://bigskyspaces.com/w7gj/GJTRACKER.zip
SOURCE: Lance, W7GJ direct to MMMonVHF

There WILL be as well a 2M activity (assuming no equipment
disaster! ;-) - more details about the 144 MHz EME part, if
we are closer to the expedition ...

** 70 MHz one-day mini-DXpedition to JP33QA **

I will go on a one-day mini-DXpedition to JP33QA on Saturday
24 July 2010. This trip will be dedicated to 70 MHz only.
Probable activity hours from 0700 UTC til 1400 UTC.
Equipment see: http://www.mmmonvhf.de/latest.php?id=3406
Will try to be QRV on ON4KST chat. Hope to be working you!
SOURCE: tnx to Robert LA4ANA direct to MMMonVHF

** 6m and 4m activity from Andre, LX1FX/MM **

Andre will be qrv again /MM for about 2 months. He will start in
Marseille, then heading to Menorca, Mallorca and then to Cadiz and
back to Marseille. The squares may be activated depending on
WX and free time situation: JN23-JN22-JN21-JN20-JN10-JM09-JM08-
IM97-IM96-IM86-IM76 and IM66 (Time: 2010-07-19 till 2010-09-18)
SOURCE: tnx to Joe, CH1HZE direct to MMMonVHF

** TK, CORSICA, activities on HF and 144 MHz **

Patrice/F5RBB and Mireille F0FRL will be active as TK/homecall
between September 12-25th. Patrice will be active on 80-10 meters
using SSB and the Digital modes, while Mireille will be on SSB on
2 meters. SOURCE: Ohio/Penn DX Bulletin #967

** W0VHQ Northwest Iowa Amateur R.C. (EN23) QRV SPECIAL EVENT **

July 24 - 25 NIARC will be operating from this museum Railroad
Caboose using the club callsign W0VHQ for the Sanborn Iowa
Railroad Celebration. For this special event, we'll be operating
on or close to 14.250, 7.225, 28.360, 50.130. For a QSL card,
send a SASE to Randy Hogan, KC0ZTR, 601 West 4th St, Sanborn,
IA 51248. No need to send a QSL card in to get one back. Also,
we'll be monitoring the local repeaters in Sanborn, Iowa 443.900
(110.9 tone) and EchoLink Node 396927 and the Sheldon, Iowa
repeater 145.310 (110.9 tone) and EchoLink Node 102345.
There should be live video of the event at www.sanborniowa.com
if you want to take a peek. :-)
SOURCE: tnx to Andy, N8OFS direct to MMMonVHF

** IZ7ATN/P : iota contest from Brindisi EU-091 **

These operators Fred/IK7JWX, Paolo/IK7UXW, Sergio/I7ZTM, Simon/
IZ7ATN and Vincenzo/I7PXV will be active from Isolotto Traversa
(IIA BR-009, LH WAIL PU-028, ARLHS ITA-175,WLOTA L-005 and Grid
Loc. JN80xp) in the Pedagne IOTA Group during the RSGB IOTA Contest
(July 24-25th) as a (Multi-Op/ Low-Power/Mixed entry. Contest call
sign will be IZ7ATN/P. Look for activity before and after the
contest. Some operators will be active on the WARC, WHF, UHF, 6m.
SSB (PSK31, RTTY). QSL via IK7JWX.
SOURCE: Fred, IK7JWX direct to MMMonVHF

** N0B Colorado 14er Special Event **

The Old Goats DXpedition team (wG0AT, N7UN, AC7MA and including
Rooster and Peanut!) are planning our 3rd Colo 14er "special event"
activation of Mt Huron (14,003'), a Colorado 14er this August 8th,
2010 using our 2009 callsign of N0B. On August 8th, Huron Pk
(W0/SR-004 4272m/14,003'), Mt Shasta (W6/CN-001 4317m/14,162'), and
Mt Langley (W6/SN-003 4275m/14,025') will be activated by Steve/
wG0AT and Guy/N7UN,and Rich/AC7MA; Brian/N6IZ; and Mark/AF6AX
respectively. This will be the 3rd year for the Special Event N0B
and the first year as SOTA Activations. One important goal will be

Summit-2-Summit contacts between >14,000 ft (>4268m) peaks but also
to provide SOTA Chaser points from these summits. The Mt. Shasta
climb is a technical effort as the mountain has permanent glacier
and snowfields. If the weather cooperates for all teams, this
should be a spectacular Special Event! Follow the latest info
at http://n0b-14er.blogspot.com and view the videos of the previous
two years. In 2009, N0B braved 30 to 40 kt winds on the summit of
Mt. Humboldt. And hopefully the propagation will favor EU contacts
on 20m! See more information about SOTA at http://www.sota.org.uk
SOURCE: Guy, N7UN via SOTA Mailinglist

** 9X0TL qrv HF and 50 MHz until end august **

Hello, In the next week I will go back to Kigali, Rwanda for
business. I hope I will get my licence on wednesday, 21-Jul-2010.
The call 9X0TL was assigned to me and all papers are prepared. With
interruptions (6-8 days each) I'm there until end August/beginning
September 2010. This is not a dedicated dx-pedition, it's a spare
time operation only. K3 , 600 Watt Solid State PA, Butternut HF-9V,
HB9CV (6m), wires - 80m-6m - CW, SSB, RTTY - QSL via home call

DXNL 1685 - Jul 21, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

FW - WALLIS AND FUTUNA, OC-118
The Japanese DXpedition showed up from Futuna (OC-118, see DXNL 1683)
as FW5F (QSL via JA2NQG) and FW5H (via JA2BNL) and not as FW5M/p and
FWD2A/p like announced earlier.

IS0 - SARDINIA, EU-165
Nicola,IS0BMU, Gianni,IS0IGV, Carlo,IS0JOO, Claudio,IZ1DNJ, and
Raffaele,IS0CPU, will be active as IM0K from San Macario (EU-165)
from Jul 23-25 (including IOTA Contest). QSLs are managed by IS0BMU.

JD1/OG - OGASAWARA, AS-031
Koji,JI1LET/JD1, is going to hit the airwaves in CW, SSB and RTTY on
40m-6m from Chichijima (AS-031) from Jul 24-30.
QSLs direct or via the bureau to his homecall.

JW - SVALBARD, EU-026
Thomas,JW/OZ1AA, Alex,JW/OZ7AM, and Ken,JW/OZ1IKY, will be active from
Spitsbergen (EU-026) from Jul 23-27. They will sign JW5E in the
upcoming IOTA Contest.
QSLs for JW5E should be sent via LA7XM, all others to their homecalls.

OH0 - ALAND ISLANDS, EU-002
Max,OH0/DK1MAX, Miro,OH0/OM5RW, Tomi,OH0/OH2BEN, Pertti,OH0/OG2M, and
Marko,OH0/OH3XR, are working from Kumlinge Island (EU-002) from
Jul 21-27. They can be found on 80m-2m and in the RSGB IOTA Contest.
All QSL cards should be sent to the operator's homecalls.

UN - KAZAKHSTAN
UP44Q is a WFF DXpedition to the Kulsajsky national park (UNFF-008)
from Jul 23-25. Operation will take place in CW, SSB and digital modes
on 80m-10m. QSLs via bureau or direct to UN0GL.
Find more info at: http://un-dx.ucoz.com/index/wff_kazakhstan/0-12

XU - CAMBODIA
Masumi,JA3AVO (XU7AVO), his XYL Hiroko,JH3PBL (XU7PBL), and their
10 year old grandson Shota,W7AVO (XU7AED) are active from Sihanoukville
in CW, SSB and digital modes on 80m-10m from Jul 20-23.
The QSLs for all callsigns should be sent only direct to JA3AVO.

Like two years before Jean,ON4JW, is now QRV as XU7AJW from Sihanouk-
ville as well until Aug 14. His QSL manager is ON7PP, but the cards are
available also as eQSL. Pictures of his last XU7AJW operation can be
found at: http://users.telenet.be/on4jw/XU.html

6W - SENEGAL
Silvia,EA1AP, Juanjo,EA1CJ, Alberto,EA1SA, and Raul,EA5KA, are going
to hit the airwaves as 6V7W with up to three stations at the same time.
Activities will take place in CW/SSB/RTTY on 160m-6m from Jul 24-31.
They wil listen especially for any 6m band openigs. Their QRGs are:
CW: 1824, 3527, 7027, 10117, 14027, 18077,21027,24897,28027,50100 kHz
SSB: 1840, 3790, 7060, 14190, 18140, 21290, 24940, 28490, 50110 kHz
RTTY: 3590, 7040, 10145, 14085, 18105, 21080, 24920, 28080 kHz.
QSL via bureau to EA5KA or direct via EA5KA, Raul Blasco Villarroya,
PO Box 20, 12080 Castellon, Spain.
Online logs will be available as well at: http://6v7w.dxciting.com

9H - MALTA, EU-023
Marcello,IT9ABY, Peter,IT9WKU, Delly,IT9ZRU, Antonella,IW9HJT, and
maybe also other OPs will sign 9H3Y in SSB, CW and RTTY on all bands
from Malta (EU-023) from Jul 24-31. QSL via bureau or direct to IT9ABY.
They plan to take part in the IOTA Contest as well.

9Q - DEMOCRATIC REPUBLIC OF CONGO
If you have missed Patrick,ON4HIL, as 9Q50ON last week there will be
another chance to work Congo again soon. Patrick wants to help local
amateurs to put up the clubstation 9Q50AR. This will be a temporary
special callsign to celebrate 50 years of independence of the country.
This station will be operated by local HAMs until the end of the year.
The QSL manager is ON4BR, he confirms QSLs direct or via bureau.

9X - RWANDA
Tom,DL2RUM, is on business trip in Kigali since Jul 21. He will get his
licence 9X0TL down there and will stay until the end of August or early
September (with little breaks). He will use a K3 radio, an amplifier
with 600 watts, a Butternut HF-9V, an HB9CV for 6m and several wires
for 80m-6m. Tom is working in CW, SSB and RTTY.
QSL cards should be sent via bureau or direct to his homecall.
More information and an online log can be found at: http://dl2rum.de

CROATIA, SPECIAL EVENT STATION
9A10P is active in all modes and bands until Dec 31 to celebrate the
anniversary of the city of Djurdjevac. On Jul 25 they will activate the
callsign 9A10P/p from the nature park "Djurdjevacki Pijesci" (9AFF-032)
also known as "Croatian Sahara".
All QSOs will be confirmed via bureau automatically.
For further information see also: http://www.9aff.com

SPAIN, SPECIAL EVENT STATIONS
Many Spanish HAMs are celebrating the first win of the FIFA World Cup.
They are allowed to use following special prefixes from Jul 12-31:
AM instead of EB
AN instead of EC
AO instead of EA

SWEDEN, SPECIAL EVENT STATION
The special event station SI9AM is situated at the "King Chulalongkorn
Memorial" in Utanede. This is the biggest Thai pavilion outside of
Thailand. This station will be QRV on Jul 24 and they want to listen
especially for stations from Thailand on 20m in SSB around 1400 UTC.
QSL direct or via bureau to SM3CVM.
More information about SI9AM can be found at: http://www.si9am.se

USA, SPECIAL EVENT STATION
W3C is a special event station working from the "Power Boat Racing" in
Cambridge/Maryland. It is working on 7200, 14250, 21250 and 28350 kHz
every day from 1400-2100 UTC from Jul 22-25.
QSLs via Easton Amateur Radio Society, Box 311, Easton, MD 21601, USA.
More information can be found on their website http://www.k3emd.com

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 24/25: RSGB IOTA Contest
Jul 24/25: SWL IOTA Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-056, LA, Vigra Island: Erling,LA4FPA, is working from Vigra Island on
20m, 10m, 6m and via the satellites FO-29, AO-51, HO-68 and maybe also
VO-52 between Jul 18 and Aug 2. QSL via homecall.

EU-068, F, Bretagne (Finistere SW) Region: A team of five HAMs is signing
TM5KD from Sein Island from Jul 22-27. QSL via QRZ.com.

EU-124, GW/MW, Welsh Coastal Islands: Some members of the Barry A.R. Society
(BARS) are QRV as GW8K and GB5FI from Flatholm Island from Jul 22-27.
QSLs for both calls via GW0ANA (direct/bureau).

EU-135, SM2, Vasterbotten County: Thomas,SM3DMP, is QRV as SF2CW from
Stora Fjaderagg from Jul 20-22. QSL via SM3DMP (direct/bureau).

EU-140, OH5, Etela-Suomi Province Group: OH1JO and OH1LEG are signing OH1K
from Kaunissaari Island from Jul 23-28. QSL via OH1JO (direct/bureau).

EU-141, LA, Finnmark County East Group: Reiner,DL3BRE, and Harald,DL7VSN,
will be active as LA/homecall from Vardoe Island working in CW/SSB/
RTTY/PSK31 on 80m-6m from Jul 23-27. QSL via homecalls (direct/bureau).

EU-158, SV, Peloponnisos Region Group: A group of Greek HAMs is QRV as SX8PR
from Proti Island from Jul 22-26. QSL via SV1JG.

NA-177, VE2, QC Province Group: Louis,VE2EZD, and Jean-Pierre,VA2SG, will
show up as VA2SG from Bonaventura Island (CisA QC-002) on Jul 24.
QSL via VE2EZD (see QRZ.com).

NA-235, KL7, Semidi Islands: Yuri,N3QQ, Merle,K5MT, Yuri,UA9OBA, and
Alex,RW3RN, are planning to activate Chirikof Island as KL7RRC between
Jul 22 and Aug 2.
QSLs for EU and Russia via UA9OBA, all others via N7RO.

==> + PUBLIC SERVICE: FCC MODIFIES RULES TO ALLOW LIMITED EMPLOYEE
PARTICIPATION IN DISASTER AND EMERGENCY DRILLS

In a Report and Order (R&O) released Wednesday, July 14, the FCC
amended Part 97.113 to allow amateurs to participate without an FCC
waiver in government-sponsored disaster preparedness drills on behalf
of their employers participating in the exercise. The FCC also has
amended the rules to allow employees to participate in non-government
drills and exercises up to one hour per week and up to two 72 hour
periods during the year. The effective date of the R&O is to be
determined and will be 30 days after its publication in the Federal
Register. Read more here
<http://www.arrl.org/news/fcc-modifies-amateur-rules-to-allow-participation-i
n-disaster-and-emergency-drills-on-behalf-of-an-e>.

==> + ARRL BOARD OF DIRECTORS HOLDS SECOND 2010 MEETING

The ARRL Board of Directors held its Second Meeting of 2010 July
16-17 in Windsor, Connecticut, under the chairmanship of President Kay
Craigie, N3KN. The Board considered and acted on a number of
```

organizational, regulatory and operating issues, including the following: Approved a campaign to celebrate the 75th anniversary of ARES® that is designed to promote and increase awareness of this valuable program; allowed candidates for Division Director and Division Vice Director to submit petitions via e-mail or facsimile; clarified the VHF rules to allow monochromatic sources (such as laser or LED) to count for contest credit, as long as the laser power is less than 5 mW; voted in favor of allowing the Montenegrin Amateur Radio Pool (MARP) to join the IARU as that country's Member-Society, and acknowledged those ARRL staff members who also serve as Volunteer Examiners. The Board also received reports from committees and individuals on a wide range of subjects, and conferred several awards on deserving nominees. A more in-depth report on the Board's actions, including the official Meeting Minutes, will be posted in the coming days.

==> ARRL CEO PRESENTED WITH "BPL SPOILS" AWARD

During the Friday morning portion of the July 2010 ARRL Board meeting, ARRL Chief Executive Officer Dave Sumner, K1ZZ, received a surprise plaque from the Amateur Radio Research and Development Corporation (AMRAD <http://www.amrad.org/>). Titled "BPL Spoils," the plaque featured a discarded BPL <http://www.arrl.org/broadband-over-powerline-bpl> modem that was rescued from surplus equipment belonging to a manufacturer that had decided to exit the BPL business. ARRL Chief Technology Officer Brennan Price, N4QX, presented the plaque to Sumner in recognition of his and the ARRL staff's tireless work against radio interference generated by BPL systems.

==> + FCC: VANITY CALL SIGN FEES TO DECREASE AUGUST 17

On July 19, the FCC announced via the Federal Register <http://edocket.access.gpo.gov/2010/pdf/2010-17331.pdf> that the cost of a 10 year Amateur Radio vanity call sign will decrease 10 cents, from $13.40 to $13.30. The new fees take effect 30 days after publication, making August 17, 2010, the first day the new fee is in effect. In FY2010, the FCC anticipates granting 14,800 vanity call signs, bringing in $196,840 from the vanity call sign program. Earlier this year, the FCC released <http://www.arrl.org/news/fcc-looks-to-lower-fees-for-vanity-call-signs> a Notice of Proposed Rule Making and Order (NPRM <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-51A1.pdf>), seeking to lower the fee for Amateur Radio vanity call signs. The notice in the July 19, 2010 edition of the Federal Register -- entitled "Assessment and Collection of Regulatory Fees for Fiscal Year 2010; Final Rule" -- includes all FCC regulatory fees; these fees are expected to recover a total of $336,712,213 during FY2010, encompassing all the Services the FCC regulates. The FCC is authorized by the Communications Act of 1934, As Amended, to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity

call sign, but also upon renewing a vanity call sign for a new 10 year term.

==> + SPOTLIGHT ON SCOUTING: CONNECT WITH THE NATIONAL SCOUT JAMBOREE VIA AMATEUR RADIO

The National Scout Jamboree takes place July 26-August 4 at Fort AP Hill, Caroline County, Virginia. A myriad of exhibits and activities await the close to 40,000 Scouts, leaders and staff. Coming from all 50 states -- and even territories and foreign countries -- they will have the opportunity to live, work and play together in an atmosphere of Scouting fellowship. And just like the National Scout Jamborees in 1973, 1981, 1985, 1989, 1993, 1997, 2001 and 2005, the 2010 event will feature Amateur Radio.

<http://www.arrl.org/images/view/News/k2bsa-layout-ants.JPG> A team of 17 Scouters and two Scouts will activate K2BSA as a demonstration station at the Jamboree. According to K2BSA Staff Member Larry Wolfgang, WR1B, they will be demonstrating various operating modes to the visiting Scouts, with activity primarily on HF, around the published Scout frequencies. Wolfgang is the ARRL Liaison to the National Scout Jamboree. Another group of 17 Scouters and one Scout will assist other Scouts in earning the Radio merit badge, while seven Scouters will be offering classes and will help administer Amateur Radio licensing exams. Read more here <http://www.arrl.org/news/connect-with-the-national-scout-jamboree-via-amateur-radio>.

==> 2010 MARKS NINTH YEAR FOR ARRL PARTICIPATION IN COMBINED FEDERAL CAMPAIGN

For the ninth year running, the US Office of Personnel Management has designated the ARRL to participate in the 2010 Combined Federal Campaign (CFC). In the past, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated almost $140,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's effort to represent its members and all radio amateurs. Read more here <http://www.arrl.org/news/2010-marks-ninth-year-for-arrl-participation-in-combined-federal-campaign>.

==> + QUICKSTATS TO DEBUT ON WEB AND QST

Member polls have returned to the ARRL Web, but with a twist. Rather than a single weekly poll, the new QuickStats page at http://www.arrl.org/quickstats offers several polls at once with new questions every 30 days. The results will be published in QST beginning with the October issue. Start by visiting the QuickStats page <http://www.arrl.org/quickstats> now. Be sure to bookmark it in your browser! Watch for poll results in the special QST QuickStats page in the rear advertising section of the magazine. Along with monthly poll

results, QST QuickStats offers colorful charts and graphs that
highlight interesting Amateur Radio statistics.

==> + SOLAR UPDATE

Tad "The moon gazed on my midnight labours, while, with unrelaxed
and breathless eagerness, I pursued nature to her hiding-places
<http://www.literature.org/authors/shelley-mary/frankenstein/chapter-04.html>
"
Cook, K7RA, reports: Increasing sunspot activity has dominated the past
few days. Sunspot group 1087 has been visible for 13 days, but the size
has gradually decreased. Over the past seven days, in millionths of a
solar hemisphere, it was 60, 50, 20, 10, 10, 10 and 10. On July 19, new
sunspot group 1089 appeared quite strongly over the eastern horizon,
with an expanding relative size of 130, 150 and 310 for July 19-21. The
predicted solar flux is 90 on each day from July 22-28, which is quite
strong, considering that the average daily solar flux for each of the
past four weeks was 73.9, 72.8, 79.2 and 80.6. There is a slight
predicted rise in geomagnetic activity, with a predicted planetary A
index of 8, 10, 10, 8, 8, 10 and 10 from July 22-28. Look for more
information -- including updated predictions, 6 and 10 meter news and
an item from NASA about the collapsing thermosphere during this
extended solar minimum -- on the ARRL Web site on Friday, July 23. For
more information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" -- in honor of the 41st anniversary of the Apollo 11 moon
landing -- is brought to you by Mary Shelley's Frankenstein
<http://www.literature.org/authors/shelley-mary/frankenstein/index.html>
(Chapter 4).

==> THIS WEEK ON THE RADIO

This week, there is a running of the NCCC Sprint Ladder on July 23. The
RSGB Islands on the Air (IOTA) Contest is July 24-25 and the SKCC
Sprint July 28. Next week, there is another running of the NCCC Sprint
Ladder on July 30. The SARL HF Phone Contest is August 1. The ARS
Spartan Sprint is August 3 and the QRP Fox Hunt is August 4. All dates,
unless otherwise stated, are UTC. See the ARRL Contest Branch page
<http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for this
online course session <http://www.arrl.org/online-course-registration>
beginning on Friday, August 6, 2010: Amateur Radio Emergency
Communications Level 1. To learn more, visit the CEP Course Listing

page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1719 - July 23 2010

Amateur Radio Newsline report number 1719 with a release date of
Friday, July 23, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Europe gets set to host a major ham radio
emergency communications meeting, more on the FCC action to permit hams
to take part in emergency training drills sponsored by their employers,
the ARRL says amateur radio is growing in the United States, an $8000
do it yourself ham radio satellite is detailed in the MAKE Magazine
blog and ham radio honors one of the early pioneers of manned space
flight. Find out more on Amateur Radio Newsline(tm) report number
1719 coming your way right now.

RESCUE RADIO: EUROPEAN EMCOMM CONFERENCE SEPT 25 TO 26

Europe will be hosting a ham radio emergency communications conference
this fall. RSGB newsman Jeremy Boot, G4NJH has the details:

--

A European Emergency Radio Conference is being organised in the German town
of Gross-Gerau for the weekend of 24th to 26th September.

Known as EuREC-DL, the conference aims to bring together radio amateurs and
emergency services to show how the two groups can work together to increase
the resilience of their communications.

I'm Jeramy Boot, G4NJH and you are listening to the Amateur Radio Newsline.

--

The conference is supported by the German Red Cross. More information can
be found at www.EUREC-DL.de. (GB2RS)

**

RESCUE RADIO LAW: FCC SAYS PUBLIC GOOD OUTWEIGHS CONCERNS OF HAM COMMUNITY
IN THE AREA OF DISASTER PREPAREDNESS

More this week regarding the Federal Communications Commission report and
order changing the amateur radio service rules to allow hams to transmit
messages in certain circumstances during disaster drills. This, regardless
of whether the ham is an employee of the organizations participating in the

drill. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with some background on the decision and the view taken by the FCC in making it:

--

In issuing its Report and Order on Docket RM 10-124, the FCC acknowledged the role that amateurs can play before and during emergencies. It noted that many governments and safety organizations make hams a part of their emergency planning. As such, the commission agreed that Part 97 rules, as written and codified, had in essence prohibited communications in which an operator has a pecuniary interest. This included communications on behalf of an employer, even when that employer was serving the needs and welfare of the American public.

Until about a year ago, the FCC had unofficially turned its back when hams employed by cities, townships, emergency response groups, hospitals and the like provided services during drills and other training exercises. But that changed when one ham who had provided such a noble service posted about his work on an Internet website. In turn, other hams who oppose ham radio involvement in anything that might even remotely be construed as business related reported the posting to Laura Smith at the FCC. This lead to the FCC contacting the ham about the matter. This was followed by what many construed as a warning from the FCC issued by its rules man Bill Cross, W3TN, at the 2009 Dayton Hamvention:

--

Bill Cross, W3TN: "No communications on behalf of an employer means just that. There's no exception for the 15 minutes you are on a break. There's no exception for -gee it's the weekend. Or, there's no exception
because
you want to do it. If its your employer, you cannot transmit
communications on their behalf. That is a commercial communications."

--

In the real world, this edict meant that hams who work for public safety agencies and hospitals could not participate in tests and exercises even though these same operators would be expected to be ready in time of a real life emergency situation. This satisfied those hams opposed to any business communications and other groups who are anti ham radio being involved in emergency communications. It also brought with it an out-cry from those hams who have devoted their lives to emergency preparedness as well as from a number of emergency communications groups and responders that have traditionally utilized the services of ham radio volunteers.

A few months later, the FCC bowed to public pressure and agreed to issue waivers on a case by case basis to permit ham radio operators to participate in training exercises and drills sponsored by government agencies and those that a government entity might appoint to oversee a practice session. In the meantime, several petitions were filed to change 97.113 to in effect codify into the Amateur Service rules what hams have been doing for almost a century.

Public safety agencies and other first responders generally supported such a rule change. Several ham groups also argued the change would help improve the skills of employees who might have to act during disasters. Others felt it could increase the usefulness of programs such as ARES, RACES and even MARS.

Those who opposed the change felt that it would erode the not for profit amateur status of the service They called the proposal an essential change for the worse in the characteristic of United States Amateur Radio service.
.

Others felt a more liberal rules change might encourage hospitals or public safety agencies to replace commercially available commercial mobile radio service equipment with ham gear, or that ham bandwidth might become de facto emergency service spectrum. There was even commentary that such a change could lead to employees being coerced into using their ham privileges, possibly in prohibited ways.

But in rendering its decision, the FCC categorically refuted all comments that had been filed against the rules modification. It stated that such a change would not erode amateur radio because it says the new exception is narrowly crafted. That it is essentially is limited to a given drill or exercise, and that ham radio communications are only one component of test activities. But to negate concerns that non-government entities like private hospitals could use this rule to pressure employees to get ham licenses or engage in questionable practices, the regulators included a time cap to have hams participate in such drills. For non-gpvernmemt entities it is one hour a week and only two drill sessions of up to 72 hours per year. No time limit was placed on ham radio participation in drills sponsored by government entities.

The FCC also dismissed other objections, including the coercion for employees to get licenses argument. In regard to the latter the regulatory agency said that it did not expect that employer over-reaching is likely to be a problem. This, given that the amended rules reflect a spirit of cooperation among the public safety and amateur communities.

In the end the FCC stated that its decision reflects the practical reality that a large number of agencies and organizations at the state and local levels coordinate with their local volunteer amateur radio operators. This, to conduct emergency drills and exercises in concert with other modes of communication, such as land mobile radio. It called such activities as essential to allow for a practiced response on the part of the first responder community.

For the Amateur Radio Newsline I'm Bruce Tennant, K6PZW, in Los Angeles

--

What the FCC appears to be saying is that the needs of the general public in time of disaster outweigh any concerns that members of the ham radio community might have expressed. Its also saying that the only way the ham community can be prepared for real disaster situations is through education and practice, and that's what permitting radio amateurs on the clock to

take part in training exercises is really what this is all about.

You can read the report and order, which includes the new rule language from a link at our website at www dot arnewsline dot org. (ARNewsline(tm) from FCC release. Audio from ARNewsline(tm) archive)

MAKE MAGAZINE BLOG PRESENTS $8,000 DIY HAM SATELLITE KIT

If you have ever wanted your own personal ham radio satellite but thought it was financially out of reach, the Make Magazine blog carries a short item on a satellite that can be yours for just $8,000.

Called a TubeSat, the magazine says that the kit for a tiny bird from Interorbital Systems that is designed to function as a basic satellite bus or as a simple stand-alone satellite. Included are the satellite's structural components, printed circuit board. electronic components, solar cells, and everything needed to build the satellite. Also included are the required programming tools.

Make's blog says that with these components alone, the builder can construct a satellite that puts out enough power to be picked up on the ground by a hand-held amateur radio receiver. It says that simple applications include broadcasting a repeating message from orbit or programming the satellite to function as a private orbital amateur radio relay station.

Interorbital Systems says it can deploy 32 of these tiny satellites simultaneously on a Neptune 30 launcher from the Pacific island of Tonga. The first launch is slated for the end of the year. These satellite will go into a very low Earth orbit and would probably have a lifetime of only a few months.

If you have an extra $8000 and want to be the first with his or her own personal ham radio satellite you can read more about the concept on line in the MAKE magazine blog at tinyurl.com/personalbird.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report.

(Southgate, MAKE Blog)

HAM NUMBERS: FIRST HALF OF 2010 SEES UPSWING IN NEW AMATEUR RADIO LICENSEES

The ARRL says that with 18,270 new Amateur Radio licenses issued in the first half of this year 2010 is shaping up to be a banner year for growth in amateur radio.

The League reports that so far, the number of new licenses issued by the FCC in 2010 is outpacing the January to June 2009 totals by almost 8.5 percent. That breaks down to 16,844 new licenses in the same time period last year verses the 18,270 new hams so fat in 2010.

As of June 30, this year, there are 694,346 licensed amateur radio operators in the United States. Broken down by license class at the end of June 2010, there were 16,299 Novices, 342,064 Technicians, 154,284 Generals, 60,059 Advanced and 121,640 Amateur Extra licensees. Not to shabby for a hobby that was listed on the July 17, 2008 Walletpop blog as one of the 25 things predicted that would soon disappear in America. (ARRL)

**

RADIO RECOGNITION: OMB NAMES FCC MOST IMPROVED FEDERAL AGENCY

The White House's Office of Management and Budget says that the Federal Communications Commission is the most improved federal agency in the area of employee satisfaction. This. based on the results of a study titled the 2010 OPM Viewpoint Employee Satisfaction Survey made public on Monday, July 12th.

According to the Washington insider newsletter The Hill, FCC Chairman Julius Genachowski credits new opportunities for employees to provide feedback, the improvement of internal communication, and efforts toward leadership development for achieving this position. He also credited Democratic Commissioner Michael Copps for his work as acting chairman before his tenure began. (The Hill, other published reports)

FAILING TECHNOLOGY - THE PEACOCK UNEXPECTEDLY ON THE EYEBALL

You might call this next story a case of failing technology. It happened on Friday, July 9th when audio from NBC Nightly News was heard on the competing CBS Evening News, and it all happened live.

According to the website TVNewser.com, when CBS anchor Katie Couric tossed to correspondent Mark Strassman who was doing a live report from Louisiana on the latest on the oil spill. But instead of hearing Strassman, CBS viewers heard the audio from NBC Nightly News reporter Martin Fletcher. Fletcher was across the big Atlantic pond live from London on the spy swap story.

When CBS News realized what was going on, it quickly ran Strassman's pre-produced version of the story in its place. There was no mention of the audio snafu when Strassman tossed back to Couric.

What caused the problem is anyone's guess. One engineer who has spent 30 years in the technical side of TV news thinks that it was likely a problem outside the direct control of the two networks. Rather he believes it was most likely at the switching hub of one of the companies that the various news organizations with contract long haul satellite and fiber optic feeds. But adds our expert, that's only a guess on his part.

If you want to see and hear this broadcast snafu for yourself, as we write this report its on-line at tinyurl.com/2bm89dy (TVNewser.com)

ELECTRONIC LAW: CEASE AND DECIST ORDER ON LIGHT SABER SOLD ON EBAY

Now here's a strange story involving electronics law. It seems that LucasFilm Ltd. recently served a manufacturer of a handheld laser with a cease-and-desist letter. This, for selling an item it claimed was too close in resemblance to its trademark light sabers from "Star Wars."

But the Hong Kong firm decided to use the force of eBay to score some revenge. This by putting the cease-and-desist letter up for auction.

According the Hollywood Reporter entertainment industry newspaper, the letter was not signed by George Lucas himself. Rather the company marketed the legal document as an opportunity for those to win a piece of LucasFilm history as well as contribute to the company's battle with the giant film maker. (HR)

**

HAM HAPPENINGS: AMSAT-UK SPACE COLLOQUIUM TO BE WEBCAST

If you cant make it to the 2010 AMSAT U-K Space Colloquium, then you will still be able to take part vicariously by watching it on your PC or Mac. This with the announcement that the British Amateur Television Club will again be provided over the Colloquium weekend.

The event takes place July 31st to August 1st at the Holiday Inn in Guildford, England. Live web streaming begins on Saturday the 31st at 09:00 UTC. To tune in, just go to www (dot) batc (dot) tv and click on the words Live Events. (AMSAT-UK)

RADIO ON THE NET: NEW EASY TO NAVIGATE POPCOMM WEBSITE LAUNCHED

Popular Communications magazine has launched what it calls a new and easier-to-navigate website. The updated site features a clean new look and a streamlined user interface to make it quicker and easier for visitors to find what they are looking for.

Current issue highlights include sample pages in full-color layout, to give prospective readers the ability to see what the magazine itself looks like in print. Live links to Internet sites mentioned in upcoming issues' editorial content will help users further explore topics of interest to them.

Highlights of back issues remain on the website with easier access than in the past. The site also includes contact information for editors and columnists, direct links to advertisers' websites, other CQ Communications publications and an extensive collection of hobby radio links and radio club information. In addition, a direct link to the magazine's Facebook page makes it simple for readers to provide feedback and connect with other hobbyists.

The new Popular Communications website is in cyberspace at www.popular-communications.com. (PopComm)

**

THE SOCIAL SCENE: TOKYO HAM FAIR 2010 AUGUST 21 - 22

The ham radio social season continues with word that the giant Tokyo Ham Fair for 2010 is slated for August 21st and 22nd at the Tokyo Big Sight arena.

Ham Fair is sponsored by the Japan Amateur Radio League and is one of the largest gatherings of radio amateurs from across the Pacific Rim. Its also where many Pacific Rim ham radio manufacturers give a first glance at the products that they plan to introduce world-wide in the coming year.

You can see more about the Tokyo Ham Fair in English at tinyurl.com/334jzb8. If you are interested in visiting the Tokyo Ham Fair you can e-mail the planners to intl (at) jarl (dot) or (dot) jp for information and assistance. (JARL)

**

NAMES IN THE NEWS: WRTC 2010 WINNERS ANNOUNCECD

Some names in the news. We begin with word that the winners of the 2010 World Radiosport Team Championship have been announced. Taking the Gold medal was the Russian R32F Team of Vladimir Aksenov RW1AC, and Alexey Mikhailov, RA1AIP. The Silver medal was garnered by the Estonia R33A Team of Tonno Vahk, ES5TV, and Toivo Hallikivi, ES2RR. Third place or Bronze went to the R33M Team of Dan Craig, N6MJ, and Chris Hurlbut, KL9A, of the United States.

The World Radiosport Team championship takes place every few years in a different country. Teams use the same power and identical antennas. The stations are also geographically close to each other in an attempt to level the playing field as much as possible, so that the winners can truly be said to be the best contesters in the world.

The 2010 World Radiosport Team Championship was held near Moscow Russia. This year 48 pairs of participants from around the world took part. (WRTC)

**

NAMES IN THE NEWS: WA4HYJ TO RECEIVE 2010 MC GAN SILVER ANTENNA AWARD

The ARRL has announced that Norm Lauterette, WA4HYJ, is to be the recipient of the 2010 Philip J. McGan Silver Antenna Award. According to the announcement, Lauterette of Casselberry, Florida has been an ARRL Public Information Officer for two decades. In that time he has demonstrated outstanding volunteer public relations success on behalf of amateur radio at both the local and regional levels. His numerous published articles both within and outside of the amateur radio community have enhanced overall support of the hobby. At the same time his effective use of local political and police relationships he has fostered an environment that significantly increased regional public awareness of amateur radio. (ARRL)

EMERGING TECHNOLOGY: TWISTING CRYSTALS

Chemists in the United States and Russia have created crystals that can twist and untwist. This they say points to a much more varied process of crystal growth than previously thought and could pave the way for new electronic products. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

Crystal growth has traditionally been viewed as a collection of individual atoms, molecules, or small clusters adding to a larger block that remains in a fixed translational relationship to the rest. But the New York University and St. Petersburg State University chemists have discovered a wholly new phenomenon for growth in a crystal structure that continually changes its shape as it grows.

To do this, the researchers focused on crystals from hippuric acid which is a derivative of the amino acid glycine. As molecules were added to the end of fine crystalline needles, stresses built up at the tips of the crystals and resulted in a helical twist. The process was reversed when crystals thickened from the opposite end of the growing tip thereby undoing the twisted formations.

The researchers work, which appears in the latest issue of the Journal of the American Chemical Society, may explain some of the properties of high-polymers These are used in clothing and liquid crystal displays, among other consumer and telecommunications products.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

You can read more on this fascinating scientific breakthrough on-line at tinyurl.com/crystaltwist. (Science Daily)

**

EMERGING TECHNOLOGY: THE END OF R-O-S

It may well be the end of the road of the road for amateur radio version of the digital mode R-O-S. It is, if you accept an Internet posting by its creator Jos&#65533; Alberto Nieto Ros.

Writing on his website, the software's author says that R-O-S version 1.0 released on July 11th will be the last. He says that he came to this decision after reading what he terms as too many derogatory comments directed towards him in Digital Group and on the R-O-S Digital Modem Group. Based on this, Jos&#65533; Ros says that its simply not worth it to him to work further to evolve this software.

It should be noted that R-O-S is still not a legal transmit mode in the United States. (ZL2TZE)

**

WORLDBEAT: SARL STREAMLINES SA HAM RADIO TESTING PROCESS

The Council of the South African Radio League has put in place some strict rules regarding ham radio testing in that nation. This in the hope of streamlining the South African Radio Amateur Examination process so as to deliver the results and call signs to successful candidates faster.

Effective immediately, candidates can only apply for one examination. In other words applicants can take only the for the class A or Class B at a single session and it will no longer be possible to sit for both examinations at the same time. Also, the closing date to apply will be strictly adhered to a d no late entries will be accepted. A candidate who's Registration is incomplete by the closing date will not be able to take the examination and will not receive an examination number.

According to a spokesperson for the South African Radio League, while it may sound harsh, the reality is that it is the few candidates who do not comply with the guidelines who delay the call sign and licensing process of all the others. Insuring that all documentation is received by the entry deadline will also assist the nations telecommunications regulator in speeding up the licensing process. (SARL, Southgate)

**

WORLDBEAT: SPAIN EXTENDS 70 MHz ALLOCATION THROUH JULY 1 2011

Spanish Radio Amateurs have received an extension allowing them to use the 70 MHz band until July 1, 2011. The Spanish Department of Post and Telecommunications first announced the temporary authorization of 70.150 to 70.200 MHz back in October of 2008. (EA3BRA)

**

HAM RADIO IN SPACE: NEW DISTANCE RECORD ON THE AGEING AO-7 HAMSAT

A new ham radio in space record on one of the hobbies oldest birds. At 2226 UTC onn July 15th, PY5LF in Curitiba, Brazil worked Josef Spandler, K3SZH, via AMSAT OSCAR 7 and achieved a new DX record for that bird of 7843 km which equates to 4898 miles.

What makes this contact all the more amazing is that AMSAT OSCAR 7 was launched some 36 years ago on November 15th, 1974 from Vandenberg Air Force Base, Lompoc, California. A Oh 7 still continues to provide limited service even though its batteries failed years ago and it is only operational when its solar panels are in sunlight. (Southgate, ARNewsline (tm))

**

HAM RADIO IN SPACE: AMSAT CALLS FOR PAPERS FOR 2010 SPACE SYMPOSIUM

The September 1st deadline of the call for papers for the 2010 AMSAT Space Symposium and Annual Meeting is rapidly approaching. AMSAT requests that those submitting papers send them the tentative title and abstract of your presentation as soon as possible. The abstract does not require any special format. Simply send an e-mail to the Proceedings Editor to k9jkm (at) comcast (dot) net with the basic information. This would include the author name, callsign, and a few sentences that describe your proposed topic. (ANS)

**

ON THE AIR: PUERTO RICO CONSTITUTION DAY SPECIAL EVENT

On the air, members of the Movimiento de Radioaficionados de Puerto Rico will sponsor a special event station on July 25th. This, to commemorate 58th anniversary of the Constitution of the Commonwealth of Puerto Rico. They will use the call WP4NPC on SSB and digital modes and operate from 10 to 40 meters in a DXpedition style operation from 1400 to 2300 UTC. QSL via WP4NPC, PO Box 3484, Bayamou, Puerto Rico, 00958. (Via e-mail)

**

ON THE AIR: CELEBRATING LASSEN VOLCANIC NATIONBAL PARK

And from August 7th to the 14th listen out for special event station N6L, to be active from California's Lassen Volcanic National Park. This will be a Multi operator portable and mobile operation with activity on the High Frequency, WARC and VHF bands. A QSL and certificate is available. QSL via K6LSN. (Via e-mail)

**

DX

In DX, PA4N operating portable MU is operating from Guernsey Island mostly on CW but also some RTTY and SSB on 160 through 6 meters. QSL via the

bureau to his home call.

And listen out for PG4DX operating portable P4 from Aruba through August 6th. Most operations are near the IOTA frequencies. QSL via bureau or direct to his home call.

I1FQH is operational as 5V7DX from Kpalime Village in central Togo through July 30th. He uses a Spiderbeam on 20 through 10 meters and a homebrew vertical on 40 and 30 meters. QSL via bureau or direct or Logbook of the World or to his home call.

Lastly, F5NVF, will be active portable 6W from Zsenegal between October 25th and November 1st. His operation will be on CW on the High Frequency bands. No other are yet known other than to QSL to his home call sign.

(Above from various DX news sources)

**

THAT FINAL ITEM: CELEBRATING SPACE PIONEER ASTRONAUT GUS GRISSOM SPECIAL EVENT STATION

And finally this week, a special ham radio link will allow visitors to the Gus Grissom Memorial in Mitchell, Indiana's Spring Mill State Park to talk with the Johnson Space Center in Houston, Texas on Gus Grissom Day. Jack Parker, W8ISH, is in Indianapolis and has the details:

--

The Gus Grissom Memorial at Spring Mill State Park honors the astronaut who was America's second man in space. Virgil I. "Gus" Grissom made that sub
orbital flight in the Mercury 7 Liberty Bell capsule. Grissom grew up in Mitchell, Indiana near the state park. He learned to fly as a boy and flew fighter jets in Korea.

The memorial tells about Grissom's life and contributions to the space program. Grissom and two other astronauts died in January 1967 when their Apollo One command module caught fire on the launch pad at the Kennedy Space Center. Museum artifacts include Grissom's space suit, one of the space capsules he flew in and personal items from his youth and adulthood.

During the day long event visitors can talk to the Johnson Space Center in Houston through a special ham radio link set up by the Hoosier Hills Amateur Radio Club. They will be operating on 40 and 20 meters. The southern Indiana hams have planned a mini fox hunt for the kids and will provide a worksheet for kids tospell out their name in Morse Code. They will use a straight key and oscillator to finish the code sending exercise.

The Amateur Radio special event station will be on the air from late morning until the park closes at 11PM.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH

--

Amateur radio honoring one of the pioneers of the United States space program who lead the way to help conquer the final frontier. (W8ISH, Hoosier Hills Amateur ARC)

WIANEWS FOR WEEK COMMENCING JULY 25 2010.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JULY 25 2010

WIA Centenary Update

Share the good news and add to the growing Centenary Media File

Now here's a plea to radio clubs and individual radio amateurs involved in
getting media exposure for the Centenary of Organised Amateur Radio in
Australia.

Do please share your media hits with the wider amateur radio community to
show what has and can be achieved.

There are a few WIA affiliated clubs on the VK100WIA roster yet to file
their media report.

Doesn't matter if it's a mere column inch in a local newspaper, mention on
a website, or a feature newspaper or magazine article, radio or even
television.

Reports on news media achievements are being posted on the WIA website
under the section 'VK100WIA Club & Media Feedback'.

Thank you to the club's that have put the special callsign VK100WIA on air. Please don't forget to file an activity report to the WIA Centenary Committee so it can be included in the Centenary Media File.

And also a reminder that the WIA Media Kit is available on request from all WIA affiliated clubs - whether or not they are rostered to use VK100WIA.

VK100WIA flooding the QSL Bureaux

If you're among the thousands who have made contact with the special callsign VK100WIA then you have qualified for its commemorative QSL card.

It will look just great on display in your radio shack showing that you actively took part in this on air activity to celebrate the Centenary of Organised Amateur Radio in Australia.

Being registered with the WIA membership service QSL Bureau will result in an automatically issued card reaching you soon.

The WIA website advises that Bureaux operate in each state and the Northern Territory.

Those radio amateurs wishing to receive their incoming cards usually make arrangements with those Bureaux.

Another way to get the VK100WIA QSL card is by the direct QSLing method.

Before doing so please check your contact details in the online VK100WIA log.

Then send your QSL card or full QSL details with contact time and date in UTC, plus funds or a self-addressed-stamped envelope to the WIA National Offfice.

And the VK100WIA callsign online log is now showing around 7,000 contacts having been made its first nine weeks of operation - so the QSL Bureaux will be awash with cards for the special callsign.

First WIA Centenary Award issued
Quick off the mark to qualify for the WIA Centenary Award is John Fisher VK3DQ who has been presented with his award certificate personally by the WIA President, Michael Owen VK3KI. The award claim by VK3DQ had three contacts with VK100WIA, one with the WIA during May, then with the Wagga and Midland Amateur Radio Clubs in June, plus 14 WIA members to tally up the required 100 points.

John VK3DQ was absolutely delighted and considered it a real privilege and an honor to be the very first to receive the award. Michael VK3KI made a surprise visit to the home of John and XYL Jean VK3VIP in the eastern Melbourne suburb of Wantirna South on Sunday to extend congratulations and personally present the award. During afternoon tea served by the couple, John VK3DQ commented on the success of the special call sign and the Centenary Award, observing it was generating a lot of interest and on air activity.

Jean VK3VIP, who is on her way to qualify for the Award too, is looking forward being part of ALARA's turn at activating the special call sign in a couple of week's time. The first DX station to qualify is Masami Shinhaze JF6CHY. About a half a dozen other award claims received are now being checked with more certificates to be issued in the coming week.

FIRST INTERNATIONAL RECIPIENT OF CENTENARY AWARD

Further WIA Centenary Award certificates have been claimed and issued during the past week, with more just arrived waiting verification.

The first overseas radio amateur to get the award has written with his thanks and best wishes for the Centenary celebrations.

Masami Shinhaze JF6CHY of Fukutsu-City the capital of Fukuoka Prefecture in Japan said, "I have the honour as the first qualified not only JA station but also DX station.

"100 years, it's long long time indeed, and I am very interested in the great history of the WIA. I wish you continued success and prosperity inthe future."

The WIA Centenary Committee expects the award to be popular among Japanese radio amateurs and the DX community generally.

Looking ahead at the VK100WIA roster

Today, 25th, tomorrow and Tuesday the Townsville Amateur Radio Club intends to have at least 36 hours of operating logged for the special callsign.

It has advised that VK100WIA will be the control station for the North Queensland Net tonight on 3605.4 kHz from 0930UTC.

The Townsville news media has been told that the club's radio station will be open to the public who can not only see a display of amateur radio equipment but also ask questions of knowledgeable club members.

In the media statements too are details of what occurred in 1927 after devastating tropical cyclone Willis.

Now that's the very first known occasion when radio amateurs provided emergency communications following a natural disaster in Australia.

Next on the roster is the Frankston and Mornington Peninsula Amateur Radio Club, 28th to the 30th of July, operating VK100WIA mainly from member QTH's. Then it's across to VK6 next weekend with the Hills Amateur Radio Club opening its club station at Cannington to the public.

The Central Goldfields Amateur Radio Club, on Tuesday the 3rd of August, will operate from the Talbot Radio, Arts and Historical Museum, with WIA President Michael Owen VK3KI attending, but more about that on next week's broadcast.

NATIONAL FIELD DAY - 23 OCTOBER 2010

Good Morning Trent Vk4ti here.. (cut 4 july 25) (audio supplied)

Automate that rig...

Take your time to automate as much as posible in your contesting work.

Modern software will check all ongoing during a contest and after the contest will submit the log to the contest organisers.

No more than what is needed for modern soundcard modes are needed for
contesting in fact if you have a sound card multi mide interface you have
99% of what is needed to get that rig optimised for contest performance.

Back to the news desk.

http://www.ei5di.com/
http://writelog.com/

Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager.
Today being the 25th July and as this news goes to air, you have about 4 weeks to check your equipment, logs sheets, and Logging Software updates.
At the bottom of the RD Contest page on the WIA website you will find the Files For Downloading,&#65533; they are:- the Rd 2010 Rules, RD Introduction, Logging Data Sheets for those that are going to handwrite their logs, (OHHH and I have increased the cell sizing to make it easier) , Log Cover Sheet, WII Equipment Declaration Forms, all these forms are available in PDF format.
PLEASE read the rules to ensure that you enter your logs in the correct category, as last year I had several logs where I had to confirm with the operators under which category they wanted to be entered into.
Those operators that are going to be operating between 01:00 and 06:00 local be sure to check for your logs shows correct time, to accrue the extra points for that time period.
Anybody requiring any of the forms posted to them please contact me ASAP.&#65533;
It is anticipated that the opening speech will run between 20 and 30 minutes, links will be available on the RD Contest page, as soon as I complete the assembly.Until next week.

ACMA Proposes Temporary Use of 70cm.

On Monday the 19th July WIA directors Peter Young, VK3MV, and Phil Wait, VK2ASD, attended a briefing
presentation by the ACMA on the proposed re-arrangements for the 400 MHz band (403 - 520 MHz) that
includes the 70cm amateur spectrum and the UHF CBRS band.
The WIA has made written submissions to the ACMA in respect to the 70cm amateur Secondary Service
allocation, detailing amateur use of the 400MHz spectrum and expressing its concerns.
The presentation to 100 radiocommunications industry members, emergency and government users, follows
on from an ACMA paper "The Way Ahead - Decisions and Implementation Options for the 400 MHz Band,"
released in April 2010, (a copy can be obtained from the ACMA website). The ACMA's Executive Manager,
Spectrum Infrastructure Branch, Andrew Kerans, provided background to the re-arrangements and to the
series of discussion papers that have been released on this issue over the past 2 years. Of particular interest
to the amateur community, the ACMA confirmed the need for the temporary ad-hoc use of the spectrum
segment 440 to 450 MHz by affected land-mobile licensees.
Clearing out parts of the land mobile spectrum at 400MHz is necessary for an orderly

transition from a 9.5
MHz to a 10 MHz transmit/receive frequency split, and those affected land-mobile users need somewhere to
go within the tuning range of their existing radios. The temporary use of the 440 to 450 MHz amateur band
will be contained to the top and bottom 500 kHz, (440-440.5MHz and 449.5-450MHz, i.e. either side of the
70cm ATV segment), and most likely will be confined to the heavily congested areas of Sydney, Melbourneand Brisbane.
The ACMA has indicated that the temporary use arrangements could last up to 3 years.
The temporary use of 440 - 450 MHz has been utilised in the past for major sporting events and has not
resulted in any reported interference issues. The WIA will be working with the ACMA's Operations Branch
that will have carriage with the implementation arrangements.
The ACMA will be holding briefing sessions in all the capital cities and regional centres over the next coming
weeks. The WIA will have representation at most of these sessions.

Blue Mountains Amateur Radio Club is holding its annual Winterfest August 22
at the clubhouse in Orchard Hills.

Please note this is the 22nd not the date inadvertantly broadcast
last week.

Venders and displays From Yaesu, Action Comms, ATRC, NBS Antennas and Masts,
AUZ Comms, ALARA, AMSAT, Flea Market and Boot Sales, Food and Drinks, so go
along and grab a bargain.

More information www.bmarc.org
follow the prompts to Winterfest page.

40M PORTABLE ANTENNA SHOOTOUT

Northern Rivers WICEN in conjunction with the Summerland Amateur Radio Club is holding a 40M portable antenna shootout at the SARC clubrooms on Sunday 19 September 2010

The idea behind the event is to encourage interest in HF portable and mobile operation.There won't be any overall winner as ease of use, robustness, portability Vs mobility, transportability and costs are all factors for the individual to consider.The results won't be precise signal strength measurements but will reflect the practical usability of the antenna.Participants will receive a certificate.

There ARE rules; trees and mobile whips on cars are OK, but don't think you're going to lash up to the club's antenna mast. 10Watts max and a predetermined frequency of 7075+/- to

give experimenters a goal to kick towards for any pre-cutting and beam spacing. Well done to the SARC and NR WICEN and if you hear Chris VK2ACD or Duncan VK2DLR on air after the event, ask them how the event went. There will also be the pre-requisite sausage sizzle to pass time during the adjudication process, hi hi.

VK3
VK4 - QNEWS

Caboolture Show attendees learn about amateur radio

A display at the recent three-day Caboolture Show about an hour drive north of Brisbane demonstrates what any group of radio amateurs to publicise amateurradio.

David Brownsey VK4AFA and Mic Lohse VK4CRC set up the display using a couple of tables to display that included a 1910 diathermy unit claimed to cure all diseases known to mankind and some not yet identified, a replica spark gap transmitter built by Al Shawsmith VK4SS.

To complete the display there was a modern amateur transceiver, an active lap-top computer display of amateur satellites, plus both the WIA?s ?Calling CQ? and ?WIA Centenary? posters ? with two knowledgeable radio amateurs on hand to answer questions.

The manning of the display at the Caboolture Show is not a one-off, but this pair of radio amateurs has shown strong initiative in mounting seven displaysthis year.

There are other radio amateurs, clubs and groups around Australia that do take the task of publicising amateur radio seriously, but there is room formany more.

With the WIA posters and other readily available resources it has never been easier to promote the wonderful world of amateur radio.
(Jim Linton VK3PC)

- Help Mike get on his Bike
Here is an update on the activity that dashing aero-paramedic, avid dx-er and all round good guy Mike VK4MSA is currently in training for. The Big W Townsville to Cairns Charity Bike Ride will be leaving Townsville on Thursday 29th July and finishes in Cairns on Saturday 31st July, along the way raising funds for The Childrens Cancer Institute of Australia. Mike has the entry fee all saved up but has to raise at least 500 dollars for charity before he can participate in the ride - and time is running out ! So, can you help out a fellow ham who is doing something good ? Contact Mike VK4MSA next time you hear him on air or head over to this website to find out more and help donate !

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO

Canberra Region Amateur Radio Club Foundation Course

Alan VK1WX sends word that "A successful foundation course was held last weekend 17/18 July with six foundation and two upgrade candidates.

The following foundation candidates passed their assessments,
Erin Thorncraft, Stan Jarvis, Lyndsay Sheldrick, Philip Bryne, John Ekman, Steve Stanton, also Matthew Bowman and Robert Smith successfully upgraded to Standard level.

The weekend was not without equipment problems, the projector failed after two minutes, an antenna tuner would not tune and the Yaesu FT757 lost its display.
Despite all of this plan B's went into operation and the assessments proceeded with some minor delays.

Many thanks to the team, John VK1ET, Gilbert VK1GH and Dom VK2HJ who very kindly came down from Goulburn to assist with assessments."

SILENT KEYS

Black box flight recorder inventor dies

The death of Dr David Warren brought to the close a very interesting life of a man who developed the black box that has played a crucial role in improvingaviation worldwide.

He was born in 1925 at a remote mission station on Groote Eylandt in the Gulf of Carpentaria, North Australia, and the first European child to be born on that Aboriginal settlement.

In father was killed in one of Australia's earliest air disasters in Bass Strait, and the last gift received from his dad was a crystal set.

That encouraged the young David in boarding school to build radio receivers and enrol to sit for his ham ticket, hoping to become Australia?s youngestradio amateur.

But this ambition was thwarted when the government imposed a ban on amateur radio with the outbreak of World War II.

However his schoolboy knowledge of electronics led him to later to build the world?s first flight data recorder.

Being involved in the accident investigation of the world?s first jet-power aircraft, the Comet, in 1953, led him to advocate that there be a cockpit

recorder as a means of solving otherwise unexplainable aircraft crashes.

The idea initially raised little interest, so while the Principal Research Scientist, Aeronautical Research Laboratories in Melbourne, he designed and built an experimental unit that could record four hours of speech as well as flight instrument readings.

The idea took five years to be finally accepted. Dr David Warren died aged85. (Jim Linton VK3PC)

INTERNATIONAL NEWS

With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART and the WW sources of the WIA.

An important meeting dealing with wireless broadband and medical electronics is slated for Washington DC later this month.

The Federal Communications Commission and Food and Drug Administration will be seeking comment on converged communications and health care devices impact on regulation. This, at a public meeting to discuss topics related to this issue is scheduled for tOMORROW AND tUESDAY July 26 and 27th.

According to a joint news release there have been significant developments in recent years in medical and health care devices using radio technology to monitor various body functions and conditions. These include including critical care elements as well as those used to deliver treatment and therapy.

Examples of the latest implant or body-worn monitoring, therapeutic, and treatment technologies include blood glucose monitors and automated insulin pumps, heart monitors, pacemakers, defibrillators, and neural pathway replacements that stimulate muscle movement. There has also been an increasing proliferation of devices using established commercial communication networks, including those providing
Internet connectivity to communicate with care providers.

The FCC and FDA say that they both recognize the need to work with all providers and users of these devices to identify pathways and strive to improve processes that will help continue to spur innovation in these areas while maintaining safety and effectiveness and promoting public health. Therefore the objective of this meeting is to gather information and to better understand issues and perspectives so the agencies can identify potential areas where each agency's jurisdiction can be identified and clarified for affected parties. Also to gauge how the collection and assessment of each agency's respectively appropriate information can be improved, expertise can be shared, and regulatory approval can be coordinated and simplified.

WEIRD AND WONDERFUL

SPACE News - Solar Sail Project (audio supplied)

On a "light theme" the following was sent through by Tom VK7TL and is a fascinating look at a project where light is being used to move very small satellites through space.

The Planetary Society is building a spacecraft that will sail on sunlight alone by the end of 2010. The new solar sail project, boosted by a one-million-dollar anonymous donation, is the beginning of an innovative program that will launch three separate spacecraft over the course of several years.

The program starts with LightSail-1, which will demonstrate that sunlight can propel a spacecraft in Earth orbit. LightSail 2 and 3, more ambitious and aim to reach farther into space.

Sailing on light pressure (from lasers rather than sunlight) is the only known technology that might carry out practical interstellar flight, helping pave our way to the stars. The project also has many practical applications that include

Monitoring the Sun for solar storms, providing stable Earth observation platforms, and exploring our solar system without carrying heavy propellants.

The solar sail propulsion is simple in concept. Light photons bounce onto a mirror-like aluminized Mylar sail. As each photon hits, its momentum is transmitted to the spacecraft.

Photons have no mass but lots of energy, so a solar sail space probe requires no onboard fuel. The force acts continuously, meaning a solar sail can eventually reach speeds five to ten times greater than any chemical rocket.

For more information on this fascinating project take a look at the link on the email and internet editions of this broadcast.

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

5B4AHJ CELEBRATES 50 YEARS IN HAM RADIO

Alan Jubb, 5B4AHJ, will celebrate his 50th anniversary as a licensed radio amateur on October 25th. To commemorate the event, he will use the special Cypress call 5B50J beginning this October 25th and continuing for a year. Listen out for him on CW and SSB. QSL via 5B4AHJ, direct or via Logbook of the World.

(ARNEWSLINE)

CROATIA

On the air, keep an ear open for Croatian special event station 9A10P to be active through the end of the year. This, to celebrate the anniversary of the city of Djurdjevac. A special QSL will be issued, and all QSOs will be confirmed automatically via the bureau.

DEMOCRATIC REPUBLIC OF CONGO

And if you missed working ON4HIL as 9Q50ON, I the Democratic Republic of the Congo, don't worry. Patrick will help the locals in Kinshasa get their club station on the air and assist them in making their first QSOs as 9Q50AR. This is another special event call sign to celebrate the 50th anniversary of the
independence of the Democratic Republic Congo and will be used by different local operators until the end of the year. A QSL Manager is expected to be announced shortly.

(OPDX)

AO, AM, AN: Spain Soccer World Champions

The joy of a whole country will be also transmitted by radio hams through the airwaves until July 31th.

The Spanish PTT has authorized all their radio amateurs to use these special prefixes (AO, AM, AN) until then, at the request of EA Digital Federation.

It comes to recognize the effort of these dedicated sportsmen, its team work and fair play, beyond winners and losers.

So, don't be surprised to see these prefixes populate our bands and feel free to contact these callsigns - happy hams are behind them.

Thanks to all !

EA Digital Federation
http://www.fediea.org/

PORTUGAL

On the air, word from Portugal comes word that special event station CS29MR will operate from July 12th to the 18th. This to celebrate the 29th International Motorcycle Concentration Faro. Operations will be on 80 through 6 meters using CW, SSB and RTTY. More information can be found on QRZ.com

AWARDS

AWARDS

WORKEDGRIDS FREEWARE APP FOR GRID SQUARE CHASERS

WorkedGrids is a freeware Windows application that displays a map showing Amateur Radio grid squares contacted and logged using a third-party logging program. The app was developed by VE2ZAZ, and uses colors to display information on a per-band basis. Up to four bands can be displayed concurrently. For its input, the program reads the plain-text ASCII log files generated by most logging programs. The file is read at a set interval and the worked grid squares on the map are updated in a dynamic way as the contest progresses and the log file is periodically saved. WorkedGrids can be downloaded from tinyurl.com/24okrtm.

(ARNEWSLINE)

A Puzzling Collapse of Earth's Upper Atmosphere
July 15, 2010: NASA-funded researchers are monitoring a big event in our planet's atmosphere. High above Earth's surface where the atmosphere meets space, a rarefied layer of gas called "the thermosphere" recently collapsed and now is rebounding again.
Image not shown here ED
Layers of Earth's upper atmosphere. Credit: John Emmert/NRL. [larger image]
"This is the biggest contraction of the thermosphere in at least 43 years,"says John Emmert of the Naval Research Lab, lead author of a paper announcing the finding in the June 19th issue of the Geophysical Research Letters (GRL). "It's a Space Age record."....Extract and notes:
http://www.nzart.org.nz/pdf/2010/thermosphere-collapse-IL-211.pdfThe full article:

GB2RS NEWS

Sunday 25th July 2010

The news headlines

It's IOTA weekend

G2 and M1 QSL managers change

ROS digimode may ride again

This weekend is the RSGB IOTA Contest. The contest runs from noon UTC on Saturday to the same time on Sunday, and operation is in the 3.5, 7, 14, 21 and 28MHz bands. Many clubs and individuals will be activating islands around the world, some of which are rarely heard on the air. Don't forget that all amateurs on the British Isles are automatically operating from an island, so will be keenly sought by others overseas. Full details are at www.iotacontest.com.

The QSL sub manager for the G2 series, John Godfrey, M0JOH, is currently recovering in hospital from a major operation. The RSGB team wish to thank him for his service to his fellow amateurs,�a speedy recovery and a prompt return to the bands. His place has been taken by Anthony Nowell RS94177, making G1 and G2 calls a combined QSL group. There are also major changes to the handling of QSL cards for M1 call signs, due to changing levels of activity. 6 groups have now been absorbed into a single M1 series, under the former M1F-Z manager Martyn Wheal, 2E0MWW. The RSGB wishes to thank Anthony, RS94177, Mike, GM6OFO, Ted, G3DRN, Neville, G0DQJ and Chris, G7NRO for their invaluable help with the M1 series Other call groups that are handled by some of these volunteers are unaffected. For details of these and all other changes, please check the Members area of the RSGB web site, QSL section.

Last week we reported that development work had been stopped on new digital mode ROS after the author posted to that effect on his blog. Since then there have been unconfirmed rumours that Jos� Alberto Nieto Ros has relented and is continuing development work. GB2RS News has tried to contact the author but no confirmation has yet been received.

The producers of a forthcoming TV series are inviting amateur radio enthusiasts and others to take part. The show revolves around a souped-up double decker bus which is touring cities around Britain. Producers are looking for single people aged between 18 and 30 to take part and are particularly keen to hear from people with any sort of talent to show off. Described as a sort of Blind Date on a bus, you can

get more information by emailing dating@carbonhq.com or by calling 0207 324 0744.

Ireland's telecommunications regulator ComReg has issued a new set of call signs for use by the Amateur Radio Emergency Network. The three calls are EI0AC, EI0EC, and EI0NC and supersede any callsigns issued in the past. The new calls are available for use during training and emergency nets as directed by Ireland's National Coordinator.

Just time now for a gentle reminder that International Lighthouses and Lightships Weekend is less than a month away. Organised by the Ayr Amateur Radio Group, this international, non-commercial goodwill event is now very well established and sees activity from over 400 lighthouses in 50 countries. Now would be a good time to register on the www.ILLW.net website, where you can find full information about the 2010 event.

And now for the details of rallies and events for the coming week

Today, Sunday 25, July the Horncastle summer rally takes place at Horncastle Youth Centre, Willow Road, Horncastle, Lincolnshire LN9 6DZ. Details from Tony, G3ZPU, on 01507 527835.

Also on Sunday 25th is the Colchester Radio Amateurs annual rally at St Helena School, Sheepen Road, Colchester CO3 3LE. Opening at 10am, there will be traders, a car boot sale, bring and buy and special interest groups. For more information contact Brian on 01206 822547.

On Sunday 1 August the King's Lynn ARC rally & car boot sale takes place at King's Gaywood Community Centre, PE30 4DZ. Opening time is 10am and admission is ?1.50. Details from Ray, G3RSV, on 01553 671307 or on the web at www.klarc.org.uk.

Sunday 1 August also sees the Lorn radio amateur rally at Crianlarich Village Hall, Crianlarich, near Oban FK20 8QN. With an opening time of 10.30am there are trade stands, catering and a raffle. Details from GM0ERV by email to gm0erv@sky.com.

Now for the news of special events

Special event station LY2010LRMD will be operating continuously on 23 to 25 July from the Lithuanian National Camping Hamfest. Details at www.lrmd.lt/saskrydziai_en.htm.

GB0YD will be on the air today, 25 July, on 80m through 10m and 2m, celebrating Yorkshire Day from Pontefract.

Also active today is GB4SBS for Second Bracknell Scouts at kings Langley, Hertfordshire. Operation will be from 180m to 10m, 2m and 70cm.

Monday 26 July sees Cheshire Scouts active as GB2CS from Knutsford, Cheshire. Operations are on 80m to 10m and 2m.

Very special GG100 series calls have been issued to celebrate the centenary of Girl Guiding. On 29 July GG100GG becomes active from Leeds on 160m to 10m, 2m and 70cm. GG100EHG will be celebrating for East Hampshire Guides from Shedfield, Hampshire on 2 August, with activity on 80 to 10m and 2m.

Special event station GB2VET is operating on 30 and 31 July and 1 August, celebrating the army, navy, and air force reunion at East Park, Holderness Rd, Hull, East Yorks HU8 8JU. They are hoping to use a vintage R1154/T1155 plus more modern equipment. Operation will be on 80m, 40m and 20m with a mixture of CW & SSB. Contact Bernard Atkinson, G0SWO, 01482 351 907.

GB50RN will be operating from 6 to 8 August in Coventry to celebrate the 50th anniversary of the Royal Naval Amateur Radio Society. Operation will be on CW and SSB on HF bands from 80-10m plus FM on 2m and 70cm.

And now the HF DX news compiled from 425 DX News and other sources

Much of the DX news this week is dominated by activations for the RSGB IOTA Contest this weekend. Here is a very small selection.

A team from the Royal Omani Amateur Radio Society will participate in the IOTA Contest as A43MI from Masirah Island (AS-014). QSL via A47RS.

Simon, HS0ZIB will be active as HS0ZIB/p from Lanta Island AS-053 as a single-op 12 hour low power DXpedition entry. Activity will primarily be on 20m SSB and there may also be some non-contest PSK31 activity. Please QSL direct.

Jiri, OK1DRX, will be active as OZ/OK1DRX from Laeso Island EU-088 also as single-op 12 hour low power DXpedition entry. QSL direct please.

Barry, VE1TRI and John, VE1CDD will be active as VE1TRI/P from Long Island, NA-127. QSL via VE1TRI by the Bureau.

The Japanese operators on Futuna OC-118 have changed their callsigns and are using FW5F and FW5H. QSL via JA2NQG and JA2BNL respectively.

Celebrating their victory at the World Cup, amateur radio stations from Spain may use special prefixes until 31 July. EA stations may use AO, EB stations may use AM and EC stations may use AN.

Erling, LA4FPA will be active from Vigra Island (EU-056) between 18 July and 2 August. He will operate on the HF bands and 6 metres, plus satellites FO-29, AO-51, HO-68 and possibly VO-52. QSL via home call.

Commemorating the 240th anniversary of the Battle of Kagul, special event station ER240C will be active until 31 July. Email er5aa@mail.ru for information on the relevant award. QSL via ER5AA, direct or bureau.

Special event station 9A10P/P will be active from a protected geographical-botanical reserve known as Croatian Sahara,&#65533;9AFF-032, on 25 July. All QSOs will be confirmed automatically via the bureau. More about the Croatian Flora Fauna programme is online at www.9aff.com.

Now the contest news

As previously noted, this weekend is the RSGB IOTA contest from noon UTC on Saturday 24th until the same time on Sunday 25th July.

On 27 July it's the 50MHz UKAC from 1900 to 2130 UTC. All modes can be used on the 6m band and the exchange is RST, serial number and locator.

And now the solar factual data for the period from the 12th to the 18th of July, compiled by Neil Clarke, G0CAS on the 19th of July.

Solar activity was very low to low. C class solar flares occurred on the 13th, 14th and the 17th. Solar flux levels declined from 80 units on the 12th to 76 by the 15th. Levels then increased again back to 79 units. The average was 78. The 90 day solar flux average on the 18th was 74 units, that's one unit down on last week. X-ray flux levels varied little day to day and averaged A9.3 units. Geomagnetic activity started at quiet levels but on the 14th and the 15th a small coronal hole disturbance took place. The Ap index for both days were 11 and 10 units respectively. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increased from 290 kilometres per second on the 14th to 500 by the 15th. However, by the end of the period had declined back to 290 kilometres per second. Particle densities were low throughout except for a brief increase to 16 particles per cubic centimetre during the 14th. Bz varied between minus and plus 16 nanoTeslas on the 14th for a short time just after the disturbance arrived. On the quieter days Bz varied between minus and plus 2 nanoTeslas, for example on the 17th and the 18th.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be at very low levels. Solar flux levels are expected to be in the low 70's for most of the week. Geomagnetic activity for the next few days could be unsettled due to a recurring coronal hole. Activity is then expected to return to quiet levels from midweek. MUFs during daylight hours at equal latitudes should be around 18MHz for the south and 15MHz for the north. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1200 and 1900 hours UTC. Sporadic-E is expected to take place most days during the coming week. The Middle East could occasionally be possible to work on 50MHz via double hop sporadic-E.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 26 July Gloucester Amateur Radio & Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 26 July South Birmingham Radio Society is on the air and having a field day meeting. Contact Don, on 0121 458 1603.

On Monday 26 July Stratford Upon Avon District Radio Society is holding a construction competition. Contact G0CHO, on 01608 664488.

On Monday 26 July Wythall Radio Club continues its Foundation course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 27 July Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 27 July Kettering & District Amateur Radio Society is having an operating night. Details on the web at http://kdars.co.uk.

On Tuesday 27 July Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 27 July Mid-Warwickshire Amateur Radio Society is discussing technical topics. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 27 July Wythall Radio Club is having a natter and on the air evening. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 28 July Bolsover Amateur Radio Society is holding a committee meeting. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 28 July Kettering & District Amateur Radio Society is having a gentleman's group afternoon. Details on the web at http://kdars.co.uk.

On Wednesday 28 July Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 28 July Midland Amateur Radio Society is having a laptop computer evening and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 28 July Telford & District Amateur Radio Society is having a boat trip on the River Severn aboard the Hafren, embarking from 7.30pm at Iron Bridge. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 29 July Kettering & District Amateur Radio Society is having a training night. Details on the web at http://kdars.co.uk.

On Thursday 29 July RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. New faces and visitors are always welcome. Details from Judy Rowlands, on 07544 456422.

On Friday 30 July Coventry Amateur Radio Society is holding a HF, VHF and UHF radio workshop. Contact John, G8SEQ, on 07958 777363.

On Friday 30 July Leicester DX Group commences its field weekend at Tilton on the Hill, Leicestershire. Contact Ellen, M6LDX, by email to leicesterdx@mail2world.com.

On Friday 30 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 31 July Lincoln Short-Wave Club is opening its permanent station GB2CWP in the Radio Room at East Kirkby Aviation Heritage Centre. For more information contact Pam Rose, G4STO, on 01427 788356.

On Sunday 1 August Kettering & District Amateur Radio Society is having a general meeting at 11am followed by a social meeting. Details on the web at http://kdars.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 26 July Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 26 July Bolton Wireless Club is running a 2m direction finding field event starting from the Britannia Hotel. For details, send an email to boltonwireless@gmail.com.

On Monday 26 July Scarborough Amateur Radio Society is having a talk and radio demonstration by Yorkshire Air Museum. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 26 July Sheffield Amateur Radio Club is having a talk on backpack portable or going mobile. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 26 July South Manchester Radio and Computer Club holds its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Tuesday 27 July Chester & District Amateur Radio Society is having a pie and pint evening at the Frog in Upton-by-Chester. Details from Barbara Green on 07957 870770.

On Tuesday 27 July Morecambe Bay Amateur Radio Society has its social evening. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

On Tuesday 27 July Otley Amateur Radio Society is taking part in the 50MHz UKAC and having a natter night. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 28 July Hornsea Amateur Radio Club is having an IOTA washup and activity evening. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 29 July Preston Amateur Radio Society is having a talk on SBS radar by Rod, G1NGR. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 29 July South Manchester Radio and Computer Club is having a talk on the design and construction of a microphone preamplifier by Peter, G0BHP. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 29 July Wakefield & District Radio Society has a briefing in advance of the 1 August narrow boat trip. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 30 July East Cleveland Amateur Radio Club is having a radio components catalogues evening and on Saturday 31 July there is a Foundation exam. For more information contact Alistair, G4OLK, on 01642 475 671.

On Sunday 1 August Morecambe Bay Amateur Radio Society is running a special event station at Heysham Classic Car Rally. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 27 July Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 27 July Livingston & District Amateur Radio Society is holding Morse code practice. Contact Norman, on 07740 946192.

On Wednesday 28 July West of Scotland Amateur Radio Society is working on construction projects and having license training. On Friday 30 July there will be a club night including presentations, guest speakers, a raffle and a quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH-EAST and EAST ANGLIA

On Tuesday 27 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 27 July Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 27 July Dorking & District Radio Society has a radio evening on the South Downs. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 27 July Horndean & District Amateur Radio Club is having a talk on HF mobile DXing by Richard, M0UOO. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 28 July Darenth Valley Radio Society is holding a fox hunt. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 28 July Farnborough & District Radio Society has its construction contest. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 28 July Havering & District Amateur Radio Club is having a numerology evening with a fun look at interpreting numbers by Fred Curtis. Contact John, M0UKD, on 07817 365354.

On Wednesday 28 July Norfolk Amateur Radio Club is having an informal, construction, workshop and Bright Sparks evening. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 28 July Worthing & District Amateur Radio Club has its annual 2m fox hunt. For more information contact Roy, G4GPX, on 01903 753 893.

NEWS FOR WALES

On Monday 26 July Llanelli Amateur Radio Society is having a junk sale & club raffle. Contact Craig, MW0MXT, on 01269 840292.

Members of The Porthmadog and District Amateur Radio Society are undertaking a project to take amateur radio into the community. They intend to visit groups such as the Scouts and to participate in national events such as `Thinking day on the air' and `Jamboree on the air'. There will also be visits to local schools where they will take along, and demonstrate the use of, a fully working radio station, giving pupils the opportunity to become familiar with this interesting hobby. Members will also participate in short discussion groups explaining the educational benefits gained from being a radio operator. The society is also offering the same facilities to any community group that would like to explore amateur radio. These visits are offered as a free service to any community/educational group. Anyone who is part of, or knows of, any community group that would like to participate in this project is invited to contact Mr Robert Hughes-Burton on 07971 770381 for further details.

Ohio/Penn DX Bulletin No. 969
The Ohio/Penn DX PacketCluster
DX Bulletin No. 969
BID: $OPDX.969
July 26, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, W3AWU, N4AA & QRZ DX, K5KV, NV7E, K8GI, K8YSE, W8GEX (60m News), 9A2MF, AT International, CO8TW, DL5YWM, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, I1HYW, I1JQJ/IK1ADH & 425 DX News, IK7JWX, IK7JWY, IZ2DPX, M0ZIF, OZ5DL, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA0U, UN6QC, VE2XB, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VK4AN for the following DX information.

*** EDITOR'S STATUS: This week was good until Thursday. My leg had some swelling during the week, and I was sent for an Ultra-sound early Thursday morning. I am now in the hospital because they found a blood clot in my leg. They have started blood thinner shots in the belly late Thursday night. I still have to use crutches and can not put weight on the right leg. The good news is I got to see the knee again at the doctor's office and the stitches came out. I was able to finish the bulletin remotely via my hospital bed thanks to a WIFI connection. It helped kill the time.... 73 de Tedd KB8NW

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late RSGB IOTA Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the RSGB IOTA Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 16th-July, through Friday, 23rd-July there were 208 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9U, 9V, 9X, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON,

OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V3, V5, V8, VE, VK, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4X, ISRAEL. Mike, VE2XB, will be active as 4X/VE2XB for one month or so starting around July 26th. Activity will be on all bands using CW and SSB. He will listen for openings on 6m too. QSL via his home callsign (QRZ.com).

5C, MOROCCO. Ruggero, IK2PZC, will be active as 5C2P during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Low-Power entry. QSL via IK2PZC.

5V7, TOGO (Update). The DXpedition to Togo by the Italian team lead by Silvano, I2YSB, has announced that the operation will take place between October 10-23th. The callsign to be used will be 5V7TT. Operators mentioned are: Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio, IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT. Pilot station is Art/IK7JWY. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1822, 3505, 7005, 10106, 14025, 18075, 21025, 24895 and 28025
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945 and 28495
RTTY - 7040, 10140, 14080, 18103, 21080, 24920 and 28080 kHz
QSL via I2YSB direct with 2 USDs and SAE (NO IRC, NO STAMP). DO NOT QSL via the Bureau (I2YSB is not an ARI member). The official forum of the DXpedition is now open at:
http://www.hamradioweb.org/forums/forumdisplay.php?fR
(registration needed to send message, not needed to read only).
For more info about the DXpedition, visit the official Web site at:
http://www.i2ysb.com

5Z, KENYA. Sig, NV7E/ZS6SIG, who has now relocated from Pretoria, South Africa, to Nairobi, Kenya, is now signing 5Z4EE for the next four years. Sig originally had the 5Z4EE callsign back in the 1980s. Activity will be on all bands 160-10 meters. Please QSL via NV7E or at the address shown for 5Z4EE on QRZ.com. ADDED NOTE: Sig, also informs OPDX, "Also recently licensed in Kenya is Andy, KI4THF, now 5Z4ZD. He is my next door neighbor in Nairobi. Please QSL via his address on QRZ.com."

5Z, KENYA. John, IZ2DPX, will be active as 5Z4/IZ2DPX from Malindi between August 4-17th. Activity will be on 40/20/17/15/12/10 meters. QSL via IZ2DUW direct or by Bureau to IZ2DPX.

BX5, TAIWAN (AS-020). Jimmy, BX5AA, will be active during the RSGB IOTA Contest (July 24-25th) as a Single-Op/All-Band/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA. Visit his Web page at: http://blog.yam.com/bx5aa

9A, CROATIA (Special Event/WFF Op). Operators Franjo/9A2MF (CW and SSB) and his XYL Anica/9A7SSY (digi mode) will be active as 9A0GEO from the Nature Reserve and GeoPark Papuk on July 24-25th. Operations will be on 40 and 20 meters. This activity is to activate the Park's reference number 9AFF-014 for the World and Croatian "Flora Fauna Programs". For more details on the Papuk GeoPark, go to: http://www.papukgeopark.com For more info about "Flora Fauna Programs", see:
World http://www.wff44.com
Croatian http://www.9aff.com

CO8, CUBA (NA-015). Juan, CO8TW, will be active in the RSGB IOTA Contest (July 24-25) as a Single-Op/All-Band/SSB/Low-Power entry. QSL via HB9SVT, and the log will be available after the contest at:
http://www.qsl.net/co8tw

D4, CAPE VERDE. Luca, IK2NCJ, will once again be active as D4C from Sao Vicente Island (AF-086) between August 5&#65533;26th. Activity will include the WAE DX CW Contest (August 14-15th) as a Single-Op/All-Band entry. QSL via LoTW or CT1ESV by the Bureau or IZ4DPV for direct. For the latest information, check the D4C Web page at: http://www.d4c.cc

EA8, CANARY ISLANDS. Mike, DK2TUX, will be active as EA8/DK2TUX from Fuerteventura (DIE S-006, WLOTA L-0883) between August 16-20th. Activity will be on 40-15 meters. QSL via DK2TUX.

EX, KYRGYZSTAN (6m Beacon). Oleg, EX8MLT, in Kyrgyzstan, has activated the first constantly operating radio beacon for 6 meters in his country. The callsign for the radio beacon is EX1SIX. Beacon Parameters are: Frequency - 50026 kHz, Mode - CW, Power - 60 W, Antenna - vertical GP; will be replaced in the near future on a Halo. Grid locator - MN82sd, QTH - village Tamga, southern coast of lake Issyk Kul.

FM, MARTINIQUE. Gerard, F2VX, is active from here as FM/F2JD until August 2nd, from FM5WD QTH.

I3/I5, ITALY (Update to OPDX.967). Alain, F5LMJ, has cancelled his trip to Italy which was going to take place between July 17-31st.

IOTA NEWS.....
AS-018. Vlad, UA0FM, will be active from Sakhalin Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/All-Band/SSB entry. QSL via UA0FM.

AS-060. Members of the Gwangju DX Club (6L0NJ) will be active as 6L0NJ/4 from the Korean Shinji Island (WLOTA-4010) between July 31st and August 3rd. Activity will be on all HF bands using SSB, CW and various Digital modes. QSL via HL4XM.

AS-138. Members of the JiangSu DX Club (JSDXC) will activate Pingtan Island between July 24-29th. Activity will be on the HF bands and also 6m/2m/70cm, as well as EME and the Satellites. The operators will sign homecall/5. QSL via their home callsign. Operators mentioned are: Bing/BA4TA, Chen/BA4RC, Wang/BA4RS, BA4RN, Li/BA4WI, Chen/BA4RB, Dale/BA4TB, Yong/BA4VE, BH4REQ,

Zhengtao/BH4ROO, Li/BD4REB, Gang/BD4RPJ, BG4RQJ, Hsia/BH4RLO and Michael/BD5RV. The team will also be in the RSGB IOTA Contest (July 24-25th) using the callsign B4R/5. QSL via BA4TB.

EU-008. Members of the Cockenzie & Port Seton Amateur Radio Club will once again activate GM2T from the Isle of Tiree (IOSA NH04, WAB NM04), the most westernly part of Scotland's Inner Hebridean Islands, during the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. Operators mentioned are: Cambell/MM0DXC, Malcolm/MM0YMG, Bob/GM4UYZ, Robin/MM0VTV, Gary/MM0FZV, Moe/MM0MRM, Steve/MM0GZA, Geoff/MM5AHO, Brian/M0RNR, Jim/G3VOU, Brian/G3UJE, Moe/MM0MRM and Ellis/GM4GZW. QSL via GM4UYZ.

EU-025. Sal, IW9FRA, will be active from the western part of Sicily Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op entry. This will be a fixed station using high power and beam antennas on 10/15/20/40 meters. QSL via LoTW or by the Bureau or direct to IW9FRA.

EU-031. Operators Antonio/IC8FBU and Giorgio/IZ8FAV will be active as IC8FBU from Capri Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/CW entry. QSL via the Bureau.

EU-043. Operators Hakan/SM6EQO and Mikael/SM6VJA will be active as SM6EQO/P from Groto Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/All-Band/CW/QRP/24HR entry. QSL via LoTW or by the Bureau.

EU-091. Operators Michele/IK7FPX, Gilberto/IK7LMX, Giacarlo/IK7QMJ, Angelo/IZ7CTE and Marco/IZ7CDE will be active as IZ7CDE/p during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/Low-Power/Mixed/24HR entry.

EU-091. (Update) Operators Fred/IK7JWX, Paolo/IK7UXW, Sergio/I7ZTM, Simon/IZ7ATN and Vincenzo/I7PXV will be active as IZ7ATN/p from Isolotto Traversa (IIA BR-009, LH WAIL PU-028, ARLHS ITA-175, WLOTA L-005 and Grid Loc. JN80xp) in the Pedagne IOTA Group during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/Low-Power/Mixed entry. QSL Manager is IK7JWX. Look for activity before and after the contest. Some operators will be active on the WARC, WHF, UHF, 6m.. SSB (PSK31, RTTY).

EU-096. Jarno, OH6NJ, will be active as OH6NJ/1 from Nauvo Island during the RSGB IOTA Contest. QSL via OH6NJ.

EU-110. Brani, OM2FY, will be active as 9A/OM2FY from Porer Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/24HR/CW/Low-Power/Unassisted entry. QSL via OM2FY (see QRZ.com).

EU-110. Goran, S52P, will be active as 9A/S52P from SV Ivan Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/All-Band/CW/QRP/12HR entry. QSL via his home callsign. Look for

activity before the contest as 9A8ZRS.

EU-110. Janko, S57L, will be active as 9A/S57L from SV Ivan Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/All-Band/CW/Low-Power/12HR entry. QSL via his home callsign. Look for activity before the contest as 9A8ZRS.

EU-123. On the week commencing September 25th, members of Sands Contest Group and Workington Radio Club, along with Brendan Minish/EI6IZ will be visiting the Isle of Aran off the coast of southwestern Scotland, operating under the callsign MM0SCG. They will be operating on VHF, HF, SSB, CW and the Digtal modes. The island has lighthouses and the following reference numbers are good: SCOTIA Island number CS14 and IOSA number CL01. They will also activate SOTA summits, time permitting.

EU-124. Look for GW6W to be active from Holy Island, North Wales, during the RSGB IOTA Contest. Activity will be field day style in the club caravan on the breakwater at Holyhead, as a Multi-Op/Low-Power, entry.

EU-125. A German team of operators will be active as OZ0FR from Romo Island (DIA NS-001 and WFF OZFF-004) during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/High-Powe entry. Operators mentioned are: Gabi/DF9TM, Frank/DL2SWW, Wilf/DJ6TK and Ric/DL2VFR. Look for activity before the contest on July 23rd. QSL via DL2VFR, direct or by the Bureau.

EU-129. Operators Olaf/DL7JOM, Rainer/DL2RVL, Bert/DL2RNS, Manfred/DL7JSM and Manfred/DH2AX will be active as DL0KWH from the Village of Peenemunde on the Island of Usedom during the RSGB IOTA Contest (July 24-25th) as a Multi-Op/Mixed/High-Power entry. QSL via DL0KWH.

EU-132. Operators Wieslaw/SP1EG, Klaus/DH1PRA, Timo/DK9WE (SO1WE), Jens/DL3ALF, Ulf/DL5AXX, Dan/DL5SE and Daniel/DL5YWM will be active as SN1A from Wolin Island during the RSGB IOTA Contest (July 24-25th). QSL via SP1EG, direct or by the Bureau.

EU-132. Operaors Przemyslaw/SP7VC and Adam/DJ0IF will be active as SP7VC/1 and SP8RX/1 from Wolin Island during the RSGB IOTA Contest. QSL via their home callsigns.

EU-133. Look for UA3A/1 from Severnyy Berezovyy to be in the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. QSL via UA1AIR.

EU-172. Operators Peter/DL4AMK, Dieter/DK1AW, Joachim/DJ2AS, Lutz/DL3ARK and Lutz/DH8WW will be active as OZ/homecalls from Aro Island (DIA JY-003, ARLHS DEN-072, WLOTA 0973) between August 21-28th. Activity will be on 40-10 meters using CW, SSB, RTTY and PSK. QSL via their home callsigns. For more info, visit their Web page at: http://www.dxclub.net

NA-034. Weather permitting, Kelly, K4UPG, will be operating QRP portable on Honeymoon Island (USI FL 017S) on Sunday, July 25th, between 1700-2200z. Activity will be primarily CW between 14040-14060 kHz and 21040-21060 kHz (if 15m is open). Kelly states he will attempt to be on 40 kHz +/- on the half hour mark (xx30z) to give island hunters a shot at him while his primary operation is the QRP contest FOBB (Flight of the Bumblebees).

NA-046. Howie, K1VSJ, will be active as K1VSJ/p from Martha's Vineyard (USI MA-005S, Dukes County, Massachusetts, WLOTA 2804), during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Mixed/Low-Power/24HR entry. QSL via his home callsign, direct or by the Bureau.

NA-065. Esed, K7BX, will be active as K7BX/p from Whidbey Island, WA, during the RSGB IOTA Contest (July 24-25th) as a Single-Op/DXpedition/Low-Power/CW entry. QSL via LoTW or direct to K7BX.

NA-112. Operators Marty/W4MY and Karl/W4CHX will be active as W4MY from Ft. Macon State Park on Bogue Banks Island (Emerald Isle, Carteret County, North Carolina), during the RSGB IOTA Contest (Saturday only, July 24th, between 1200-2400z) as a Multi-Op/Mixed-Mode entry. QSL via W4MY.

NA-143. Leslie, AD5WB, will be active from Galveston Island (USI TX001s) during the RSGB IOTA Contest as a Single-Op/Fixed-Island/High-Power/Phone/12HR entry. He will be on for 12 hours during the contest. Leslie plans on starting operations on Saturday (1200z) and then take a break during the day time hours and get back on the air in the late afternoon and operate into the evening/night. Activity will be on 40/20/15/10 meters as conditions and weather permit.

OC-137. Eddie, VK4AN, is a resident on Russell Island and will participate in the RSGB IOTA Contest (July 24-25th) as a Single-Op/Mixed/Assisted/Low-Power/24HR entry. Look for Eddie at the bottom of each band/mode; i.e. 21001, 21201, 14001, 14151, 7001, 7050 etc...

OC-171. Craig, VK4LDX, will be conducting a short term DXpedition to Magnetic Island between July 23-25th, as VK4LDX/P. The main purpose is for the RSGB IOTA Contest between 1200z, July 24th, and 1200z, July 25th. Craig will be using 100W into verticals for 40m, 20m, 15m and 10m as a Single-Op/All-Band/Low-Power/24HR entry. Before the contest he will be operating PSK on 40, 20 and 15m. Later on that Saturday, he hopes to be available on the ANZA DX Net which starts at 0515z on 14183 kHz. For updates, visit his blog at: http://vk4ldx.blogspot.com

SA-026. Operators Atilano/PP5EG, Evan/PP5NZ, Fabiano/PY3VK and Fabio/PP5BZ will be active as PT5T from Santa Catarina Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. QSL

via K3IRV.

Jul 27 AN --------------------
Jul 28 AN BN - Below Normal
Jul 29 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 30 AN LN - Low Normal
Jul 31 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 1 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OX, GREENLAND. After more than 35 years, Ole, OZ5DL (OV5A), will be active again from Nuuk, Greenland, as OX3DL, between July 28th and August 6th. QSL via OZ5DL, direct or by the EDR Bureau.

PJ7, SINT MAARTEN (NA-105). Randy, K5SL, will be active as PJ7/K5SL between July 31st and August 13th. Look for activity to be on 17 meters CW/SSB and 40/20 meters CW. QSL via K5SL.

QSL INFO AND NEWS.....
TS8P QSL STATUS. Fred, IK7JWX, reports that the TS8P QSLs have arrived from the printer, and he will be sending them out during the next week (direct and then after by the Bureau). Log is available online at: http://www.i8lwl.it

QSLS VIA LoTW: 7Q7BP, CQ0ODX/P, GW9T, HK3CW, IKI0OZD, IK4RQJ, JH9FNB, LU1BR, RA3DA, TO9HP, YO9HP and ZP4KFX

QSLS RECEIVED VIA MAIL: A65BD, C31CT, C91R, EA1AHA, EA1EJ, J38XX, MS0INT, OD5/DL6SN, OY2J, OY3AA, T32CI, T32MI and V63JQ

QSLS RECEIVED VIA THE BUREAU: None Reported This Week!

SY9, CRETE (EU-015). Operators Mike/SV9CVY, Victoria/SV2KBS and Ben/DL6FBL will be active as SY9M during the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. QSL via SV9CVY.

TC150, TURKEY (Special Event/Lighthouse Op). Members of the Turkish group called TCSWAT (TC Special Wireless Activity Team) will be active from the Sile Lighthouse for the 2nd activation of TC150SLH for the "150th Anniversary of Sile Lighthouse" between 1500z Friday, July 23rd, and 1700z Sunday, July 25th. The team will try to work on all bands using CW, SSB and PSK. The President of Republic of Turkey, Culture and Tourism Minister, Communication Minister, the Mayor of the Sile Municipality and some other authorities will be present at the station. For more information about

the Lighthouse and the rules of the "Sile Lighthouse Award", check the following link at: http://www.ta0u.com/2010/eng/PDF/TC150SLH.PDF

ZF, CAYMAN ISLANDS. Mike, K9NW, will be active as ZF2JT from Grand Cayman until July 25th. Activity will only take place between the first 12-14 hours of the RSGB IOTA Contest (July 24-25th) as a Single-Op entry. QSL via his home callsign.

ZS8, MARION ISLAND. Pierre, ZS1HF/ZS8M, continues to be active, mostly on 20 meters (14240-14245 kHz) SSB with some 40 meters (7140 kHz) SSB. Times vary: 20m between 1230-1530z and 40m between 0430-0630z. Online log is now available at: http://dx.qsl.net/logs
QSL address is: ZS8M, PO BOX 151, Worcester, 6850, Soth Africa. (The previous box number is still current; all new posts will be redirected to Box 151). The QSL Manager is Dirk Lotz, ZS1X ; E-mail address is: zs1x@iburst.co.za
It is recommended to read details about QSLing on QRZ.com. The ZS8M QSL cards are now being processed.

The following stations are expected to be active in the
RSGB IOTA Contest (July 24-25th, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2010 RSGB IOTA Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/iota2010.html

SARL NEWS - SUNDAY 18 JULY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with deep regret that we must announce that two radio amateurs became silent keys recently. They are: Gert Bester, ZS6ZB, became silent key on 10 July 2010 and Ben Pieters, ZR6BFW, on 17 July. Ben was a member of the Kempton Amateur Radio Technical Society.

We extend our sincere condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

AMATEUR RADIO MIRROR INTERNATIONAL TO MOVE TO A LATER MONDAY SLOT

CONSTRUCTION KIT BLUES

SUMBANDILASAT - SO 67 MORE SA PASSES PLANNED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

AMATEUR RADIO MIRROR INTERNATIONAL TO MOVE TO A LATER MONDAY SLOT

The Monday repeat transmission of Amateur Radio Mirror International will move to a later time slot, one hour later. The new time is 20:05 UTC or 22:05 CAT, the frequency remains 3 215 kHz. The change was necessary as Sentech has no antenna available due to repeated cable theft which is requiring major maintenance to be carried out on antennas and feeders.

Reception reports are urgently required. Please send your report to armi@sarl.org.za.

CONSTRUCTION KIT BLUES

The SARL has experienced many delays in the supply of some components required for the three construction kits on offer and has not been able to deliver kits at the RTA. To accommodate everyone it has been decided to offer the kits on mail order as well as making them available at future Radio Technology in Action 2010 events. The kits are now expected to be available from mid August. Orders paid for at the RTA will be delivered free of charge. New orders will require an additional R20 for packing and postage. More details will be announced in SARL News and on the RTA web page soon.

SUMBANDILASAT - SO 67 MORE SA PASSES PLANNED

SA AMSAT has announced that' after consultation with the CSIR Satellite Application Centre (SAC), more passes over South Africa will be scheduled. During the week these passes will be in the evening and on weekends during the day and on some evenings. If you are scheduling a special event at a school a special morning pass can be scheduled on request by sending an email to saardt@intekom.co.za at least 2 weeks prior to the event. More details about passes over other areas will be announced soon.

Hans, ZS6AKV, will present a paper at the AMSAT UK Satellite Colloquium next Sunday and discuss how best to accommodate other parts of the world on SO 67.

INTECNET WINNER IS ZS1DE

The winner of the 2 Gb memory stick is ZS1DE. He reported to the Cape Town relay by Henry Chamberlain, ZS1AAZ.

ARRL CEO PRESENTED WITH "BPL SPOILS" AWARD

During the Friday morning portion of the July 2010 ARRL Board meeting, ARRL Chief Executive Officer Dave Sumner, K1ZZ, received a surprise plaque from the Amateur Radio Research and Development Corporation (AMRAD). Titled "BPL Spoils," the plaque featured a discarded BPL modem that was rescued from surplus equipment belonging to a manufacturer that had decided to exit the BPL business. ARRL Chief Technology Officer Brennan Price, N4QX, presented the plaque to Sumner in recognition of his and the ARRL staff's tireless work against radio interference generated by BPL systems.

INTRUDER ON 70 cm REMOVED BY ICASA

Following a report by the SARL to ICASA about an unlicensed repeater operating in the 70 cm band, ICASA investigated the intrusion and instructed the owner who was providing services for his local community watch to shut down the repeater. It was not plain sailing as at first the owner refused ICASA access to his premises to seal the repeater. The repeater is now off the 70 cm amateur allocation.

PERMISSION TO OPERATE SPREAD SPECTRUM MADE EASIER

The SARL and ICASA have streamlined the application for permission to operate Spread Spectrum on the 40 metre amateur band. A simple request form will be included in the SARL DSSS kit. The form will also be made available on www.sarl.org.za in the next few weeks.

COMPETITION NEWS

This afternoon from 15:00 to 18:00 CAT you can participate in the Boland ARC's 40 metre contest. Get into your car and operate as a mobile station or set up a field station - RaDAR style, just get out of you shack!

On Wednesday evening the 4th leg of the SARL 80 metre Club Contest will be run. It is a phone contest and will be on the air from 19:30 to 20:30 CAT. Which club will submit the most logs? West Rand ARC is leading the pack, can your club do better?

On Sunday 1 August, the SARL's premier contest takes to the air. The SARL HF Phone contest will be on 20, 40 and 80 metres from 15:00 to 18:30 CAT.

Find all the rules for these three contests in the 2010 SARL Contest Manual and/or in HF Happenings 415, both are available on www.sarl.org.za.

The SARL Youth sprint results are as follows: 1st place: Rudi Sygo, ZS6RDI, 14 Years, wins an ARRL Hand Book; 2nd Place Mitchel Meinhardt, ZS6YH, 12 Years, wins a 40m direct conversion receiver kit; 3rd Place Simon&#65533; de Silva, (ham to be), 18 Years, wins Internet Security Software and a book (Prevent Unwanted Intrusion).

The youngest operator for the day was the 4 year old Eduan Leighton and the oldest, the 90 years young Leslie Clark, ZS6NV. The SARL thanks all participants and specially the members who submit logs.

CLUB NEWS

The Kempton Park Amateur Radio Technical Association (KARTS) will commence Class A training on Saturday, 31st July 2010 for the October 2010 RAE. Candidates must please contact either Stephen, ZS6SKY, or Clive, ZS6BT. Visit the KARTS website for contact information, www.zs6kts.co.za

The Sasolburg Amateur Radio Club will be presenting the RAE course from Thursday 29 July 2010 at the Vaal University of Technology, room S317. Classes are presented weekly from 18:30. Contact Riaan, ZS4PR, on 038 581 8569 or send e-mail to zs4pr@qsl.net.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 089, which rotated onto the eastern limb, appears to be growing into a fairly decent sunspot cluster. This region is

bubbling with B-Class flares and has also produced one C-Class flare thus far. The effective sunspot number is expected to be less than 30 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the late afternoons till after sunset. During sunset it will be good towards Europe. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Local conditions are going to be good during the day time on 40 m. With the change of season 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in noise levels 80 m is best for the shorter distances and also during the early mornings and late afternoons and is also the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today 25 July - Boland ARC 40 m Sprint 13:00-16:00 UTC; 28 July -SARL 4th 80 m Club Contest 17:30-18:30 UTC; 29 July - Sasolburg ARC starts classes for the RAE. For information send email to zs4pr@qsl.net; 31 July - Kempton Park ARTA (KARTS) starts RAE classes. Visit www.zs6kts.co.za for information; 1 August - SARL HF Phone Contest 13:00 to 16:30 UTC; 2 August - Closing date for PIC course in Pretoria on 14 August; 2-7 August - National Science Week at Sci Bono and ZS6SCI on the air from 09:00 till 14:00 CAT; 9 August - SARL YL Sprint on 40 m 09:00 to 10:00 UTC; 12 - 14 August - International EME Conference, Dallas, Texas; 14 August - PIC course in Pretoria; 16 August - Logs for SARL HF phone competition must be in.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav,ZS6BWN.

Thank you for listening, 73.

/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 25th July 2010

Silent Key

Eddie Steadman, EI9DJB (Silent Key) It is with great sadness that we report on the passing of Eddie Steadman, EI9DJB.

Eddie was a regular at SEARG meetings and for the last number of years, served as an officer on the SEARGcommittee.

May he Rest In Peace.

Region 4 IRTS News

Region 4 IRTS wish to congratulate all candidates who were successful in the recent theory examination, and look forward to hearing the new callsigns on the air soon.

Region 4 would also like to extend our thanks to the IRTS exam board and Comreg for issuing the results so quickly. It is hoped to run another successful course in early 2011. Those interested should contact Ger McNamara EI4GXB by email ei4gxb /at/ gmail.com or 087 2532512.

IOTA Contest

This weekend is the RSGB IOTA Contest. The contest runs from noon UTC on Saturday to the same time on Sunday, and operation is in the 3.5, 7, 14, 21 and 28MHz bands.

Many clubs and individuals will be activating islands around the world, some of which are rarely heard on the air. Don't forget that all radio amateurs In Ireland and on the British Isles are automatically operating from an island, so will be keenly sought by others overseas. The IOTA contest is in its last hour and there is still a chance to work some of the Irish expeditions for that rare WAI square.

Full details are at www.iotacontest.com.

UK Space Agency to launch CubeSat

The UK Space Agency has announced a one-year pilot programme to design and launch a CubeSat and is running a competition for ideas for payloads.

This miniature, cube-shaped satellite will allow the UK to test new space technologies and carry out new space research 'cheaply' and quickly.

The pilot programme, named UKube 1, will use a spacecraft platform that is currently under development by the company Clyde Space Ltd and will involve a competition amongst companies and academic groups to come up with the most innovative ideas for payloads. The winning payloads will be launched on the satellite in mid 2011.

Companies and academics who are interested in designing a payload can contact the UK Space Agency for more information.

There is another CubeSat under construction in the UK called FUNcube.It is being built by AMSAT-UK and the hardware will be shown at the AMSAT-UK International Space Colloquium.

AMSAT-UK FUNcube Website www.funcube.org.uk/

AMSAT-UK

AMSAT-UK International Space Colloquium will be held in Guildford July 31 - Aug 1. This event will be streamed live on the internet for those that can not make the visit.

For more details please go to www.batc.tv (click on Live Events)

Amsat also have a voice net on Sunday Mornings at 10.00am on 80m with updated News and Satellite information the frequency is 3.780 -+ QRM.

EI50UN Special Event

Friday 23rd of July saw the Irish Army celebrate fifty years of UN peacekeeping service. It was in July 1960 that the first contingent of Irish troops was airlifted by giant Globemaster aircraft to the former Belgian Congo. Twenty-six Irish soldiers died in the Congo including nine in November of that year in the Niemba ambush. By a strange coincidence, news of the ambush was relayed by amateur radio to the chief of staff of the army, General Se&#xFFFD;n McEoin.

You can read this intriguing amateur radio story of this by visiting www.ei0mar.org and clicking the Niemba ambush link at the bottom of the page. The Heathkit Apache transmitter used in relaying the sad news was donated to the vintage radio museum in Howth and was exhibited in Baldonnel for the event.

Howth Martello Radio Group members Tony (EI5EM), Joe (EI7FV), Eamonn (EI2CHB), Joe (EI2JZ) and Pat Herbert, curator of the vintage radio museum attended the ceremony and the events taking place afterwards.

The highlight of the day was visiting the tented radio shack where the special call-sign EI50UN was being activated for the occasion, organised by Pat EI5IF. Brian (EI4GL) and Paddy (EI1DG) were also in the shack. Tony (EI5EM) tried one of the army thigh-mounted straight keys to put out a CQ and had several nice QSOs using the EI50UN call. Unfortunately, time did not allow for working all the stations calling in the pileup. The Hurdy Gurdy Museum FACEBOOK site has photographs of the day's events.

The Heathkit Apache will be back on display in Howth shortly. The vintage radio museum is open daily until the end of October from 11 until 4 daily. The museum website is www.ei0mar.org.

EI0MAR Visitors

On Wednesday 14th July Billy (MI6ETE), David (GI0ISQ) and his xyl Doreen travelled from Coleraine especially to visit the Vintage Radio Museum in Howth. They had an early start, changing trains in Belfast and again at Connolly station to catch the DART for Howth. At the museum they were welcomed by Pat Herbert, the curator along with Andy (EI4ERB) and Nick (EI5GOB).

Everybody enjoyed the day and several QSOs took place using the EI0MAR call-sign. The visitors departed in the late afternoon for the journey home. Billy and David are members of the Bush Valley Amateur Radio Club which meets in the village of Dervock, in County Antrim.

On the following Saturday, the museum had the pleasure of welcoming members of the South East Amateur Radio Group to Howth.

SEARG Visit to Howth Martello Tower

On Saturday the 17th of July last, Francis (EI5GOB), John (EI8JA), Mark (EI4FNB), Paul (EI3ENB) and Mark (EI7IS) visited the Vintage Radio Museum at Howth Martello Tower.

>From the radio perspective and probably due to it's strategic location, the Martello tower at Howth has a significant history associated with it as it was used by the American radio pioneer Lee De Forest in 1903 to demonstrate his wireless telegraph system to the British post office where successful two way communications were established with another of De Forests stations in Holyhead.

Two years later in 1905, the Marconi Company established a receiving station at the Martello tower while the telegraph ship Monarch sailed to various locations in the Irish Sea transmitting signals which were analysed and measured at Howth while trying various antenna and earth configurations.

The visit was made all the more enjoyable by Pat Herbert (the museum curator) and Tony Breathnach, EI5EM (who runs the amateur station EI0MAR from the tower). Pat and Tony gave their guests a very warm welcome.

The museum is very east to get to using public transport and a visit is highly recommended.

For more info on the EI0MAR pleas see their web site, www.ei0mar.org Just Recently EI0MAR have been placed have been placed as an object on the internet map for our APRS Users to see the location. The Map can be found at a number of sources including www.aprs.fi

---

WAI Squares Activation

Last weeks activation had to be cancelled due to a small craft warning in effect however this trip will be re scheduled.

Practical Wireless Author G4AVA Dies

The very well known Practical Wireless Author, Gordon King G4AVA became SK recently.

Rallies

North Cork Radio Group is pleased to announce their first annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 19th 2010

The doors open to the public at 11.30 and the rally will run until about 5pm. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room rates for the rally a Single Room B&B: 60 and Double Room B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477.

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb /at/ gmail.com as soon as possible.

further details can be found via the groups website, www.northcorkradiogroup.com

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1897 Marconi registers the "Wireless Telegraph and Signal Company".

1899 Royal Navy successfully trials Marconi sets duringexercises.

1969 Neil Armstrong steps onto the surface of the moon.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

599. SARL NEWS - SUNDAY 18 JULY 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-07-26 13:37:44 UTC
From: website@sarl.org.za
Message-ID: <20100726133732.065AF33CC6@panix2.panix.com>
Source record: 5618
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 18 JULY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with deep regret that we must announce that two radio amateurs became silent keys recently. They are: Gert Bester, ZS6ZB, became silent key on 10 July 2010 and Ben Pieters, ZR6BFW, on 17 July. Ben was a member of the Kempton Amateur Radio Technical Society.

We extend our sincere condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

AMATEUR RADIO MIRROR INTERNATIONAL TO MOVE TO A LATER MONDAY SLOT

CONSTRUCTION KIT BLUES

SUMBANDILASAT - SO 67 MORE SA PASSES PLANNED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

AMATEUR RADIO MIRROR INTERNATIONAL TO MOVE TO A LATER MONDAY SLOT

The Monday repeat transmission of Amateur Radio Mirror International will move to a later time slot, one hour later. The new time is 20:05 UTC or 22:05 CAT, the frequency remains 3 215 kHz. The change was necessary as Sentech has no antenna available due to repeated cable theft which is requiring major maintenance to be carried out on antennas and feeders.

Reception reports are urgently required. Please send your report to armi@sarl.org.za.

CONSTRUCTION KIT BLUES

The SARL has experienced many delays in the supply of some components required for the three construction kits on offer and has not been able to deliver kits at the RTA. To accommodate everyone it has been decided to offer the kits on mail order as well as making them available at future Radio Technology in Action 2010 events. The kits are now expected to be available from mid August. Orders paid for at the RTA will be delivered free of charge. New orders will require an additional R20 for packing and postage. More details will be announced in SARL News and on the RTA web page soon.

SUMBANDILASAT - SO 67 MORE SA PASSES PLANNED

SA AMSAT has announced that' after consultation with the CSIR Satellite Application Centre (SAC), more passes over South Africa will be scheduled. During the week these passes will be in the evening and on weekends during the day and on some evenings. If you are scheduling a special event at a school a special morning pass can be scheduled on request by sending an email to saardt@intekom.co.za at least 2 weeks prior to the event. More details about passes over other areas will be announced soon.

Hans, ZS6AKV, will present a paper at the AMSAT UK Satellite Colloquium next Sunday and discuss how best to accommodate other parts of the world on SO 67.

INTECNET WINNER IS ZS1DE

The winner of the 2 Gb memory stick is ZS1DE. He reported to the Cape Town relay by Henry Chamberlain, ZS1AAZ.

ARRL CEO PRESENTED WITH "BPL SPOILS" AWARD

During the Friday morning portion of the July 2010 ARRL Board meeting, ARRL Chief Executive Officer Dave Sumner, K1ZZ, received a surprise plaque from the Amateur Radio Research and Development Corporation (AMRAD). Titled "BPL Spoils," the plaque featured a discarded BPL modem that was rescued from surplus equipment belonging to a manufacturer that had decided to exit the BPL business. ARRL Chief Technology Officer Brennan Price, N4QX, presented the plaque to Sumner in recognition of his and the ARRL staff's tireless work against radio interference generated by BPL systems.

INTRUDER ON 70 cm REMOVED BY ICASA

Following a report by the SARL to ICASA about an unlicensed repeater operating in the 70 cm band, ICASA investigated the intrusion and instructed the owner who was providing services for his local community watch to shut down the repeater. It was not plain sailing as at first the owner refused ICASA access to his premises to seal the repeater. The repeater is now off the 70 cm amateur allocation.

PERMISSION TO OPERATE SPREAD SPECTRUM MADE EASIER

The SARL and ICASA have streamlined the application for permission to operate Spread Spectrum on the 40 metre amateur band. A simple request form will be included in the SARL DSSS kit. The form will also be made available on www.sarl.org.za in the next few weeks.

COMPETITION NEWS

This afternoon from 15:00 to 18:00 CAT you can participate in the Boland ARC's 40 metre contest. Get into your car and operate as a mobile station or set up a field station - RaDAR style, just get out of you shack!

On Wednesday evening the 4th leg of the SARL 80 metre Club Contest will be run. It is a phone contest and will be on the air from 19:30 to 20:30 CAT. Which club will submit the most logs? West Rand ARC is leading the pack, can your club do better?

On Sunday 1 August, the SARL's premier contest takes to the air. The SARL HF Phone contest will be on 20, 40 and 80 metres from 15:00 to 18:30 CAT.

Find all the rules for these three contests in the 2010 SARL Contest Manual and/or in HF Happenings 415, both are available on www.sarl.org.za.

The SARL Youth sprint results are as follows: 1st place: Rudi Sygo, ZS6RDI, 14 Years, wins an ARRL Hand Book; 2nd Place Mitchel Meinhardt, ZS6YH, 12 Years, wins a 40m direct conversion receiver kit; 3rd Place Simon&#65533; de Silva, (ham to be), 18 Years, wins Internet Security Software and a book (Prevent Unwanted Intrusion).

The youngest operator for the day was the 4 year old Eduan Leighton and the oldest, the 90 years young Leslie Clark, ZS6NV. The SARL thanks all participants and specially the members who submit logs.

CLUB NEWS

The Kempton Park Amateur Radio Technical Association (KARTS) will commence Class A training on Saturday, 31st July 2010 for the October 2010 RAE. Candidates must please contact either Stephen, ZS6SKY, or Clive, ZS6BT. Visit the KARTS website for contact information, www.zs6kts.co.za

The Sasolburg Amateur Radio Club will be presenting the RAE course from Thursday 29 July 2010 at the Vaal University of Technology, room S317. Classes are presented weekly from 18:30. Contact Riaan, ZS4PR, on 038 581 8569 or send e-mail to zs4pr@qsl.net.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 089, which rotated onto the eastern limb, appears to be growing into a fairly decent sunspot cluster. This region is

bubbling with B-Class flares and has also produced one C-Class flare thus far. The effective sunspot number is expected to be less than 30 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the late afternoons till after sunset. During sunset it will be good towards Europe. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Local conditions are going to be good during the day time on 40 m. With the change of season 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in noise levels 80 m is best for the shorter distances and also during the early mornings and late afternoons and is also the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today 25 July - Boland ARC 40 m Sprint 13:00-16:00 UTC; 28 July -SARL 4th 80 m Club Contest 17:30-18:30 UTC; 29 July - Sasolburg ARC starts classes for the RAE. For information send email to zs4pr@qsl.net; 31 July - Kempton Park ARTA (KARTS) starts RAE classes. Visit www.zs6kts.co.za for information; 1 August - SARL HF Phone Contest 13:00 to 16:30 UTC; 2 August - Closing date for PIC course in Pretoria on 14 August; 2-7 August - National Science Week at Sci Bono and ZS6SCI on the air from 09:00 till 14:00 CAT; 9 August - SARL YL Sprint on 40 m 09:00 to 10:00 UTC; 12 - 14 August - International EME Conference, Dallas, Texas; 14 August - PIC course in Pretoria; 16 August - Logs for SARL HF phone competition must be in.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav,ZS6BWN.

Thank you for listening, 73.

/EX

DXNL 1686 - Jul 28, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

FM - MARTINIQUE, NA-107
Gerard,F2VX, is working as FM/F2JD from Martinique (NA-107) till Aug 2.
He is active from the shack of FM5WD.

IS0 - SARDINIA, EU-165
Massimo,IM0/I0PNM, activates Isola San Pietro (EU-165, IIA CI-009) in
SSB and RTTY on 10m/15m/20m between Jul 22 and Aug 20. He also plans to
activate the lighthouse Capo Sandalo.

KH2 - GUAM / KH0 - NORTHERN MARIANA ISLANDS
Bodo,DL3OCH, will travel through the Pacific region in August and
plans to show up from following islands using his US callsign:
Aug 1-7: KH2/KT3Q (Guam, OC-026)
Aug 7-14: KH0/KT3Q (Northern Mariana Islands, OC-086)
Bodo is working mostly in CW and some RTTY/PSK31 on all bands from
80m-6m. He is using an IC-7000 with power amplifier and beams.
QSL for this activity should be sent to DL3OCH or HB9EHJ, NOT via KT3Q.
Online logs will be uploaded to the LoTW in December and are daily
updated on his website: http://www.clublog.org

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Lee,HL1IWD, will be on the air from Saipan (OC-086) signing AH0/AH2Y
between Jul 29 and Aug 1. QSL via HL1IWD.

OX - GREENLAND
Ole,OZ5DL, will activate Greenland (NA-018) again after 35 years. He
will work as OX3DL in "holiday style" from Jul 28 until Aug 7. His
preferred frequency is 14.018 MHz. QSLs direct or via bureau to OV5A.

Michael,OX/DB5MH, will work in QRP (FT-817, 5 watts and a groundplane)
from Disko Island (NA-134) between Jul 29 and Aug 8. He plans to be QRV
on 14.310 MHz every day around 0000 UTC. Since he has only solar cells
available he will listen more than transmit. QSL via DJ9KH, bureau ok.

PJ7 - NETHERLAND ANTILLES, SINT MAARTEN, NA-105
Randy,PJ7/K5SL, will be QRV from Sint Maarten (NA-105) in SSB and CW especially on 17m during his morning hours from Jul 31 until Aug 13. He will focus on CW on 17m, 20m and 40m during his evening hours.

S7 - SEYCHELLES
Jose,EA4DB, will work "holiday style" as S79DB in CW, SSB, RTTY and PSK on 40m-10m using his FT875D with 100 watts and dipoles from Aug 3-14. QSL cards should be sent to his homecall, direct, via LoTW or eQSL.

V3 - BELIZE
KU5B is going to hit the airwaves as V31UB in SSB, CW and digital modes on 80m-6m between Jul 31 and Aug 7. QSOs will be confirmed via LoTW.

4X - ISRAEL
Mike,VE2XB, is travelling through Israel for four weeks starting on Jul 26. He will be QRV as 4X/VE2XB in CW and SSB on all bands and hopes to catch some 6m band openings as well.
QSLs via his homecall, with SASE and 2 IRCs.

5Z - KENYA
Sig,NV7E/ZS6SIG, was working in Pretoria/South Africa the past time but will live in Nairobi for the next four years. He was already licensed before as 5Z4EE in the 1980s and now got this callsign allocated again. Sig will be active on all bands from 160m-10m.
QSL via NV7E or via the address of 5Z4EE at QRZ.com.

Andy,KI4THF, is also newly licensed and has the callsign 5Z4ZD now. He is living in the neighborhood of Sig and will stay there for a few years as well. His address can be found at QRZ.com as well.

AUSTRIA, SPECIAL EVENT STATION
The scout clubstation OE1XJA/3 of the TELESCOUT club will be activated in all modes on all bands (without 160m) to celebrate "100 years of scouts in Austria". The station works from the scout camp in Laxenburg near Vienna from Aug 1-12. QSLs via OE bureau, ADL: 615.
More info at: http://www.telescout.org and http://www.qrz.com/db/oe1xja

CANADA, SPECIAL EVENT STATION
Members of the "Georgian Bay Amateur Radio Club" (GBARC) will be QRV in CW and SSB on 80m, 40m and 20m signing VA3FPI from Flower Pot Island (ON005, Light House CAN-181, WLH 0763) between Jul 31 and Aug 2.

MOLDAVIA, SPECIAL EVENT STATION
The special event station ER240C is active until Jul 31 to remember the 240th anniversary of the battle of Kagul. A special award is available as well. For further information about this award mail to er5aa@mail.ru
QSL via ER5AA, direct or via bureau.

THE NETHERLANDS, SPECIAL EVENT STATION
Fred,PA0FAW, will use the callsign PA10WSF from Aug 2-30 to mark the "World Statues Festival" in Arnhem (http://www.worldstatues.nl) taking place on Aug 28/29. Fred will be QRV mostly in CW and digital modes.
A special QSL is available via PA0FAW, via bureau, direct or eQSL.

URUGUAY, SPECIAL EVENT STATION
Uruguayan HAMs are celebrating their participation in the semi-finals
of the FIFA World Cup with the special callsign CV5UC until Aug 5.
QSL via CX5UR.

PIRATE: Bat-Erdene,JT1CS, secretary of the Mongolian Radio Sport Federation,
writes that JT1NOC does not have a valid license. He did not renew his
old license so his current operation is assumed to be illegal.

SILENT KEYS: Following DXers passed away during the past weeks:
Les Morgan (G0WDG), Giovanni Scotti (I2JZS), Andrej Prosvetov (UA3ICK),
Geoff Chance (M0GRC, organizer of the International Marconi Day),
Vladimir I. Solodovnikov (UA9MAZ), Valentin N. Bojko (UY5EI),
Tom O'Donnell (EI4Z), Ronald Cooper (G0MSM), Munir Nahhas (VE3MYN),
Antonio Tarantola (IK1IZB), Wayne E. Gingerich (W6EUF),
Mauro Santini (IN3SAU, member of the IH9P M/M winner team of the CQWW
DX SSB Contest 2002), David Rollitt (G3XYP), Giampiero Pozzi (IK1ZNN),
Yury F. Rakcheyev (RU4AY) and Aleksandar Gligorcuk (Z32CB).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 28/29: SCC RTTY Championship
Jul 28/29: YO DX Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-031, JD1/OG, Ogasawara Islands: Koji,JI1LET/JD1, will show up from
Chichi-jima from Jul 24-30. QSL via homecall (direct/bureau).

AS-060, HL4, Cholla-Namdo Province Group: Members of the Gwangju DX Club
(6L0NJ) plan to activate Shinji Island (WLOTA 4010) as 6L0NJ/4 in CW,
SSB and digital modes on all bands from Jul 31 until Aug 3.
QSL via HL4XM (direct/bureau).

EU-045, I*0, Lazio Region Group: Members of the "Italia Zero DX Group" will
be QRV as IB0Y from Ponza Island from Aug 1-8. QSL via IZ0PSA.

Island Trip

Toshi,JO3EVM, plans following activities as JO3EVM/JA6 from Jul 27-30:
Iriomote Island AS-024 Jul 27/28
Kobama Island AS-024 Jul 28/30
Okinawa Honto Island AS-017 Jul 28/30
QSL via homecall (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

IB0Y LH 1395 Ponza Aug 1-8
IM0/I0PNM LH 2989 San Pietro Jul 22-Aug 20
JI1LET/JD1 LH 2269 Chichi-jima Jul 24-30

UA - New prefix allocations and restructuring of some regions:

On Jan 21, 2010, the Russian licensing authority allocated following prefix
numbers to neighbouring regions:
digit to call area
---
2 3
5 3
7 6
8 9
More details can be found on the homepage of RW2L at QRZ.com.

The Russian government passed a resolution for a administrative reform.
UA9G: Komi-Permyatzkij Okrug (KP) merged into UA9F, G. Permskij Kraj (PM)
UA8T: Usti-Ordinskij Buryatskij AO (UO) merged into UA0S, T: Irkutskaya Obl.
UA8V: Aginsky Buryatsky AO (AB) merged with UA0U: Chitinskaya Obl. (CT) and
got the new name UA0U, V: Zabajkalskij Kraj (ZK)
UA0B: Taymyrsky AO (TM) and UA0H: Evenkiyskiy AO (EV) merged with UA0B,
H:
Krasnoyarsky Kraj (KK)
UA0X: Koryaksky AO (KY) merged in UA0X, Z: Kamchatskaya Kraj (KT)

These changes can be found in the RDA data base from Mar 1,2010, at:
http://rdaward.org/table_rda1.htm
Users of SWL4WIN will find some updates for their country DB, the maps and
the RDA statistics soon at: http://www.informatix.li/english/Frame_EN.htm

Were KA1XC and WI1BX born assholes, or, did they just grow into it?

Just wondering because only an asshole would deliberately wait until
W1AW code practice starts and then meet a sked on the same freq.

** 2m Digital EME Championship 2010 **

The 2m Digital EME Championship 2010 sponsored by REF/DUBUS
will take place on August 7/8. - Full rules are here:
http://www.marsport.org.uk/dubus/EMEContest2mDigi2010.pdf
SOURCE: Joe, DL8HCZ/CT1HZE via MoonNet

** EME Yuri's night **

Friends, Plans are being worked on for a big, coordinated, world
wide EME (Moon Bounce) event for Yuri's Night, 2011 on or about
April 12. Good moon positioning for Arecibo tracking if they can
come on board. Young folks/Educators/STEM/Live Media (like the
vidcast broadcasts done at Arecibo) / Big Dish/Big Antenna-Small
Antenna/ participation is strongly encouraged. There has been EME
activity in prior Yuri's nights, the one at NASA Ames is notable
memorable. Hope to bring a lot of big dishes on board, as enablers
of Smaller Antenna success, and maximum publicity, science outreach
exposure .Lots of time to build an event format. Feeback encouraged
Best Regards, 73, de Pat Barthelow AA6EG apolloeme"at"live.com

** From Space Weather.com **

METEOR SHOWER: The University of Western Ontario meteor radar is
picking up strong returns from the Southern Delta Aquarid meteor

shower, which peaks on July 28th and 29th. Sky watchers
(particularly in the southern hemisphere) should be alert for
meteors between about 10 pm and dawn. "Visual rates could be as
high as 20 per hour," notes Bill Cooke of NASA's Meteoroid
Environment Office, "although glare from the nearly full Moon will
make the fainter meteors difficult to see."

Aloha to all, My lovely wife and I are headed out for a few weeks,
Ecuador wandering North adventually to Belize and home from
Quintana Roo. I have applied for and received my call signs HC1JA
and V31JA. I will reciprocal operation if I set up in Guatemala.
I will be operating 6m and 2m. I could be active anytime between
28th July and 18th August. I have global phone, text and www.
I will upload to Gab's DXspotter when I can. Perhaps other spotters
to drum activity. I frequent 17m when in this region, so maybe

find me there on HF also occasionally during N/S openings morning
and evening. I wont be attempting any lengthy 6m eme, I have a 100
watts and small antenna, but will be doing 2m eme, 600watts and
5wl antenna. On 2m I am normally found around .140 digital (always
1st for CQ) or .070 CW. On 6m I prefer CW sub-band, so will hunt
there. On 6m hope for an opening, I will be! ...

** A SUPERIOR GRIDS EXPEDITION **

John, K8YSE, will be activating multiple grids around Lake Superior on the FM and Linear satellites beginning around August 2nd. He plans to operate from the following grids: EN28-29-36-37-38-39-46 EN47-48-49-56-57-58-59-63-64-65-66-67-68-69-73-74-75-76-77-78-79-83 EN84-86-87 and EO30 in both the US and Canada. An APRS beacon (K8YSE-8) will be on during the trip and also the via ISS digi when there are no local digi's in range. There will be some operations on 6 meters including an all day effort from Brockway Mountain, Copper Harbor, MI, in EN67. See John's QRZ.com page for more details and grid map. If you have specific requests, E-mail John at his QRZ.com E-mail address. QSLs will be sent to everyone in the log Requests/SASEs are not necessary. If you want to send an SASE, please wait until the trip has ended and include all requests in one envelope. Cards or simply a listing of the QSOs will be fine.

** V4, ST. KITTS qrv in October/November 2010 HF and 6m **

Jon, W5JON, will once again be active as V47JA from the Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG), hillside QTH overlooking the Caribbean Sea and Atlantic Ocean, between October 20th and November 10th. Activity will be on 160-10 meters (including 60m) using an ICOM IC-7000 w/KL-400 amp (350 watts) into a ZS6BKW design "All-Band Dipole" antenna. His operations will include the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via W5JON. Jon states, "As in the past, XYL Cathy (W5HAM) will be very busy pool side."

** CN78 operation on 50 MHz **

Hi All, I am headed up for CN78 for a bit... Got my trailer fixed...
Its 5:04 now i should be up there in a 1/2 hour... I will be on
50.125 and 50.130 I will aim east for a bit then turn... I will be
out for the next few days off and on I will list times here... 73
SOURCE: Dan, KD7UFF via VHF Reflector

** 4X, ISRAEL qrv on HF and 50 MHz **

Mike, VE2XB, will be active as 4X/VE2XB for one month or so
starting around July 26th. Activity will be on all bands using CW
and SSB. He will listen for openings on 6m too. QSL via his home
callsign (QRZ.com). SOURCE: Ohio/Penn DX Bulletin #969

** OZ1DJJ qrv as OX3LX in August on 6m **

Greenland: Bo, OZ1DJJ will be qrv again as OX3LX from 13rd until
16th august 2010 with QRO on 50 MHz. Loc. GP47
SOURCE: FUNKTELEGRAMM 08/2010

** EX, KYRGYZSTAN (6m Beacon) **

Oleg, EX8MLT, in Kyrgyzstan, has activated the first constantly
operating radio beacon for 6 meters in his country. The callsign
for the radio beacon is EX1SIX. Beacon Parameters are: Frequency
50026 kHz, Mode - CW, Power - 60 W, Antenna - vertical GP; will be
replaced in the near future on a Halo. Grid locator - MN82sd,
QTH - village Tamga, southern coast of lake Issyk Kul.

==> + ARRL IN ACTION: ARRL ARGUES THAT OKLAHOMA TOWN'S RFI ORDINANCE IS
"NULL AND VOID"

Saying that only the Federal Communications Commission is empowered
to regulate radio frequency interference (RFI), the ARRL has notified
Midwest City, Oklahoma, that its local ordinance 27-3(9), seeking to
regulate radio transmissions and RFI, is "null and void." Midwest City
is in the Oklahoma City metropolitan area. The ordinance reads: "In
addition to other public nuisances declared by other sections of this
Code or law, the following [is] hereby declared to be [a] public
nuisance: Operating or using any electrical apparatus or machine which
materially and unduly interferes with radio or television reception by
others."

On July 21, ARRL General Counsel Chris Imlay, W3KD, wrote to Midwest
City Assistant City Manager Dave Ballew, City Attorney Katherine Bolles
and Director of Code Enforcement Mike Stroh, informing them that the
```

ARRL had been provided with a copy of the ordinance by amateurs in that community. "We are also aware that a notice was sent by Mr Stroh on behalf of the City to one of ARRL's members who resides in Midwest City asserting that the FCC-licensed radio amateur to whom the letter was addressed was in violation of the ordinance as the result of radio frequency interference appearing in a neighbor/complainant's home electronic equipment," the letter read. "The licensed radio amateur was ordered to remedy the problem in one day, under penalty of a sanction assessed against the real property of the radio amateur." Read more here <http://www.arrl.org/news/arrl-argues-that-oklahoma-town-s-rfi-ordinance-is-null-and-void>.

==> + JOHN ROBERT STRATTON, KE5ISX, APPOINTED WEST GULF DIVISION VICE DIRECTOR

After review of eligibility by the ARRL Ethics and Elections Committee, President Kay Craigie, N3KN, has appointed John Robert Stratton, KE5ISX, an attorney in Austin, Texas, to serve as Vice Director of the ARRL West Gulf Division for the remainder of the current term that expires January 1, 2011. Stratton, an attorney, fills the vacancy created when John Thomason, WB5SYT, resigned the position earlier this month <http://www.arrl.org/news/arrl-west-gulf-division-vice-director-john-thomason-wb5syt-resigns-position>.
"John Robert Stratton has the training, experience, time and motivation to be a great Vice Director," said ARRL West Gulf Division Director Dr David Woolweaver, K5RAV. "His addition to the West Gulf Division's team will enhance its ability to provide the quality of service the membership deserves."

A General class licensee, Stratton has been licensed and an ARRL member since 2006. In February 2007, Stratton became active in League affairs after learning about the new cell phone bills that were introduced in the 2007 Texas Legislative Session, and he volunteered to help work against the bills. He was put in touch with Dr Woolweaver, who was then the West Gulf Division Vice Director and was leading the West Gulf legislative efforts. "Initially just a volunteer, I was selected to lead the West Gulf legislative team," Stratton said. "We were successful in defeating the cell phone bills that would have made mobile Amateur Radio operation illegal. With the help of some smart and dedicated hams, we were also successful in obtaining passage of new laws that protected those state employees who were hams [so they could operate] when they deployed in emergencies." Read more here <http://www.arrl.org/news/john-robert-stratton-ke5isx-appointed-west-gulf-division-vice-director>.

==> COMING SOON: MORE ARRL 2010 FIELD DAY PINS

After a higher than expected run on pins for Field Day this year, the ARRL has ordered more and expects them to arrive next month. "The pins were in stock until just before Field Day, but due to some

exceptionally high interest, we were unable to fulfill a few final orders," said ARRL Product Marketing Specialist Jackie Ferreira, KB1PWB. "We have reordered the pins, as many hams enjoy collecting these annual pins; lots of ARRL-affiliated radio clubs also like to hand these out to their members who participate in Field Day each year." The 2010 Field Day pins may be ordered from the ARRL online store <http://www.arrl.org/shop/Field-Day-2010-Pin/> or by telephoning 888-277-5289 in the US, Monday-Friday from 8 AM-5 PM Eastern Time (outside the US, please call 860-594-0355). Pins will begin shipping in mid-August.

==> + THE BANDS "HEAT UP" FOR THE 2010 ARRL UHF CONTEST

VHF/UHF weak-signal operators across North America are making the final tests on their stations in preparation for the ARRL UHF Contest, coming up the weekend of August 7-8. Most VHF+ weak-signal operation takes place on the two lowest-frequency bands of the VHF spectrum -- 6 and 2 meters; however, a lot of activity takes place above 144 MHz in the UHF portion of the radio spectrum and beyond. This contest focuses on 222 MHz and above; there will be lots of activity, and hopefully lots of propagation, too! Read more here <http://www.arrl.org/news/the-bands-heat-up-for-the-2010-arrl-uhf-contest>.

==> ARDF UPDATE: RADIO FOXHUNTERS FIND THEIR CHAMPIONS IN OHIO

By ARRL ARDF Coordinator Joe Moell, K0OV

They came from 15 states and four foreign countries. In their suitcases were radio sets, antennas, sun block and running shoes, but they left some room in hopes of taking home a medal or two. They were the hams and future hams -- ranging from age 12 to older than 70 -- who went to Southwest Ohio in the third week of May for the 10th Annual USA Championships of Amateur Radio Direction Finding (ARDF). ARDF is done on 80 meter CW and 2 meter AM in separate events, each with five "fox" transmitters. A course is typically three miles from start to each of the five transmitters (in optimum order) and then to the finish. Your mission is to find your assigned three, four or all five foxes, depending on which of the 11 age/gender categories you are in. Each transmitter is on for one minute at a time in a five-fox cycle that repeats. You must find your way on foot with just your direction-finding gear, the map you're given and your compass. GPS help is not allowed. Read more here <http://www.arrl.org/news/ardf-update-radio-foxhunters-find-their-champions-in-ohio>.

==> + GOVERNMENT AGENCIES INTRODUCE USER-FRIENDLY FEDERAL REGISTER

<http://www.arrl.org/images/view/News/ARRL_FederalRegister.JPG>
While the Federal Register may be the ultimate record of the business of the USA's Executive Branch, it can be difficult to navigate. The Register publishes approximately 80,000 pages of documents each year in the form of Notices, Proposed Rules, Rules and Official Documents; this

is where all new and amended rules to Part 97, the Amateur Radio Service, must be published before they go into effect. On Monday, July 27 -- in an effort to make things a bit easier on the thousands of people who access the Federal Register each day -- the US Government Printing Office and the National Archives' Office of the Federal Register launched a new and improved online Register. Named Federal Register 2.0, it is an outgrowth of President Obama's first executive order that mandated greater federal government transparency. The launch of the new site coincided with the 75th anniversary of the Federal Register Act, which became law on July 26, 1935. Read more here <http://www.arrl.org/news/government-agencies-introduce-user-friendly-em-federal-register-em>.

==> + FCC LAUNCHES CONSUMER HELP CENTER

Beginning July 28, those who have dealings with the FCC will have a new tool that the FCC claims will put them "within one click of all the information they want" from the Commission: a new "easy-to-use" Consumer Help Center. "Our new Consumer Help Center makes it easy for consumers to learn about our work and take action," said FCC Chief of the Consumer and Governmental Affairs Bureau Joel Gurin in a press release. "Here, in one place, consumers can do a number of things, such as read about consumer issues, get practical advice for avoiding problems, file a complaint, comment on our rulemakings, or read what our FCC experts are saying in our Consumer Blog." Read more here <http://www.arrl.org/news/fcc-launches-consumer-help-center>.

==> + SOLAR UPDATE

Tad "Somewhere in this favored land the Sun is shining bright <http://www.baseball-almanac.com/poetry/po_case.shtml>" Cook, K7RA, reports: We've seen increasing solar activity all this week, with average the daily sunspot numbers rising nearly 14 points to 35.6, and the average daily solar flux rising nearly 5 points to 85.3. Sunspot group 1089 has grown, shrunk and is now growing again; as of Wednesday, it has been visible a total of 10 days. Three more sunspot groups appeared this week, with the latest -- group 1092 -- rapidly appearing on Wednesday with a relative size of 180 millionths of a solar hemisphere. The relative size of group 1089 for July 19-28 was 130, 150, 310, 240, 200, 160, 140, 100, 70 and 90. The predicted solar flux (as of Wednesday) for July 29 is 85, 87 for July 30-August 1 and 85 for August 2-4. The predicted planetary A index for those days is 15 for July 29, 10 on July 30-31, 8 on August 1-2 and 6 on August 3-4. Along with increased solar activity, we have seen higher geomagnetic indicators, all due to a stiff solar wind. Both the planetary and mid-latitude A indices nearly doubled for the week. Look for more information -- including a look at sunspot activity and predictions, as well as 6 meter activity now compared to the 2000-2001 sporadic-E seasons -- on the ARRL Web site on Friday, July 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page

<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Ernest L. Thayer's Casey at the Bat <http://www.baseball-almanac.com/poetry/po_case.shtml>.

==> THIS WEEK ON THE RADIO

This week:

- July 30 -- NCCC Sprint Ladder
- August 1 -- SARL HF Phone Contest
- August 3 -- ARS Spartan Sprint
- August 4 -- QRP Fox Hunt

Next week:

- August 6 -- NCCC Sprint Ladder
- August 7 -- TARA Grid Dip Shindig
- August 7-8 -- ARRL UHF Contest <http://www.arrl.org/august-uhf>; North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 8 -- SKCC Weekend Sprint
- August 11 -- NAQCC Straight Key/Bug Sprint; QRP Fox Hunt
- August 11-12 -- CWops Mini-CWT Tests

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event Station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1720 - July 30 2010

Amateur Radio Newsline report number 1720 with a release date of
Friday, July 30, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ARRL tells an Oklahoma City that it has
no legal ground to try to control R-F-I, San Francisco sued over its
new cellphone radiation label law, the Florida Repeater Council
releases a proposal to narrow-band the 2 meter and 70 Centimeter
repeater subbands and ham radio helps celebrate 100 years of Scouting
in America. A live report by Mark Abramowicz, NT3V, from the 2010 Boy
Scouts of America Jamboree on this weeks Amateur Radio Newsline(tm)
report number 1720 coming your way right now.

RADIO LAW: ARRL TELLS MIDWEST CITY THAT ITS RFI ORDENANCE IS ILLEGAL
AND ORDERS IT BE RESCINDED

The ARRL has told an Oklahoma city that it has no jurisdiction over
radio frequency interference. Amateur Radio Newsline's Bruce Tennant,
K6PZW, has more:

--

Saying that the Federal Communications Commission is the only entity
empowered to regulate radio frequency interference, the ARRL has notified
Midwest City, Oklahoma, that its local ordinance 27-3(9), seeking to
regulate radio transmissions and RFI, is in the League's words, "null and
void."

Midwest City is located in the Oklahoma City metropolitan area. On July
21st, ARRL General Counsel Christopher D. Imlay, W3KD, wrote to Midwest
City Assistant City Manager Dave Ballew, City Attorney Katherine Bolles and
Director of Code Enforcement Mike Stroh. In his letter he informed them
that the ARRL had been provided with a copy of the ordinance by radio
amateurs in that community. Imlay also stated that the League was aware
that a notice was sent by Stroh on behalf of the city to one of ARRL's
members who resides in Midwest City. In it, the city asserted that the FCC
licensed radio amateur to whom the letter was addressed was in violation of
the ordinance as the result of radio frequency interference appearing in a
neighbor complainant's home electronic equipment. That radio amateur was
ordered to remedy the problem in one day, under penalty of a sanction
assessed against his real property.

Imlay then stated categorically that the city had absolutely no legal ground on which to enact or enforce its ordinance. His letter explained in detail to the city officials that the FCC is the only entity empowered to regulate RFI and that Radio Frequency Interference is not a matter subject for municipal regulation by Midwest City. He went on to state that Midwest City's ordinance 27-3(9), which purports to regulate RFI is preempted on its face by federal oversight and is therefore the city's ordinance is null and void.

In his note, attorney Imlay expressed his hope that it will not be necessary to submit the Midwest City ordinance to the FCC by way of a Request for a Declaratory Ruling. But warned W3KD, that would be the ARRL's planned course of action unless the ordinance is rescinded. He also says that the letter from Director of Code Enforcement Stroh to the radio amateur in Midwest City must be retracted immediately.

Reporting for the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

In his letter to the leadership of Midwest City, Attorney Imlay noted that the radio amateur in question has the full support of ARRL in any action he may choose to take in this matter. (ARRL, K5DBX, QRZ.com)

**

RADIO LAW: CTIA SUES SAN FRANCISCO OVER CELLPHONE LABEL LAW

The Cellular Telecommunications Industry Association has gone to court to stop a recently passed San Francisco, California law. One that would require retail stores to disclose radiation levels for the mobile phones they sell. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the Newsroom with the details:

--

In a lawsuit filed Friday, July 23rd, the trade organization, that's better known by its initials CTIA, says that the San Francisco ordinance attempts to unlawfully regulate emissions from cell phones which is a duty reserved exclusively by the FCC. The suit, filed in the U.S. District Court for the Northern District of California, seeks to block the ordinance, which was passed last month and requires retailers to post information about the Specific Absorption Rate for the phones they sell.

Specific Absorption Rate or SAR is a measurement of cellular telephone radiation. The FCC has established a Specific Absorption Rate limit for all mobile phones sold in the United States and the CTIA argues that the ordinance unlawfully interferes with the Federal Communications Commission's authority over such telecommunications devices. The also CTIA claims that the San Francisco ordinance conflicts with federal law by challenging the FCC's determination that all FCC complaint handsets are safe.

This is an important case for ham radio to follow because if implemented it could eventually be expanded to cover all types of two way radio gear used

within the city limits of San Francisco including amateur radio stations. And if left standing, it would also undermine the federal governments preemptive role in the area of governing anything to do with the transmission of radio frequency energy.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

We will be keeping a close eye on this one as it proceeds through the courts. (Adapted from published news reports.)

**

FM AND REPEATERS: FLORIDA REPEATER COUNCIL RELEASES VHF AND UHF NARROWBANDING PROPOSAL

The Florida Repeater Council has officially posted it's proposed narrow-banding recommendation for 2 meters and 70 centimeters on its website. The concept adopted by the Florida Repeater Council leadership basically follows the narrow-banding in the Part 90 VHF and UHF commercial services. Its also based on the knowledge that most if not all of the newer amateur radio FM equipment available on the market today in the 144 to148 MHz and 430 to 450 MHz range is capable of using 6.25 KHz channels if deviation is set at 2.5 KHz deviation.

Since the use of these new technology systems usually requires the purchase of new radios which are compatible with the new technology systems, by allocating narrow band channels for only newer technology systems there should be a minimal impact on existing wide band repeaters and their users.

While 12.5 and 6.25 KHz channel spacing has been used on the UHF commercial and amateur bands for some time, the VHF bands have used 15 KHz spacing for decades. Since the legacy spacing of VHF commercial and the 146 to 148 MHz amateur service bands do not permit the use of 12.5 or 6.25 KHz spacing without a complete and disruptive re-farming of the entire band, the Florida Repeater Council is proposing to follow the FCC's VHF plan for Part 90. This will allow use of 7.5 KHz spacing between the legacy 15 KHz channels in the 146 to 148 MHz subband 2 meter and 10 kHz spacing between the existing 144.5 to 145.5 MHz channels in the lower subband.

The Florida repeater council says that most newer amateur radio equipment evaluated can program to the 7.5 or 10 KHz spacing without difficulty. However in some case the scanning or stepping functions of some radios may require software or firmware updates to properly scan these new channels in a given radios VFO mode.

The proposed changes will create 71 new frequency pairs for narrow band repeaters on 2 meters. It would also significantly expand the number of UHF narrow band channel pairs available as well. This says the council should provide the needed spectrum for experimentation and development of the newer technology systems that utilize narrow band emission such as

D-Star and P-25 digital audio relay services.

The Florida Repeater Council will be looking for public comment on its proposal by e-mail to narrowbandcomments (at) florida-repeaters (dot) org or at the Melborne Hamfest this coming October. More on this proposed band change is on-line at www.florida-repeaters.org. (KS4VT, FRC)

RADIO LAW: SPANISH FISHING INTRUDERS ON THE HAM BANDS

The IARU Region 1 website reports that Spanish fishermen are now being heard daily on most of the High Frequency bands. Frequencies mentioned include 3.500, 3.510, 3.550, 3.590, 7.000, 14.000, 21.000, 21.222 and 21.395 MHz.

All operations are on upper sideband. DK2OM says that the operators often use a voice scrambler but when decoded, they only use private names. No ship names or other identification is given. DK2OM adds that talking to them is wasted time as they only react with obscenities.

If you hear them, you can log reports of these intruders online at tinyurl.com/spanish-fishing
(IARU Region 1)

HAM RADIO IN SPACE: ISS TO CELEBRATE 100 YEARS OF US SCOUTING WITH ISS CONTACT

A special Amateur Radio on the International Space Station contact with the 100th anniversary of Scouting Jamboree is scheduled to take place at about 18:20 UTC on Saturday, October 31st. At the time of the contact the I-S-S will be in a 56 degree elevation pass over the National Boy Scout Jamboree at Fort A. P. Hill, Virginia. That's where some 43,000 scouts and leaders will join 8,000 volunteers to celebrate this milestone event for the scouting movement. Amateur Radio Newsline's Mark Abramowicz, NT3V, is at the Jamboree and will have a report on ham radios part in this years Jamboree later on in this weeks Amateur Radio Newsline report.

ENFORCEMENT: SOUTH AFRICA TELECOM REGULATOR REMOVES UNLICENSED REPEATER FROM THE 70 CM BAND

An unlicensed repeater has been removed from the 70 centimeter band in South Africa. Following a report by the South African Radio League to the Independent Communications Authority of South Africa about the unlicensed machine operating in the ham radio band, the South African regulator investigated the intrusion. It located the system and instructed the owner, who was providing services for his local community watch, to shut down the repeater. At first the systems owner refused the regulatory agency's representatives access to his premises to seal the repeater from further operation. The person soon relented and the repeater is now off and out of the 70 centimeter South African amateur radio band. (SARL)

**

ENFORCEMENT: UNLICENSED BROADCASTER ORDERED TO PAY $10,000 FINE

The United States FCC has affirmed a $10,000 Forfeiture Order issued to Dexter Blake of Mt. Vernon, New York. This, for willfully and repeatedly violating Section 301 of the Communications Act of 1934 by operating an unlicensed radio transmitter on the frequency 101.5 MHz in the Mt. Vernon area.

Back on March 3, 2009, the Commission's New York Field Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Blake. To date, Blake has not filed a response to the NAL or paid the proposed forfeiture. Therefore, based on the information the FCC had before it, the regulatory agency on July 22nd affirmed the forfeiture and has issued Blake an order to pay the fine. (FCC)

**

RADIO LAW: FCC TO REDUCE VANITY FEE BY A DIME

The cost of getting a ham radio vanity call sign is about to go down a dime. On July 19th, the Federal Communications Commission announced via the Federal Register that the cost of an Amateur Radio vanity call sign will decrease 10 cents to $13.30. The new charge takes effect 30 days after publication, making August 17th the first day the new fee is in effect. (FCC, ARRL)

**

RADIO EDUCATION: RSGB PRESENTS MUSICAL MORSE TRAINING

The RSGB newcomers web page has an MP3 designed to encourage learning Morse Code. With a musical backing track, it gives the entire Morse alphabet including numbers and punctuation. We cant bring it to you because of the FCC's ban on music on the ham bands, but you can hear it on-line at tinyurl.com/morsemusic. Just click the 'Play' button to listen. (GB2RS)

RADIO AND THE MILITARY: NETHERLANDS TERMINATES URUGZANFM ON JULY 30

Uruzgan FM, the special program for Dutch forces in Afghanistan made its final transmission on July 30th. This, as the Dutch mission in Afghanistan ends on August 1st.

Uruzgan FM was produced by the Dutch domestic network 3FM. It was broadcast via Radio Netherlands Worldwide heard Monday through Friday at 1400 UTC on local FM transmitters in Afghanistan fed by satellite and via the website at www dot uruzgan dot fm. It was also broadcast on local stations in the Netherlands in areas around the military bases.

Uruzgan FM was launched in August 2006 at the start of the Dutch mission in Afghanistan. The Uruzgan FM team along with various Dutch artists has visited the Dutch bases in Afghanistan three times. (Media Network)

RADIO BUSINESS: IOWA'S HAMKITT STORE CLOSING ITS DOORS

Some sad news in the ham radio business world. This with word that the HAMKITT store in Des Moines, Iowa is closing it's doors due to poor sales.

According to Terry Graves, K7FE, who is the Chief Editor, QRZ dot com, Joe Leto, W0IW, opened the Des Moines, Iowa retail business with the intent to provide local hams an amateur radio store to visit. He also had a web site providing online sales.

The ham store void in the area was an attraction for Joe to start his business. While it was well received by the locals, the poor economy caused reduced sales and made the venture unprofitable. According to W0IW the remaining inventory is still for sale and will be until he closes the door. To find out if he has what you need you can e-mail Joe to info (at) hamkitt (dot) com

For those not aware, Joe Leto, W0IW, hosts the The Iowa Wireless Contesting Station. (K7FE, QRZ.com)

**

ON THE AIR: KINGS COUNTY REPEATER ASSOCIATION TO COMMEMORATE 911

New York City's Kings County Repeater Association's annual 9/11 Memorial Event will operate special event station KC2RA on Friday, September 10th from 1300 to 2300 UTC. The operation will take place only a short walk from Ground Zero with SSB operations on 7.250 and 14.295, PSK31 on 14.070 plus D-Star on reflector REF020B and Echolink node 64300. RF participants who send card with S-A-S-E will receive a commemorative QSL. Send yours to KC2RA, Post Office Box 280288, Brooklyn, New York, 11228. For more information see www.kc2ra.org on the World Wide Web. (KCRA)

**

ON THE AIR: INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND

A tide of registrations for the International Lighthouse and Lightship Weekend. There are 340 lighthouses, some lightships and one time-ball tower registered so far for the International Lighthouse and Lightship Weekend on the 21st and 22nd of August.

The event now in its 11th year was begun by the Ayr Radio Club of Scotland. Now there are radio amateurs and lighthouses in some 30

countries involved.

The 300th registration this year came from Rainer Kledtke DO7RKL for the Westerheversand lighthouse in the northernmost part of Germany. A most famous landmark it stands 41-metres tall on a peninsula between the North and the Baltic seas.

Australia has been a strong supporter of this fun event celebrating the history of lighthouses. It has 53 registrations, just ahead of Germany on 50 and the United States some 40 lighthouses.

There's still lots of lonely lighthouses looking for the company of friendly radio hams to bring radio gear to them for the International Lighthouse and Lightship Weekend. To learn more or register a lighthouse visit the website at www.illw.net. (VK3PC)

NAMES IN THE NEWS: KE5ISX APPOINTED NEW WEST GULF ARRL VICE DIRECTOR

Some names in the news. First up is John Robert Stratton, KE5ISX, of Austin Texas. He has been appointed by ARRL President Kay Craigie, N3KN, to serve as Vice Director of the Leagues West Gulf Division for the remainder of the current term that expires January 1, 2011.

A General class licensee, Stratton has been licensed and an ARRL member since 2006, but said he has wanted to be a ham since he was a Boy Scout in high school. In February 2007 he became active in League affairs after learning about the new cell phone bills that were introduced in the Texas Legislative Session and volunteered to help work against those measures. Due to his success with that legislation, Stratton became the ex-officio West Gulf Legal Counsel and in 2009. He was then appointed Assistant Director and Division Legislative Action Chair.

Stratton, an attorney by profession, fills the vacancy created when John Thomason, WB5SYT, resigned the position earlier this month. (ARRL)

**

NAMES IN THE NEWS: VK3DQ NAMED FIRST RECIPIENT OF WIA CENTENARY AWARD

John Fisher, VK3DQ, is the first ham to qualify for the Wireless Institute of Australia's WIA Centenary Award. The award to Fisher was based on his three contacts with 100th anniversary WIA commemorative station VK100WIA. One contact was made with the WIA during May. Fisher then made contact with the Wagga and Midland Amateur Radio Clubs operation of VK100WIA in June. He also worked 14 WIA members to tally up the required 100 points. Fisher received his award in a surprise visit to his home by Wireless Institute of Australia's President, Michael Owen VK3KI. (WIA News)

**

NAMES IN THE NEWS: TWO ASTRONAUTS TAKE PART IN SIMULATED ISS CONTACTS

Astronauts Ron Garan, KF5GPO, and Mike Fossum, KF5AQG, have each successfully completed a simulated Amateur Radio on the International Space Station contact with the Challenger Learning Center of Indianapolis on Thursday, July 22. Garan and Fossum answered 14 and 22 questions respectively during the training exercise. These practice sessions are terrestrial based amateur radio contacts using the same type of ham gear that the astronauts will be using when they are on board the International Space Station. (ANS)

**

NAMES IN THE NEWS: ARRL SAYS APOLLO 11 HEARD BY HAM

The ARRL reports that a ham received signals from the Apollo 11 lunar astronauts 41 years ago. According to the League, in July of 1969, Larry Baysinger, W4EJA, independently detected radio transmissions from the Apollo 11 astronauts on the lunar surface.

Baysinger was both a radio amateur and an amateur radio-astronomer. His accomplishments were reportded by Louisville Courier-Journal reporter Glenn Rutherford in an article titled Lunar Eavesdropping: Louisvillians Hear Moon Walk Talk On Homemade Equipment. You can read more at www.arrl.org/eavesdropping-on-apollo-11. (ARRL)

THE SOCIAL SCENE: K6J AT THE WINGS OVER WINE COUNTRY AIR SHOW

The Sonoma County Radio Amateurs Club has been granted a Special Event license to operate Special Event Station K6J. This, at the Pacific Coast Air Museum Wings over Wine Country Air Show on August 21st and 22nd in Santa Rosa, California.

Wings Over Wine Country is one of the nations premier air shows with flight presentations by both the Air Force and Navy demonstration teams. It also features a display of military aircraft known as warbirds along with other aviation related entertainment.

To help commemorate this years show, station K6J we will be operating SSB on 20 meters on or around 14.275 MHz. As part of the stations operation it will describe the show to other hams with whom it makes contact. Those who work K6J who can send a request for a QSL card or certificate. More information and QSL routing should soon be on-line at www.sonomacountyradioamateurs.com. (KG6JSL)

THE CHANGING OF THE GUARD: DAVID WARREN - INVENTOR OF "BLACK BOX RECORDER - S.K.

An Australian scientist who invented the "black box" flight data recorder, has died. Jim Linton, VK3PC, reports on the life of inventor David Warren:

--

The death of Dr David Warren brought to the close a very interesting life of a man who developed the black box that has played a crucial role in improving aviation worldwide.

He was born in 1925 at a remote mission station on Groote Eylandt in the Gulf of Carpentaria, North Australia, and the first European child to be born on that Aboriginal settlement.

His father was killed in one of Australia's earliest air disasters in Bass Strait between the states of Victoria and Tasmania, and the last gift received from his dad was a crystal set.

That encouraged the young David in boarding school to build radio receivers and enroll to sit for his ham ticket, hoping to become Australia's youngest radio amateur. But this ambition was thwarted when the government imposed a ban on amateur radio with the outbreak of World War II. However his schoolboy knowledge of electronics led him to later to build the world's first flight data recorder.

Being involved in the accident investigation of the world's first jet-power aircraft, the Comet, in 1953, led him to advocate that there be a cockpit recorder as a means of solving otherwise unexplainable aircraft crashes.

The idea initially raised little interest, so while the Principal Research Scientist, Aeronautical Research Laboratories in Melbourne, he designed and built an experimental unit that could record four hours of speech as well as flight instrument readings.

The idea took five years to be finally accepted. Dr David Warren died aged 85

For the Amateur Radio Newsline, I'm Jim Linton, VK3PC.

--

A variation on Warren's invention is now being included in more and more new cars, trucks and other vehicles. (VK3PC)

**

WORLDBEAT: UK'S BBC BROADCAST HOUSE GETTING FORTIFICATIONS

Call this one a sign of the times. The British Broadcasting Corporation has been given the final go ahead to build a fortress-style parapet around Broadcasting House to defend it from terrorist attack. Under the 5 million pound plan, which has been endorsed by British Security Service MI5, what is described as an imposing ring of steel consisting of hydraulic rising pylons and concrete planters is being erected around the landmark building in London's Portland Place. Work is due to be completed by November. More is on-line at tinyurl.com/2d7kxpf (West End Extra)

**

HAM RADIO IN SPACE: SO-67 AGAIN RETURNING TO SERVICE

South Africa AMSAT reports on their web page that operations are slowly being resumed on its Sumbandilsat SO-67 bird. According to the announcement the satellites ground control station will observe the amateur payload to ensure the it remains stable and then gradually add more operating time. You can follow the progress on-line at www.amsatsa.org.za. (ANS)

**

RADIO IN SPACE: PLANETARY SOCIETY SAYS YES TO LIGHTSAIL-1

LightSail-1, the Planetary Society's new ultra-light Cubesat-based solar sail spacecraft, has passed its Critical Design Review. At a two-day meeting in Pasadena, California, a team including Jet Propulsion Labs project veterans Glenn Cunningham, WA6TPT, Bud Schurmeier, Viktor Kerzhanovich, and Aerospace Corporation's Dave Bearden gave the thumbs up to proceed with building the spacecraft's hardware and software. LightSat-1will demonstrate that sunlight alone can propel a spacecraft in Earth orbit. More information is on-line at tinyurl.com/ycnsqmc (LightSail-1)

**

PROPAGATION STUDY: NEW 6 METER BEACON IN KYRGYZSTAN

EX1SIX is a new 6 meter propagation beacon that has come on the air from Kyrgyzstan. It transmits on 50.026 MHz with 60 watts out to a vertical groundplane from grid square MN82sd. That's near the village Tamga on the southern coast of lake Issyk Kul.

According to Oleg Ivin, EX8MLT, the beacon's installation was made possible thanks to the help of David Krejg, N3DB. Ivin says that N3DB is the leader in the installation of a project to install 6 meter beacons world wide. More is on line at tinyurl.com/propbeacon. (UN Ham Radio News)

**

DX

In DX, word that planning is well underway for the upcoming Saint Maarten DXpedition. Co-leaders W8GEX and K9CT were recently there and have secured property for the CW and SSB stations to be located on the east and west sides of the island. These locations have clear shots to Europe and North America. ICOM is providing IC7600 transceivers and Alpha will be providing their amplifiers for this DXpedition. Four stations will be on continuously and manned by a 12 person team of experienced international operators. The plan is to be on the air starting on October 10th and continuing for 10 days.

VE2XB, will be active as portable 4X from Israel for one month or so having started operation around July 26th. Activity will be on all bands including 6 meters using CW and SSB. QSL via his home callsign on QRZ.com.

IZ2DPX will be active stroke 5Z4 from Malindi Kenya between August 4th to the 17th. Operations will be on 40, 20, 17, 15, 12 and 10 meters. QSL via IZ2DUW direct or by the bureau to IZ2DPX.

IK2NCJ will once again be on the air as D-4-C from Sao Vicente Island between August 5th to the 26th. Activity will include the WAE DX CW Contest on August 14th and 15th as a single operator all band entry. QSL via Logbook of the World or CT1ESV by the bureau.

Lastly, DK2TUX, will be active portable EA8 from the Canary Islands between August 16th to the
20th. Operations will be on will be on 40 through 15 meters. QSL via DK2TUX.

(Above from various DX News Sources)

**

THAT FINAL ITEM: HAM RADIO AT THE 100th ANNIVERSARY BSA JAMBOREE

And finally, the Boy Scouts of America have been holding their Jamboree at Ft. A.P. Hill in Virginia and ham radio was a major part of the action. The theme is 100 years of scouting. Amateur Radio Newsline's Mark Abramowicz, NT3V, is live on the scene with this report:

--

It has been an incredibly busy time here at the 2010 Boy Scouts of America National Jamboree where operations of K2BSA have been a critical part of the program.

Brian Mileshosky, N5ZGT, is the chairman and coordinator for K2BSA operations here at Fort AP Hill, just outside of Bowling Green, Virginia.

"Ive got a staff that works under me and we're in charge of the demonstrating of ham radio to the Scouts, Mileshosky explains.

"That is getting them on the air, conducting the space station contact, things like that while the other staff is off doing other complementary things like the Radio merit badge and doing the licensing classes, the VE exams and basically wrapping up the whole picture of demonstrating and providing ham radio to the participants here."

Mileshosky says more than 40-thousand Scouts and leaders are on the jamboree site and thousands have been stopping by the check out ham radio. "

To my knowledge, I think to date this could probably be considered the largest on-site amateur radio demonstration to youth in the world to date," Mileshosky says. "And that's just a fantastic thing to be behind."

And, Mileshosky says there's something far more important in the mission of K2BSA here at the jamboree.

"Wer'e targeting ham radio's legacy," Mileshosky says. "And that no matter how you look at it, whether if you look at ham radio as a hobby or as a service or both, we got to have blood in it for it to continue and that blood has got to be young."

Larry Wolfgang, WR1B, is acting as the American Radio Relay League's connection to K2BSA operations.

"The board of directors has voted strong support for the Scouting program," Wolfgang says. "And so that support starts right from the top. At the headquarters level, the support is great because I get to come here and represent the league, be a liaison and kind of help out in every way possible with the operation."

That includes technical support for set-up of the antenna array and radio gear as well as all ARRL license manuals and other publications, maps, frequency charts and even pins. Wolfgang says the one of the keys to the K2BSA operation's success is the Radio merit badge which Scouts can earn in a little over three hours.

"A lot of Scouts really like the idea they can complete the merit badge," Wolfgang says.

"And they may not know about radio to start with, but by the time they're done, they have a pretty good idea of what we do as amateur radio operators.

"And quite a few of them want to take the license class and move on to get a license."

A huge supporter of this year's K2BSA operation at the jamboree is ICOM. Ray Novak, N9JA, is division manager for amateur and receiver products at ICOM America. He stopped by to visit the jamboree operation and see how things were going.

"A couple of stations that we have are running 7600s," Novak says. "We've also worked with the local amateur radio group that has the D-star repeater in Stafford, Virginia, using the WS4VA repeater to do D-star from two locations here and, a couple of other radios as well.

"We're helping with radios for the fox hunt. We're just trying to show all different aspects of where ICOM helps out with the ham radio community."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the 2010 Boy Scouts of America National Jamboree in Fort AP Hill, VA.

--

The Jamboree runs from July 26th through August 4th. More with Mark from this very special scouting event next week. (NT3V, ARNewsline(tm))

GB2RS NEWS

Sunday 1 August 2010

The news headlines

New world record on 10GHz

Ofcom publishes Notice on Licence Exempt Devices

ROS mode development definitely continues

A new world record in distance on 10GHz has been established between the Cape Verde islands and southern Portugal. On 10 July at 10:46 UTC the previous record of 2070km was smashed by a SSB QSO at 2696km during the Hyperatlantica 2010 DXpedition. A detailed report will appear in the September 2010 RadCom but in the meantime details, in French, can be found at www.hyperatlantica.ch. Congratulations to all involved.

Ofcom has published a new document that describes proposed changes to some licence exempt radio services, including underwater radio links. The RSGB expressed concern in an earlier consultation that underwater radio in the range 1-30MHz might have unwanted surface emissions under certain conditions, with the potential to cause interference to amateur bands. Ofcom's says that the equipment user must ensure that the apparatus is operated in accordance with the conditions of the licence exemption. Concerns were also expressed about implementing the European Commission's Short Range Device Decision, which may have some impact on the 433MHz licence-exempt band. Full details of the Ofcom Notice can be found online at http://tinyurl.com/GB2RS-Ofcom-SRD.

Further to recent reports on GB2RS we are delighted to confirm that the author of ROS has definitely decided to continue development work. The software's author, Jose Alberto Nieto Ros, told GB2RS that he will be implementing new modes and enhanced facilities. The most recent development is an auto reporting system linked into the PSK-Reporter system at http://pskreporter.info/pskmap.html. The latest version of ROS is available for download at http://rosmodem.wordpress.com.

The IARU reports that Spanish fishermen are abusing frequencies in the 3.5, 7, 14 and 21MHz bands. Only private names are used; there are no ship names or other idents. Voice communications may also be scrambled. Amateurs are reminded not to engage in communication with unlicensed stations because this would be in breach of your own licence conditions.

GB2RS understands that the Omani Telecommunications Regulatory Authority has allocated the band 50-52 MHz to the amateur service on a secondary basis. We hope to provide more information as it becomes available.

The M0OCT Amateur Radio Society, based at Clay Cross near Chesterfield, starts Foundation and Advanced courses on 1 September. The Foundation course runs for 8 evenings with the exam on 20 October. The Advanced exam will be in June 2011. Details on either course can be obtained by email to exams@m0oct.com or by phone to 01246 20 50 72. Details will also be posted on the group website www.m0oct.com.

On the 24 July the Eagle Radio Group held an open day at their venue in Mablethorpe. There were demonstrations on D-Star, WISPR, slow scan TV, HF radio and much more. The event was supported by the RSGB Regional Team of Jim, G0EJQ and Steve, M5ZZZ. The exhibition was attended by local dignitaries including the Mayor and his consort. Public interest was better than expected and five people showed keen interest in taking the Foundation licence. A donation to the RSGB Spectrum Defence Fund was presented by the group. Eagle Radio Group Chairman Charles, G0CBM, said that concentrating more on the newer digital modes had been a key attraction for the younger generation.

The RSGB headquarters at Abbey Court in Bedford will be closed on Friday 6 August for staff training.

And now for the details of rallies and events for the coming week

Today, 1 August, sees the King's Lynn ARC rally & car boot sale at King's Gaywood Community Centre, PE30 4DZ. Opening time is 10am, and there will be trade stands, a bring and buy, catering and of course the boot sale. Details from Ray, G3RSV, on 01553 671307or on the web at www.klarc.org.uk.

Today also sees the Lorn radio amateur rally at Crianlarich Village Hall, Crianlarich, near Oban. Opening time is 10.30 and there will be trade stands, catering and a raffle. Details from GM0ERV by e-mail to gm0erv@sky.com.

The Flight Refuelling Amateur Radio Society, G4RFR Hamfest takes place on Sunday 8 August at Cobham Sports and Social Club Ground, Merley, Dorset BH21 3AA. There is plenty of onsite parking and doors open at 10am. There will be the usual mix of trade and display items and an RSGB book stall. The South Coast Repeater & Beacon Group will be selling all forms of electronic and microwave exotica to raise funds to maintain the multi-band Bell Hill GB3SC series Microwave beacon Complex. Full details of Hamfest can be found on the web at www.frars.org or by phone from Mike, M0MJS on 01202 883 479.

Now for the news of special events

GB2YD will be celebrating Yorkshire Day at Maltby Crags today, Sunday 1 August. Operation will be on HF, 2m and 70cm, with activity on 6m as well if conditions permit. Operation is likely to be from 10am to 4pm.

Special event stations also licensed from today include GB6TPR for The Princess Royal at Ormesby in Norfolk and GB4BPL for Bury Port Lighthouse in Wales.

GB50RN will be operating from 6 to 8 August in Coventry to celebrate the 50th anniversary of the Royal Naval Amateur Radio Society. Operation will be on CW and SSB on HF bands from 80-10m plus FM on 2m and 70cm.

Maltby Festival will be celebrated next weekend by GB4MF, which will operate on HF bands from 80-10m plus 2m and 70cm.

South Tyneside amateur radio society will be operating GB2SJ from Souter Lighthouse over the weekend of 21 August and not the 7th as they had previously advised.

On 2 August, special event station 3Z0PDXA will commence three months of operations in Poland.

And now the HF DX news compiled from 425 DX News and other sources

Vasek, OK2AN, will be activating a number of Czech castles on 1 - 7 August for the World Castles Award. Details at www.wcagroup.org.

Moj, PA3GZU will be active holiday style as DU9/PA3GZU from Mindanao Island (OC-130) from until 7 August. He will operate SSB, BPSK31 and CW mainly on 20 metres, plus 40, 15 and 10m depending on conditions. QSL via home call, bureau preferred.

Lionel, F5PSL will be active as FH8ND from Mayotte (AF-027) until 15 August. He plans to operate SSB on 80 to 6m. QSL via F1OKV, direct or bureau.

Members of the Kennehoochee Amateur Radio Club will be active on 5-7 August as special event station K4L. They will be operating from Sapelo Island (NA-058, USi GA007) in the State of Georgia. QSL via W4BTI, direct or bureau. Logs will be uploaded to LoTW and e-QSL. More details including frequencies will be posted at www.w4bti.org.

Look for IZ2DPX operating as 5Z4/IZ2DPX from Malindi, Kenya, from 4 to 17 August. Operation will be on 40-10m; QSL via IK2DUW or direct.

Now the contest news

Early in the morning of 1 August is the RoPoCo 2 contest. Operating in CW on 80m from 0730 to 0830 UTC, the exchange is RST and full postcode received.

3 August sees the 144MHz UKAC between 1900 and 2130 UTC. All modes are permitted in the 2m band. RST, serial number and locator form the exchange.

The European HF Championship takes place on Saturday 7 August from 1200 until 2359 UTC. Operation is CW and SSB on the contest bands from 1.8 to 28MHz. EU stations should only work other EU stations for contacts to be valid. The exchange is RST plus the year you were first licensed.

Also on the 7th is the 144MHz Low Power contest from 1400-2000 UTC. All modes are permitted and the exchange is RST, serial number, locator and postcode.

The 432MHz Low power contest is on Sunday 8 August from 0800 until 2100UTC. Operation is all mode on 70cm. RST, serial number, locator and postcode should be exchanged.

And now the solar factual data for the period from the 19th to the 25th of July, compiled by Neil Clarke, G0CAS on the 26th of July.

First, the latest smoothed monthly sunspot numbers for October, November and December 2009 are now available and are 7, 7.6 and 8.3 respectively.

On the 19th a medium sized group rotated into view and to some degree was magnetically complex. However, it only produced one C class solar flare which occurred on the 20th. As the week progressed the group grew in size but magnetically simplified which in turn reduced the threat of any further solar flares. Solar flux levels increased from 80 units on the 19th to 89 by the 21st. The average was 86 units. The 90 day solar flux average on the 25th was 75, that's the same level as last week. X-ray flux levels increased from previous weeks and averaged B1.6 units. Geomagnetic activity remained quiet every day despite a weak coronal hole disturbance that took place. The most disturber day was the 23rd with an Ap index of 8 units. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increased from 280 kilometres per second on the 19th and the 20th to 470 by the 25th. Particle densities were low except for an increase to 30 particles per cubic centimetre on the 23rd. Bz varied between minus 6 and plus 9 nanoTeslas on the 23rd and with fluctuations much less on the other days. HF propagation was above predicted levels for much of the week. This was due to the higher solar flux levels and not seasonal effects, which will come in a few more weeks. There was sporadic-E up to 70MHz on most days.

And now the solar forecast. This week the slightly more active side of the Sun is expected to rotate into view. Solar activity is still expected to remain at very low levels. Solar flux levels should increase into the 80's as the week progresses. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. Darkness hour lows are expected to be around 10MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 14MHz. The best time to try this path will be between 0700 and 1000 hours. With the peak of the summer sporadic-E season now gone, openings on 144MHz are unlikely to take place. However, openings will still take place on 28 and 50MHz on some days with openings up to 70MHz occasionally.

And that's all for this week from the propagation team.

VK100WIA ROUNDUP

(For broadcast 1 August)

The Moorabbin and District Radio Club has thanked the amateur radio community
for helping to make its recent VK100WIA roster slot a success with over 600
contacts being logged.

The members of the Victoria?s oldest established radio club worked hardconcentrating on air activity through the special callsign to support the Centenary of Organised Amateur Radio in Australia.

Looking ahead at the VK100WIA roster

This weekend the Hills Amateur Radio Group in Western Australia is in full swing operating VK100WIA from its club rooms in Sanderson Road, Lesmurdie.

It has opened its radio shack to the public and there has been interest shown by the local newspaper, the Hills Gazette.

On Tuesday the Central Goldfields Amateur Radio Club will be launching its three day slot and going all out to Centenary of Organised Amateur Radio in Australia by operating from the Talbot Radio Arts Museum.

The club which is based in Maryborough Central Victoria has an interesting story to tell its local media about one of the earlier amateur wirelessexperimenters who lived in Maryborough.

On Tuesday special guest at the Talbot Museum in Camp Street Talbot will be the President of the Wireless Institute of Australia, Michael Owen VK3KI who will give a brief speech at 11.30am just before the BBQ is fired up.

So do listen out for VK100WIA at 0001 UTC on Tuesday the 3rd of August emanatingfrom Talbot.

The special callsign roster moves to Victoria?s Mornington Peninsula on Friday the 6th, Saturday the 7th and Sunday the 8th of August where it will be put to air by the Southern Peninsula Amateur Radio Club.

Most of the operating will be from the Scout Hall, Point Nepean Road, Rosebud, a high public profile location in the centre of Rosebud, with a display to include software defined radio.

The members of SPARC are very enthusiastic about promoting amateur radio and have contact their local news media seeking publicity.

Looking even further ahead at the roster we see the Newcastle-based VK2AWA Contest Group, the Illawarra Amateur Radio Society, and Australia?s youngest club, the Macedon Ranges Amateur Radio Club in Victoria, all set to play a part in the centenary celebrations.

Doubled-headed promotion

A large article in the Hastings Independent newspaper in Victoria has promoted both the Frankston and Mornington Peninsula ARC and the SouthernPeninsula ARC.

This excellent story not only gives readers both detail of the VK100WIA activity but how to follow-up each club for more information.

While including the history of amateur radio and its role in providing emergency communications, it also features a photo of 9-year old Callum Seymour operating on air, a radio amateur of the future.

Now to VK6, where the Hills Amateur Radio Group has had two newspaper article published drawing attention to the club and creating interest.

The first in Echo News is headlined ë100 years and still going strongì.

The other article, ëRadio buffs mark milestoneì which included a photo of the HARG President Martin Streeton VK6ZMS, who is quoted talking about amateur radio and gets in a good plug for the club.

In an email received, Martin said club members were delighted in being part of the centenary celebration, and added, ëthanks for the WIA Media Kit, it did the job nicelyì.

And a reminder for all clubs to file their media hits so these can be include in the WIA Club Media Feedback section of the WIA website, and mentioned right here on the broadcast.

- North Queensland Net VK100WIA Report
The Townsville Amateur Radio Club, as part of its 3 day block provided by the WIA, utilised VK100WIA during the running of the Sunday July 25th evening North Queensland Net on 3605.4kHz along with relay and callbacks on 146.7MHZ.
38 stations called in on 80metres with most staying on for the second round of the net run by Gavin VK4ZZ while 10 operators called in on 2metres with most staying on for the second round of the net run by Richard VK4FRJG.
Propagation was good on 80metres with stations worked in VK3, VK6, VK2 and VK4 call areas.

NEWS FROM THE NORTH

WOW - Women on Wireless celebrate the centenary

The Australian Ladies Amateur Radio Association, ALARA, threw itself into the task for putting the WIA special callsign VK100WIA on air and did anoutstanding job.

Jean Fisher VK3VIP, the Victorian ALARA representative led the way, duly facilitated by OM John VK3DQ who was the designated ëtea-boyì, with operating being shared by Margaret Blight VK3FMAB and Michele GrantVK3FEAT.

Among the highlights reported by Jean VK3VIP was making contact with Dick GI3OUR in Northern Ireland, and VK100WIA being net control of the 160 metre band coffee break net.

ALARA was active on the 160m, 80m, 40m and 20m bands, mostly SSB but also some CW contacts were had, plus 2m including IRLP and transmissions through the Melbourne digital amateur television repeater VK3RTV.

The log for the three days shows DX contacts with Brunei, Chile, Costa Rica, Croatia, Honduras, Japan, New Zealand, Northern Ireland, New Caledonia, Russia and the United States.

Well done to ALARA members Jean, Margaret and Michele, and others who madeit such a success.

ADD to the WOW item

While thereis no contest for rostered clubs in terms of the number of
contacts they make, itis interesting to note ALARA tallied up 660 contactsin three days.

Now thatis second behind Amateur Radio Victoria, which had 798 contacts
when four of its members put VK100WIA on air on behalf of the WIA duringthe month of May.

ALARA is now thinking of how it can top off its effort with VK100WIA and
celebrating the Centenary of Organised Amateur Radio in Australia, by
seeking some media publicity for ALARA in its 30th anniversary year.

- Ann Renton Memorial Ladies Net VK100WIA Report
It was time to focus on the YLs with VK100WIA during the Townsville
Amateur Radio Club Inc
activation of the WIA 100th Birthday special call during the Ann
Renton Memorial Ladies Net
on Tuesday evening 27th July.
A special linking operation enabled the net, which usually only runs on the Townsville
2metre repeater, to also run on the Townsville 70cm repeater, link
via IRLP to the Rockhampton
VHF Repeater and also link in 3605.4kHz with net control by Lyndall VK4ZM in Vincent
and all the behind the scenes interlinking done by Gavin VK4ZZ at the TARC Club Rooms
at West End.
The net was blessed with the attendance of YLs Evie VK4EQ and Denise VK4FCDB
in Townsville and Mary VK4PZ and Meryll VK4HAJ in Rockhampton. Alas no contacts were
made on 80metres, however Jeff VK4NJB in Rockhampton and 5 OMs in Townsville were also
able to join in the special edition of the net and share in the warm glow of the VK100WIA
callsign.

TEXT OF ANNOUNCEMENT FOR WIA NATIONAL NEWS BROADCAST
FOR WEEK COMMENCING SUNDAY 1ST AUGUST 2010

SUBMITTED BY CHRIS MEAGHER VK2ACD
FOR SUMMERLAND AMATEUR RADIO CLUB

Coming up next weekend, the Summerland Amateur Radio club presents the
2010 SARCFEST. Its on Sunday the eigth of August, at the clubrooms, 414 RichmondHill Road,
Goonellabah, just 10 kilometres from Lismore.

There will be displays, traders, tucker, talks, raffles, refreshments and best ofall lots
of,
as they say, "pre-loved" ham gear for sale.

And for those keen on building radio euipment, there's a big stock of parts toclear, including a big selection of hard-to-get butterfly, beehive and compressiontrimmer capacitors.

The gates open at 9am. To get a location map and an information flyer,
send an email with the title "HAMFEST" to VK2ACD @ dodo.com.au.
Theres plenty of parking space and no need to book to sell from a table or yourcar boot.

See you at SARCFEST next Sunday.

Pronunciation:

Goonellabah = Goo-"nella"-bar
VK4 - QNEWS

News from TREC

G'day I'm Dale VK4DMC for the Tablelands Radio and Electronics Club with news from TREC.

Last Sunday TREC members and friends helped the TREC President John VK4TL celebrate his eightieth birthday. The party was a huge success with lots of food and drinks and, of course a guided tour of John's shack where he proudly demonstrated his new Elecraft K3 transceiver.

We also got to see his nearly completed home-brew linear amplifier - truly a work of art.

Things are happening here in Far North Queensland with many activities planned for the next few months. Coming up, communications support for the Far North Horse Endurance Riders events. On the 14th/15th August TREC will be setting up a public display for V.P. Day at the Rocky Creek War Memorial. Using restored 2nd World War transmitting equipment we hope to work stations for the RD Contest.

The following weekend will see TREC members activating the Archer Point Lighthouse just south of Cooktown for the International Lighthouse/Lightship Weekend.

A club meeting is planned towards the end of the month and on the last weekend of August another Communications Support event for the endurance riders.

All in all a busy month ahead for TREC members.

This has been Dale VK4DMC 73

VK8
VK8NSB SSTV Repeater has been on air now for over 6 weeks from Darwin with stations in VK2,3,4 and a couple of JA operators submitting reports. Stuie VK8NSB reports that the repeater as off Sunday the 25 Jul is now fully operational thanks to good mate Gary doing the honors of placing the 10m Vertical 12m high on tower No 2 at Stuies QTH. The repeater now operates 30 watts into a half wave Vertical for 10m on 28700 USB. Stuie advises that there are currently 8 pictures on the system and a different picture will beacon every 30 min. Amateurs wishing to use the repeater only have to tone the system with a 1750khz tone for 2 seconds which will activate the repeater. If anyone has any problems or is interested in learning more about SSTV please drop stuie a e-mail at vk8nsb@hotmail.com.
VK9

ELECTRONIC LAW: CEASE AND DECIST ORDER ON LIGHT SABER SOLD ON EBAY

Now here's a strange story involving electronics law. It seems that
LucasFilm Ltd. recently served a manufacturer of a handheld laser with a
cease-and-desist letter. This, for selling an item it claimed was too
close in resemblance to its trademark light sabers from "Star Wars."

But the Hong Kong firm decided to use the force of eBay to score some
revenge. This by putting the cease-and-desist letter up for auction.

According the Hollywood Reporter entertainment industry newspaper, the
letter was not signed by George Lucas himself. Rather the company marketed
the legal document as an opportunity for those to win a piece of LucasFilm
history as well as contribute to the company's battle with the giant film maker. (HR)

Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager.
Today being the 1ST August and, you have about 3 weeks to the commencement of this year's
RD Contest.
I have not asked in the past so I would ask if when you send your log in either by
Electronic or postal means please ensure that you have you correct postal address.
Anybody requiring any of the forms posted to them please contact me ASAP.
In the coming week I will finalize the Opening speech, which at this point it will run for
exactly 30 minutes, and will finish with a series of beeps indicating it is 08:00utc, I
will send out a special email via the usual weekly news server.
The opening speech will be available via the wia website.
For those people that are hand writing their logs, " PLEASE" try to write your logs in a
legible manner, as in the past some logs have been VERY HARD to decipher.
Until next week.

Good Morning Trent Vk4ti here.. (cut 5 august 1)

If you are planning a multi op station for the RD remember to make up some
bandpass filters to reduce inter station interference.

For the classic VHF UHF bandpass filters can be simply made from coaxial
T pieces and these also work well at HF.

For my HF setup I use auto switched band pass filters on both rigs that cover
160 through ten metres - this allows me to monitor

40M while working on 80M without any intereference. Certainly worth checking
out if you are planning multi op stations

MEDIA WATCH

TV series inviting amateur radio enthusiasts

Described as a sort of Blind Date on a bus, the producers of a forthcoming TV series are inviting amateur radio
enthusiasts and others to take part.

The show revolves around a souped-up double decker bus which is
touring cities around Britain. Producers are looking for single
people aged between 18 and 30 to take part and are particularly keen
to hear from people with any sort of talent to show off.

Amateur Radio makes waves on the 'net

Last Sunday 25 July, Ham Radio hit the big-time on the 'net with a
specific request for advice listed on the international geek news site
http://SlashDot.org. The person wants to go long distance trail walking
in the wilds of Colorado's mountains, and wanted to know whether it was
sensible to use a satellite phone or whether Amateur Radio could help
out. "I'm only interested in acquiring a radio and license if it is a
lot more effective and reliable than the cell phone I already carry."
Lots of advice was forthcoming, including VHF/UHF handhelds through
repeaters (including a suggestion to put a personal repeater in his car
at the trail-head), Amateur satellite options were extensively
discussed, lots of other people discussed the relative merits of mobile
phone technology versus Globalstar versus SPOT versus Iridium satellite
phones, personal emergency locater beacons (PLB's) versus EPIRBS, and so
on. Someone made the mistake of saying that "Amateur Radio is dying" and
was quickly told that 2009 was a bumper year for new licenses in the
USA, and 2010 is already well ahead of last year. With good 'net
publicity like this, that goes all over the world, Amateur Radio will be
looking up everywhere.

MAKE MAGAZINE BLOG PRESENTS $8,000 DIY HAM SATELLITE KIT

If you have ever wanted your own personal ham radio satellite but thought it was financially out of reach, the Make Magazine blog carries a short item on a satellite that can be yours for just $8,000.

Called a TubeSat, the magazine says that the kit for a tiny bird from Interorbital Systems that is designed to function as a basic satellite bus or as a simple stand-alone satellite. Included are the satellite's structural components, printed circuit board. electronic components, solar cells, and everything needed to build the satellite. Also included are the required programming tools.

Make's blog says that with these components alone, the builder can construct a satellite that puts out enough power to be picked up on the ground by a hand-held amateur radio receiver. It says that simple applications include broadcasting a repeating message from orbit or programming the satellite to function as a private orbital amateur radio relay station.

Interorbital Systems says it can deploy 32 of these tiny satellites simultaneously on a Neptune 30 launcher from the Pacific island of Tonga. The first launch is slated for the end of the year. These satellite will go into a very low Earth orbit and would probably have a lifetime of only a few months.

If you have an extra $8000 and want to be the first with his or her own personal ham radio satellite you can read more about the concept on line in the MAKE magazine blog at tinyurl.com/personalbird.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report.

(Southgate, MAKE Blog)

WW SPECIAL INTEREST GROUPS -- HOMEBREW

EMERGING TECHNOLOGY: TWISTING CRYSTALS

Chemists in the United States and Russia have created crystals that can twist and untwist. This they say points to a much more varied process of crystal growth than previously thought and could pave the way for new electronic products. Bill Pasternak, WA6ITF, is in the newsroom with the details:
--

Crystal growth has traditionally been viewed as a collection of individual atoms, molecules, or small clusters adding to a larger block that remains in a fixed translational relationship to the rest. But the New York University and St. Petersburg State University chemists have discovered a wholly new phenomenon for growth in a crystal structure that continually changes its shape as it grows.

To do this, the researchers focused on crystals from hippuric acid which is a derivative of the amino acid glycine. As molecules were added to the end of fine crystalline needles, stresses built up at the tips of the crystals and resulted in a helical twist. The process was reversed when crystals thickened from the opposite end of the growing tip thereby undoing the twisted formations.

The researchers work, which appears in the latest issue of the Journal of the American Chemical Society, may explain some of the properties of high-polymers These are used in clothing and liquid crystal displays, among other consumer and telecommunications products.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

You can read more on this fascinating scientific breakthrough on-line at tinyurl.com/crystaltwist. (Science Daily)

WW SPECIAL INTEREST GROUPS --- IOTA

VK4SWE on Sweers Island in the Gulf of Carpentaria. Lyn is the only ham on Sweers, IOTA OC-227 and is in Mornington Shire. She currently runs 100w into a vertical but is soon to enjoy 400w, a triband yagi and a 50' tower.

WW SPECIAL INTEREST GROUPS --- QRP and WEAK SIGNAL COMMUNICATION

WW SPECIAL INTEREST GROUPS --- RADIO SCOUTING

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

New callsigns for Ireland's Amateur Radio Emergency Network
Ireland's regulator ComReg has issued a new set of callsigns for use by the Amateur Radio Emergency Network (AREN)
The callsigns are available for use during training and emergency nets as directed by the National Coordinator.
The three callsigns are EI0AC, EI0EC, and EI0NC and supersede any callsigns issued in the past

WW SPECIAL INTEREST GROUPS --- LIGHTHOUSES AND LIGHTSHIPS

A tide of registrations for the International Lighthouse and LightshipWeekend

The 300th registration this year is from Rainer Kledtke DO7RKL for the Westerheversand lighthouse in the northernmost part of Germany, on a peninsula between the North and the Baltic seas.

A most famous landmark it stands 41-metre tall on a peninsula between the North and the Baltic seas.

There are 340 lighthouses, some lightships and one time-ball tower registered so far for the International Lighthouse and Lightship Weekend on the 21st and 22nd of August.

Australia has been a strong supporter of this fun event celebrating the history of lighthouses. It has 53 registrations, just ahead of Germany on 50 and the United States some 40 lighthouses.

Thereis still lots of lonely lighthouses looking for the company of
friendly radio hams. To learn more or register a lighthouse visit thewebsite www.illw.net

The event now in its 11th year was begun by the Ayr Radio Club of Scotland
GM0AYR and has radio amateurs and lighthouses in some 30 countriesinvolved.

SARL NEWS - SUNDAY 1 August 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with deep regret that we must announce that two radio amateurs went silent key during the past week. They are: Bennie Schoeman, ZS6ABS, on Tuesday 27 July, five days after his 95th birthday on the 22nd July and, Craig Bergsteedt,ZS6CKB, on Thursday 29 July after a long battle with cancer.

We extend our sincere condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

RULES FOR CONTESTS

YOU FORGOT TO PAY YOUR SUBSCRIPTION?

ARRL CEO CALLS FOR AMATEURS TO OBSERVE AND RECORD PROPAGATION ANOMALIES

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

RULES FOR CONTESTS.

As mentioned before a revised draft version of the Blue Book for 2011 needs to be completed by the end of August 2010. This is an appeal for all interested parties to go through the present Blue Book V2 2010 and highlight any rules / statement that need to be changed / modified.

The main area of focus should be Section 1 "General Rules"

Please send suggestions to Geoff Levey, ZS6GRL ,to email address glevey@gmail.com.

This is the only way that transparency can be achieved.

YOU FORGOT TO PAY YOUR SUBSCRIPTION?

If you have not yet paid your subscription for the 2010/2011 year please do it now. By the end of August members who have not renewed will lose their benefits and we are sure that you do not want to be one of them.

We hear so often what does the SARL do for me? There are a few actions we would like to remind you of. It was the SARL's interaction with ICASA that gave us access to a bigger slice of the 40 metre band ahead of many other countries. It was the SARL that recently had an intruding repeater removed from the 70 cm band.

Our voice needs to be strong, only your membership can do that. Let's turn the question around and ask ourselves "what can I do for the SARL and Amateur Radio? The answer is obvious, join the National Body for Amateur Radio, support SARL events and initiatives. Get full details on www.sarl.org.za or call 011 675 2393. If you are already a member and have paid, thank you for doing the right thing. We value your support.

ARRL CEO CALLS FOR AMATEURS TO OBSERVE AND RECORD PROPAGATION ANOMALIES

In an his editorial in the August edition of QST the ARRL Chief Executive Officer, Dave Sumner, K1ZZ, called on radio amateurs to continue to observe and record propagation anomalies. He wrote "we are about the only people who still are. There was a time when anyone with a TV set could view the effects of sporadic E, whether they wanted to or not; it's what interrupted the baseball game when the picture from your local station was knocked out by one from Miami or St Louis."

In every generation there are people who seek a better understanding of natural forces that shape life on our planet. For more than a century, amateur radio has provided an outlet for such curiosity. It still does today - and it will tomorrow.

The SARL is working with the Hermanus Magnetic observatory to have space weather conditions streamed in real time. The first step is to set up a display at the NARC in time for the September Radio Technology in Action 2010, after that it will also become available on the SARL web.

The SARL will also be setting up a reporting system to record unusual propagation conditions. If you experience an unusual propagation condition, record all the details and mail a report to unsualprop@sarl.org.za.

IARUMS TO CONCENTRATE ON CLEANING UP METRES

The SARL's councillor for the IARU Monitoring System (IARUMS), Fred Scheepers, ZS1FCS, invites radio amateurs and shortwave listeners to

join a campaign to remove non amateur stations from the 40 metre amateur band. It requires many persons to monitor the band from 7 000 - 7 200 kHz for intruders and record their details such as the station ID, the frequency and time. Many intruder broadcast stations will broadcast their ID on the hour and half hour. If you cannot understand the language make an mp3 recording or a wave file and add it to your report. Fred has set a special email address that is easy to remember. It is intruder@sarl.org.za.

COMPETITION NEWS

CLOSING DATES FOR LOG SUBMISSIONS

Clubs and individuals who host their own contests, can you please let Geoff, ZS6GRL, know if you are prepared to change the closing date for log submissions from 15 days to 7 days after the contest. The UHF/VHF contest is not included in this change.

At the moment the results of the contests are coming out once everyone has forgotten about them. The following email address can be used glevey@gmail.com.

SARL HF PHONE CONTEST 1 AUGUST 2010

The aim of the SARL HF Phone Contest is for participants to contact as many amateurs in Southern Africa as possible on the 20, 40 and 80 m bands. The HF Phone contest takes place on Sunday 1 August 2010 from 13:00 to 16:30 UTC.

The following frequencies may be utilized - 14 125 to 14 350 kHz; 7 060 to 7 100 and 7 130 to 7 200 kHz; 3 603 to 3 650 and 3 700 to 3 800 kHz. There are four categories of participation a) Single Operator Single Band; b) Single Operator All Band; c) Multi Operator Single Band or d) Multi Operator All Band.

The exchange is a RS report and a consecutive serial number starting at 001. A multi-operator station transmitting on several bands simultaneously may at their discretion use separate number sequences for each band. Each contact counts 1 point, each call area worked on each band counts 2 points and each station contacted on all three bands counts 2 points. Contacts with stations outside these areas are allowed, QSO points may be claimed but no zone or three-bander points may be claimed.

More details including the call areas are available in the contest manual, which can be downloaded from www.sarl.org.za. There are trophies and certificates awarded for the highest overall score as well as the highest score on a single band. Logs must be submitted within 15 days to the Bloemfontein Radio Amateur Club, Box 12104, Brandhof, 9324 or sent by e-mail to zs4bfn@netactive.co.za. The closing date for the log submissions is 16 August 2010.

Participants under 18 years old and participants over 19 years old will take part in two separate draws for a 2010 ARRL Handbook and an ARRL Antenna book respectively. Get those antennas in order and get radio active in the SARL HF Phone contest on 1 August.

RESULTS OF THE 2010 WINTER QRP:

1st ZS3Y - Volker 460 points; 2nd ZS2ACP - Andre 414 points; 3rd ZS4JAN - Jan 390 points; 4th ZS6BB - Pierre 264 points; 5th ZS2J - Derek 210 points; 6th ZR1AAH - Allen 208 points.

The full results will be published in HF Happenings.

CLUB NEWS

At the AGM of the Zululand Amateur Radio Club, held on the 11h July 2010 in Richards Bay, the following Committee members were elected to serve the members of the club for the forthcoming year:

Chairman: John Kramer, ZS5J; Vice Chairman: Andrew Jansen ,ZS5AND; Treasurer: Willie Axford, ZS5WI; Secretary: Dawn Snyders, ZS5ME; Members: Jo Snyders, ZS5PO, News Editor;

Thys v Rensburg, ZS5ZS;

Warren Snyders, ZS5WOZ;

Brian Utterson, ZS5AE.

We wish them well during their term of office, and thank the outgoing members for their hard work during their term of office.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 089 is decreasing in area but hopefully the new Sunspot 1 092 will contribute to higher solar activity. During 2009, 71% of the days were without sunspots. For 2010 up to now 17% of the days were sunspot free. The effective sunspot number is expected to be less than 20 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the late afternoons till after sunset. During sunset it will be good towards Europa. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

For the SARL's contest this afternoon 20 m will produce the best results at the start of the contest, especially over the longer distances. Propagation on 40 m will be good during the a long part of the afternoon. 80 m will take over near sunset.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today 1 August - SARL HF Phone Contest 13:00 to 16:30 UTC; 2 August - Closing date for PIC course in Pretoria on 14 August; 2-7 August - National Science Week at Sci Bono and ZS6SCI on the air from 09:00 till 14:00 CAT; 9 August - SARL YL Sprint on 40 m 09:00 to 10:00 UTC; 12 - 14 August - International EME Conference, Dallas, Texas; 14 August - PIC course in Pretoria; 16 August - Logs for SARL HF phone competition must be in; 21 August - RTA symposium in Port Elizabeth.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav,ZS6BWN, and edited by George, ZS6NE.

Thank you for listening, 73.

/EX

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

*** EDITOR'S STATUS: First I want to thank the many who sent get well wishes last week. This week was a much better week than last week. I was lucky to only spend two days in the hospital because of the blood clot. However, they did sent me home with a package of Lovenox (blood thinner) to inject into my belly twice a day and Coumadin (also a blood thinner). The good news is I am off the Lovenox as of Wednesday last week. I am still on crutches, but can put a little weight on my right leg (just on my toes to balance). I am expected to go to REHAB for the knee later in the week. Should be interesting instead of sitting around.... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th-July, through Sunday, 1st-August there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T8, TA, TF, TG, TI, TK, TN, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU,

YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (Possibly Rotuma [3D2/R]). Seb, F8IJV, is making plans to be in Fiji during 2011 in October (dates are not final yet). Activity will be limited to his free time (this will not be a DXpedition). He has received his license and will use the callsign 3D2JV. Seb will be active from the QTH of Tony, 3D2AG, on Liti Levu (OC-016). He plans to be active on 160-6 meters, mainly on SSB and FM on 10 meters, and possibly some Digital modes. Seb also plans to participate to the 2011 CQWW DX SSB Contest while there. If it is possible he may go to Rotuma by plane, if it is not too expensive. He would like to operate a few days from there. The equipment to be used will be an Yaesu FT-450, 5 band Spiderbeam, and three vertical antennas for the 160/80/40 meter bands (possibly a K9AY for reception). QSL via his home callsign, by the Bureau or direct, and also LoTW. More details will be forthcoming.

4K7, AZERBAIJAN. Yannick, F6FYD, will once again be here between August 3-20th. He will be active from the club station, 4K7Z, with his new callsign 4J6FR (previously 4J0FR). QSL via F6FYD.

5B/ZC4, CYPRUS. Tony, G0WFV, will be active from Cyprus between August 3-15th using the callsigns ZC4WFV and 5B/G0WFV. Activity will be sporadic using a Yaesu FT-817 and a homebrew vertical. Operations will be mainly 20 meters SSB, but other bands and modes are possible too.

5Z, KENYA. Simon, IZ7ATN, is now active as 5Z4/IZ7ATN from Malindi on the coast of the Indian Ocean until August 2nd. Activity will be holiday style. He was active on 20m SSB this past week. QSL via his home callsign.

6V, SENEGAL. Enrico, IK2FIL, will be active as 6V7X from Le Calao during the last two weeks in September. Main activity will be for the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/All-Band entry. Operations will be on 80-10 meters. Outside of the contest, Enrico will be on 30 meters RTTY only. QSL via LoTW, eQSL, by the BUREAU or direct to IK2FIL. Visit his Web page at: http://6v7x.jimdo.com

7P8, LESOTHO. Arnold, WB6OJB, will be active as 7P8JK from here between now and August 6th. Activity will be on the HF bands, 40-10 meters using mostly SSB with some CW. QSL direct to his home callsign.

9H, MALTA. Stephen, IZ0IWM, will be active as 9H3VY from here between August 11-20th. Activity will be QRP on the HF bands. QSL via his home callsign, by the Bureau or direct.

9L, SIERRA LEONE. Roger, G3SXW, reports that the members of the VooDoo Contest Group will operate as 9L5VT in CQWW DX CW Contest (November 27-28th) as a Multi/? entry. This year's operation will be dedicated to Vince, K5VT, who became SK recently in April. QSL via LoTW or direct to G3SXW. More details should be forthcoming.

9L, SIERRA LEON (2011 DXpedition - Dedicated to the work of Mercy Ships). Once again in close cooporation between the DAGOE Foundation, Mercy Ships and 4 Dutch radio amateurs, planning is being done for a DXpedition to Sierra Leone. The Team will stay in Sierra Leone for 3 weeks in March 2011 and foresee to participate in the Russian DX Contest. The location will be in the area of the capital Freetown. The team hopes to be able to use the callsign 9L5MS. Operators mentioned are: Arie/PA3A (CW/SSB), Bas/PD0CAV (SSB/RTTY), Ad/PA8AD (CW/SSB) and Arie/PA3AN (SSB/RTTY). The Team is supported by Mercy Ships crew members and staff. The team set the following goals and will be able to reach these goals with help of the radio amateur community worldwide:
1.Activate the DXCC-entity Sierra Leone on the HF bands
2.Provide support for a Mercy Ships Charity Project
3.Raise funds for the Mercy Ships Charity Project
All donations and surplus from the QSL will be transferred to the Mercy Ships Charity Project. QSL via PA3AWW, by the Bureau or direct (see info on the Web page). Also, QSLs can be requested with a donation via the OQSL request service on the Web page. For more details and updates, visit their Web page at: http://www.sierraleone2011.com/sl_2011/home.php

9M6, EAST MALAYSIA. Yoshihiro, JK2VOC, will be active as 9M6/JK2VOC between September 2-6th. Activity will include the All Asia DX Phone Contest (September 4-5th). QSL via JK2VOC.

9V, SINGAPORE. Loren, AD6ZJ, may once again be active as 9V1/AD6ZJ during September. Activity will be limited as time permits, mostly during weekends and nights. Operations will be on any open bands, but he will focus on the 30/17/12 meter bands using CW, SSB and RTTY. QSL via LoTW, by the Bureau or direct to his home callsign.

9Y, TRINIDAD AND TOBAGO. Jim, N6TJ, will be active as 9Y4W during the CQ World-Wide DX CW Contest (November 27-28th) as Single-Op/All-Band entry. QSL route was not provided.

A SUPERIOR GRIDS EXPEDITION. Just a reminder that OPDX's Webmaster John, K8YSE, will be activating multiple grids around Lake Superior on the FM and Linear satellites beginning around August 2nd. He plans to operate from the following grids: EN28-29-36-37-38-39-46-47-48-49-56-57-58-59-63-64-65-66-67-68-69-73-74-75-76-77-78-79-83-84-86-87 and EO30 in both the US and Canada. An APRS beacon (K8YSE-8) will be on during the trip and also the via ISS digi when there are no local digi's in range. There will be some operations on 6 meters including an all day effort from Brockway Mountain, Copper Harbor, MI, in EN67. See John's QRZ.com page for more details and grid map. It may be a little late, but if you have specific requests, E-mail John at his QRZ.com E-mail address. QSLs will be sent to everyone in the log. Requests/SASEs are not necessary. If you want to send an SASE, please wait until the trip has ended and include all requests in one envelope. Cards or simply a listing of the QSOs will be fine.

CQ COMMUNICATIONS, INC. PRESS RELEASE (CQ Facebook "Fans" Top 3500 Mark - Majority Under Age 45). Richard Moseson/W2VU, Editor of CQ Amateur Radio, reports on July 30th: "More than 3,500 Facebook users have signed up as

'fans' of CQ magazine on the popular internet social networking site. Plus, they represent a considerably younger group of ham radio operators than organized ham radio has been reaching through traditional means. 'According to Facebook's own demographics, the majority of CQ's fans on the site are age 45 or younger,' according to CQ Editor Rich Moseson, W2VU. 'This is significant because it means we have opened up an important avenue of communication with these younger hams by making the effort to go where they 'hang out,' rather than expecting them to find us. This is essential if we are going to make sure that younger hams are connected to the mainstream of the hobby.'
Facebook statistics also show that CQ's fans are drawn from all over the world, with more than 20 countries represented and members in the U.S. accounting for only a little more than one-third of CQ's Facebook fans.
CQ Amateur Radio magazine < www.cq-amateur-radio.com> is the world's leading independent amateur radio publication, with readers in over 100 countries. CQ sponsors more than a dozen amateur radio contests and operating awards, including the world's most popular participation sport, the CQ World Wide DX Contest, which has drawn more than 10,000 competitors in each of the past two years. Thousands of additional stations participated but did not submit logs. CQ is a publication of CQ Communications, Inc.,
which also publishes Popular Communications
<www.popular-communications.com>,
CQ VHF <www.cq-vhf.com> and WorldRadio Online <www.worldradiomagazine.com> magazines."

CY0, SABLE ISLAND (Update). Randy, N0TG, reports: "We are pleased to announce the addition of Gary Bartlett, VE1RGB, to the Sable Island DXpedition team. We are very fortunate to have successfully recruited Gary; a skilled CW operator, active competitor in contests, experienced in handling pileups, a great technical background, an active member of the Halifax Amateur Radio Club (HARC) and all round nice guy. In addition, a plus, is that he has previously operated from Sable. Gary makes his home in Wellington, Nova Scotia. He will be an asset in assuring that the DXpedition team meets its objectives. Everything remains on track for October 22&#65533;31st. Callsigns are: CY0/AA4VK, CY0/AI5P, CY0/N0TG, CY0/VE1RGB and CY0/WA4DAN. The preferred QSL route is via the 'ONLINE QSL REQUEST Service'." QSL instructions and options are listed on their Web site at: http://www.CY0dxpedition.com

HH2, HAITI. Fazlay, S21RC, has received his amateur radio license to operate as HH2/S21RC from Port-Au-Prince until the end of September. He reports that last week, Roberto, YS1RS, helped him "install a mast and a 40m inverted V in the office space which is in a big container - we have plans to install a 20m antenna during the weekend." Starting August 2nd, look for HH2/S21RC to be active during the weekday evenings. He also hopes HH2/YS1RS will be active too. For updates, watch Fazlay's Web page at: http://www.s21rc.net
He is also on Twitter at: http://twitter.com/s21rc

HS8, THAILAND. Voravut, HS8JYX, is planning to be in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (??)/Low-Power entry. QSL via HS8JYX, LoTW or eQSL. Visit his Web page at: http://www.hs8jyx.com

INDIAN OCEAN TOUR. Willi, DJ7RJ, will be active as FR/DJ7RJ from Reunion Island (FR) between September 23rd and October 3rd. He will then operate as 5R8RJ from Madagascar between October 4-29th. He hopes to operate 160-10 meters using CW and SSB, as well as possibly 6 meters. QSL via his CBA.

IOTA NEWS.....
AF-019. Francesco, IZ8GCE, will be active as IG9S from Lampedusa Island (African Italy) during the CQWW DX SSB Contest (October 30-31st) as a Single-Op entry. QSL via IZ8GCE.

AS-007. Look for special event station 8J1M6O to be active from Honshu Island (WLOTA L-2376) between September 1st and December 31st. Activity is to celebrate the 60th anniversary of Mitaka City (Tokyo Prefecture, Kanto region). QSL via the JARL Bureau.

AS-025. Alex, UA3DLD, will be active as RI0FKD from Kunashir Island, in the Kuril Islands group, between August 8th and Septemeber 3rd. He may also activate other islands within the Kuril Island group during this period, possibly using the callsigns RI0FKD/P and RI0FKD/FF. QSL via UA3DLD.

EU-038. Frank, DK5FT, will be active as PA/homecall from Texel Island (WLOTA L-0043) on August 16-22nd. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau.

EU-091. Fred, IK7JWX, reports that the IZ7ATN team was not active during the IOTA Contest from Isolotto Traversa (IIA BR-009, LH WAIL PU-028, ARLHS ITA-175, WLOTA L-005 and Grid Loc. JN80xp) in the Pedagne IOTA Group due to many problems.

EU-113. Fred, PA1FJ, will be active as SV8/PA1FJ/p from Kythira Island (GIOTA INS-004, MIA MG-062, WLOTA L-1703) on August 23-30th. Activity will be on 20/15/10 meters using CW and SSB, possibly using a Yaesu FT-817 QRP transceiver (when it is repaired!) or his Kenwood TS-480 Buddistick and 20m dipole antenna. QSL via the Dutch QSL Bureau or eQSL.

NA-041. Rick, K6VVA, has tentative plans to activate this IOTA group again in June of 2011, as well as several other KL7 IOTAs in July or August of 2011.

NA-044. Juergen, NF6J, will once again be active as VO2/NF6J from Battle Island (CISA NF-049) between September 3-10th. Activity will be on 30/20/17/15/12 meters CW only. QSL via his home callsign, direct or by the Bureau.

NA-091. Rick, K6VVA, is planning a trip to Quadra Island between September 27-30th. His callsign will be K6VVA/VE7. Activity will be mostly CW, with some SSB, on 40-15 meters. QSL via N6AWD.

NA-134. Michael, DB5MH, is active as OX/DB5MH from Disko Island until August 8th. Activity will be a QRP operation only. Look for Michael on 14310 kHz, daily at 0000z. QSL via DJ9KH.

NA-208. (Update) Cezar, VE3LYC, has announced that the Industry Canada has approved his request for the VY0X callsign. He also reports that there is no change in the schedule for this operation to Pelly Bay Island, and intends to be active for 3 days between August 11-15th. Details on the QSL information is available on the QRZ.com under VY0X.

OC-295. Operators John/9M6XRO, Steve/9M6DXX, 9W6AMC, Lee/9W6LEE and Gordon/G3USR plan to activate the rare IOTA island of Pulau Sebatik between September 24-27th. Activity will be on 80-10 meters, but with an emphasis on 40-15 meters. They will have two stations on the air with amplifiers using a HexBeam and verticals located directly above the sea water. Callsigns will be 9M6XRO/P on CW and 9M6DXX/P on SSB, and they hope to have both stations on the air during all the major openings to Europe and North America. OC-295 has only been claimed by 14.2% of IOTA participants having been activated just once before in July 2006. QSL both callsigns via M0URX, direct, by the Bureau, or LoTW. For more details and for a link to M0URX's online QSL request form for both direct and Bureau cards, go to: http://www.m0urx.com/sebatik.html

SA-009. Jim, N6TJ, will be active as 9Y4W from Scarborough, Tobago Island (WLOTA L-0412) during the CQWW DX CW Contest (November 27-28th) as a Single-Op entry. QSL via the address on QRZ.com.

SA-080. Six Brazilian operators will be active as ZY6Z from Morro de Sao Paulo and Tinhare (DIB BA-04, DFB BA-06, DFH BA-11, ARLHS BRA-157 and WLOTA 1624) between September 3-7th. The Brazilian Navy schedule could affect the dates. Operators mentioned are Jose/PY6HD, Roberto/PY6RT, Nilzo/PY6AWU, Ramon/PY6KY, Cristovao/PY7GK and Fernando/PY2JY. Activity will be on 80-10 meters using CW and SSB. Suggested frequencies are:
CW - 3530, 7030, 14040, 18098 and 21040 kHz
SSB - 3755, 7060, 14260, 18128, 21260, 24950 and 28560 kHz
QSL via PY6HD direct only. Also QSL via LoTW (no eQSL).

J6, ST. LUCIA. The "Buddies in the Caribbean" DXpedition group which specializes in 100 watt or less low power radios and the Buddipole portable antenna systems is back again to the Island of St. Lucia (J6) between December 8&#65533;13th. The north shore Villa location was magnificent during their first visit in February 2010. The group wants to demonstrate "Ultralite DXpeditioning" into these magnificent "vista" locations, by operating a field portable battery-only radio with backpackable and

lightweight antennas, but most of all "having fun" with a new group of operators. The eight operators are: Budd/W3FF, Guy/N7UN, Wey/K8EAB, Bill/W7ZT, Todd/N4LA, Kent/K4MK, Gary/NX8L, and Tom/W4OKW. There will be 3 villa stations in operation on 160-10 meters using CW, SSB, and RTTY. At the same time, several teams will be battery-only and field portable either from St. Lucia's beaches or scenic mountain tops. The group is applying for a unique J6BP callsign for the ARRL 10m Contest on December 11-12th. QSL via LoTW, eQSL, or mail to the operator's home callsign (SASE required). For more details, see the following Web page at: http://sites.google.com/site/carribeanbuddies

KH6BZF PROPAGATION FORECAST/REPORT (For August 2-8th)....

UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

N1, UNITED STATES (Special Event). Members of the Symbol Technologies Amateur Radio Club will sponsor a special event station honoring those who lost their lives during the horrific terrorist attacks on U.S. soil of 9/11/2001. Club station W2SBL will be multi-operated as N1Y on Saturday 1500z, September 11th, through 1500z Sunday,September 12th. Operations will be from grid FN22 in Delaware County, NY. Activity will be on the HF bands using SSB/CW/PSK31/SSTV, and on 70cm/2m/6m SSB. QSL is 100% via a SASE or by the Bureau via W2SBL.

OH0, ALAND ISLAND. Przemek, SP7VC, will be active as OH0/SP7VC during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via SP7VC or the LoTW.

OJ0, MARKET REEF (Update). Members of the Scandinavian Amateur Radio Teleprinter Group (SARTG) will activate the special callsign OJ0SARTG during the 40th SARTG WW-RTTY Contest (August 21-22nd) as a Multi-Single entry. Current operators mentioned are Kari/OH2BP, Vaino/OH9GIT, Charlie/SM4RGD, Jan/SM5FUG and Ewe/SM7BHM. Look for activity the day before and after the contest (also possibly during contest rest periods) on CW and SSB with operators signing OJ0/homecall. QSL OJ0SARTG via SM7BHM, direct (2 USDs, 2 Euro or 1 IRC) or by the Bureau.

PJ7, SINT MAARTEN (Update). Joe, W8GEX, reports the following in a press release: "The Sint Maarten 2010 team is proud to announce that

they are in high gear with the planning for the celebration of the new country status on 10-Oct-10. They have a 12 member international team assembled, including: Franz/DJ9ZB, Max/I8NHJ, John/K6MM, Dave/K4SV, Kevin/K6TD, Craig/K9CT, Ralph/K9ZO, Bill/N2WB, Charlie/NF4A, Charlie/ K6KK, Bruce/W6OSP, and Joe/W8GEX. This is a team of highly experienced, hard workers and some of the nicest people you could meet.
In addition to the operators, Tom Harrell/N4XP is the team treasurer and Janet Pater/W8CAA is helping in the organization. John/K6MM has done an outstanding job as Web master. The Web site, which is nearly complete, can be viewed at: http://www.stmaarten2010
The website will feature OQSL and accept donations by PayPal.
The group plans to have four stations on the air 24/7, and will have two additional stations that can be activated if needed. They will work all bands, and on CW, SSB and RTTY.
Equipment sponsors are ICOM, Alpha, Tennadyne, DX Engineering, Acer and M2.
Leaders Joe/W8GEX and Craig/K9CT were on the Sint Maarten for a week and have secured two operating locations on opposite ends of the island. They were very happy with all of the cooperation received from local residents.
Below is our frequency plan for the operation:
CW - 1826.5, 3524, 7024, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 3799, 7078, 14240, 18145, 21295, 24945 and 28475
RTTY - 7048, 10140, 14080, 18100, 21088 and 28080 kHz
6m - 50115 kHz"

PJ4, NETHERLANDS ANTILLES (Very Early Announcement). Members of the South East Europe Contest Club (SEECC) are planning to be active from Bonaire (SA-006 and WLOTA L1279) for the "2011" CQWW DX SSB Contest. It is expected that this will be a new DXCC entity by then. Operators mentioned are: Romeo/S52RU, Dale/N3BNA, Marko/YT2T, Maurizio/IV3ZXQ, Zvonko/Z35W, Fabrizio/IW3SQY, Acim/YU1YV and Noah/K2NG. Activity will be on 160/80/40/20/15/10/6 meters using CW, SSB and RTTY. QSL Manager is YU1YV. More details and updates are available at: http://www.seecc.org/Pj4%20exped

GJ4FDM QSL STATUS. Tom, GM4FDM, reports: "The good news is that the GJ4FDM cards have arrived from the printer. The BAD news is that whilst I was hill walking with my grandchildren 2 weeks ago, I fell off a mountain and smashed my right leg. I had to be winched out by rescue chopper. I have a plaster cast from toe to hip and am pretty well immobile. I cannot negotiate the stairs/steps to my garage shack! I have another hospital appointment this week - let's keep our fingers crossed..... I missed the IOTA Contest and have been pretty well confined to home/bed so am pretty downbeat at the moment, but I'll get to it, as soon as I am physically able..... I have received a few E-mails enquiring about 'not in LOTW log' or 'where's the cards'. When I can, I will answer all the queries."

QSL CORRECTION/TYPO. QSL A43MI from Masirah Island during the 2010 RSGB IOTA Contest (July 24-25th) via A47RS (not A47RO as listed in OPDX.968).

J88CFQ QSL STATUS. David, EB7AEY, reports that QSLs should be received during the past week from the printer, and he expects that cards will be answered next week.

TS8P QSL STATUS. Fred, IK7JWX, states that he has begun sending QSLs out for this operation.

QSLS VIA LoTW: YI9PSE

QSLS RECEIVED VIA MAIL: 3B8CF, 4J3M, 5K4T, 5K8T, 5N7M, 5W0AP, 5W0CF, 5W0NM, 5W0WL, 6Y5WJ, A25NW, A71CT, CO4SM, E4X, E51LEO, E51NAA, E51PMR, E51SNL, E51XIW, EK1KE, EK5KE, EX2T, H44WG, HP3DX, PZ5RA, SV5/LZ1WL,

T30XG, TN5NS, TO2T, UK9AA, UN3M, V63JY, VP8DLM, VR2009EAG, VY0V,
YI9PSE, ZK/IK1PMR and ZB2FRK

QSLS RECEIVED VIA THE BUREAU: F4DBJ, I6JHA, IA5/IZ4DYQ, IE9N, IG9/IK5BCM,
IK2EGL, IQ8OM, IW9GTD, OH0JFP, OH6DX, OH7M, OL9S, P3F, RZ3DW, SO70N,
UA3QNS, UA9CDV, YT3MA, YT60W, YU1LA and ZA/IW2JOP

TM40, FRANCE. Members of the Amateur Radio Club of Lanester will activate
the special callsign TM40FIL between now and 2359z, August 15th. Activity
is to celebrate the 40th anniversary of the Festival Interceltique Lorient.
Operations will be on CW, SSB, PSK and RTTY, and on 160m through 23cm.
QSL via F6KPQ.

V3, BELIZE. Colin/KU5B will be active as V31UB between July 31st and
August 7th. Activity will be 80-6 meters using CW, SSB and the Digital
modes. QSL via LoTW.

VK9N, NORFOLK ISLAND. After their operation from ZK2AA (see ZK2 listed
below), operators Andrea/IK1PMR, YL Claudia/PA3LEO, Al/LA9SN, Doug/N6TQS
and possibly others will be active from here between December 5-12th.
Plans of activity were not provided but will probably be the same as
their operation from ZK2AA. QSL via PA3LEO.

VP2V, U.S. VIGRIN ISLANDS. Art, N3DXX, will be active as VP2V/N3DXX from
Tortola during the CQWW DX CW Contest (November 27-28th) as a Single-Op
entry. QSL via KN5H.

YJ0, VANUATU (Update to OPDX.964). The YJ0VK Team is pleased to confirm
that their plans are now finalized and the callsign has been approved.
They plan to operate 6 full days from the Island of Efate (OC-035) and
their schedule is as follows:
August 27th • Commence operations approx. 0000z
September 2nd • Close operations approx. 0100z
The team will be focusing on the HF bands (with special attention to the
30/17/12 meter bands) and hopes to hand out a QSO to everyone they hear.
Their stations will be fairly simple with power limited to 100 watts and
antennas being verticals and dipoles. For more information, please refer
to their Web site which will be updated regularly between now and the trip
at: http://yj0vk.vkham.com
Depending on the InterNet availability on the island, they hope to update
their online log at least once per day.

ZK2, NIUE. Look for 6-8 operators to be active as ZK2AA between November
20th and December 3rd. Operators mentioned are: Andrea/IK1PMR, YL Claudia/
PA3LEO, Al/LA9SN, Doug/N6TQS, Alan/K6SRZ, Tom/SP5UAF and possibly others.
Activity will be focused on Europe, 160-40 meters, 30/17/12 meters, CW
and RTTY using four Elecraft with solid state amps with RX antennas. QSL
via PA3LEO. A Web site is currently under construction. ADDED NOTE: Some
of the operators of this operation will go on to operate from Norfolk
Island; see VK9N listed above.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 1st August 2010

Examination Results

The results of the Theory Examination for the Amateur Station Licence examination held in Limerick and Dublin on 7th July were issued very quickly. Of the 21 candidates who sat the examination 12 qualified for the HAREC qualification, a pass rate of 57%.

This brings to 220 the total number that have sat the eleven examinations that have been held since IRTS took over responsibility for organising, setting and correcting the theory examination in May 2005. Of these 130 or 60% qualified for the award of the HAREC qualification.

The cooperative arrangement between ComReg and IRTS on the examination has worked extremely well and is one of the factors that have contributed to the excellent working relationship that exists between the Societyand ComReg.

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 6th October next at 2 p.m. in the ComReg Offices in Dublin. The closing date for receipt of applications to sit the examination is Friday, 17th September.

For further information on the application procedure, exam fees and other details see 'Theory Examination' in the 'Information' section of the website. The 'Downloads' section of the website includes a very useful document 'Studying for the Amateur Radio Examination'.

The 'Links' section of the website under 'Radio Theory' contains much useful information for anyone studying for the licence examination.'

AREN Net

AREN have Nets on the 7th and 21st of each month on 3.660 +- QRM & 144.525 FM at 19.30pm

---

IOTA Contest

Last weekend's IOTA contest had plenty of support from EI stations, both from the mainland and from offshore islands. Offshore islands stations heard were EJ3Z (Shannon Basin Radio Club) on Inisboffin, EJ1DD (Dalkey Island Contest Group) on Clare Island, EJ4II on the Saltees and EI/SQ7JT on the Blaskets.

Many EI stations operated from the mainland, including EI/WG5N, EI2JD, EI5DI, EI6JK, EI6KC, EI7GY, EI7JN, EI8JB, EI8JX and EI9HQ.

The higher bands - 10 and 15 metres - were particularly disappointing this year, with 10 metres barely opening during the contest and only brief openings on 15 metres. However the other bands seemed to be in good shape, so good scores can be expected.

EI50UN Special Event

A special event station EI50UN will be on the bands until DEC 31 2010 celebrating the 50th anniversary of the first Irish Battalion to serve overseas with the United Nations (ONUC) in Congo.

QSL's via EI2V Irish Air Corps Amateur Radio Club.

WAI Squares Activation

Peter EI4GZB & Declan EI9HQ has rescheduled their squares run for Sunday the 8th August.

Planned squares to be worked are Oscar 33 34 35 36 County Dublin. All squares will be activated /MM from the boat it is planned that the above squares will be activated both times during the day, on the outward and return journeys.

Bands to be used will be 20m 40m & 80m 14.268 7.068 & 3.680/760KHz SSB only + - QRM.

New Distance Record for an AO-7 HAMSAT QSO

A new radio in space record of was achieved on 22.26 UTC on July 15th, PY5LF in Brazil worked K3SZH in USA, via AMSAT OSCAR 7 and achieved a new DX record for that bird of 7843 km which equates to 4898 miles.

What made this contact all the more amazing is that AMSAT OSCAR 7 was launched some 36 years ago on November 15th, 1974 from Vandenberg Air Force Base, Lompoc, California.

A Oh 7 still continues to provide limited service even though its batteries failed years ago and it is only operational when its solar panels are in sunlight.

Tipperary Amateur Radio Group

The news Meeting of the Tipperary Amateur Radio Group will take place on Thursday next the 5th August in Raheen House Hotel Raheen Road Clonmel at 8.00 pm, All are welcome.

Limerick Radio Club News

Gerry Byrnes EI3JU has kindly donated a caravan to the club. It will be used for portable, contest and field day activities. Members have already got to work on fitting it out for operating purposes. Maurice Dunworth EI3JF has kindly donated secure storage space for us to carry out the work. Members wishing to help out are asked to make contact with Ger McNamara EI4GXB at ei4gxb /at/ gmail.com or 087 2532512.

Rallies

North Cork Radio Group is pleased to announce their first annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 19th 2010

The doors open to the public at 11.30 and the rally will run until about 5pm. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room rates for the rally a Single Room B&B: 60 and Double Room B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477.

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb /at/ gmail.com as soon as possible.

further details can be found via the group's website, www.northcorkradiogroup.com

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1866 After a dozen years, Cyrus Field successfully completed the trans-Atlantic Cable. 1872 Dr M Loomis granted patent for wireless experiments.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

624. [DXNL] DXNL 1687 (Aug 4, 2010)

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-02 20:49:06 UTC
From: Robert Busch - DL7VOA <dxnl@dxhf.darc.de>
Message-ID: <815327187.20100802224622@dxhf.darc.de>
Source record: 5643

DXNL 1687 - Aug 4, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

D4 - CAPE VERDE, AF-086
Luca,IK2NCJ, plans an activity as D4C from Sao Vicente Island (AF-086) from Aug 5-26. He will also join the WAE DX CW Contest (single OP/all-band) on Aug 14/15. QSL via CT1ESV (bureau), IZ4DPV (direct) or LoTW. See also the webpage at: http://www.d4c.cc

HH - HAITI, NA-096
Fazlay,S21RC, is staying in Haiti since a few days ago and he got a licence for HH2/S21RC. He will work in the capital Port-au-Prince until the end of September. Roberto,YS1RS, helped him to put up his antenna. Now he has an inverted V for 40m but wants to add another one for 20m. Fazlay will be QRV as mostly during the weekends and HH2/YS1RS should hit the airwaves soon as well.
See also online at: http://www.s21rc.net sowie http://twitter.com/s21rc

XU - CAMBODIA
Laurent,F8ATM, will be active as XU7ATM in SSB and RTTY on all bands from the Hill Side View Guest House in Sihanoukville from Aug 10-17. An online log can be found at: http://www.clublog.org/logsearch/XU7ATM QSLs via bureau or direct to F8ATM, LoTW is possible as well.

ZS8 - MARION AND PRINCE EDWARD ISLANDS, AF-021
Pierre,ZS8M, is still very active, mostly on 20m SSB (14240-14245 kHz, 1230-1530 UTC) but has been spotted also on 40m (7140 kHz, 0430-0630Z). His online log is available at: http://dx.qsl.net/logs
The QSL route is: ZS8M, PO Box 151, Worcester, 6850, South Africa. This is the address of his QSL manager Dirk Lotz, ZS1X. If you have any questions you may e-mail to: zs1x@iburst.co.za

4K - AZERBAIJAN
Yannick,F6FYD, is back in Azerbaijan from Aug 3-20. He will be QRV from the clubstation 4K7Z with his new callsign 4J6FR (formerly 4J0FR). The QSLs should be sent via F6FYD.

5B - CYPRUS / ZC4 - BRITISH MILITARY BASES ON CYPRUS, AS-004
Tony,G0WFV, will stay on Cyprus from Aug 3-15. He will sign ZC4WFV and
5B/G0WFV in SSB mostly on 20m and other bands using a Yaesu FT-817 and
a homemade vertical.

5Z - KENYA
John,5Z4/IZ2DPX, will be active from Malindi on 40m/20m/17m/15m/12m/10m
from Aug 4-17. QSL via bureau to IZ2DPX or direct via IZ2DUW.

7P - LESOTHO
Arnold,WB6OJB, is staying in Lesotho since July 30. He can be found
in SSB and CW (QRS) on 10m/15m/17m/20m/40m signing 7P8JK until Aug 6.
QSL via homecall.

FRANCE, SPECIAL EVENT STATION
TM40FIL is activated by members of the Radio Club Lanester from the
40th festival "Interceltique de Lorient" in SSB, CW, PSK and RTTY on
160m-23cm from Aug 1-15. QSL via F6KPQ.
For more information see: http://www.festival-interceltique.com

LATVIA, SPECIAL EVENT STATION
The special callsign YL15LRG is working throughout the month of August
to celebrate the 15th anniversary of the Liepaja Radio Amateurs Group.
All QSOs will be confirmed via bureau automatically.

WFF activity: The "Lassen Volcanic National Park" (WFF KFF-049, WVA-09) will
be activated on 40m-6m and VHF by the special event station N6L from
Aug 7-14. A special award will be issued as well.
For further information see: http://lassenbirthday.blogspot.com
The QSLs are managed by K6LSN and eQSLs will be available as well.

SILENT KEYS: The DXers George Eddowes (G3NOH), Gordon King (G4VFV) and
Raymond R. Veldran (K4ZOO) passed away during the last week.

PIRATE: JT1CS writes that the licence of JT1FDB expired and thus the current
operation of JT1FDB/7 is illegal and not valid for the DXCC award.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Aug 7: EU HF Championship
Aug 14/15: WAE DX CW Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-025, R0F, Kuril'skiye (Kuril) Islands: Alex,UA3DLD, plans to show up as
RI0FKD from Kunashir between Aug 8 and Sep 3. He also plans to activate
more islands. QSL via homecall.

EU-029, OZ, Sjaelland Archipelago: Michael,OZ/DG5LAC, will be QRV from the island of Mon from Aug 8-13. QSL via homecall (direct/bureau).

EU-032, F, Poitou-Charentes Region Group: Volker,F/DK2MT, plans to become active from Oleron Island (DIFM AT-025) from Aug 1-20. QSL via homecall (direct/bureau).

EU-042, DL, Schleswig-Holstein State NW Group: Andy,DL7AT/m, will be QRV from Sylt from Aug 7-15. QSL via homecall (direct/bureau).

EU-082, R1Z, Barents Sea Coast West Group: Nick,RA1QQ/1, and Dima,RN3GM/1, will show up from Kildin Island from Aug 9-15. QSL via RA1QQ.

EU-129, DL, Usedom Island: Tommy,DL8KX/p, will be QRV from Usedom from Aug 7-14 and he also plans to show up as SP1/DL8KX from Wolin Island. QSL via homecall (direct/bureau).

EU-136, 9A, Kvarner Group: Leonardo,9A/IW0QO, is working from Losinj Island from Aug 1-18. QSL via homecall (direct/bureau).

NA-058, W4, GA State Group: Several members of the Kennehoochee ARC (W4BTI) will be QRV as special event station and IOTA/lighthouse DXpedition signing K4L from Sapelo from Aug 5-7. QSL via W4BTI (direct/bureau).

NA-158, KL, Kenai, Cook Inlet Group: Michael,AB5EB, Jake,KB5SKN, and Mike,AD5A, are going to become active as AB5EB/KL0 and AD5A/KL5 from Kalgin Island from Aug 6-8. The QSL route is not known yet.

Lighthouse activities (WLOTA/ARLHS/ILLW)

AB5EB/KL0 LH 1728 Kalgin Aug 6-8
AD5A/KL5 LH 1728 Kalgin Aug 6-8

First 6m beacon in Kyrgyzstan

Oleg,EX8MLT, is the operator of the first 6m beacon in Kyrgyzstan.
The beacon is transmitting on 50.026 MHz with the callsign EX1SIX.
The transmitter hast 60 watts and is situated in the city of Tamga, at
the southern bank of the lake Issyk Kul.

"a new cosmology"

Fitzpatrick offers us a new cosmology that solves a lot of problems:

We know something epochal happened 10 to 15 billion years ago because
of the Cosmic Microwave Background Radiation (CMBR).

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

August 4, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Move 'Em Out - Rookie Roundup #2
- ARRL UHF On the Ultra-Shorts
- Borderline Conduct On the Air
- What Did I Sound Like?
- WRTC-2010 Webinar by PVRC
- World Above 50 MHz Retrieved
- Lightning Sparks Some Ideas
- Tuning Up

NEW HF OPERATORS - THINGS TO DO

This weekend's CW version of the North American QSO Party
<http://www.ncjweb.com/naqprules.php> is a great way to beat the heat
on a sultry summer Saturday. It's a 12-hour, low power contest in which
you can make a lot of progress towards your 5BWAS award
<http://www.arrl.org/was>, too! On the following weekend, check out the
ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> - specially
designed for hams licensed in the past three years. New ways to submit
your score and on-line resources are described on the contest's Web
page.

BULLETINS

Two different dates have been published for the August edition of the
ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup>. The correct
date is August 15th.

BUSTED QSOS

A yellow card for the Contest Update! WRTC-2010 competitor VE3DZ's call
was given as VE3DX - I guess my typing fingers have a mind of their
own! (Thanks, Hank N8XX)

The upcoming Connecticut QSO Party <http://www.ctqp.org/> is not the
first one ever - the Candlewood ARA <http://www.danbury.org/cara/>
```

sponsored a Connecticut QSO Party in the past. The new contest is the first one for the new sponsor, but not the first ever. (Thanks, Mark K1RO)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Aug 7-8

- ARRL UHF Contest
- NS Weekly Sprint--CW (Aug 6)
- TARA Grid Dip Contest--Digital
- 10-10 Summer Phone QSO Party
- North American QSO Party--CW
- Straight Key Weekend Sprint

Aug 14-15

- ARRL Rookie Roundup--Phone
- CWops Mini-CWT Test (Aug 11)
- Worked All Europe--CW
- Keymen's Club of Japan Contest--CW
- Maryland-DC QSO Party
- Feld-Hell Monthly Sprint

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Summer is travel season and Canada is a popular destination - what about an American operating a ham radio in Canada? Since 1952, a reciprocal operating permission has been in place between our countries and all that is required is to carry a copy of your license, identify properly, and operate by the host country's rules. Append the appropriate suffix to your call - such as N0AX/VE7. For further information on US/Canadian operation, visit the Radio Amateurs of Canada (RAC) Web site <http://www.rac.ca/en/amateur-radio/regulatory/operating-in-canada/canada-usa.php>. (Thanks, Majdi N0RMZ)

While the 2011 Dayton DX Dinner <http://www.swodxa.org/> has been moved to the Dayton Marriott on Patterson Blvd, contest activities during the Dayton Hamvention remain at the Crowne Plaza. This includes the Contest Dinner <http://contestdinner.com/>, Contest University <http://contestuniversity.com/>, and Contest Super Suites <http://contestsupersuite.com/>. There are no plans to change locations for 2011. (Thanks, Tim K3LR)

A new Pennsylvania FM Sprint has been announced by the Holmesburg Amateur Radio Club (HARC) <http://www.harcnet.org/>. It will run on Saturday, February 26, 2011 from 7 - 11 PM using FM simplex frequencies on 50, 144, 222, and 432 MHz. The first statewide FM contest in the country, Pennsylvania is leading the way in this activity - an excellent way to introduce VHF FM hams to contesting and long-distance

communications. (Thanks, Bob WA3PZO)

Have you grown weary of interminable email "threads" (topics) on your
favorite email reflectors? If you use the gmail service, open the
message on the unwanted thread, press the "m" key , and gmail will
"mute" the conversation and not place future messages on the thread in
your Inbox. (Thanks, David K2DBK)

Veteran all-night contester, Fred K1VR relays the link to a Havard
Magazine article on lost sleep
<http://harvardmagazine.com/2010/07/lost-sleep-is-hard-to-find>. "This
article tells you that you will have a higher rate, with greater
accuracy, from 3 PM to 7 PM, and a lower rate, with lower accuracy,
from 3 AM to 7 AM. Quelle surprise!" At least you now have an excuse.

If the Dutch can reclaim land from the sea, why not this interesting
idea
<http://green.blorge.com/2010/07/recycled-island-will-be-created-from-plastic-waste-in-the
-pacific-ocean/>
for taking what's already in the sea and making land out of it?
Slightly far-fetched, but then, the good ideas always are. The hard
part is telling which ones aren't too far out there before actually
trying them! (Thanks, Brent W5WW)

Web Site of the Week - Don VE6JY <http://alfaradio.ca/ve6jy.html> made
several recordings during the first day of WPX SSB
<http://www.4shared.com/dir/34969409/5124c8fb/sharing.html> and then
again during IARU
<http://lists.contesting.com/_cq-contest/2010-07/msg00295.html>.
Recordings were made with the Perseus SDR and cover 80, 40, and 20
meters at various times. The links point to cq-contest reflector posts
Don made describing the files and how to play them back. Take a listen
to see how you sound in Edmonton, Alberta! At some point, we'll be able
to log on and retrieve spectrum recordings of ANY time and date, not
just during contests. Do you like the idea of playing back a great long
path opening? How about listening to yourself work DXCC all over again?
It's coming and this is just beginning!

WORD TO THE WISE

DQ - in this case, NOT a purveyor of tasty ice-cream treats! DQ means
disqualification and that you've been caught intentionally violating
the contest rules. As the recent stories on radio-sport.net relate,
contest sponsors, armed with more sophisticated detection algorithms,
are becoming more aggressive in flagging down and ticketing offenders
for a variety of transgressions. If you're new to contesting - take
some time to read the contest rules. If you're unclear as to the
meaning of a rule, drop a note to the contest sponsor. They will be
glad you asked and are always happy to explain their rules - no sponsor
is anxious to DQ anyone!

==> SIGHTS AND SOUNDS

Another in the outstanding series of Potomac Valley Radio Club Webinars <http://www.pvrc.org/webinar/webinars.htm>, "A Look at the 2010 WRTC Competition" with North American teams N6MJ/KL9A, K5ZD/W2SC, and N2NT/K3LR is coming up next Sunday, August 8 at 1900Z. The Webinar is free, but registration <https://www2.gotomeeting.com/register/529858251> is required. A second WRTC Webinar is in the works with three teams from outside North America. (Thanks, Ken K4ZW)

One of the loudest signals on the bands emanates from the NH QTH of KC1XX. Budding pilot Charlotte KQ1F flew over the station and has posted an album of photos <http://www.underwater.org/mermaid/aerial/KC1XX/KC1XX.html> for your enjoyment (and maybe a little envy?). (Thanks, Dave KM3T)

Jeff KU8E posted this great collection of Field Day photos <http://www.facebook.com/album.php?aid=2039527&id=1506164554&l=1924172792> from W4CVY featuring none other than John K4BAI at the controls along with a collection of happy young hams-in-training. (Thanks, Tim K3LR)

CW enthusiasts will enjoy the presentation "Morse Code, Keys, Keyers, Paddles and Things That Go Dit in the Night! <http://www.youtube.com/user/AWAMuseum#p/u/10/ezgyY0X73kU>" by Antique Wireless Association Curator Emeritus, Ed Gable K2MP. (Thanks Paul K2DB)

==> RESULTS AND RECORDS

Recent efforts by ARRL Contest Branch Manager, Sean KX9X have retrieved a lot of material from the "World Above 50 MHz <http://www.arrl.org/the-world-above-50-mhz>" section of the previous ARRL Web site. The upper left-hand menu points to the old content, including V/U/SHF Clubs, WA50 Standings, 6 Meter Firsts, and Distance Records. The Grid Chase <http://www.arrl.org/grid-chase> material is also on-line now. Standings are not currently being updated, but send updates to standings@arrl.org and eventually, those will be entered. Records will be updated as time permits, too. (Thanks, Gene W3ZZ)

CQ WW CW logs <http://www.cqww.com/cq-ww-cw-2009.htm> are now on-line for public viewing. They have also been parsed by the CQ WW Analyser <http://www.ei6dx.com/cqww-contest-analysis/cqww-activity-analyzer> - software written by Stan EI6DX/UA1OUT. The log database now contains almost 13 million QSOs from nearly 30,000 SSB and CW logs submitted in 2007, 2008 and 2009. Stan notes that 2009 activity was up 12.5% compared to 2008!

Wouldn't you like to have this 1955 QSL in your collection? (Thanks, Dan K7SS)

A CQ Worldwide RTTY searchable scores database <http://www.cqwwrtty.com/scores_db.htm> is now on-line, containing the entire 23-year history of the contest. The rapid growth of digital contesting is reflected in a graph <http://www.cqwwrtty.com/stats.htm> on the contest's statistics page. Records

<http://www.cqwwrtty.com/records.htm> in virtually any category imaginable are also posted. Contest Director, Ed W0YK would like to thank Don AA5AU and Randy K5ZD for the creative, hard work that pulled it together.

Here's a different sort of results summary - the Antenna Gain winners from the Central States VHF Conference <http://www.csvhfs.org/conference/index.html> a couple of weeks ago. These are three of the winners:

144 MHz - WB0TEM - 11-element K1FO Yagi - 12.2 dBd
222 MHz - AB0RX - 15-element homebrew Yagi - 14.4 dBd
432 MHz - WA0ARM - Two-stack of 15-element W0EYE Yagis - 16.4 dBd

The highest gain measured that day was 44.9 dBi for a 43 x 40" offset dish by K0MHC. For those of you signing along, that turns 1watt into 10 kW ERP. Stand clear! (Full results of the antenna gain and noise figure competitions will be posted eventually on the CSVHFS <http://www.csvhfs.org/> home page.)

Julius N2WN relays an idea for state QSO party managers - issue a state-shaped plaque (or certificate or sticker or ???) that is an appropriate scale to fit with all of the other states. Then see who could qualify first for all 50?

OPERATING TIP

CTY Files <http://www.country-files.com/cty> - most logging software uses the prefix-based cross-reference developed by Jim AD1C to link call signs and location. With so many special calls and prefixes in play these days, keeping your CTY files up to date should be on your pre-contest to-do list.

==> TECHNICAL TOPICS AND INFORMATION

Rob K5UJ recommends this Radio World article <http://www.radioworld.com/article/69646> on lightning protection as a source of good information on thinking about grounding as a means of handling a strike once it happens.

The perfect work glove hasn't yet been made, but we all keep looking. Pete N4KW uses sailing gloves for tower work. The tips of the fingers are cut out, making the glove great for handling hardware. They have extra leather padding in the palm and the entire top of the glove is made of a stretch nylon material. You can find them at a local marine store or online vendor.

While you're up there on the tower, how about taking care of your feet? Work boots such as the popular Red Wing brand are available with a steel shank, taking the load away from the tender arches of your feet. Mike K5WMG also notes that motorcycle boots are also available with instep plates that have similar benefits.

Another handy tip from the superstation of VE6JY
<http://alfaradio.ca/ve6jy.html> - use blue or green paint masking tape
for labeling equipment. It adheres well, comes off without leaving a
residue, is easy to write on, and easy to see!

Julius N2WN uses the software tool ADIF Master
<http://www.dxshell.com/soft/am.html> for working with big ADIF files.
It can be used for editing and for finding specific contacts too:

Just how long was that QSO anyway? If you have the latitude and
longitude of both stations, John AE5X sends word of a WGS-84, a program
<http://www.mrsoft.fi/ohj02en.htm> to calculate the distance between
points. In fact, you can calculate it to the foot if you want!

Here's a face to go with a familiar call - this is Zack W9SZ making a
tour of Gateway Electronics during lunch break at the Central States
VHF Conference. (Photo by N0AX)

Here's another in a growing list of Android smart-phone applications
- GPS Test
<http://www.androlib.com/android.application.com-chartcross-gpstest-zjAp.aspx>.
It's free and displays which satellites are being received, along with
signal strengths for each, your speed of travel, GPS time, and a full
six-character grid locator! There's more and a GPS Test Plus version,
but you can find out more about the program on-line. This would be
great for Rover stations and mobile operation. (Thanks, Les N1LF)

At the recent Central States VHF Conference, I happened upon the Wicks
Aircraft Supply <http://wicksaircraft.com/> catalog. While it's aimed
at aviators, there is a lot of neat hardware and gadgetry on display
there, many items suitable for ham radio use.

For plumbing a tower use a string and weight. If the weight moves in
the wind, try putting it in a bucket of water to damp the movement.
(Thanks, Towertalkians and Steve K7LXC)

I know you all want to know about the physics of a rolling rubber band
<http://news.sciencemag.org/sciencenow/2010/07/the-physics-of-a-rolling-rubber-.html>.
The problem of what happens to the energy in a deformable object as it
moves it actually pretty complicated - it's sure not a snap!

Technical Web Site of the Week - What ham shack, garage, or tool kit
doesn't include a can (or two) of WD-40? You can smell it just thinking
the name, can't you? Invented 57 years ago (!), its longevity is being
celebrated as described by this article in the Wired Gadget Lab
<http://www.wired.com/gadgetlab/2010/07/wd-40-celebrates-old-age-with-1950s-style-can/>.
Bonus points if you still have one of those original cans. Double bonus
if you use it for the original intended purpose of displacing water!
(Thanks, Tom K1KI)

==> CONVERSATION

Tuning Up

How about a little fun for the Dog Days
<http://en.wikipedia.org/wiki/Dog_Days> of August, so named because of
Sirius the Dog Star's appearance in the evening sky of the Northern
Hemisphere. Andy N2NT has constructed a devilish quiz requiring you to
take the call signs listed and turn them into the names of rock or pop
musicians and musical groups. Answers will be given in the next issue,
so you have two weeks - and one, two, one-two-three-four...

73, Ward N0AX

==> CONTESTS

4 August through 17 August

An expanded, downloadable version of QST's Contest Corral in PDF format
<http://www.arrl.org/contest-calendar> is available. Check the
sponsor's Web site for information on operating time restrictions and
other instructions.

HF CONTESTS

NS Weekly Sprint--CW, from Aug 6, 0230Z to Aug 6, 0300Z. Bands (MHz):
1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules
<http://www.ncccsprint.com/rules.html>

TARA Grid Dip Contest--Digital, from Aug 7, 0000Z to Aug 7, 2359Z.
Bands (MHz): 160-28, 50. Exchange: Name and 4-char grid square. Logs
due: Sep 4. Rules <http://www.n2ty.org/seasons/tara_grid_rules.html>

10-10 Summer Phone QSO Party--Phone, from Aug 7, 0001Z to Aug 8, 2359Z.
Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due:
Aug 23. Rules <http://www.ten-ten.org/>

North American QSO Party--CW, from Aug 7, 1800Z to Aug 8, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and state. Logs due: 14 days. Rules <http://ncjweb.com/>

Straight Key Weekend Sprint--CW, from Aug 8, 0000Z to Aug 8, 2359Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): 1.82, 3.55, 7.055, 7.114, 14.05, 21.05, 28.05, 50.09. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

CWops Mini-CWT Test--CW, from Aug 11, 1100Z to Aug 12, 1200Z. Bands (MHz): 3.5-14. Frequencies (MHz): 18 to 28 kHz above band edge; Multiple operating periods. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

ARRL Rookie Roundup--Phone, from Aug 15, 1800Z to Aug 15, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: See Web. Rules <http://www.arrl.org/contests>

Worked All Europe--CW, from Aug 14, 0000Z to Aug 15, 2359Z. Bands (MHz): 3.5-28. Exchange: RST and serial (see Web for QTC rules). Logs due: 15 days. Rules <http://www.waedc.de/>

Keymen's Club of Japan Contest--CW, from Aug 14, 1200Z to Aug 15, 1200Z. Bands (MHz): 1.8-28, 50. Exchange: RST and JA pref/dist or continent. Logs due: Sep 15. Rules <http://www.jarl.com/kcj>

Maryland-DC QSO Party--Phone,CW,Digital, from Aug 14, 1600Z to Aug 15, 0400Z and Aug 15, 1600Z to Aug 16, 0000Z. Bands (MHz): 1.8-28, 50-440, Frequencies (MHz): See Web site. Exchange: Maryland County/City or S/P/C. Logs due: Sep 14. Rules <http://mdcqsoparty.w3vpr.org/>

Feld-Hell Monthly Sprint--Digital, from Aug 14, 2000Z to Aug 14, 2200Z. Bands (MHz): 1.8-28. Exchange: RST, Feld-Hell member nr or age, S/P/C. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

VHF+ CONTESTS

ARRL UHF Contest--Phone,CW,Digital, from Aug 7, 1800Z to Aug 8, 1800Z. Bands (MHz): 432+. Exchange: 4-char grid square. Logs due: Sep 7. Rules <http://arrl.org/contests>

TARA Grid Dip Contest--Digital, from Aug 7, 0000Z to Aug 7, 2359Z. Bands (MHz): 160-28, 50. Exchange: Name and 4-char grid square. Logs due: Sep 4. Rules <http://www.n2ty.org/seasons/tara_grid_rules.html>

Straight Key Weekend Sprint--CW, from Aug 8, 0000Z to Aug 8, 2359Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): 1.82, 3.55, 7.055, 7.114, 14.05, 21.05, 28.05, 50.09. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

ARRL Rookie Roundup--Phone, from Aug 15, 1800Z to Aug 15, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: See Web. Rules <http://www.arrl.org/contests>

Keymen's Club of Japan Contest--CW, from Aug 14, 1200Z to Aug 15, 1200Z. Bands (MHz): 1.8-28, 50. Exchange: RST and JA pref/dist or continent. Logs due: Sep 15. Rules <http://www.jarl.com/kcj>

Maryland-DC QSO Party--Phone,CW,Digital, from Aug 14, 1600Z to Aug 15, 0400Z and Aug 15, 1600Z to Aug 16, 0000Z. Bands (MHz): 1.8-28, 50-440, Frequencies (MHz): See Web site. Exchange: Maryland County/City or S/P/C. Logs due: Sep 14. Rules <http://mdcqsoparty.w3vpr.org/>

==> LOG DUE DATES

4 August through 17 August

August 5 - ARS Spartan Sprint, email logs to: spartansprint@yahoo.com, paper logs to:(none). Rules <http://adventure-radio.org/wiki/index.php?title=Spartan_Sprint_Rules>

August 8 - WAB 144 MHz QRO Phone, email logs to: aebbooks@ntlworld.com, paper logs to:Tony Beardsley, G3XKT, 14 York Avenue, Sandiacre, Nottingham NG10 5HB, United Kingdom. Rules <http://wab.intermip.net/Contest%20Rules.php#OtherRules>

August 9 - FISTS Summer Sprint, email logs to: wa1lad@cox.net, paper logs to:Gil Woodside, WA1LAD, 30 Hilltop Ave., West Warwick, RI 02893-2825, USA. Rules <http://www.fists.org/sprints.html>

August 10 - DL-DX RTTY Contest, email logs to: logs@drcg.de, paper logs to: (none). Rules <http://drcg.de/index.php?option=com_content&task=view&id=24&Itemid=36%E2%8C%A9=en>

August 10 - IARU HF World Championship, email logs to: IARUHF@iaru.org, paper logs to:IARU HF Championship, IARU International Secretariat, Box 310905, Newington, CT 06111, USA. Rules <http://www.arrl.org/iaru-hf-championship>

August 11 - ARCI Summer Homebrew Sprint, email logs to: contest@qrparci.org, paper logs to:ARCI Summer Homebrew Sprint, c/o Jeff Hetherington, VA3JFF, 139 Elizabeth St. W., Welland, Ontario L3C 4M3, Canada. Rules <http://www.qrparci.org/content/view/7516/118/>

August 15 - RSGB IOTA Contest, email logs to: iota.logs@rsgbcc.org, paper logs to:RSGB IOTA Contest, Radio Society of Great Britain, 3 Abbey Court, Fraser Road, Priory Business Park, Bedford MK44 3WH, England. Rules <http://www.rsgbcc.org/hf/rules/2010/riota.shtml>

August 16 - SARL HF Phone Contest, email logs to: hfcontests@netactive.co.za, paper logs to:Bloemfontein Radio Amateur Club, Box 12104, Brandhof, 9324, South Africa. Rules <http://www.sarl.org.za/public/contests/SARL%202010%20Contest%20Manual.pdf>

August 17 - RSGB RoPoCo 2, Upload log at: http://www.rsgbcc.org/cgi-bin/hfenter.pl, paper logs to:RSGB G3UFY, 77 Bensham Manor Road, Thornton Heath, Surrey CR7 7AF, England. Rules <http://www.rsgbcc.org/hf/rules/2010/rropoco.shtml>

August 17 - CQC Great Colorado Gold Rush, email logs to:
ki0rb@arrl.net, paper logs to:(none). Rules
<http://www.cqc.org/contests/gold2010.htm>

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-08-05
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF MS Pre-View **

Itï¿½s now time for one of the most popular meteor showers: the
Perseids. Although this shower has proven to be very dynamic in
recent years (as in 2009, for example), only the ï¿½traditionalï¿½
peak is expected to occur this year. Some encounters with high
density trails are expected, but unfortunately they are not
expected to cause significant meteor activity enhancement on top
of background activity. According to IMO, the maximum is expected
to occur between August 12, 23h30m UT and August 13, 02h00m UT this
year, with ZHR=100 hr-1. Have a look to meteor predictions for
August 2010 (together with some tips about Perseids) at our MS
Propagationpage. http://www.mmmonvhf.de/ms.php
As well here you be able to find the OVERVIEW (MAP & TABLE) "who"
will be "where" qrv during the METEOR SHOWER Perseids 2010
SOURCE: Massimo, IV3NDC and Guido, DL8EBW Team of MMMonVHF

** MMMonVHF MS Sprint Contest 2010 (World Wide MS Contest!) **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines DUBUS
and Funk-Telegramm (by Joachim, DL8HCZ) invited you to take part
in our 144 MHz Meteorscatter Sprint Contest:
2010 contest period: Date: 12./13. August 2010
Time period: 12.00hrs till 13.August 2010 12.00hrs UT

** MMMonVHF MS Sprint Contest 2010 - NEW Contest Software **

The MS SPRINT contest is now supportet by two kinds of logging
software: MS Sprint by Arcom and since some days as well by
UcxLog (by Ben, DL7UCX) More Info about the software can be found
as well in the forum of MMMonVHF:
http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=10&topic=91

PLEASE take here rules and info of the the MMMonVHF Sprint Contest:
http://www.mmmonvhf.de/ctest.php
SOURCE: Erwin, DK5EW, on behalf of the MMMonVHF Team

** SPORADIC E & TROPO on 144 MHz **

As well as the Sporadic E saison is not closed (last opening occured 2nd august between EI/GW/GM and CT/EA8) also the TROPO situation on 144 MHz will be sometimes surprising - congrats to Tim, G4LOH, who did some QSOs down to EA8 and as well D4 (4050km) http://www.mmmonvhf.de/tr.php and http://www.mmmonvhf.de/es.php
SOURCE: Guido, DL8EBW Team on behalf of the MMMonVHF Team

** GLOBAL ERUPTION **

During the early hours of August 1st, NASA's Solar Dynamics Observatory recorded a complex global disturbance on the Earth-facing side of the sun. Most of the sun's northern hemisphere was involved in the event, which included a long-duration C3-class solar flare, a "solar tsunami," and a massive filament eruption. As a result of these blasts, a coronal mass ejection (CME) is heading toward Earth. High-latitude geomagnetic storms and auroras are possible when the cloud arrives a few days hence. Check http://spaceweather.com for movies and updates.

Jeremey, W7EME, qrv C America 50 & 144 MHz (now as TG9/W7EME)
NEWS from Jeremy, TG9/W7EME, dated 2010-09-30: Aloha to all: Those of you trying to work me last moon pass, Please take a moment to correct how you install my call sign. My reciprocal for JT use is "TG9/W7EME" I am also "TG9" in the DXCC field under Options in the Settings. I had good signals from better than a dozen whom I was receiving only your call. This is an error in the way you have entered My call in Your software. First operation TG9, 30th July moon: 17 QSO on 2m. 6m terrestrial, no openings on the 30th. So I am on again about half way through tonights moon at EK45xb. A good guess is after 0600z 31st July again. We are busy on other projects to after dark here. I will be TG9 through at least Thursday morning (local) next week.... GL es 73 Jeremy
LATEST NEWS from from Jeremy, w7eme, dated 2010-08-01:
wx vy bad - no operation last 2 days... im in TG 3 more days and will try my best to be on if WX gets better...

Meteor Scatter activity from KM36VC...
Every weekend and the period between 13-25 of August stations
SV5BYR/5 and SW5KKR/5 will be active from KM36VC in meteor
scatter using WSJT software, TS-2000 with 100 watts and a 13
elements yagi (13B2 from Cushcraft). Antenna is located 10m
above ground level. We have open horizon from 170 to 5 degrees
so there is no problem for Central and Western Europe stations.
Sceds are welcome using only ON4KST chat and during the present
of operators there. If there is any 6m Es the priority given to
Magic Band operation. Best regards and hope to work you during
Perseids. 73s SV5BYR (Mike) SW5KKR (Manos)

EA3CEC, EA3CBH, EA6SA and EA6VQ will be operating from EA3CEC's
radio QTH in the province of Avila (IN70QK). A special callsign has
been requested but it is still not confirmed. Rig: 2x2M12 + Kw +
MGF-1308 - Frequencies/Modes: 144.139 MHz on EME, JT65B. Depending
on QRM other frequencies could be used. We'll have Internet and
will announce it in N0UK's EME chat. If any big guns are
interested to try in CW we could arrange a time slot for CW, but
due to our small setup JT65B will be the main operating mode.
Due to the restrictions of the location in a valley it's going to
be difficult to work MS and other terrestrial propagation modes,
but we'll see when we are there. It also could happen that we try
to work some satellites when there is no Moon, but it will depend
on the available time. Operating times: Our intention is to be QRV
most of the time from Moonrise to Moonset, but the QTH is in a
valley, so we expect to get/lose Moon at about 20 degrees or so.
This will restrict the operating times a little. Skeds/operating
policy: No skeds will be taken for digital modes. Just call us

when you can copy us. DO NOT call if you don't copy us.

Rolf, DK2ZF and Martin, DK7ZB will be active from south/east
Pacific on 3 bands EME - LATEST NEWS from Rolf, dated 2010-08-01:
Start of the group will be in Chile (CE3, WW-Loc: FF46). First
they will try to find a quite QTH and than the will qrv. Which
QTHs during the 14 day trip will be active is still uncertain.
More details will be spread here at MMMonVHF!

Hello all, I hope that it will be a good news for EMErs.
This activity will hold during more than 2 weeks from Guadeloupe
Island in the French Antillas. I will be at teh QRA of FG5FI,
Francis with the following rig coming with me. FT897D HL-500V Tokyo
Hy-Power LNA SP2 2 x 8 el DK7ZB Xpol and some spare parts ..
I will tell you more in the next months about the test and the
details about frequency and timing. Also,for practical reasons,
maybe the call sign will be different. I will be QRV internet so
a log on line will be fill after each path. My fgdxspedition site
is still under construction but you can bookmark it yet:

** KL7/KB7Q last activity on 6m EME **

KL7/KB7Q Gene will take the 6 meter gear and try some EME from
BP40da during his stay at ALASKA, May 15th to August 15th. Hello
EME'ers, I'll be taking the station down and rolling out of
Ninilchik, Alaska on August 12 around 1400 utc, so the end of my
three month stay here draws near. EME on 6 meters has really
worked well - I have already made 28 contacts with 26 different
stations. Nine were single Yagi stations. My goal is 30 stations
worked! I will be operating during these nine moonrise/moonset
windows running skeds and looking for stations. Read more in
detail: http://www.mmmonvhf.de/latest.php?id=3144

** DXpedition to Issyk Kul Lake (EX6EME, MN82) **

Dear 6m EMErs, Subject to arrival of our power amplifier from M2
this week looks like we will be going to Issyk Kul, Kyrgyzstan
this Saturday, August 7. Certainly we will make final announcement
if we go or donï¿½t but at this point I just want to lay some basic
rules and share some basic info about the trip in this semi-final
announcement: While operating from the Issyk-Kul lake QTH we will
use the following procedures: Operation. We will be QRV from
August 7 to August 14 the whole week. Callsigns. We will EX6EME
callsign. Operators: Mike (UN8GC / KZ1R) and Oleg (EX8MLT). If we
exhaust all correspondents, we may operate as EX8MLT and EX/KZ1R
callsigns. Grid. MN82re at all times.... Read more in
detail: http://www.mmmonvhf.de/latest.php?id=3448

** TF3CY QRV 9-13th August on 6m EmE **

Hi there Iï¿½m going to be QRV from 9th to 13th of August on 6m EmE
during the moonset. Looks like a lot of activity on the moon this
few days ;) I will be somewhere close to HP94AD square, semi-
portable. I will only be able to work moonset as I will be on the
SW side of Iceland. The original plan was to be on the south most
edge of Iceland, thus both working moonrise and moonset, but Iï¿½m
just returning from summer vacation and could not get the extra
days off work going on a trip to the south cost. Please email me
if you want to try to work me, I will be active on the ON4KST chat
I must warn that Iï¿½m very new in EmE ï¿½ so donï¿½t expect anything but
trouble! ;) but I managed to make two QSO in the last window ï¿½ and
Iï¿½m now building on that experience. I will have 600W , and a 10el
yagi on a 8m mast, more info and pics on www.tf3cy.is I can only
keep the antenna up if the weather is reasonably calm ï¿½ I will
post if I have to postpone. 73 de TF3CY Benedikt Sveinsson

==> + ARRL LEADERSHIP: ARRL BOARD MEETS IN CONNECTICUT FOR ITS 2010
SECOND MEETING

The ARRL Board of Directors held its Second Meeting of 2010 July
16-17 in Windsor, Connecticut, under the chairmanship of President Kay
Craigie, N3KN. International Amateur Radio Union Secretary Rod
Stafford, W6ROD, and Radio Amateurs of Canada President Geoff Bawden,
VE4BAW, were guests of the Board. At the two-day meeting, the Board
considered a number of reports and acted on several recommendations and
Directors' motions. Read more here
<http://www.arrl.org/news/arrl-board-of-directors-meets-in-connecticut-for-20
10-second-meeting>.

==> + PUBLIC SERVICE: FCC TO ALLOW GOVERNMENT DRILLS WITHOUT A WAIVER
AS OF SEPTEMBER 3
```

In July, the FCC released a Report and Order
<http://www.arrl.org/news/fcc-modifies-amateur-rules-to-allow-participation-in-disaster-and-emergency-drills-on-behalf-of-an-e>
(R&O
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.pdf>)
that amended Part 97 -- more specifically Section 97.113
<http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.117.pdf> --
stating that government entities sponsoring disaster and emergency
drills will no longer need to apply for a waiver to hold these drills.
Additionally, employees who wish to participate in
non-government-sponsored drills and exercises may do so under certain
conditions. Part 97 is the portion of the Commission's rules that
govern the Amateur Radio Service. In the August 4 edition of the
Federal Register, the FCC issued a summary of the R&O entitled
Amendment of the Commission's Rules Regarding Amateur Radio Service
Communications During Government Disaster Drills --noting that the
effective date of these new rules will be September 3, 2010
<http://edocket.access.gpo.gov/2010/pdf/2010-19198.pdf>.

==> + IT'S A BIRD, IT'S A PLANE! NO, IT'S AN ASTEROID -- ASTEROID
(31531) ARRL, TO BE EXACT!

<http://www.arrl.org/images/view/News/31531%20ARRL_3.JPG> John,
Paul, George and Ringo are on the list. Mozart, Bach, Beethoven and
Brahms -- even Frank Zappa and Elvis (but not Madonna). Of course
Asimov and Sagan made the cut, Mr Spock, too, but not Captain Kirk. And
now ARRL -- more precisely, (31531) ARRL -- joins this prestigious
company as one of more than 16,000 named minor planets in our solar
system. A minor planet -- such as an asteroid -- is an astronomical
object in direct orbit around the Sun that is neither a dominant planet
-- such as Mercury, Saturn and Neptune -- nor a comet. The first minor
planet -- named Ceres -- was discovered in 1801. Since then, more than
200,000 minor planets have been discovered, most of them lying in the
asteroid belt. But as of July 27, 2010, only 16,005 had been named.
Read more here
<http://www.arrl.org/news/it-s-a-bird-it-s-a-plane-no-it-s-an-asteroid-asteroid-31531-arrl-to-be-exact>.

==> + ARRL FACEBOOK PAGE TOPS 10,500 FANS

With more than 10,500 fans on Facebook, the ARRL page is the number
one spot for hams on the Internet's most popular social networking
site. Not only is the ARRL page the most popular Amateur Radio page on
Facebook, it is attracting young -- and not-so-young -- hams to share
their opinions and ham radio-related news with other hams. Read more
here <http://www.arrl.org/news/arrl-facebook-page-tops-10-300-fans>.

==> + ACTIVE SUN PUTS ON DISPLAY FOR EARTH

Last weekend was quite a busy time for our Sun. During the late
hours of Friday, July 30, a magnificent coronal mass ejection (CME)
billowed away from the eastern limb of the Sun; the source of the blast
was apparently sunspot 1092. On Sunday, August 1 at approximately 0855

UTC, Earth-orbiting satellites detected a C3-class solar flare, and again, the blast came from sunspot 1092. At about the same time as the solar flare, an enormous magnetic filament erupted, stretching across the Sun's northern hemisphere, a complex global eruption involving almost the entire Earth-facing side of the Sun.

"This eruption is directed right at us and is expected to get here early in the day on August 4," said Leon Golub <http://www.cfa.harvard.edu/news/2010/pr201011.html>, Senior Astrophysicist with the Solar and Stellar X-Ray Group in the High Energy Astrophysics Division of the Harvard-Smithsonian Center for Astrophysics. "It's the first major Earth-directed eruption in quite some time. We got a beautiful view of this eruption, and there might be more beautiful views to come if it triggers aurorae." Read more here <http://www.arrl.org/news/active-sun-puts-on-display-for-earth>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things that ARRL is doing on behalf of its members. This installment covers the month of July. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-24>.

==> + SWISS HAMS SET NEW WORLD RECORD ON 10 GHZ

A group of six Swiss hams have set a new record for the longest contact (based on GPS coordinates) made on 10 GHz using SSB -- 2696 km (1675 miles): from Ilha do Sal <http://en.wikipedia.org/wiki/Sal,_Cape_Verde> (one of the northern Cape Verde islands) to Portugal. Using a 20 W transmitter -- with a 90 cm parabolic reflector with 35 dB gain -- these hams, part of the Hyperatlantica 2010 DXpedition <http://www.hyperatlantica.ch/>, were able to contact Portugal on the morning of July 10 for almost 25 minutes. The original record of 2070 km (1286 miles) -- set in 2000 by Armin Martsch, DL4AM, and Adalbert Kaufmann, DJ3KM -- was broken by the Swiss group earlier that same day, with a contact between Ilha do Sol and Tangier, Morocco at a distance of 2200 km (1367 miles).

==> + SOLAR UPDATE

Tad "There lands the Fiend, a spot like which perhaps Astronomer in the Sun's lucent Orbe through his glaz'd Optic Tube yet never saw <http://www.dartmouth.edu/%7Emilton/reading_room/pl/book_3/index.shtml>" Cook, K7RA, reports: Both the sunspot numbers and solar flux declined this week, with the average daily sunspot numbers down more than 15 points to 20.3 and the average daily solar flux down nearly 4 points to 81.4. A new sunspot group emerged Wednesday, and two more may be coming on Thursday. Geomagnetic activity was high, due to a coronal mass ejection that sent Wednesday's planetary A index to 42; a second CME may hit earth Thursday. The predicted planetary A index for August 5-9 is 35, 15, 7, 5 and 5. Look for more information -- including a look at

the three-month moving average of daily sunspot numbers that rose more than four points to 20.4, as well as the outlook for the near term -- on the ARRL Web site on Friday, August 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Milton's Paradise Lost <http://www.dartmouth.edu/%7Emilton/reading_room/pl/book_1/index.shtml> (Book 3 <http://www.dartmouth.edu/%7Emilton/reading_room/pl/book_3/index.shtml>, lines 588-590).

==> THIS WEEK ON THE RADIO

This week:

- August 6 -- NCCC Sprint Ladder
- August 7 -- TARA Grid Dip Shindig
- August 7-8 -- ARRL UHF Contest <http://www.arrl.org/august-uhf>; North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 8 -- SKCC Weekend Sprint
- August 11 -- NAQCC Straight Key/Bug Sprint; QRP Fox Hunt
- August 11-12 -- CWops Mini-CWT Tests

Next week:

- August 13 -- NCCC Sprint Ladder
- August 14 -- Feld Hell Sprint
- August 14-15 -- Maryland-DC QSO Party; WAE DX Contest (CW)
- August 15 -- ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup>
- August 16 -- Run for the Bacon QRP Contest
- August 18 -- QRP Fox Hunt

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Amateur Radio Newsline(tm) Report 1721 - August 6 2010

Amateur Radio Newsline report number 1721 with a release date of
Friday, August 6 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio, Scouting and the ISS combine at
the 2010 Boy Scouts of America Jamboree. We take you to the scene.
Also, a major flare-up on the sun causes propagation changes on Earth
and the FCC's new national emergency radio system proposal draws a
negative response from those who will have to use it. Find out the
details on Amateur Radio Newsline(tm) report number 1721 coming your
way right now.

HAM RADIO IN SPACE: ISS TO SCOUTING JAMBOREE CONTACT SUCCESS

A very successful contact was made on Saturday, July 31st between six
Scouts at the 2010 National Boy Scout Jamboree and Astronaut Doug
Wheelock, KF5BOC on board the International Space Station. This years
Jamboree was held to celebrate the 100th birthday of Scouting in
America. Amateur Radio Newsline's Mark Abramowicz, NT3V, reports from
Fort A.P. Hill, Virginia:

--

K2BSA: "NA1SS, NA1SS. This is K2BSA, K-2 Boy Scouts of America."

NA1SS: "K2BSA, we've got you loud and clear aboard the International Space
Station. This is Col. Doug Wheelock and on behalf of my crew I wanted to
wish you all a great day down there and we're looking forward to talking to
you."

--

And that's how it started here on the K2BSA site on a pleasant Saturday
afternoon as youth staff member Andrew Koenig, KE5GDB, who is Amateur Radio
Newsline's 2009 Young Ham of the Year, initiated the biggest contact of the
jamboree. The six Scouts representing Georgia, North Carolina,
Pennsylvania, and Wisconsin, all got a chance to take part in a truly
out-of-this-world experience they won't soon forget. Each got to ask
astronaut Wheelock a question, some relating to Scouting and the space
program.

Fritzi, a 15-year-old life Scout from Devon, Pennsylvania, asked Wheelock whether Scouting could have a positive effect on space exploration. The answer: Scouting has the right stuff for the astronauts.

"Flying in space is much like Scouting," Wheelock says. "And much like a lot of things in life that are difficult to accomplish with one person. But, you need good team building skills and good leadership skills to be an astronaut. The same skills that are key to be a good Scout."

Fritzi was impressed: "They're in space," Fritzi says. "They're in zero gravity and we're down here on Earth just sort of going through a normal day."

Mark, a 12-year-old First Class Scout from Charlotte, N.C., says this was a first for him.

"I've talked to one astronaut on Earth before but I've never talked to someone in space and I think that's cool and I don't think I ever expected to do that," Mark says.

Jonathan, a Star Scout from Reading, Pennsylvania, asked Wheelock whether astronauts, like Scouts, are trained to improvise, especially when equipment fails.

"That's the second most important thing that you learn in Scouting that you need to have as an astronaut and that's the skill of problem solving," Wheelock responds.

"To be able to look at a problem because things are going to break if you're working with machinery things are going to break and you have to use what you can, what tools you have and what knowledge you have about that system to fix it."

Jonathan says he was happy to be chosen to play a role in the event.

"No, I never expected this," he says. "On a scale of 1 to 10, with one being the worst and 10 being the best, I'd give it a 10."

Connor, a 13-year-old Scout from Buchanan, Georgia, agreed: "It was amazing," he says.

David, a 15-year-old life Scout from Fort McCoy, Wisconsin, echoed the sentiment. "It was really cool talking to someone who was in space and it was just an amazing experience," David says.

For Quinn, an Eagle Scout from Carrollton, Georgia, the experience will stay with him. "Personally, I think it's amazing because I'm talking to someone who's representing the pinnacle of humanity's hopes and dreams because he is you know reaching out into the unknown," Quinn says. "He's helping our species go out and explore and change the way we live."

And, Quinn confided, the contact with Wheelock helped cement in his mind, the kind of profession he'd like to pursue.

"When I was told not to be nervous I said: Oh no, I'm not going to be nervous because hopefully, one day, I'll be on the other end of the radio.

I'll be the person talking to Boy Scouts or other people back on Earth from the space station or from space in general."

Wheelock clearly enjoyed the brief exchange and the Scouts say it's a memory they'll cherish for a lifetime.

From the 100th anniversary celebration of the founding of the Boy Scouts of America, here at the National Jamboree at Fort A.P. Hill in Virginia, I'm Mark Abramowicz, NT3V.

--

Amateur Radio Newsline has obtained exclusive rights to air the entire contact between the Scouts at the Jamboree and Doug Wheelock on board the ISS. Its available right now at our website, arnewsline.org. And Mark will be back a bit later in this weeks newscast with a wrap-up on the ham events at this years Scouting Jamboree. (NT3V, ARNewsline(tm))

**

PROPAGATION: SUN EMITS CME TOWARD EARTH

If you noticed some strange propagation or lack of it this past week, there is a reason. During the early hours of August 1st a complex eruption on the sun sent a coronal mass ejection or C-M-E toward Earth. NASA's Solar Dynamics Observatory recorded a complex global disturbance on the Earth-facing side of the sun. Most of the sun's northern hemisphere was involved in the event, which included a long-duration class C 3 solar flare and a massive filament eruption. As a result of these blasts, the coronal mass ejection was sent out into space with Earth as one of its targets. This means that high latitude geomagnetic storms and auroras were possible when the cloud arrived at our planet. More information is on-line at spaceweather.com. (VHF Reflector, Spaceweather, others)

**

RADIO INTRIGUE: LEBANON REPORTEDLY ARRESTS GERMAN HAM

Lebanese army intelligence has reportedly arrested a German engineer and amateur radio operator in eastern Lebanon on suspicion of spying for Israel. This, according to several on-line media reports on Tuesday, August 3rd.

The Nahar Daily said that the army raided the "Liban Light" cheese factory in the town of Talya and arrested an individual named Manfred Peter H. He was identified in several reports as the engineer in charge of maintenance of the factory's machines. The reports says that the army is questioning the 58 year old over his use of radio transmitters.

According to several other postings the actual identity of the person reportedly detained may be Manfred Peter Haug DL6SN. Haug works at the factory, has an OD5 guest license and government permission to operate in Lebanon, but no source has yet confirmed if Manfred Peter H and DL6SM are one in the same or if the person taken into custody is still being

detained. One source tells us that the ham in question has been released but there has not been any second source confirmation of this, as we go to air.

The German newspaper Spiegel Online has a story on this at tinyurl.com/2whspw2. But beware that it a Google English automated translation making it rather hard to understand. (Spiegel OnLine, Nahar Daily, other sources)

RADIO LAW: FCC PROPOSES REALLOCATING 90 MHz OF MSS SPECTRUM TO TERRESTRIAL BROADBAND

The Federal Communications Commission has begun the process required to make additional spectrum available for new investment in mobile broadband networks. This by exploring the reallocation of spectrum currently designated to the Mobile Satellite Service in the 2 GHz band, the Big L-E-O band and L-band.

In its news release the FCC says that such an allocation modification would set the stage for more flexible uses of the band by terrestrial services. As such, it also proposes to expand existing secondary market policies and rules to address transactions involving the use of Mobile Satellite Service bands for terrestrial services. This says the FCC would create greater predictability in bands licensed for terrestrial mobile broadband service. (FCC, CGC)

**

RESCUE RADIO: DUTCH HAMS SUPPORT ARMY E-MAIL EXERCISE

The Dutch Amateur Radio Emergency Service or DARES recently took part in an emergency preparedness exercise known as Civil Challenge. This, in collaboration with the Dutch Army.

From June 22nd to the 24th DARES task was to establish an e-mail link between the locations of the Army in Vught and Budel with an additional LAN network provided at Budel for the number of users there. To accomplish the e-mail link, a Winlink system using existing, new or temporary RMS Packet Gateway stations was used for this exercise. Six tactical email accounts, 1 in Vught and 5 in Budel were created to support the exercise.

DARES also took the opportunity to organise 3 Master Classes, in which the operation and use of the VHF / UHF Winlink system was explained and demonstrated to the participants. For DARES members it was also an opportunity to test all their new TNC-X modems under simulated emergency conditions. (IARU Region 1)

**

RADIO LAW: 97.113 REVISION ON EMPLOYEE HAMS IN DRILLS TAKE EFFECT SEPTEMBER 3

The effective date that the need for waiver from the FCC to use employee hams in government sponsored training exercises goes away is September 3rd. In the August 4th edition of the Federal Register, the FCC issued a summary of the Report and Order on this matter. The revised rules take effect 30 days after publication in the Federal Register making the effective date September 3rd. (ARRL, FCC)

**

RADIO LAW: LATEST FCC PROPOSAL FOR INTEROPERABLE DISASTER RADIO SYSTEM DRAWS NEGATIVE REVIEWS FROM FIRST RESPONDERS

Another stumbling block for the FCC in the creation of a new, 700 MHz, inter-operable emergency communications system has emerged to oppose the FCC's latest plan. This, as emergency service providers and first responders voice their opposition the latest proposal from the regulatory agency. Amateur Radio Newsline's Frank Haas, KB4T, has the details:

--

Two years ago, the Federal Communications Commission tried to create a nationwide wireless broadband network for police, firefighters and other first responders. Its plan was to auction off part of the 700 MHz band with the proviso that telecommunications providers purchasing the spectrum also build and maintain the emergency service network. Those conditions proved too burdensome, and the auction failed to attract any serious bidders.

Now the agency is hoping to rework the plan, which relies on the use of a slice of 700 MHz called the D Block. But many public safety officials say the FCC is again taking the wrong approach and they are voicing strong the opposition to the plan in the public media.

The latest idea from the FCC is to auction off the D Block to wireless carriers and use the proceeds to help pay for a public safety network on a separate slice of spectrum already set aside for first responder broadband use. In terms of spectrum, the existing 700 MHz public safety bands are adjacent to the D Block frequencies.

The FCC contends that the existing public safety block provides adequate capacity for day-to-day emergency response operations. The agency adds that in an emergency its latest proposal would give public safety users priority access to the D Block and other spectrum from the digital transition while fulfilling the Congressional mandate to insure public safety benefits from

the latest wireless technology.

But the FCC proposal has run into vehement resistance from public safety agencies. They warn that their current spectrum allocations are not big enough to meet their needs. They are also very cautious of relying on commercial broadband providers, particularly in emergencies. As such, they are calling on the government to give the D Block to them so they can combine it with the adjacent band space to double the amount of spectrum dedicated to public safety broadband operations.

But House Commerce Committee leaders are drafting legislation based on the FCC plan. And they are being pushed along by the other large wireless providers such as T-Mobile who are eager for more spectrum and in turn support the FCC proposal.

But not so fast say some leaders in the first response community. Among them is Charles Dowd who is the Deputy Chief in the Communications Division of the New York City Police Department. Dowd has stated his opinion that commercial networks are just not reliable enough for first responders who deal with life and death matters.

And Richard Mirgon, the president of the Association of Public Safety Communications Officials International, says that in a mass emergency, commercial networks are often already overwhelmed.

With the dispute now heading to Congress, the current focus is on funding. If Congress fails to approve the monies needed for the FCC's plan, the proposal could be dead in the water before it ever sees the light of day.

And for the foreseeable future, it appears as if ham radio operators and only ham radio operators who will remain the singular emergency response communicators capable of interfacing with every emergency response and relief team. This through the simple expedient of assigning volunteers with HT's and mobiles to shadow official response personnel and provide for their inter-agency communications needs.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, reporting from Holly Hill, Florida.

--

The deficiencies of the current first response and disaster relief radio networks became apparent after the 911 attacks in New York and Washington D.C. as well as and Hurricane Katrina along the gulf coast. In both cases, police, fire fighters and other responders could not talk to one another because they were using incompatible radio systems. Some were early digital and others were using analog FM. Each had its own set of designated frequencies and no way to directly communicate with any other service. In both instances it was ham radio volunteers who filled the communications gaps left when all else failed. (Published news reports)

RADIO LAW: IARUMS TO CONCENTRATE ON CLEANING UP 40 METRES

The South African Radio Leagues deligate for the International Amateur Radio Union Monitoring System, Fred Scheepers, ZS1FCS, is inviting all radio amateurs and shortwave listeners to join a campaign. This, to remove non amateur stations from the 40 meter amateur band.

Scheepers says that it requires many people to monitor the band from 7 to 7 point 200 MHz for intruders and document details such as the station ID, the frequency and time. According to Scheepers, many intruder broadcast stations will give their ID on the hour and half hour.

If you cannot understand the language the station is broadcasting you might consider recording it as an mp3 or wave file and add it to your report. Those reports go to the International Amateur Radio Union Monitoring System coordinator in your nation. (SARL)

**

RADIO LAW: ITALY'S PTT TAKES ILLEGAL BROADCASTER OFF 20 METERS

A pirate broadcaster is no longer bothering ham radio operations on 20 meters. The IARU Region 1 website reports that the illegal daily AM transmissions from Naples on 14.000 MHz have ended. According to DK2OM, the Italian Department of Post and Telecommunications appears to have located the source of the transmission and has shut it down. (IARU)

**

RADIO RECORDS: NEW DISTANCE RECORD FOR 10 GHz

The Radio Society of Great Britain reports that a new world distance record on 10GHz has been established between the Cape Verde islands and southern Portugal. At 10:46 UTC on July 10th the standing record was smashed by a SSB QSO ranging 2696 kilometers during the Hyperatlantica 2010 DXpedition. The previous distance record on this band had been 2070 kilometers. The Hyperatlantica operators eclipsed that by some 626 additional kilometers. (GB2RS)

**

NAMES IN THE NEWS: AA7A APPOINTED TO DXAC

Some names in the news. First up is Ned Stearns, AA7A, of Scottsdale, Arizona. He has been appointed to fill the Southwestern Division DX Advisory Committee vacancy created with the passing of Vince Thompson, K5VT.

Stearns, who is an electrical engineer has 11-band DXCC and is possibly the only person to have achieved this. A past ARRL Vice Director, Stearns has first hand knowledge and experience from operations on many DX-peditions.

In the 1990's Stearns was a frequent co-host of Len Winkler. KB7LPW, nationally syndicated talk show "Ham Radio and More." That show was originated from the studios of KFNN radio in Phoenix, Arizona, and was carried live on the Bloomberg Radio Network. (ARRL SW Division Communicator, ARNewsline(tm))

**

NAMES IN THE NEWS: ARMAD FOUNDER KB9IBW RECEIVES ACTIVIST OF THE YEAR AWARD

And congratulations to Amateur Radio Military Appreciation Day founder Emery McClendon, KB9IBW. This, on his being named recipient of the "Activist of the Year" award from The Americans For Prosperity Foundation. McClendon was presented the honor on July 23rd at the Rightonline Conference in Las Vegas, Nevada in recognition of his leadership in advancing economic freedom and liberty through the modern media. (ARMAD, Southgate)

**

THE SOCIAL SCENE: DAYTON HAMVENTION ANNOUNCES 2010 THEME

The theme for the 2011 Dayton Hamvention will be two words that hold a lot of meaning in the hobby: "Global Friendship." According to Michael Kalter, W8CI, General Chairman for nest years event, the selection of these two simple words as the theme emphasizes how the technology continues to bond amateur radio operator's from all over the world. Hamvention 2011 is scheduled for May 20th to the 22nd. More information is on-line at hamvention.org or by e-mail to media (at) hamvention (dot) org. (Hamvention®)

**

PUBLIC SERVICE: HAMS NEEDED TO SUPPORT USAF MARATHON

At least 20 more hams are needed to support United States Air Force Marathon now slated for September 18th in Dayton Ohio. The race begins and ends on then grounds of the National Museum of the United States Air Force located on Wright-Patterson Air Force Base located only a few miles East of downtown Dayton. If you are a ham living in the Dayton area or will be in the area on the date of the race, you can volunteer on-line at www.usafmarathon.com and the follow the link that says "Become a Volunteer." Then Fill in the form, find the section Race-Day Opportunities and mark the box "Amateur Radio Operator." Please be sure to enter your call sign in the comment box. Questions and comments go by e-mail to Mike Crawford at kc8gle (at) earthlink (dot) net. (KI4KWW)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO POLITICS: EGYPT FORMS NATIONAL HAM RADIO SOCIETY

The Egyptian Radio Amateurs Society for Development or ERASD has been established as the new national official representative body for radio amateurs in Egypt. According to the IARU Region One website, even though amateur radio has been present in Egypt since the early 1920's, there was no officially recognized society to represent radio amateurs in that nation for nearly the past eight decades. Now, thanks to the earnest efforts by a steering group composed of SU1GS, SU1SK, SU1AO, SU1HM and SU1SA, such a body has been formed. More about it is on-line at www.qsl.net/eara (IARU)

**

HAM TECHNOLOGY: ROS DEVELOPMENT WILL CONTINUE

It appears that the author of the new amateur radio digital mode software R-O-S has had a change of heart, and has reversed his earlier decision to discontinue development work on the project.

According to the Radio Society of Great Britain's news service, the software's author, Jose Alberto Nieto Ros, told GB2RS that he will be implementing new modes and enhanced facilities. He says that the most recent development is an auto reporting system linked into the PSK-Reporter system

The latest version of R-O-S is available for download at www.rosmodem.wordpress.com. Unfortunately, R-O-S still appears to be illegal to transmit by United States hams, but rumors about that its supporters may soon petition the FCC to legalize the mode which is growing in popularity world-wide. (GB2RS, Southgate)

**

HAM RADIO NEAR SPACE: TWIN HAM BALLOONS TO LAUNCH AUGUST 7

A pair of high altitude balloon for Scouts carrying fast scan amateur television repeaters and digital beacons were to be launched on Saturday, August 7th. This, as part of the Scouts Space Jam Technology Merit Badge Workshop. Both balloons were scheduled to be launched from DePauw University flight range in from Rantoul, Illinois with the first one lofting at 8 a.m. Central U-S time and the second a half hpur later at 8:30 a.m. On-line tracking of both flights will be available on-line at tinyurl.com/2ed2u85. More information on Space Jam is on the web at spacejamboree.com. (N9QGS, QRZ.com)

**

ON THE AIR: 6 METER AM NET ESTABLISHED IN MICHIGAN

6 meter AM lives again. This with the announcement that stations in Michigan, North-West Ohio and North-East Illinois are invited to check out the Classic Radio Roundtable which starts every Sunday evening at 7:30 Central time on 50.4 MHz. The net control station is Gary Franklin, K8BKB, who is located in the city of Kalamazoo, Michigan. Most stations are running classic 1960's era vintage gear but all hams with any form of AM capability are invited to tune in and take part. (W9DZ, VHF Reflector)

**

ON THE AIR: OMAN GIVES ITS HAMS 6 METER PRIVILEGES

Still with 6 meter news, the Radio Society of Great Britain reports via its GB2RS news service that the Omani Telecommunications Regulatory Authority has allocated 50 to 52 MHz to that nations amateur service. This, on a secondary user basis. No other information is available as we go to air. (GB2RS)

**

ON THE AIR: THE NETHERLANDS, SPECIAL EVENT STATION

On the air, PA0FAW will use the callsign PA10WSF through August 30th to mark the World Statues Festival in Arnhem taking place on Aug 28th and 29th. Fred will be operating mainly CW and several digital modes. A special QSL is available via PA0FAW, via bureau, direct or eQSL. More on the festival itself is in cyberspace at www.worldstatues.nl. (Via e-mail)

**

ON THE AIR - AUSTRIA SPECIAL EVENT STATION

The Austrian station OE1XJA stroke 3 of the TELESCOUT club will be activate through August 12th to celebrate "100 years of scouting in Austria. The station will take to the air from the scout camp in Laxenburg near Vienna. Operation will be on all bands except 160 meters using all modes. QSLs via the O E bureau. More information on this event is on-line at www.telescout.org. (QRZ-DX)

**

ON THE AIR - UK SPECIAL EVENT STATION

And GB50RN will be operating August 6 to 8 from Coventry in the United Kingdom. This to celebrate the 50th anniversary of the Royal Naval Amateur Radio Society. Operations will be world-wide on CW and SSB on 80 through 10 meters. Local area operations will take place on FM on 2 meters and 70 centimeters as well. (GB2RS)

**

DX

In DX, I0PNM, is operational portable IM0 from Isola San Pietro Sardinia using SSB and RTTY on 20 through 10 meters through August 22nd. He also plans to activate the lighthouse at Capo Sandalo. QSL as directed on the air.

OZ5DL has been heard as OX3DL on from Greenland operating holiday style. His preferred frequency is 14.018 MHz. QSL via OV5A, either direct or via bureau.

DB5MH is reported on from Disko Island operating QRP with an FT-817 and groundplane antenna. Listen out for him on or near 14.310 MHz every day

around 0000 UTC. QSL via DJ9KH.

JT1CS who is the secretary of the Mongolian Radio Sport Federation reports that JT1NOC does not have a valid license. He did not renew his old license so his current operation is assumed to be illegal.

Lastly, VE2XB is currently in the mid-East traveling through Israel. He will be there four weeks and will operate portable 4X using Morse and SSB on all bands including 6 meters. QSL direct to VE2XB.

(Above from various DX news sources)

**

THAT FINAL ITEM: HAM RADIO AND THE BEST SCOUTING JAMBOREE EVER

And finally this week, thousands were exposed to amateur radio thanks to the efforts of the K2BSA staff during the 2010 National Boy Scout Jamboree recognizing the 100th birthday of Scouting in America. Amateur Newsline's Mark Abramowicz, NT3V, is on the K2BSA staff and has the wrap-up:

--

Its now official. The K2BSA staff has wrapped operations at the 2010 Boy Scout Jamboree at Fort A.P. Hill, Virginia.

In all, more than 5,000 people toured the K2BSA demonstration station a feat that rivaled most of the exhibits and displays at the jamboree.

Brian Mileshosky, N5ZGT, was the K2BSA station coordinator. He says the operation met all of his expectations.

"We had approximately 13 percent of the total jamboree population which was about 43,000 and a half people here at the jamboree," Mileshosky says. "Thirteen percent of that population came through our exhibit and was exposed to ham radio, got to touch and feel radios get on the air themselves meet people on the other side of the country and the world and learn about a fascinating hobby and service."

He offers high praise, too, to those amateurs who found K2BSA on the HF bands and offered to speak with Scouts who were visiting the station and many of whom were working on Radio merit badge.

"What was very fascinating is about three out of every five contacts were from Scouts present or past - remarking on their time in Scouting or the fact that they have a relative or friend who is here at the jamboree or that they got Eagle Scout or that they still regret not getting Eagle Scout when they were a youth," Mileshosky says. "Especially for the boys that we put on the air, that made their time on the airways much more comfortable because they had an instant connection with everybody they were talking to."

Although the statistics were being finalized as we leave the jamboree, here are some of the impressive numbers:

More than 200 Scouts earned the Radio Merit Badge.

More than 130 people most of them Scouts passed their Technician license exams and many of themm sat through the one-day classes to earn their license. And those were packed.

And, even the garrison commander of Fort A.P. Hill, Maj. John Haefner took his Tech test and on the finall day of the jamboree passed his General. So, the major got promoted to General in a short span of time.

Congratulations to all who came through K2BSA and to our new licensees.
Hope you&#65533;(tm)ll be getting on the air soon.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the National Boy Scout Jamboree in Fort A.P. Hill, Virginia.

--

Don't forget to check out an Amateur Radio Newsline Exclusive, the audio of the International Space Station contact with K2BSA during the jamboree. It's at our website, arnewsline.org as a downloadable MP3 file. Just scroll down until you see " K2BSA contact with the International Space Station" and right click on the word "here" to save it to your computer. (NT3V, ARNewsline)

GB2RS NEWS

Sunday 8th August 2010

The news headlines

Icom UK sponsor the 3rd UK Contest University

Plasma television interference complaints

Over 300 stations planned for the ILLW

Icom UK will again be sponsoring Contest University UK on Saturday 9 October at this year's RSGB Convention, which will be held at the new venue of Horwood House near Milton Keynes. Contest University UK is the place where you can learn all the skills and secrets to start your journey in becoming a contester, or even learn the secrets to stay ahead of your competitors. Contest University UK is now in its 3rd year and is based on the highly successful international format that has seen many radio amateurs throughout the world learn about this exciting facet of amateur radio from experienced practitioners. The main topics of Contest University are now shown on the RSGB website. If you have any questions regarding Contest University, please contact course director Mark Haynes, M0DXR at mark.haynes@yahoo.co.uk.

If you are considering a visit to the RSGB Convention on 8 to 10 October, please note that the early bird discount on weekend packages finishes on 14 August. If you would like more details on the different options available, please check out the RSGB Convention area of the main RSGB website.

The recent request from the RSGB EMC Committee for interference complaints regarding plasma televisions has been very successful - to date over 80 instances have been recorded. These figures will be presented to CISPR for their information-gathering campaign aimed at determining the extent and seriousness of interference from plasma TV receivers. The EMC Committee would like to encourage all amateurs, members and non members, to report instances of interference from plasma televisions so they can present a strong case in a few weeks' time. All that you have to do is send a very brief e-mail to plasma.tv@rsgb.org.uk.

The International Lighthouse and Lightship Weekend takes place on 21 and 22 August. So far there are 340 lighthouses, some lightships and one time-ball tower registered. The event, now in its 11th year, was begun by the Ayr Radio Club. Now there are radio amateurs and lighthouses in

some 30 countries involved. The 300th registration this year came from Rainer, DO7RKL for the Westerheversand lighthouse in the northernmost part of Germany. Australia has been a strong supporter of this event with 53 registrations, just ahead of Germany on 50 and the United States with 40 lighthouses registered to date. There are still lots of lonely lighthouses looking for the company of friendly radio amateurs to bring radio gear to them for the International Lighthouse and Lightship Weekend. To learn more or register a lighthouse, visit the website at www.illw.net.

EX1SIX is a new 6 metre propagation beacon that has come on the air from Kyrgyzstan. It transmits on 50.026MHz with 60 watts out to a vertical ground plane from grid square MN82sd. More is on line at www.tinyurl.com/propbeacon.

The Midland Amateur Radio Society Birmingham will be starting a Foundation Course on 8 September at 7pm at Selly Park Baptist Church. Help between classes has been arranged using Skype. If anyone wishes to do the Foundation course please contact either Jim or Martin by e-mail to GX1MAR@live.co.uk. The course will run even if it only has one person taking it. More information can be found on the club website www.radioclubs.net/mars.

Welland Valley Amateur Radio Society, based in Market Harborough, is having an open evening. The club would like to invite anyone who has an interest in radio or electronics of any kind to visit them between 7 and 9pm on Monday 16 August in the Village Hall at Great Bowden. They plan to have a range of amateur radio equipment on display for the evening from VHF and UHF to short wave receivers and scanners. Operation will demonstrate voice, data, television and Morse communications.

And now for the details of rallies and events for the coming week

The Flight Refuelling Amateur Radio Society, G4RFR Hamfest takes place today, Sunday 8 August, at Cobham Sports and Social Club Ground, Merley, Dorset BH21 3AA. There is plenty of onsite parking and doors open at 10am. There will be the usual mix of trade and display items and an RSGB book stall. The South Coast Repeater & Beacon Group will be selling all forms of electronic and microwave exotica to raise funds to maintain the multi-band Bell Hill GB3SC series microwave beacon complex. Full details of Hamfest can be found on the web at www.frars.org or by phone from Mike, M0MJS on 01202 883 479.

Friday 13 August sees the Cockenzie & Port Seton ARC 17th Annual Mini-Rally Night in the Community Centre, Main Hall, Port Seton. You can bring along your own `junk' and sell it yourself. Tables are available on a first come first served basis. Doors are open from 6.30 to 9.30pm.

The Friskney & East Lincolnshire Communications Club Rally takes place on 15 August at the Friskney Village Hall, Church Road, Friskney, Lincs. This is about 6.5 miles south of Skegness. Doors open from 10am to 2.30pm and entry is ?1.50. Details from Bren, 2E0BDS, on 01754 820 204.

Now for the news of special events

Next weekend sees the start of several special event licences. Some of the stations you can expect to hear on the air are GB1HA from Headcorn Aerodrome in Ashford, Kent and GB2STC for the Series Two Club in Milnthorpe. GB2PF, celebrating the life of Peter Fidler, a map maker and explorer who travelled Canada in the late 1700s will be on the air from Chesterfield in Derbyshire and GB0HCR will be on the air as part of the Hylton Castle Re-enactment in Sunderland.

>From 14 August, two lighthouses in the north of Scotland will be on the air. GB2SLH will be operating from Sumburgh Lighthouse on South Mainland, Shetland and GB1OL will operate from Orkney Lighthouse in Westray.

EI50UN will be on the bands until 31 December celebrating the 50th anniversary of the first Irish Battalion to serve overseas with the United Nations in Congo. QSLs via EI2V, the Irish Air Corps Amateur Radio Club.

And now the HF DX news compiled from 425 DX News and other sources

IK2NCJ will be on the air as D4C from Sao Vicente Island between 5 and 26 August. Activity will include the WAE DX CW Contest on 14 and 15 August as a single operator all band entry. QSL via Logbook of the World or CT1ESV via the bureau.

DK2TUX, will be active portable EA8 from the Canary Islands between 16 and 20. Operations will be on 40m through to 15m. QSL via DK2TUX.

Michael, OZ/DG5LAC, will be on the air from the island of Mon in the Sjaelland Archipelago from 8 to 13 August. QSL via his home callsign either direct or via the bureau.

Volker, F/DK2MT, plans to be active from Oleron Island, which is IOTA reference EU-032, until 20 August. QSL via his home callsign either direct or via the bureau.

Andy, DL7AT/M, will be QRV from Sylt, which is IOTA reference EU-042, from 7 to 15 August. QSL via his home callsign either direct or via the bureau.

Nick, RA1QQ/1, and Dima, RN3GM/1, will be on Kildin Island, which is part of the Barents Sea Coast West Group, from 9 to 15 August. QSL via RA1QQ.

Tommy, DL8KX/P will be QRV from Usedom, which is IOTA reference EU-129, from 7 to 14 August. He also plans to show up as SP1/DL8KX from Wolin Island. QSL via his home callsign either direct or via the bureau.

Leonardo, 9A/IW0QO, is working from Losinj Island until 18 August. QSL via his home callsign either direct or via the bureau.

Now the contest news

The 432MHz Low power contest is on today, Sunday 8 August, from 0800 until 2100UTC. Operation is all mode on 70cm. RST, serial number, locator and postcode should be exchanged.

Also on the 70cm band, the 432MHZ UK Activity Contest takes place on 10 August between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

The RSGB 80m Club Sprint series begins this month, with the CW leg on the 12th from 1900 to 2030UTC. Work everyone, but remember that once you have made a QSO as the result of calling CQ, you have to vacate the frequency. Remember also that the contest exchange is different for the Club Sprints: it is serial number and your name, but no signal report.

The final 4m Cumulative of the year takes place on Sunday 15 August between 1400 and 1600UTC. There's only a slim chance of Sporadic-E propagation in this one, because it's very late in the season. Using all modes, the exchange is signal report, serial number and locator

In the WAE DX CW Contest, European stations work non-Europeans only. This takes place on 14 and 15 August from 0000 to 2350UTC on all bands from 3.5 to 28MHz. The exchange is signal report and serial number.

And now the solar factual data for the period from the 26th of July to the 1st of August, compiled by Neil Clarke, G0CAS on the 2nd of August.

On three days solar activity increased to low levels when a C class solar flare took place on the 27th, 26th and the 1st. The C3 solar flare on the 1st took place around the same time as an enormous magnetic filament stretching across the sun's northern hemisphere erupted, this was clearly seen from the new `Solar Dynamic Observatory'. Also an Earth-directed full halo coronal mass ejection is heading our way. For almost daily updates on solar activity the place to visit is the `spots and flares' forum, which is compiled by Neil, G0CAS. Solar flux levels remained in the low 80s all week and averaged 83 units. The 90 day solar flux average on the 1st was unchanged from last week at 75 units. X-ray flux levels peaked at B2 units on the 30th and the average was B1.5 units. Geomagnetic activity started at quiet levels on the 26th but for the next couple of days activity increased due to a recurring coronal hole. The Ap index was 19 and 14 on the 27th and the 28th respectively, before quiet conditions returned for the remainder of the period. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 400 kilometres per second on the 26th to 720 by the 28th. Particle densities remained low throughout. Bz varied between minus 7 and plus 8 nanoTeslas on the 27th and between minus 2 and plus 3 nanoTeslas on the quietest day.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be at very low levels. Solar flux levels should be around the 80 mark for most of the week. Initially, geomagnetic activity will be at quiet levels but on Tuesday activity could increase due to a small recurring coronal hole. However, the effects could be minimal, on the last rotation the Ap index

increased to 11 units on the most disturbed day. Activity should return to quiet levels from midweek onwards. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 24MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 1500 and 2100 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

NEWS FOR THE MIDLANDS

On Sunday 8 August Kettering & District Amateur Radio Society is having a social meeting. Details on the web at http://kdars.co.uk.

On Monday 9 August Gloucester Amateur Radio & Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 9 August South Birmingham Radio Society is on the air and having a contest meeting. Contact Don, on 0121 458 1603.

On Monday 9 August Wythall Radio Club continues its Foundation course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 10 August Derby & District Amateur Radio Society is having a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 10 August Kettering & District Amateur Radio Society has an operating night. Details on the web at http://kdars.co.uk.

On Tuesday 10 August Loughborough & District Amateur Radio Club is having a DF hunt on 160m, using the new rules. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 10 August Telford & District Amateur Radio Society is having a meeting of the HamFest committee at Heath Hill. Contact Mike, G3JKX, on 01952 299 677.

On Tuesday 10 August Wythall Radio Club is having a committee meeting. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 11 August Kettering & District Amateur Radio Society has a gentleman's group afternoon. Details on the web at http://kdars.co.uk.

On Wednesday 11 August Lincoln Short-Wave Club is having a talk on Photoshop tips, tricks and possibilities by Alistair, M0TEF. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 11 August Midlands Amateur Radio Society is having a laptop computer evening. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 11 August Telford & District Amateur Radio Society is having a debrief for VHF NFD, Microwave & 50MHz contests. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 12 August Kettering & District Amateur Radio Society is having a training night. Details on the web at http://kdars.co.uk.

On Friday 13 August Coventry Amateur Radio Society is having a barbecue and portable night at Newbold Comyn. Contact John, G8SEQ, on 07958 777363.

On Friday 13 August South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 14 August Lincoln Short-Wave Club is putting G5FZ on the air and doing jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 14 August Wythall Radio Club commences its weekend Steam Rally Special Event at Bromsgrove. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Sunday 15 August Friskney and East Lincolnshire Communications Club is holding its radio rally. Contact Chris, M0MFP, on 01507 442240.

On Sunday 15 August Kettering & District Amateur Radio Society is having a social meeting. Details on the web at http://kdars.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 9 August Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 9 August Bolton Wireless Club is having a talk on 30 years of radio contesting by David, G8ZRE. For details, send an email to boltonwireless@gmail.com.

On Monday 9 August Scarborough Amateur Radio Society is having a talk on Scarborough & Ryedale Mountain Rescue by their team leader Andy Crossley. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 9 August Sheffield Amateur Radio Club is having a talk on how to build an outside radio shack by M1ERS. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Tuesday 10 August Morecambe Bay Amateur Radio Society is having a social evening. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

On Tuesday 10 August Otley Amateur Radio Society is having a member presentation on the DXpedition to Robben Island. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 11 Chorley & District Amateur Radio Society is returning after a summer break to new premises at Tatton Community Centre. Contact Denise, M0NES, on 07962 397047.

On Wednesday 11 August Hornsea Amateur Radio Club is having a talk on the Y Service Intercepts by Ted, G3UOZ. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 12 August Hornsea Amateur Radio Club is taking part in the 80m CW Club Sprint. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 12 August Preston Amateur Radio Society is having a talk on the G5IJ antenna by Roy, G0TAK. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 12 August South Manchester Radio and Computer Club is having a shack night. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 13 August East Cleveland Amateur Radio Club has a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

No news has been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 10 August Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 10 August Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946192.

On Wednesday 11 August West of Scotland Amateur Radio Society is working on construction projects & conducting licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 12 August Aberdeen Amateur Radio Society is on the air and holding beginners' CW lessons. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 13 August Borders Amateur Radio Society is closed. More information from Ray, GM0CDV, on 01573 228730.

On Friday 13 August Cockenzie & Port Seton Amateur Radio Club has its 17tth annual mini-rally night. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 13 August West of Scotland Amateur Radio Society has presentations, guest speakers, a raffle & quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH-EAST and EAST ANGLIA

On Sunday 8 August Wimbledon & District Amateur Radio Society dismantles its annual camp. Contact Jim, M0CON, on 020 8874 7456.

On Monday 9 August Coulsdon Amateur Transmitting Society has its annual barbecue at the QTH of G4RWW. More information from Andy, G8JAC, by email to g8jac@btinternet.com.

On Monday 9 August Milton Keynes Amateur Radio Society is having an antennas workshop. For more information go to www.mkars.org.uk.

On Tuesday 10 August Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 10 August Harwell Amateur Radio Society is closed. Contact Malcolm, G8NRP, on 01235 524844.

On Wednesday 11 August Aylesbury Vale Radio Society is having a talk on HF aerials by Roger,&#65533;G3MEH. Details from Roger, G3MEH, on 01442 826 651.

On Wednesday 11 August Chelmsford Amateur Radio Society is having a committee meeting at Danbury village hall. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 11 August Darenth Valley Radio Society is having an update on D-Star by 2E0ULA. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 11 August Farnborough & District Radio Society Club is having a natter night. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

WIANEWS FOR WEEK COMMENCING AUGUST 08 2010.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING AUGUST 08 2010

Top of the news

A look ahead at the VK100WIA roster

Today the Southern Peninsula Amateur Radio Club completings its three-days
of operating at the Rosebud Scout Hall. Their activity has been an enormous
success and certainly given amateur radio a publicity boost.

VK100WIA moves to South Australia tomorrow, Tuesday and Wednesday with the
Elizabeth Amateur Radio Club operating mainly from member QTH?s daily 8amto 11pm local
time.

Look for them using SSB on the 80m and 40m, and SSB plus PSK on 20m, the
local 2m repeaters and Echolink VK5RLZ-R. On Wednesday the operation will
be a field station set up in Fremont Park, Elizabeth.

VK100WIA moves up to New South Wales this Thursday, Friday and Saturday,
12th to 14th of August, courtesy the VK2AWA Contest Group.

On Sunday the Illawarra Amateur Radio Society takes over. So do look for
both the VK2AWA Contest Group and Illawarra Club during the Remembrance DayContest.

On Saturday the 21st through to Monday the 23rd of August the Lockyer Valley Radio Electronics Club is taking a Project Management approach to maximising the media and other publicity opportunities that are available.

It is set to launch an information blitz on all local news media, send personal invitations to the Mayor and local councillors, and inform ten local schools.

Lockyer Valley Radio Electronics Club will have public displays and demonstrations of SSB, CW, PSK, and SSTV & ATV, and seeking enrolments for Foundation Licencecourses.

The VK100WIA roster available on the WIA website also have details for:

The Macedon Ranges Amateur Radio Club.

The Mid South Coast Amateur Radio Club.

The North East Radio Club of South Australia.

And to complete the month of August and kick off September is the Redcliffe And District Radio Club in Queensland.

More details in future broadcasts.
(Jlinton)

Good Morning Trent Vk4ti here.. (cut 6 aug 8)

Mate against mate, state against State - The RD contest, radios version of the State of Origin Football series is on next weekend.

I am sure much planning has gone into the 2010 Rememberance Day and wish all competitiors a great weekend.

Make sure you have fun and after the RD dont forget to submit those logs to Peter VK4OD

Back over to the news desk..

[Audio uploaded]
Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager.
I have not asked in the past so I would ask if when you send your log in either by Electronic or postal means please ensure that you have you correct postal address.
Anybody requiring any of the forms posted to them please contact me ASAP.
In the coming week I will finalize the Opening speech, which at this point it will run for exactly 30 minutes, and will finish with a series of beeps indicating it is 08:00utc, I will send out a special email via the usual weekly news server.
The opening speech will be available via the wia website.
For those people that are hand writing their logs, " PLEASE" try to write your logs in a legible manner, as in the past some logs have been VERY HARD to decipher.
Until next week.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Amateur Radio magazine August edition[Audio sent]

The cover story is about the activation of the Cape Nelson lighthouse new Portland in south-western Victoria by Grant Alford VK3ILH during the International lighthouse and Lightship Weekend.

Other events reported on this month include GippsTech 2010 and the Australian Foxhunting Championships held at Mt Gambier.

Roger Nichols VK7RN in his article 'The Targa Wrest Point Rally' explains how radio amateurs provide communications for this major motor sportevent.

Foundation Corner by Ross Pittard VK3CE discusses 'going mobile' which make an interesting read.

A fully illustrated article about the Melbourne Digital Amateur TV repeater VK3RTV is published under the authorship of Peter Cossins VK3BFG.

Contesters will find information about the 30th ALARA Contest, Westfield Cup, the Remembrance Day Contest and more.

And for specialist interests, there are the regular columns on DXing, Shortwave Listening, amateur satellites and VHF/UHF.

Amateur Radio magazine is a WIA membership service and copies are also available at selected newsagents.

(Barry Robinson VK3PV)

Project manage amateur radio events

When an event is multifaceted and involves a team of people then a planned approach is most likely to get superior results.

The Lockyer Valley Radio & Electronics Club VK4WIL has done just that as it plans to put the special callsign VK100WIA on air, Saturday the 21st through to Monday the 23rd.of August.

Club Treasurer and Project Manager for the activity, Alan Shannon VK4SN says many hours have been put into VK100WIA activity and without a planning document things could be missed or overlooked.

The document is sent to the club committee and others assisting with the project so they can personally track what has and needs to be done.

It includes logistics, sponsorship, event rostering, media liaison andpublicity.

The aims are to achieve measurable outcomes including level of participation, increased club membership and maximising the contacts over the three-day roster slot.

The WIA Centenary Committee is delighted that Alan VK4SN has provided a copy of the project plan and agreed to its request that it be made available through the WIA website for the interest of all radio clubs.

(Announcers Robert and Brian chat about the planning document)

Correction!
While it's generally considered rude to ask a lady her age, beware if
you do declare it openly (like on a weekly new bulletin) and get it wrong!

That's what happened to us last week and we were quickly brought into
line by more than one ALARA member. Quickest off the mark were Jean VK3VIP
and Susan VK7LUV who reminded us that ALARA - the Australian Ladies
Amateur Radio Association - was in fact celebrating its' 35th year, notits 30th.

Our most humble apologies.

HAMS ACROSS AUSTRALIA
VK3

Ballarat Amateur Radio Group Hamvention 2010

Sun 24 Oct 10.00 AM to 3.00PM

Location is again at the Ballarat Greyhound Track, cnr Rubicon and Sutton
streets. Tables will be booked via Hamvention@BARG.org.au There will be
Commercial Traders, preloved gear and lots of odds and ends. Door prizes. Three
category Homebrew competition will be conducted with $50 prize for best judged
in each of grade. Details and forms are available on the BARG.org.au web site.
Map of how to get to the event can be downloaded on same site.

VK6 - NEWS WEST
Hi from Jono VK6NDT

Some of you fellow ham enthusiasts may have heard about a new 2m repeater firing up in the North West. Well its finally here. Tom Price is a remote mining town in the Pilbara region of the north west, It also boast's the highest town in Western Australia at 750m ASL. The town is located inland, at the edge of the Hamersley Range almost half way between Newman and Karratha. Tom Price was purpose built by Hamersley Iron Mining Company in 1965 after rich iron-ore deposits were discovered in the near by Hamersley Ranges

Ham Radio has been with this town for some time but limited to HF due to its remoteness. There has even been Scouts involved in ham radio here with the callsign VK6SCG. Unfortunately like everywhere the numbers of hams has decreased over time and only a hand full of operators are left (a mix of Fly in Fly out staff and Locals).

One thing about this lovely town is that the Karajini National Park is just down the road which attracts alot of tourists every year.

With only a few amateur repeaters outside the metro area the idea of getting one set up out here was discussed.
Help was never to far away with Craig VK6FLAM and the guys from the Amateur Radio Society of North West Australia, Mike VK6BHY and Steve VK6HV. we were able to get some gear together to get it on the air.

So the Callsign - VK6RTP, and the Frequencies are as follows for a mobile. TX is 146.025 and RX 146.625 (channel 1 for the older generation)
The repeater is a simple set up just using 2 Simoco SRM9000 commercial radio's back to back and utilizing a NHRC-4 Repeater controller for audio adjusting and CWID

The repeater is located at Mt Nameless, the highest point in WA with vehicle access, with an antenna height of 1135m ASL. It has around a 90km radius of coverage with the transmitter at 15w out of the antenna which is currently a Folded dipole soon to be changed out with a High gain vertical which should hopefully put a bit more signal into the national park for the touring hams.

VK6RTP has been set up with a courtesy tone and a 4 second tail (or hang time which ever you prefer) to differ from the Wannaroo repeater for those hams who may want to try a bit of long distance FM dx into the Pilbara.

With New Mine sites like Rio Tinto's Brockman 4, Marandoo Expansion, Western Turner Syncline and FMG's Solomon Mine Future plans for Amateur Radio in the Pilbara are to extend coverage into the Karajini national park as mentioned. Also to Fit VK6RTP with IRLP capabilities for the Fly in fly out people with only a hand held radio with them, and to have Tom Price linked with the Wickham/ karratha Repeater VK6RWR and Exmouths VK6REX and who know's maybe even a repeater at Newman. I may even look into a 10m FM link as well some time down the track.

Some more information about the new 2m Repeater in the North West and some photos can be seen at www.VK6NDT.webs.com

I cant wait for the QSO's.
73's Jono VK6NDT

ACMA NEWS

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO

RADIO EDUCATION: RSGB PRESENTS MUSICAL MORSE TRAINING

The RSGB newcomers web page has an MP3 designed to encourage learning Morse Code. With a musical backing track, it gives the entire Morse alphabet including numbers and punctuation. We cant bring it to you because of the FCC's ban on music on the ham bands, but you can hear it on-line at tinyurl.com/morsemusic. Just click the 'Play' button to listen. (GB2RS)

SILENT KEYS
INTERNATIONAL NEWS

New world record on 10GHz

A new world record in distance on 10GHz has been established between the Cape Verde islands and southern Portugal.

On 10th July at 10.46 UTC the previous record of 2,070km was smashed by a SSB QSO at 2,696km during the Hyperatlantica 2010 DXpedition.

A detailed report will appear in the September 2010 RadCom but in the meantime details, in French, can be found at www.hyperatlantica.ch.
Congratulations to all involved.
RSBG
WEIRD AND WONDERFUL
OPERATIONAL NEWS

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

DXpedition gets YJ0VK callsign

This DXpedition with a team of four Australian radio amateurs will be operating for six days, 0001 UTC on 27 August through to 0100 UTC on 2September.

Team Leader Chris Chapman VK3QB advises that YJ0VK on Vanuatu\'s main Island of Efate will be on the HF bands, with special attention to theWARC bands.

The stations will be fairly simply yet effective 100 watts feeding vertical and dipole antennas, and an Inverted-L for 160m.

More information is available on the website yj0vk.vkham.com

Depending on internet availability the plan is to update the online log atleast once a day.

We wish the team Chris Chapman VK3QB (Leader), Allan Meredith VK2CA (QSL Manager & Webmaster), Luke Steele VK3HJ and Benton Vowles VK3CBV.
(Jim Linton VK3PC)

PROPAGATION STUDY: NEW 6 METER BEACON IN KYRGYZSTAN

EX1SIX is a new 6 meter propagation beacon that has come on the air from Kyrgyzstan. It transmits on 50.026 MHz with 60 watts out to a vertical groundplane from grid square MN82sd. That's near the village Tamga on the southern coast of lake Issyk Kul.

According to Oleg Ivin, EX8MLT, the beacon's installation was made possible thanks to the help of David Krejg, N3DB. Ivin says that N3DB is the leader in the installation of a project to install 6 meter beacons world wide. More is on line at tinyurl.com/propbeacon. (UN Ham Radio News)

HAM RADIO IN SPACE: SO-67 AGAIN RETURNING TO SERVICE

South Africa AMSAT reports on their web page that operations are slowly being resumed on its Sumbandilsat SO-67 bird. According to the announcement the satellites ground control station will observe the amateur payload to ensure the it remains stable and then gradually add more operating time. You can follow the progress on-line at www.amsatsa.org.za. (ANS)

HAM RADIO IN SPACE: ISS TO CELEBRATE 100 YEARS OF US SCOUTING WITH ISS CONTACT

A special Amateur Radio on the International Space Station contact with the 100th anniversary of Scouting Jamboree is scheduled to take place at about 18:20 UTC on Saturday, October 31st. At the time of the contact the I-S-S will be in a 56 degree elevation pass over the National Boy Scout Jamboree at Fort A. P. Hill, Virginia. That's where some 43,000 scouts and leaders will join 8,000 volunteers to celebrate this milestone event for the scouting movement. Amateur Radio Newsline's Mark Abramowicz, NT3V, is at the Jamboree and will have a report on ham radios part in this years Jamboree later on in this weeks Amateur Radio Newsline report.

WW SPECIAL INTEREST GROUPS --- LIGHTHOUSES AND LIGHTSHIPS

Australia really lights up

The International Lighthouse and Lightship Weekend being held on the 21 and 22nd of August, has VK radio amateurs and clubs setting a new recordof 54 registrations.

And they remain just ahead of Germany with 51 registrations, followed bythe USA on 42.

A total of 350 registrations have been received so far from 30 nations.

For more information visit the website www.illw.net
(arv)

FAMPARC has VK100WIA literally smokin?

The Frankston and Mornington Peninsula Amateur Radio Club had seven of its members involved in a multi-band operation for the special callsign VK100WIA.

While the callsign continues to prove very popular but when David VK3EW put it on 17m band on Saturday morning it created a pile-up.

A club member who won?t be named, had a mishap with the microwave oven, which put an end to calling CQ as operators need some fresh air.

FARMPAC also have the Frankston-Hastings Leader newspaper photograph attend the club rooms which resulted in a story being published.

In all the club reports it logged 816 contacts on HF, D-STAR and 2m FM for VK100WIA and enjoyed supporting the WIA and the centenary celebration.

The operator roster was Rod VK3YC, Gerard VK3GER, Terry VK3BMX, Peter VK3BPN, John VK3CVF, David VK3EW and David VK3LDR.

THE FINAL FINAL

Maleluca Mayhem!

John VK5NX, one of our may relay stations wrote:
" Fortunately this Sunday Broadcast Relay went out with out any real trouble
except for the very strong wind we were experiencing at the time blowing the
fronds of a nearby Melaleuca tree flapping on to one of my antenna wires;
even though it is insulated it still managed to change the tuning and cause a
deterioration of the signal going out, but I managed to find a setting that was
usable so that the signal went out anyway! Proof of the effort was the following
callback number for Sunday 1st August on 80m --16 Stations-- in the trying
conditions I guess thats partway reasonable. "

And it's great to see John's doing well after a short stay at the White Coat Hotel,
a.k.a. The Pretty Nurse Boarding House, a couple of weeks ago.

16 stations on 80 and another 17 from when he put it out on 40m, thanks must go out
to John and all the other stations casting out the WIA Weekly News into the ether eachweek.

A reminder to all listening that we do keep track of callbacks, in fact while compiling
the news I came across more than 30 callback notifications from all over the country,
so each time you listen, please let us know you were there.

Please think of the environment before printing this email

==========
WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK3HXR on behalf of the National WIA.

SARL NEWS - SUNDAY 08 August 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

It si with regret that we must announce that Chris Burger, ZZS2CCB of Jeffreys Bay, formerly ZS6ACG, became silent key on Wednesday 5 August due to a heart attack.

Our sincerest condolences to his relatives and friends.

(PAUSE)

In the news today:

NATIONAL RADIO FREQUENCY PLAN GAZETTED

MEMBERSHIP RENEWALS

NEW DISTANCE RECORD FOR 10 GHz

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NATIONAL RADIO FREQUENCY PLAN GAZETTED

ICASA has gazetted the National Frequency Plan for South Africa. It appeared in the Government Gazette number 727 of 2010 dated 30 July 2010. The document of 344 pages lists all the frequencies available in South Africa from 9 kHz to 3 000 GHz with all references and restrictions. The document is over 9 MB in size.

The SARL is studying the document and has requested Hans,ZS6AKV, to be present at the ICASA/SARL liaison meeting which will take place this week. There is at least one new allocation for amateur radio and that is 135,7 to 137,8 kHz. However its use may have to wait till the new

regulations are published. It will be discussed at the liaison meeting this week.

It is planned to have the document available on the member's section of the SARL web in three section of roughly 3 MB per section by Wednesday this week.

1 006 MEMBERS HAVE DONE THE RIGHT THING - RENEWED THEIR MEMBERSHIP

This is a reminder to members who are not part of the 1 006 who have already renewed their membership for 2010/2011. If you have not yet done so, please take action this week. You owe it to your hobby! Reminder accounts were sent out last week. If the reminder crossed your payment, please ignore it. If you have not yet paid, please make a payment this week. If you are not sure of how much to pay call Mariska during office hours on 011 675 2393.

NEW DISTANCE RECORD FOR 10 GHz

The Radio Society of Great Britain reports that a new world distance record on 10 GHz has been established between the Cape Verde islands and southern Portugal. At 10:46 UTC on July 10th the standing record was smashed by a SSB QSO ranging 2 696 kilometres during the Hyperatlantica 2010 DXpedition. The previous distance record on this band had been 2 070 kilometres. The Hyperatlantica operators eclipsed that by some 626 additional kilometres.

CELEBRATE WOMAN'S DAY WITH THE SARL YL SPRINT AND WIN A HUGE BOUQUET OF FLOWERS

The SARL YL Sprint is a fun activity to celebrate Women's Day between radio amateurs in Southern African countries. Call "YL Sprint!" The Sprint will be run on Monday 9 August from 09:00 to 10:00 UTC. It is a phone sprint on the 40 metre band using 7 053 to 7 100 and 7 130 to 7 200 kHz.

The exchange is a RS report and YL or OM. Contacts between YL stations are worth 5 points; contacts between YL and OM stations are worth 3 points and contacts between OM stations are worth 1 point. Submit logs within 15 days after the contest by e-mail to zs4bfn@]netactive.co.za or by mail to the Bloemfontein RAC, Box 12104, Brandhof, 9324. The closing date for log submissions is 24 August 2010.

All YL logs received will go into a special draw for a large bouquet of flowers delivered to your door. Make sure your home address also appears on the log.

WINNER OF YOUTH DAY SPRINT PHOTO COMPETITION

The winner of the Antenna Book is the Lichtenburg Amateur Radio Club with the entry of their youngest participant Eduan, four years old. He made his first youth day contact using the Lichtenburg Amateur Radio Club's callsign, ZS6LRK. The contact was supervised by Eddie, ZS6BNE. Eduan made contact with a youth day sprint station Rudi, ZS6RDI,

operating portable in division 5 (Ramsgate). Visit www.sarl.org.za to see the picture. Congratulations, the Antenna Book will be on its way soon.

RAE CLASSES IN PRETORIA

The Magalies Radio Amateur Club will commence with classes for prospective radio amateurs for the Class A RAE.

The lectures will take place in the ZS6JVT Radio Training Centre of the Higher Technological School John Vorster in Meyer Street, Rietfontein, Pretoria.

The course will comprise about 10 lectures with the inclusion of radio speech. HF assessments will also be done during that period.

Classes will run from 09:00 till 13:00. Attendees are advised to bring cold drinks and something to eat during the 10 minute breaks after each hour.

Classes for the Class B RAE have already commenced last Monday.

Those interested may contact Johann, ZS6PSS, on 082 446 1581.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. A coronal mass ejection (CME) from Sunspot 1 092 that was heading straight for Earth, caused a bit of sensational media activity during the week but turned out to be basically a non-event, as to be expected. Currently sunspots 1 092, 1 093, 1 094 and 1 095 are visible. This marks the first time in Cycle 24 that four sunspot regions are visible at the same time. The effective sunspot number is expected to be less than 20 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the late afternoons till after sunset. During sunset it will be good towards Europa. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

9 August - SARL YL Sprint on 40 m 09:00 to 10:00 UTC; 12 - 14 August - International EME Conference, Dallas, Texas; 14 August - PIC course in Pretoria; 14 August - RAE classes start in Pretoria in the ZS6JVT room, contact Johann, ZS6PSS, at 082 446 1581 for information; 16 August - Logs for SARL HF phone competition must be in; 21 August - RTA symposium in Port Elizabeth; 24 August - Logs for the YL sprint to be in to zs4bfn@]netactive.co.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

>From The Business Manager ZL2TDM

Debby Says...

Subscription Invoices

The subscription for 2011 invoice will be included with your next Break In due out at the beginning of August.

For those members who are currently paying by regular automatic payment, please disregard this notice as your payment will continue to cover your membership.

For those wishing to take advantage of the rebate, please ensure your payment is received here on or before 30 November 2010.

Elections for Council

A call for nominations to Council will be made in the coming months. It's time for you all to consider who you may wish to represent your area in this important role.

Please remember the person you nominate will speak for you all and take action in the best interests of amateur radio and the Association, therefore it is imperative you speak as a collective when placing nominations.

Call Book

The next Call Book will be published in October this year, please remember if you have recently moved that YOU need to contact Radio Spectrum on 0508 776 463 and advise your new address details. While you may have advised me of your new details I am unable to change the Ministry's database, therefore what ever address they have on file will be published in Call Book.

Talk soon...Debby ZL2TDM

Want to Bone up on Wireless Tech? Try Ham Radio

Abundant spectrum resources and an engaged research community are drawing wireless experimenters back into a hobby that many had forgotten.
By John Edwards

John D. Hays, an IT manager in Edmonds, Wash., devotes most of his spare time these days to helping develop a communications system that's designed to integrate portable two-way radios with the global telephone network. The project's goal is to create a failure-proof voice communications infrastructure that can immediately connect first responders with the outside world.

"Individuals with radios in the field could interconnect with the telephone system even when their cell phones are shut down by an emergency," he says. This would be useful in all manner of disasters, from natural to man-made....

Buildathon attracts new recruits to amateur radio

Thursday, 8 July 2010, 3:39 pm

Press Release: Christchurch City Council

Christchurch youngsters are able to build their own radio receiver at the AM Radio Buildathon, part of the winter school holiday festival TV2 KidsFest.

Aimed at 10- 13-year-olds, the event shows how a radio works and about the hobby of amateur radio, enabling them to build a free kitset of electronic parts.

Coordinator David Searle (whose radio callsign is ZL3DWS) says there has been a great turnout to the two AM Radio Buildathon events held so far, of both boys and girls.

As well as being fun, it is also a great entry point into technology careers, he says. "Learning about this hobby can also lead to careers within the thriving Canterbury electronics industry, and participants can learn how to take the hobby further through the Amateur Radio license exam."

The final AM Buildathon will be held on the morning of Thursday 15 July at Kendal Primary School Hall in Bishopdale. More information at

http://sites.google.com/site/zl3buildathon/

- Ends -

David ZL3DWS

FMTAG NOTES FOR AUGUST 2010

DIGITAL TV SWITCHOVER

The Government has decided that all analogue-modulated TV transmissions in the VHF and UHF broadcast bands, which include Channel 39, will close down in March 2015, or at some earlier date, and that the upper end of the UHF television band will be cleared of television, so that the vacated spectrum can be used for next-generation mobile communications.

One consequence of these decisions is that the existing television transmissions will need to convert to digital and be fitted into about half of the present spectrum, requiring that their transmission parameters need to be more closely defined than at present.

For the Amateur Television service this means that each Radio Licence for analogue-modulated TV, engineered to the standards specified in MED Public Information Brochure Number 38 (also known as PIB38 on the MED web site) needs to be replaced by a Spectrum Licence for analogue-modulated TV, expiring in March 2015, engineered to the much higher standards specified in MED Public Information Brochure Number 39 (also known as PIB39 on the MED web site).

As part of the process, the MED has cancelled all of the existing Radio Licences for Channel 39 TV Repeaters. Operators of Channel 39 TV Repeaters need to close them down to avoid receiving an Infringement Notice from the MED.

Operators wishing to operate their analogue-modulated Channel 39 TV repeaters, between now and the 2015 Digital TV Switch-Over, need to apply for a Spectrum Licence. FMTAG has sent an information package to the following Branches, advising them of the the options:

Whangarei

Auckland VHF

Hamilton

Gisborne

Wellington VHF

Motueka

Christchurch

North Otago

Otago

Any other Branches wishing to receive a copy of the information package should contact FMTAG at:

fmtag@nzart.org.nz

SRD INTERFERENCE TO 70cm REPEATERS

FMTAG has received enquiries from Branches suffering Short Range Device (SRD) interference on their 70 cm repeaters.

Addition of Continuous Tone Coded Squelch to the repeater does not require licensing action. However, a change of transmit frequency requires the creation of a new licence. Branches can start the licensing process by completing NZART Form 10 and sending it to:

fmtag@nzart.org.nz

PROPOSALS

Branch 26 Nelson has applied to relocate its 890 repeater to Fringed Hill North, Topo50 map reference BQ26 265.95 270.15. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 438.900 MHz and the repeater receive frequency can remain on 433.900 MHz.

Branch 71 Rodney has applied to relocate its 730 repeater to Moirs Hill Road, Topo50 map reference AZ31 475.39 625.68. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 147.300 MHz and the repeater receive frequency can remain on 147.900 MHz.

FINAL RECOMMENDATIONS approved by NZART Council at its August meeting.

Branch 11 Gisborne has applied for a 2 metre APRS Digipeater at Whakapunake, Topo50 map reference BH42 992.89 915.63. An engineering evaluation confirms that there will be no interference to other stations and that the transmit and receive frequency will be 144.575 MHz.

Branch 30 Otago has applied for a 70 cm repeater at Rudd Road, Topo50 map reference CE17 032.61 204.29. FMTAG has selected a repeater transmit frequency of 439.150 MHz. The associated repeater receive frequency will be 434.150 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 81 Waikato VHF has applied to relocate a simplex linking transceiver from Te Aroha to Te Uku, Topo50 map reference BD32 733.36 067.57. An engineering evaluation confirms that there will be no interference to other stations and that the transmit and receive frequency can remain on 430.2125 MHz.

Branch 81 Waikato VHF has applied for a simplex linking transceiver at Te Uku, Topo50 map reference BD32 733.36 067.57. FMTAG has chosen a transmit and receive frequency of 439.350 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 81 Waikato VHF has applied for a simplex linking transceiver at Te Weraiti, Topo50 map reference BD36 558.18 103.12. FMTAG has chosen a transmit and receive frequency of 439.350 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 81 Waikato VHF has applied to relocate its 2 metre repeater from Te Aroha to Te Weraiti, Topo50 map reference BD36 558.18 103.12. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 146.950 MHz. The associated repeater receive frequency will be 146.350 MHz.

Branch 88 Tauranga Emergency Communications has applied for a 2 metre repeater at TECT All Terrain Park, Topo50 map reference BE36 749.37 969.25. FMTAG has chosen a repeater transmit frequency of 147.025 MHz and associated repeater receive frequency of 147.625 MHz. An engineering evaluation confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to:

fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available at:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to:

fmtag@nzart.org.nz

END

****

The Revised GURL for Short Range Devices (SRDs)

Members may be aware that the MED has relaxed the conditions of use for Short Range Devices.The new conditions, which were put in place without any consultation with NZART, permit the use of walkie-talkies, wireless headphones, audio senders, etc., typically featuring very annoying, long duration transmissions in the input band of most of our 70 cm repeaters.

There is also a new allocation at 3.640-4.040 MHz for Auditory Aids which has potential to interfere with amateur signals in the 80 m band.

The previous GURL permitted the same 433.05 - 434.79 MHz frequency range and output power (25 milliwatts e.i.r.p. peak power), but restricted the use to Telemetry and Telecontrol only,modes that typically feature, somewhat annoying, but short duration transmissions.

All of the National System repeaters use input frequencies above 434.79 MHz and are not affected by the GURL change.

NZART was not aware that this change was being considered and the ALO is urgently following the matter up with the MED with a view to getting the 3.5 MHz and 430 MHz changes, which were not discussed with NZART, reversed.

There are a number of problems that Council can foresee, such as these devices creating non-amateur repeater traffic on amateur repeaters, while the transmitting party is using a legal device, creating a frequency-assignment dilemma for the trustees and the Ministry's technical officers, or an audio sender being interrupted by a repeater user!

If a repeater is interfered with by any devices which have just recently become legal, it is important that you contact your NZART Councillor immediately as well as the Ministry.Repeaters are legal and licensed fixed stations protected from interference by law.

FMTAG has presented some work-arounds if a repeater is constantly interfered with, but the cost and effort involved makes this a last resort step.These changes could also increase the interference caused to these devices.

NZART officers are working to resolve this situation and will be happy to brief members when and if it becomes necessary to take further official action over this issue, or to educate users and retailers about this matter.

The SRD GURL is available on the RSM website at:

http://www.rsm.govt.nz/cms/licensees/types-of-licence/general-user-licences/short-range-devices

You can use the RSM SMART system to see the licensed services in these frequencies.

Select search for a licence, enter the frequency limits (433.05 to 434.79 MHz) and select search. ï¿½Amateur Repeater - Mobile Transmitï¿½ means it is a

repeater input.

Amateur Radio In Ethiopia - Help Needed

>From Gary ZL2IFB, I have received the following: (ED)

Dear Jamie,

I don't know whether this is suitable for Infoline or Break In, but I'm hoping NZART will be able to help publicise the following appeal.

I am involved in a voluntary project called ARIE (Amateur Radio In Ethiopia) to get some ham gear together and send it out to Sid ET3SID for four Ethiopian students.

Please visit:

http://www.nzart.org.nz/html/2010/04-news.html#aug03

For further and contact information.

Contest News

VHF/UHF/SHF Contest Notes

The next contest is the MICROWAVE CONTEST, all bands 614 MHz and up, on
Saturday the 2 and Sunday the 3 of OCTOBER 2010. The operating times are:
Saturday 1700 to 2300 NZT and Sunday 0700 to 1300 NZT.

The rules are available at: http://www.vhf.org.nz/VHF-UHF-SHF-ContestRules
Logs should be sent within two weeks, to:
zl2wa@clear.net.nz with Contest Log in the subject line,
or by post to:
Contest Manager, Wellington VHF Group, P.O. Box 12-259, Thorndon, Wellington

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K3LR, NG3K & ADXO, N4AA & QRZ DX, K8GI, K8YSE, W8GEX (60m News), N0TG, AT International, CT1ILT, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, GD6TWF, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, IK7JWX, OZ6OM & 50 MHz DX News, MM0DFV, Pete's-DX-Newsdesk, RN4LP, RSGB IOTA Web Site, TA0U, TK5MH, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VQ9LA, XE1BEF and ZS8M for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st-August, through Sunday, 8th-August there were 200 countries active. Countries available: 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J5, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V8, VE, VK, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8/3B9, MAURITIUS AND RODRIGUEZ ISLAND. Giorgio, IZ4AKS, will be active as 3B9/IZ4AKS from Rodrigues Island (AF-017) between August 28th and September 4th. Activity will be limited to his free time as this is a holiday style operation and not a dedicated DXpedition. Look for activity on 10-40 meters, mainly SSB, but possibly RTTY and CW. He will use a FT-897D with 100 watts into a vertical antenna placed near the ocean.

Prior to and after his Rodrigues activity, look for Giorgio to possibly be active as 3B8/IZ4AKS from Mauritius (AF-049). QSL only direct with SAE and 2 USDs (NO IRC, NO BUREAU QSLs).

APDXC 2010. The 3rd Asia Pacific DX Convention (APDXC) will be held at Osaka International House in Osaka, Japan, between November 5-7th, 2010. There will be presentations (conducted in English!) on some of the recent DXpeditions, technical sessions, DX dinners banquet, as well as the usual convention stuff. Also, there will be an opportunity to join a tour to visit the Icom factory, and participate in a technical session led by the Icom HF radio design team, and more. Program details and updates will be announced on the following Web site at: http://www.apdxc.org

AT10, ANTARCTICA. QSL Manager Gianni, I1HYW, informs OPDX that the first batch of QSL direct for AT10BP received at his home address have been mailed on August 5th. The remaining requests will be sent out within a week. All the envelopes that are received now will be answered on a daily basis. The requests that were sent to India, will not be answered before December 2010, once Bhagwati returns back home. In the meantime AT10BP from Maitri Base Antarctica will continue to be active regularly on 20m (14300 kHz +/- QRM), 15m (21300 kHz +/- QRM) and 40m (7150 kHz +/-QRM) SSB only. If you would like to have a sked with AT10BP, you can E-mail Bhagwati directly at: bplovemaitri@rediffmail.com
For more info, visit the Worldwide Antarctic Program (WAP) Web page at: http://www.waponline.it

CR6, PORTUGAL (WFF Op). Operators Jose/CT1CJJ and Filipe/CT1ILT will be active as CR6K/P from SW Alentejano e Costa Vicentina Natural Park (WFF CTFF-12 and DPRN CTFF-12) between now and August 14th. Activity will be holiday style on 80/40/30/20/17/15/10 meters using CW and SSB. They will be using only a vertical (with lots of radials) and 100 watts. The duo was expected to activate Pessegueiro Island (EU-167) on August 7th. QSL via either CT1CJJ or CT1ILT. For more details, visit: http://www.rep.pt/ct1ilt/swalentejano2010.html

DAYTON 2011 HAMVENTION NEWS.....
* SWODXA DINNER BANQUET. Don DuBon, N6JRL, President of SWODXA, announced on August 2nd: "Southwest Ohio DX Association (SWODXA) is happy to announce plans for the 26th annual DX Dinner. This dinner, which is held in conjunction with Dayton Hamvention, will be held on Friday, May 20, 2011.
Because we realize many attendees make their plans well in advance, we want to let you know that our location for the dinner has changed. It will be at the Dayton Marriott located at 1414 S. Patterson Blvd., Dayton, OH 45409.
We are excited about our new venue. While it is less than five minutes from our previous location, it has a much larger capacity, has been recently renovated, and we will have a new menu selection. Other advantages are that there are no steps as the dinner will be held on the ground floor, and there is ample, free, on-site parking. In our planning meetings, the staff has been very receptive and is

anxious to meet the needs of our attendees and graciously welcomes
SWODXA.
The Marriott is a large hotel with many room choices. Should you
need accommodations, their phone number is 937 223-1000 or the website
is: http://www.marriott.com/hotels/travel/dayoh-dayton-marriott.
When tickets become available, more information regarding the
dinner will be posted on our website at www.SWODXA.org.
We look forward to seeing everyone at the DX Dinner at the
Marriott
and at Hamvention. Good Dxing!"

* Tim, K3LR, Dayton Contest Dinner Chairman, reports: The 19th annual
Saturday night Contest Dinner, Contest University and the Contest
Super Suites are confirmed at the Crowne Plaza for 2011. There are
no plans to change locations for 2011. Please watch the Dayton
contesting Web sites for details."
http://contestsupersuite.com
http://contestuniversity.com
http://contestdinner.com

DX0, SPRATLY ISLANDS (Update). Press Release dated August 6th (edited):
"Only 150 days to go before the scheduled QRV of the multi-operator
DXpedition on Thitu Island in the Spratlys January 6-24th, 2011, and
more substantial progress has been achieved.
The Philippines National Telecommunications Commission has issued the
DX0DX licence and DXpedition Team Leader Chris Dimitrijevic/VK3FY and
DU8/VK3FY confirms that the required documentation is filed with the
DXCC Advisory Committee. Formal DXCC accreditation is expected soon
after proof is electronically submitted that operators have reached the
island and DX0DX is on air. It was earlier announced that Bob Schenck,
N2OO, has been appointed the QSL manager.
Among the current and growing list of corporate sponsors are ICOM
America which is providing ten top-line IC7600 transceivers & a IC-9100
Transceiver, Amplifiers from Acom International, OM Power and THAMWAY Corp.
Antennas from SteppIR, Spiderbeam and Mosley- Electronics. Bandpass Filters
from WX0B Array Solutions, Masts from Rohn Products. Ham Radio Outlet,
Head-sets from Heil Sound, Feeders The RF Connection.
Decisions are now being finalized on the roles needed for the DXpedition.
The logistical co-ordination of equipment from sponsors is being headed
by Charles W6KK where we are basing our shipments.
The massive logistics exercise to get the equipment, supplies and
operators shipped to Thitu Island has received confirmation that the boat
to be used is undergoing its annual dry-dock maintenance and certification.
Other expertise within the team is being used to plan rostering, logging
and the many different tasks required to make it a success.
The team's medical doctors are ready to assist should anyone become
unwell, and to also outreach to the island's residents as part of the
DXpedition's humanitarian, health and welfare contribution.
It has also been learnt that some of the 30 operators lined up for the
DXpedition are using it as a personal incentive to lose some body weight

as they prepare for their stay on the island.
This will be especially helpful for those wishing to frequently walk
between four dedicated operating camps for SSB, CW, RTTY and 2m & 6m
operation. Not to mention trips to the mess tent for meals.
Online surveying of DXers finds that the demand for The Spratlys on
160m to 10m is fairly equal with each band falling in the 9% - 11% range
after 2,670 votes received.
The preferred mode survey results to date are SSB (36%), CW (35%) and
RTTY (27%) with 785 votes cast.
The DX0DX Team acknowledges the financial support already received from
individual radio amateurs Brad/WA6JJB, Paul/N6PSE, Marc/DO4DXA, Maurice/
N4LZ, Vic/W4VIC, Ken/N5TY, Allan/VK2CA, Paul/VK2HV, Scotty/KG9Z, Clay/K7HC,
Mitch/DJ0QN, Neill/K4ESE, Doyl/AB4IQ, William/K3WA and Billy/W3EL.
Support has also been given by the IARU Region 3 member society
Philippine
Amateur Radio Association (PARA), DXWORLD, The Daily Dx and ClubLog."

E2/HS, THAILAND (News)..............................
* Through the efforts of Radio Amateur Society of Thailand (RAST),
John/HS1CHB and Charly/HS0ZCW, The Thailand radio authority has
approved, effective today (August 8th) for all HF bands and all
modes the new callsign of E2E. This is a real and legitimate call,
sought because it is so short (and to bring glory to the Kingdom
of Thailand, and fun for its operators). QSL via HS0AC.

* Charles Harpole, HS0ZCW/K4VUD, reports: "You can help Thailand
authorities understand the need to authorize full use of the 6 meter
band for Thailand hams (HS and E2). Please send an E-mail via the
Radio Amateur Society of Thailand (RAST), typical below, supporting
this authorization, to the RAST coordinator of this effort: 'John',
HS1CHB, whose E-mail address is his USA callsign at: n9wms@hotmail.com
Example -
To Whom It May Concern:
I support the allocation of full time use of the amateur ham
radio band of 50 to 54 MHz for all Thailand licensed operators.
I have, for many years, sought a contact with Thailand hams on
this band. There are international awards for such two-way
exchanges, but, to date, it has not been possible. The 50 to 54
MHz band also is important to ham radio contests where world-wide
efforts to contact Thailand are in demand. This 6 meter band
permission for Thailand can bring Thailand into agreement with
almost all of the other global countries' rules, and it complies
with international band-plans.
Further, the allocation of the 6 meter band to Thailand hams
opens a good band for emergency communication uses and relieves
congestion on other bands.

Thank you for your consideration.

FULL NAME AND ADDRESS (be sure to add your country name)

NOTES: Please be sure to be super polite, do not say that past
practice is bad, and include the '50 to 54' MHz phrase. Please
use your own words where ever possible to avoid canned messages,
but a can message is better than no message.

Your help will make a difference because Thailand never wants to
be first to do something like this, but never wants to be left out
or be behind. Thanks and 73,..... Charles Harpole, HS0ZCW"

ET, ETHIOPIA (Press Release from Chris, GD6TWF). "The following appeal was
made on: http://dx-world.net/2010/assistance-required/
Hi! I am Abel (ex-9E2ABL). What I want to ask about is that I have passed
the RSGB exam and am now properly licensed.. but when I apply for the
license here I am required to have a radio & I may pay for the custom
duty here but for the radio that I cannot afford ... so if there is a
way like an organization to support or anything...that I can get a radio
it will be so helpful. I hope I will get a positive response.
Thank you, 73 Abel

Following this appeal Sid May, ET3SID, a British National Resident in
Ethiopia for decades contacted <www.dx-world.net> to say he had coached
four young Ethiopians all members of the Ethiopian Amateur Radio Society
("EARS") though the examination including Abel and stated that all four
were in the same position they had the qualification to get a license but
could not afford the cost of buying, shipping and importing equipment.
As a result of this request several amateurs made offer of help and it
was decided to form a simple appeal to raise funds and accept donations
of equipment so that these four young amateurs could get on the air.
The appeal is called Amateur Radio In Ethiopia ("ARIE") and a webpage
has been launched at <http://tinyurl.com/ETproject> which gives all the
information and details on how to donate.
We have already had offers of equipment and cash donations from UK,
Germany, New Zealand, UK, USA and Isle of Man.
The appeal has been designed so anyone can donate according to means.
That old rig gathering dust on the shelf would change someone's life. A
small donation would allow us to buy PL259's or a few metres of coax. A
big donation would allow us to ship a donated rig out.
We welcome donations from individuals, clubs, societies, associations,
dx-groups any where in the world. If your business is interested in being
involved please contact us to see how we can work together.
We passionately believe that this organization will have a life long
impact on the recipients, help people enjoy their hobby who, without your
help, would not be able to do so. Contributed towards equipping Ethiopian
hams who will be making contacts and giving many other hams a new DXCC
country while at the same time developing their own valuable technical
skills and career prospects. For any questions please look at our Website
<http://tinyurl.com/ETproject> or contact Chris Wood at: gd6twf@iom.com "

EX, KYRGYZSTAN (WFF Op). Operators Mike/UN8GC and Oleg/EX8MLT will be
active as EX9FF from Issyk Kul Lake (EXFF-002, Locator: MN82) between
now and August 14th. QSL only via direct to UN8GC or by the LoTW. For

more info, go to: http://un-dx.ucoz.com/index/un_news/0-5

FK/C, CHESTERFIELD ISLANDS. Michel, FK8IK, will be on the Chesterfields Islands as part of a scientific expedition between August 9-19th. Look for him to be active during his spare time as FK8IK/C on 80-10 meters using CW with 100 watts into various dipoles. QSL via his home address: P.O. Box 14639, 98803 Noumea, NEW CALEDONIA.

INTERNATIONAL LIGHTHOUSE-LIGHTSHIP WEEKEND 2010 (0001z, August 21st, through 2359z, August 22nd) NEWS. Operators Hector/CE3FZL, Ricardo/CE3HDI, Hugo/CE3BBC, Cristian/CE3PCN, and Esteban/XQ7UP will operate as XR2A from Punta Angeles Lighthouse (ARLHS CHI-001) in the Valparaiso harbor, Chile, during the ILLW. Activity will be on all bands as posible using CW and SSB. QSL information is available at: http://www.qrz.com/db/xr2a

IOTA NEWS.....
AF-091/ (Update) An Italian team of operators will activate the Tunisian AF-092. Islands of Plane (AF-091) and Kuriat (AF-092) as TS7TI between September 13-23rd. Operators mentioned are: Alfredo/IK7JWX, Leopoldo/I8LWL, Simon/IZ7ATN, IK7UXW, Ampelio/IS0AGY and Ivo/9A3A (CW op). Activity will be on all bands HF, WHF, VHF and 6m, using CW, SSB, PSK31 and RTTY. During their activity they will also activate some wanted WFF/VFF reference numbers and the most wanted grid square JM57. They are currently seeking sponsors/supporters for this DXpedition.

AS-089. Operators Andrey/R9XC and Ilya/UA9XLC are now active from Litke Island as R9XC/9 until August 11th. Activity is on 80-10 meters using CW and SSB. QSL via the home callsign, direct or by the Bureau.

EU-042. Andy, DL7AT, will be active as DL7AT/P from Sylt Island between now and August 15th. QSL via his home callsign.

EU-126. Mario, DL5ME, will once again be active as OH9AA/p from Syvaletto Island in the Lappi Province Group between August 18&#65533;22nd. QSL details can be found on QRZ.com. ADDED NOTE: OH9AA/p was active last year for only eight hours.

EU-129. Tommy, DL8KX, will be active as DL8KX/p from Usedom Island (GIA/DID O-013, WLOTA L-1640) between sometime now and August 14th. Look for activity to be on or near the usual island and IOTA frequencies. QSL via his home callsign, by the Bureau or direct. Also see EU-132.

EU-132. Tommy, DL8KX, will be active as SP1/DL8KX from Wolin Island (SPIA SZ-002, WLOTA LH-4120) between sometime now and August 14th. Look for activity to be on or near the usual island and IOTA frequencies. QSL via his home callsign, by the Bureau or direct. Also see EU-129.

EU-136. Leonardo, IW0QO, will once again be active as 9A/IW0QO from Losinj Island (CIA-25, ACIA IC-116, IOCA CI-058, MIA MC-204)

between now and August 18th. Activity will be holiday style
on 80, 40, 20, 15 and 10 meters. QSL via his home callsign,
by the Bureau or direct to: c/o Sezione A.R.I. di Perugia,
P.O. Box 113, 06100 Perugia - PG, Italy.

J48, GREECE (Also LZ). Laci, HA0HW, will once again be active as J48HW
from Thassos Island (IOTA: EU-174, GIOTA: NAS-037, MIA: MG-124, WLOTA:
LH-4186, QRA: KN20HS) between August 28th and September 7th. He usually
operates mainly CW, with some SSB, RTTY and PSK31 as well, on the HF
bands (mainly on 40/30/20/17 meters) and on 6 meters. His rigs are a
FT-840 with a MOS-FET amplifier and an IC-706 (for 6m only). Antennas
are a monoband Gps and dipoles on fishing poles. QSL via his home callsign,
direct or by the HA Bureau. Laci informs OPDX that he will spend one day
in Bulgaria (LA), and will operate from the LZ9W super contest station
as LZ/HA0HW.

KH6BZF PROPAGATION FORECAST/REPORT (For August 9-15th)....
Aug 9 AN-HN SOLAR REFERENCE KEYS
Aug 10 HN-AN --------------------
Aug 11 AN BN - Below Normal
Aug 12 AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 13 AN LN - Low Normal
Aug 14 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 15 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LIGHTHOUSE ACTIVITY. If you worked Hector, XEBEF, this past weekend
(August 6-8th), he was active from Faro Punta de Campos Lighthouse
(MEX-052 ARLHS, DK79ua). He was expected to be on 160-10 meters and
6 meters, using SSB, CW, RTTY and JT65A, with no amplifier. QSL is
OK via direct, by the Bureau and e-QSL.

P4, ARUBA (SA-036). John, W2GD, will be active as P40W between November
22nd and December 1st. Activity will include the CQWW DX CW Contest
(November 27-28th) as a Single-Op/All-Band. Operations outside of the
contest will be on 160m and 30/17/12 meters as time permits. QSL via
LoTW or direct to N2MM. Logs will be loaded on LoTW upon his return to
the USA.

PJ4, NETHERLANDS ANTILLES. Operators John/K4BAI, Jeff/KU8E and Jim/K9YC
will be active as PJ4/homecall from Bonaire (IOTA SA-006, WLOTA L1279)
between November 23-30th. Also look for them to be active as PJ4A during
the CQWW DX CW Contest (November 27-28th) as a Multi-Op entry. QSL PJ4A
via K4BAI. E-mail requests for Bureau cards will be accepted.

QSLING CYPRUS STATIONS. Alan, 5B4AHJ, CARS QSL Bureau Manager, reports:
"The QSL Bureau of the Cyprus Amateur Radio Society (CARS) is receiving
large numbers of QSLs that cannot be delivered to the intended recipient,
because that station has a QSL manager outside Cyprus.
The problem is threefold:
a) Those generating the QSLs are not bothering to check to see if
the station has a manager.
b) Even if a manager's call is written on the QSL, many QSL Bureaus

are still sending the QSL to Cyprus.
c) QSLs for calls 5B/DXcall are being sent to Cyprus when either they should be sent to the manager, or in the absence of a manager, they should be sent to the bureau for the home call.
I have produced a list of stations with foreign managers at:
http://www.shacklog.co.uk/5BForeignManagers.htm
Please pass this information far and wide, including to your local QSL Bureau."

NEW QSL MANAGER. Vladislav, RN4LP, informs OPDX that he is now the QSL Manager for EK6LP. He states that QSOs will be uploaded to the LoTW "ONLY AFTER":
- your E-mail requests
- responding to your paper QSL sent direct
He states, "Contest QSOs will be uploaded 6 months later and there are ONLY direct QSLs (w/2 USDs or 1 new IRC). Sorry, NO BUREAU or NO eQSL. Don't waste your time and money!" His address is:
Lakeev Vladislav, P.O.Box 208, Dimitrovgrad, 433512, Russia
His E-mail address is: rn4lp71@gmail.com

QSLS VIA LoTW: A61BK, CQ0ODX/P, DF5HOA, FY5PO, JE2EHP, MD0CCE, MI0M, MW0UTD/P, RL3BM, SV1BDO/3, UA3KW, UT5URW, UT7UJ, V31CB, YI9PSE, ZL1ALZ and ZP4KFX

QSLS RECEIVED VIA MAIL: 4X1FC, 8R1RPN, 9H1AL, 9J2FM, AT10BP, BY8DX, C36PP, CQ7OA, E4X, KH2/N2NL, LZ2KV, T32CI, T32SI, UK8UWG, V63AKA, V63TR, V85SS, VY0V, ZC4VJ, ZS10WCS and ZW8B

QSLS RECEIVED VIA THE BUREAU: None Reported This Week!

SILENT KEYS.....
* Jurij, MM0DFV, informs OPDX that his trainee Artyom Silkin, RZ3DAJ, (only 25 years old) became a Silent Key due to a road accident on July 29th, 2010.

* Nuccio, I0YKN, reportedly became a Silent Key (SK) due to a heart attack this past week.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above Silent Keys.

T8, PALAU. Operators Takio/JH3QFL and Haruki/JH3KEA will be active as T88TB and T88KH, respectively, from the Island of Palau (OC-009) between September 19-22nd. Activity will be on 80-6 meters using CW, SSB and RTTY. QSL direct to their home callsign or by the Bureau.

TC, TURKEY (New Awards Available). During August, September and October, the Turkish group called TCSWAT (TC Special Wireless Activity Team), in collaboration with Canakkale Onsekiz Mart University, is organizing a special "World Universities Congress 2010 Award" for contacts with the following special callsigns:
TC2010WUC - (HQ) Canakkale Onsekiz Mart University
TC1WUC - Istanbul European Side University

TC2WUC - Istanbul Asian Side University
TC3WUC - Izmir Dokuz Eylul University
TC6WUC - Giresun University
TC9WUC - Kars Kafkas University

To be eligible for the Gold, Silver, Bronze awards, there must be at least one QSO with the Onsekiz Mart University TC2010WUC HQ station and at least:
GOLDEN AWARD - In different modes and/or bands, total of ten contacts with the other five stations.
SILVER AWARD - In different modes and/or bands, total of seven contacts with the other five stations.
BRONZE AWARD - In different modes and/or bands, total of five contacts with the other five stations.

Same rules apply to SWLs. To apply for the award, please contact "Tevfik Aydin KAZANCIOGLU, PK 73 Karakoy, 34421 ISTANBUL, TURKEY", before December 31st, enclosing your log extract together with 5 new IRCs or 5 Euros.

VQ9, CHAGOS ISLANDS (News). Larry, N0QM/VQ9LA, on Diego Garcia (AF-006) informs OPDX: "The VQ9X club station lost the HYGAIN 14 ELEMENT HF LOG PERIODIC ANTENNA early July 2010 due to a Boom to Mast Clamp failure, the antenna is now on the ground and will be repaired in the future. When the antenna fell off the mast it took out the 40M dipole, Wire V-Beam, and 2 meter repeater antenna.
The V-beam was repaired on 30th July 2010 by VQ9LA and VQ9JC, now the VQ9X club is on the air with the 270 foot per leg ladder line V-Beam. The 160m antenna will be off the air until the Log Periodic is put back up on the tower. This fine antenna has provided many contacts with the world wide DX community for the past 11 years and will be missed. I returned back to Diego Garcia on 26 July 2010 after being off the Island for a few months.... 73, Larry VQ9LA"

WC5, UNITED STATES (USI Op). Members of the Tri-County Amateur Radio Club (WC5C) will once again activate Pelican Island (TX050L) on August 14th, starting at 1400z. Pelican Island is an uninhabitated island on Eagle Mountain Lake in North Central Texas. The club members make an adventure of it, getting to the Island by kayak, canoe and various other water craft. Activity will be typically 40/20/15/10 meters. However, the WC5C team will attempt to honor sked requests for other bands. Modes are usually CW and SSB, others by request...sometimes Satellite FM, PSK31, etc.... QSL info is available on QRZ.com.

ZD9, TRISTAN DA CUNHA AND GOUGH ISLANDS. John, ZS1LF, will be active as ZD9GI from Gough Island (AF-039) between September 2010 and September 2011. This is John's second tour to Gough Island, and he will be the new radio technician and team leader on the island. The team consists of a medic, diesel mechanic, radio technician, three weather observers and two research assistants. He will be departing from Cape Town, South Africa, on the polar supply ship "SA Agulhas" (the same ship Pierre, ZS1HF/ZS8M used). Activity will be on 160-10 meters mainly using SSB, but possibly some Digital modes later. Operating will mostly be done after his official

working hours and weekends. His equipment will be a TS-480 and dipoles (No Yagis due to bird life). QSL Manager is ZS1A (j-s@iafrica.com). QSL direct to: Johan Sevenster, 2 Roozeboom STR - de Bron, Bellville, 7530, South Africa. Also by the Bureau. More details are available on QRZ.com. PLEASE NOTE: John states, "If you require Gough Island, please feel free to contact me at zd9gi@yahoo.co.uk and I will try to assist you. If you do not get an answer immediately, it means I am out of the office and busy elsewhere on the island. I will return all E-mails when I return. If you would like to receive pictures and stories, please E-mail me."

ZS8, MARION ISLAND. Pierre, ZS1HF/ZS8M, informs OPDX that Max, IZ8EPY, has kindly created the following Web site at:
http://www.iz8epy.it/html/zs8m.html
The Web contains pictures that Pierre has taken on the island and also an online logbook. There are also newsletters that Pierre has written (in PDF format) from Marion Island. PLEASE TAKE NOTE: Pierre, ZS8M, will be off the air starting at 1500z, August 8th, until 0500z, August 19th, while the supply ship is being unloaded. All hands are required to help sort out the unloading, etc.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 8th August 2010

SILENT KEY

It is with deep regret that we have to inform you of the death of Colm Ardiff EI3H. Colm's health had been gradually deteriorating over the past while and he died peacefully on Sunday last after a short illness.

Colm was born in Howth, County Dublin and in his younger days served as a marine radio officer. Once a month he and some former 'old salt' colleagues met in Wynne's Hotel in Abbey Street to chat and reminisce on their days at sea.

On returning to land based employment Colm worked for a brief period in the Aer Lingus radio workshops before joining the then Department of Transport and Power. He served in various capacities in that Department and its successors, including Dublin Airport and the Departments Headquarters where he was serving on hisretirement.

In amateur radio Colm was, as you would expect, an accomplished CW operator. He is probably best known for his transmission of the Sunday 40 metre News since its inception over 30 years ago. This is a job he was 'talked into' supposedly for a brief period by the late Tom O'Connor EI9U. Through these bulletins and his standing in for the 80 metre operators from time to time , the '3 Hotel 'call sign and voice became well known to the amateur radio community throughout the country as well as to his regular callers from the UK. Colm always had some friendly words for all those who reported on the news bulletins and his infectious good humour was evident in the exchanges with these stations.

In recognition of his many years of dedicated service to the Society and to Amateur Radio, Colm was recently made an Honorary Member of IRTS. The esteem with which Colm was held both in amateur radio and in his professional life was evidenced by the fact that Tom EI3AL, who had worked with Colm, travelled from Killarney to be present at the funeral Mass.

Colm will be sadly missed by his many friends in the amateur radio community and unfortunately the familiar 'CQ CQ CQ all radio amateurs and short wave listeners' at the start of the preamble to the Sunday news will be heard no more from the station of Echo India 3 Hotel.

The funeral took place on Wednesday last to Fingal Cemetery after 11 a.m. Mass in the Church of the Resurrection, Bayview, Sutton. Among the attendance at the funeral were S�amus EI8BP, Vice President IRTS, representing the President Paul EI2CA who is away on holiday at present, Michael EI2CL, Pierce EI4CI, Ian EI7CX, Joe EI7GY, Joe EI4FV, Thos EI2JD, Peter EI4HX, Se�n EI2CR, John EI7BV, Tom EI3AL and Se�n EI7CD.

To his wife Frances, his sons Barry and Neil and to his extended family and friends we offer our sincerest sympathy. May his gentle soul rest in peace. Ar dheis D� go raibh a anam d�lis

Silent Key

YV1NX, Fergus Walshe O'Shea, ex EI4BD has become a Silent Key. He was a well known DXer and many EI operators have worked Fergus particularly on CW for YV credit on all bands from 160 to 10 metres.

In the late 1950s he was very active from Qatar as MP4QAL. He was a member of the First Operators Club, FOC and was very active up to his recent sudden death. He will be missed.

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 6th October next at 2 p.m. in the ComReg Offices in Dublin. The closing date for receipt of applications to sit the examination is Friday, 17th September.

For further information on the application procedure, exam fees and other details see 'Theory Examination' in the 'Information' section of the website. The 'Downloads' section of the website includes a very useful document 'Studying for the Amateur Radio Examination'.

The 'Links' section of the website under 'Radio Theory' contains much useful information for anyone studying for the licence examination.'

WAI Squares Activation

Peter EI4GZB & Declan EI9HQ has rescheduled their squares run for Today the 8th August.

Planned squares to be worked are Oscar 33 34 35 36 County Dublin. All squares will be activated /MM from the boat it is planned that the above squares will be activated both times during the day, on the outward and return journeys.

Bands to be used will be 20m 40m & 80m 14.268 7.068 & 3.680/760KHz SSB only + - QRM.

Castle Kirk Activation EI-005 C

On Saturday the 31st of July at 7 am Steve, EI5DD, Gerry, EI8DRB, and Enda, EI3IS, set off to activate Castle Kirk situated on a small Island on Lough Corrib. The weather conditions were dreadful, but after a wait of two hours the showers and winds subsided making it possible to take an open boat to the island across the lake. The boat was loaded in record time with equipment ranging from generator to two complete HF stations.

A tent was erected within the walls of the castle and A doublet for 80 metres and tuneable for 40 metres was erected along with a centre fed half wave vertical for 20 metres. The tent was large enough to accommodate two stations, spare equipment and operators.

The 20 metre band was lively and a pile up developed. 40 & 80 metres were not in great shape even the regular nets were not audible. After 8pm the 80 metre began to open up and a steady flow of stations were operated. At 1 am the station closed down until 7 am Sunday.

The great plans to work EI operators were thwarted by poor conditions on 80 metres around midday. EI0RTS was plagued with deep QSB and many stations calling into the news were having difficulty.

The Group look forward to activation Castle Kirk once again, for more info on the Galway VHF Group and photos of the event etc please check out the website www.galwayvhfgroup.com

---

IARUMS news

Can amateurs & SWL's please keep a listening watch around 28.265 FM as there have been incursions by churches on this frequency heard throughout Europe at up to 59 +20db. Please send details of names etc used so we can identify locations and report them to ComReg for investigation.

All information can be sent to Ger McNamara EI4GXB who is the IRTS IARUMS co-ordinator at ei4gxb /at/ gmail or 087 2532512

Nationwide Interview with Ben EI4IN

Ben EI4IN has been interviewed by RTE in association with the Irish Kidney Association and will be appearing in next Wednesday's Nationwide on RTE1 at 7pm.

Limerick Radio Club News

Gerry Byrnes EI3JU has kindly donated a caravan to the club. It will be used for portable, contest and field day activities. Members have already got to work on fitting it out for operating purposes.

Maurice Dunworth EI3JF has kindly donated secure storage space for us to carry out the work. Members wishing to help out are asked to make contact with Ger McNamara EI4GXB at ei4gxb /at/ gmail.com or 087

2532512.

The Club would also like to welcome Simon Kenny EI7ALB & Gerry Byrnes EI3JU as 2 newsreaders on Monday nights on the Limerick Repeater. They will join the team including Brian Toner EI9AL and Ger McNamara EI4GXB.

Donation to North Cork Radio Group Members Of the North Cork Radio Group would like to thank Robbie Phelan EI2IP for his very kind and generous donation to the group.

Robbie very kindly donated an assortment of Antennas and equipment for the aid of assisting newly licensed members and to enable much more efficient field Days. NCRG are an active portable group and appreciate these very kind donations.

Cork Astronomy Club

The North Cork Rally is fast approaching and NCRG are very pleased to announce confirmation of the Cork Astronomy Club in attendance, The Cork Astronomy Club is an independent Group that owns its own 13 inch Dobsonian reflector telescope, available for all members to use, under supervision.

Each month, from September to May, they try to have at least one observing session, weather permitting. Observing sessions are announced at the club's monthly meetings. Some sessions are held at the club telescope site, some at Blackrock Castle Observatory, and some at various dark-site locations outside the light-polluted skies of the city.

An excellent opportunity for less experienced members to try out equipment before buying. Members wishing to be involved can register at any of the monthly meetings or at the North Cork Radio Group Rally 2010.

Further information is available for the website www.corkastronomyclub.com/ information regarding the

---

Rallies

North Cork Radio Group is pleased to announce their first annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 19th 2010

More information is available via the Groups website www.NorthCorkRadioGroup.com, traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb /at/ gmail.com as soon as possible.

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1876 Alexander Bell telephones over a distance of 8 miles, then 143 miles.

1903 Berlin wireless telegraph Conference begins.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

(direct: dl7voa@darc.de)

EA6 - BALEARIC ISLANDS, EU-004
Jacek,EA6/SP5OXJ, is working from Calas de Mallorca (EU-004) from
Aug 8-20. Jacek is active in CW and digital modes mostly on 20m/30m.
QSLs direct or via bureau to SP5OXJ or via LoTW.

FK/C - CHESTERFIELD ISLANDS, OC-176
Michel,FK8IK, is member of a scientific expedition which is staying on
the Chesterfield Islands (OC-176) from Aug 9-19. During his little
spare time Michel will sign FK8IK/C in CW on 80m-10m with 100 watts
and dipoles. QSL via his homecall.

OX - GREENLAND, NA-018
Masaru,JA5AQC, will show up as OX1JA when he is visiting Jesper,OX3KQ,
in Kangerlussuaq from Aug 13-16. After that he will be QRV as OZ5AQC
from Denmark on Aug 17-19. QSLs for both calls only direct via JA5AQC.

XV - VIETNAM
Mal,VK6LC, will stay again in Vietnam between Aug 12 and Sep 10. He is
calling this "DX Vocation". He will re-activate his old station XV2LC
again in Ho Chi Minh City. Later he will sign also XV4LC from the
Mekong Delta. Activity will take place from two different locations:
His first QTH will be Can Tho where he will use a delta loop for 40m/
20m/15m and a quad loop for 17m operating in CW and SSB. The other QTH
is Soc Trang where he will work mostly in CW and hopes to become active
also on 160m. For some pictures see XV2LC and XV4LC on QRZ.com.
QSL cards for both calls should be sent to VK6LC.

Z2 - ZIMBABWE
Herbert,7Z1HB, will be QRV again as Z21LS from Harare on Aug 13-19.
Unfortunately he has no lowband antennas. QSL via bureau to DE1ZHB or
direct to: Herbert Baurmann, Jadawel International, PO Box 61539,
Riyadh 11575, Villa 408, Saudi Arabia.
Everybody who sent his QSLs for 7Z1HB direct and received no reply yet

is asked to send an e-mail to Herbert: Herbert.Baurmann@gmx.net

9H - MALTA, EU-023
Stephen,IZ0IWM, will stay on Malta (EU-023) from Aug 11-20 and intends
to show up as 9H3VY on HF with his QRP radio.
QSL via bureau or direct via his homecall.

AFRICA TRIP: Les,W2LPL, and his son Daniel,W2DBL, will be QRV mostly in SSB
from South Africa signing ZS6/homecall from Aug 11-15.
Their next stop will be Tuli Bloc in Botswana where they will sign
A25/homecall from Aug 16-19. QSLs via their homecalls.

WFF activities: Jose,CT1CJJ, and Filipe,CT1ILT, are active as CR6K/p from
the SW Alentejano e Costa Vicentina Natural Park (WFF CTFF-12, DPRN
CTFF-12) until Aug 14. Their are working "holiday style" in CW and SSB
on 80/40/30/20/17/15/10m running 100 watts into a vertical.
QSLs via CT1CJJ or CT1ILT
See also: http://www.rep.pt/ct1ilt/swalentejano2010.html

Mike,UN8GC, and Oleg,EX8MLT, are working as EX9FF from the lake
Issyk Kul (EXFF-002) till Aug 14. QSL only direct to UN8GC or via LoTW.
Find more information at: http://un-dx.ucoz.com/index/un_news/0-5

SILENT KEYS: Following DXers passed away during the last week:
John Adams (G3YNC), Nuccio Meoli (I0YKN), Paolo Gori (I5ZJK),
Elliott K. Klein (K7ER), Fergus Walshe O'Shea (YV1NX) and
Artyom Silkin,RZ3DAJ, who died in a car accident at the age of 25.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---

http://www.space.com/scienceastronomy/sun-eruption-solar-tsunami-100806.html
and http://spaceweather.com

Alan,5B4AHJ, QSL manager of the CARS, reports that the Cypriot bureau
is receiving a large number of QSLs that cannot be delivered to the
intended recipient because the station has a QSL manager not on Cyprus.
He has published a list of stations with foreign QSL managers at:
http://www.shacklog.co.uk/5BForeignManagers.htm

UPCOMING CONTESTS

Aug 14/15: WAEDC Contest, CW
The complete rules can be found on the website: http://www.waedc.de

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

EU-038, PA, Friesland Province Group: Frank,PA/DK5FT, will be QRV from
Texel Island from Aug 16-22. QSL via homecall.

EU-156, F, Basse-Normandie Region Group: Kurt,ON4CB, and Francois,ON4LO,
will sign F/OR9W/p from Tombelaine Island (DIFM MA-021) from Aug 12-14.
QSL via ON4CB (direct/bureau).

EU-175, CU3-7, Azores Central Group: Leonel,CU4/CU3EJ, will be active from
Graciosa Island (DIP AZ-004) on Aug 10. QSL via homecall.

NA-126, VE1, NS Province South Group: Don,VE1AOE, Paul,VE1MPM, and
Dana,VE1VOX, will show up as VB1H from Harris Island (CIS-new) from
Aug 11-15. QSL via VE3EXY (direct/bureau).

NA-197, KL7, Kenai Peninsula County: Wayne,K9YNF/KL7, is going to become
active from Fox Island from Aug 16-20. Pilot station will be K9JE.
QSL via homecall (direct/bureau).

NA-208, VY0, Nunavut (Kitikmeot Region) East Group: Cezar,VE3LYC, is going
to hit the airwaves as VY0X from Pelly Bay Island (CQ zone 2) from
Aug 11-15. QSL via homecall (direct/bureau).

News from JT1FDB

In the last DX Newsletter we published a message of JT1CS that JT1FDB/7
would be a pirate. Now we have got following statement from OM Frank,DD0CW:

"I read in the DX Newsletter that you passed on the information of JT1CS
stating that my activity as JT1FDB/7 would have been illegal because of an
expired license. However, the truth is that I am a victim of an internal
struggle for power within the Mongolian Radio Sport Federation.

In 2006 I have received a license for JT1FDB for US$ 250 which is valid
until the end of 2011 and was issued by the previous management of the MRSF.
Meanwhile, the management has changed. They now assume that my license was
not valid although I have been on the air in the years 2006 and 2008,
without disturbing anyone (even I was spotted on the internet).

Already in 2000, 2002, 2006 and 2008 I was using my JT1FDB license and was
working as JT1FDB/7 before, which means appending the regional suffix. This
was referred to me by the previous management as correct. Meanwhile, you
should buy an extra license for each region. They are now valid for only one
year and cost US$ 200 a piece. The main problem in JT is that the sovereign
function of 'issuing a license' is not done by a public authority, but by
a radio club. So you have no legal security. Moreover, this club obviously
discovered the issue of licenses as a source of money and is becoming more
and more immoderate.

Vy 73 de DD0CW, Frank."

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DD0CW, DF6EX (WIN-QSL),
DH2PC, DJ5AV, DK8JB, DL1SBF, DL7VOA, DM3VL, DO3ME, F6AJA & Les Nouvelles DX,
NG3K, SP5OXJ, 5B4AHJ, 7Z1HB and others.

643. MMMonVHF Newsletter 2010-08-10

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-10 16:21:38 UTC
From: MMMonVHF News Mailer <nl@mmmonvhf.de>
Message-ID: <201008101559.o7AFxhZB004643@server13.web4a.de>
Source record: 5462
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-08-10
TWO Day earlier but right in time in advance of the PERSEIDS!
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF MS Sprint Contest 2010 (World Wide MS Contest!) **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines DUBUS
and Funk-Telegramm (by Joachim, DL8HCZ) invited you to take part
in our 144 MHz Meteorscatter Sprint Contest, which took place for
the first time in the 2008 Perseid shower. The 144 MHz Meteor-
scatter Sprint Contest will take place each year on the day of the
from IMO (International Meteor Organization) announced maximum of
the Perseid shower:

2010 contest period: Date: 12./13. August 2010
Time period: 12.00hrs till 13.August 2010 12.00hrs UT

PLEASE take all rules and info of the the MMMonVHF and
DUBUS 144 MHz Meteorscatter-Sprint Contest 2010 here:
http://www.mmmonvhf.de/ctest.php
Results 2009: http://www.mmmonvhf.de/ctest2009.php
Results 2008: http://www.mmmonvhf.de/ctest2008.php
The MS SPRINT contest is now supportet by two kinds of logging
software: MS Sprint by Arcom and since some days as well by
UcxLog (by Ben, DL7UCX) More Info about the software can be found
as well in the forum of MMMonVHF:
http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=10&topic=91
SOURCE: Erwin, DK5EW, on behalf of the MMMonVHF Team

** Make More Miles on VHF MS Activity OVERVIEW **

As well as in the past PERSEIDS and GEMINIDS MS-Shower the
VHF-DX-Portal MMMonVHF will be trying to setup an up to date
OVERVIEW (MAP & TABLE) during the METEOR SHOWER Perseids 2010
Please do use: http://www.mmmonvhf.de/ms.php
We will try to spread in short time infos "who will be "were"

qrv and use "which" qrg from up 7th of august 2010. We did setup
a new Google Map which you are able to zoom as your needs... Mean
time there are near 200 Squares active (counted since 7th aug)!!!
Please feel free to send us your active, seen or worked Square
if you do not find it in the MAP: If you wants - easiest way is
to get some of us on KST or: http://www.mmmonvhf.de/kontact.php
SOURCE: Massimo, IV3NDC and Guido, DL8EBW Team of MMMonVHF

** 50 MHz License in HS/E2 **

RAST - The Radio Amateur Society of Thailand - is asking all
interested countries, club's and OM's to support us at the
National Telecommunication Commission of Thailand for renewing the
50 MHz license for HS/E2 Hams. Therefore we ask everybody to send
us supporting letters - 50 MHz - which could help us with the
renewal and extension of the 50 MHz license. Letters and
attachments could be posted in our topic
http://rastforum.com/index.php?topic=577.0
or via email to admin(at)rastforum(dot)com. Further information
about RAST on our website www.qsl.net/rast or on the forum
rastforum.com Thank you very much for your support - hope to work
you soon on 50MHz... SOURCE: tnx to Swen HS0ZFZ to MMMonVHF

** SUN: INCOMING CME **

The solar eruption of August 7th might affect Earth after all.
Newly-arriving data from the Solar and Heliospheric Observatory
(SOHO) show a CME heading our way with a significant Earth-
directed component. High-latitude sky watchers should be alert
for auroras when the cloud arrives on August 10th. A movie of
the CME is featured on today's edition of http://spaceweather.com

Meteor Scatter activity from KM36VC... LATEST NEWS from Mike,
SV5BYR, dated 2010-08-10: From tomorrow Wednesday 11-8-2010 my
holidays at KM36VC starting. My time will be shared between family
and radio. During Perseids peak I'll be active on 2m band working
as more station are possible. Many people like to work KM36 and
sometimes the list is too long. I will keep each list maximum to
5 stations and after tests will update it again. 15 minutes
(+/- 5 minutes) will be the maximum time for each station. Also
6m operation is of course in my plans if propagation helps.
Hope to work you. 73s Mike.

An Italian team of operators will activate Plane Island (AF-091
WLOTA L-0413) and/or Kuriat Island (AF-092 WLOTA L-0974) as TS7TI
on 13-23 September 2010. The IOTA request is 14.8% for Plane island
and 30.8% for Kuriat Island. They will be active on all bands HF,
WHF, VHF, 6m., SSB, CW, PSK31, RTTY. Activity during a little tour
/P, will be from some wanted WFF 3VFF and from the most wanted
square JM57. Operators include Alfredo IK7JWX, Leopoldo I8LWL,
Simon IZ7ATN, Paolo IK7UXW, Ampelio IS0AGY and Ivo 9A3A. They are
currently seeking sponsors/supporters for this DXpedition. It
looks good that as well a MS Station can be setup on 2 Meter!

** DXpedition to Issyk Kul Lake (EX6EME, MN82) **

Hi everyone, quick update: we have logged K6MYC and N6RMJ this morning during our moonrise however we did copy these stations and with some of them almost completed: W7MEM NN7J W7CE - Our setup seems to work well in the current conditions. 6M1000 PA by M2 is doing very good job. Now we only traffic. So if any of you are interested in giving it a shot please don't hesitate! We will be on during every moonrise and every moonset this week. Since we have full elevation capability we can easily work those of you with no elevation. You can follow our online updates on ON4KST chat and through Twitter http://twitter.com/ex6eme You can also find us on the Facebook to see some pictures (search for Mike Chirkov). 73 and see you on the moon, Mike & Oleg EX6EME
SOURCE: Mike UN8GC / KZ1R / EX6EME & W7GJ via Magic Band EME

** XV1X on 6m EME! **

I completed today with XV1X on 6m EME during his moonrise, for the first 6m EME from Vietnam. It was new 6m DXCC #157 for me (#105 via 6m EME). Eddy has a 6 element yagi and kw, and is horizon only. He usually has too much noise at his city QTH, but it was quiet this morning. He has ground gain lobes at 4, 11 and 18 degr. GL this week on EME - the Degradation is very low, Kp is very low = CNDX are GREAT! SOURCE: Lance, W7GJ via Magic Band EME

** Square-Trip through Irland, by SP7VC **

IO41-IO42-IO43-IO44-IO53-IO54 and IO55 HF/50MHz Trip by SP7VC and SQ7OYL. Between 10-24.08.2010 I and Kate SQ7OYL are traveling around the island Irland and we will be activ on KF and 50Mhz from locators IO41,42,43,44 and IO53,54,55
SOURCE: tnx to Mek EI/SP7VC direct to MMMonVHF

** 3D2, FIJI (Possibly Rotuma [3D2/R]) on HF and 50 MHz **

Seb, F8IJV, is making plans to be in Fiji during 2011 in October (dates are not final yet). Activity will be limited to his free time (this will not be a DXpedition). He has received his license and will use the callsign 3D2JV. Seb will be active from the QTH of Tony, 3D2AG, on Liti Levu (OC-016). He plans to be active on 160-6 meters, mainly on SSB and FM on 10 meters, and possibly some Digital modes. Seb also plans to participate to the 2011 CQWW DX SSB Contest while there. If it is possible he may go to Rotuma by plane, if it is not too expensive. He would like to operate a few days from there. The equipment to be used will be an Yaesu FT-450, 5 band Spiderbeam, and three vertical antennas for the 160/80/40m. bands (possibly a K9AY for reception). QSL via his home callsign, by the Bureau or direct, and also LoTW. More details will be forth coming. SOURCE: Ohio/Penn DX Bulletin #970

** T8 - Palau qrv HF and 50 MHz **

Nao, JK1FNL reports that he will be active as T88NA from Palau on 23-26 September. He will operate CW, SSB and RTTY on 160-6 metres. QSL via home call. SOURCE: [TNX JK1FNL] via 425 DX NEWS # 1005

** OZ6OM qrv Thursday 50 MHz NAC **

Hello Guys, I (OZ6OM) will be QRV in the Nordic Activity Contest
Thursday evening (August 12 th.) between 17 and 21 UT. Due to outer
circumstances, I have had to postpone my hilltopping from JO55CE,
untill the September section at the 9 th. But I will be QRV from an
alternate QTH in JO55EJ running 100 w. into a 5 element Yagi at
35 m. above ground - and a 360 deg. clear takeoff. Intention is to
keep activity round 50.173 MHz (SSB/CW) and 50.230 MHz / 50.236
(JT6m). Iï¿½m open for skeds at CW/SSB the first 1ï¿½ hours, and JT6m
the last 2ï¿½ hours, with emphasis at the ongoing Perseid shower.
I can be reached at email oz6om(at)uksmg.net prior to the contest
and SMS +45 2066 7388 during the contest. (The reason I have to
operate this way is, my attempt at setting up reasonable antennas
at my QTH have ended in a court twist) Hope to see You down the log

August 11, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY
```

It was a personal pleasure and privilege to check into the inaugural VHF FM net of our renewed ARES® program, under the leadership of new EC Robbie Creal, KG4HUF. The net was held on a new repeater system donated to the county's emergency management agency by the new ARES® group. The new repeater and tower/antenna is sited on the campus of the EOC.

The huge Florida State EOC <http://www.floridadisaster.org/eoc/Update/Home.asp> in Tallahassee is now D-STAR capable. The EOC station KA4EOC monitors K4WAK port B. As in the past, State EOC managers have requested that the ARRL Northern Florida Section Manager or his designate serve as gateway between the FEOC and other ARES® assets in the region during emergency or disaster situations. When necessary or requested, the Northern Florida Section Manager or his designate will be stationed at the facility in Tallahassee to perform this liaison duty. The current SM is Paul Eakin, KJ4G, who maintains close contact with the EOC on a daily basis, especially now as we approach the crux of hurricane season.

For up-to-date, state-of-the-art D-STAR and networking information and resources drafted by people who are actually doing the real work in the field, one of the finest Web/blog sites I have seen is the NE-FL D-STAR System <http://nefl-dstar.com/blog/>, the "Journal of the North East Florida D-STAR Repeater System," which also serves as the platform for ARES® information and updates. Readers will find a bounty of information on D-STAR applications, ranging from basic programming of radios to the latest on networking digital repeaters, including both software and hardware issues. You will also find tips and resources, news and updates on current emergency management communications issues, tools and developments. Check it out - it is superb.

==> FCC MODIFIES RULES TO ALLOW LIMITED EMPLOYEE PARTICIPATION IN
DISASTER AND EMERGENCY DRILLS

In a Report and Order released Wednesday, July 14, the FCC amended Part
97.113 to allow amateurs to participate without an FCC waiver in
government-sponsored disaster preparedness drills on behalf of their
employers participating in the exercise. The FCC also has amended the
rules to allow employees to participate in non-government drills and
exercises up to one hour per week and up to two 72 hour periods during
the year. The effective date of the R&O is September 3. Read more here
<http://www.arrl.org/news/fcc-modifies-amateur-rules-to-allow-participation-in-disaster-an
d-emergency-drills-on-behalf-of-an-e>.
- ARRL Letter

==> ARES&#65533;: 75 YEARS!

The ARRL Public Relations Committee has noted that the 75th anniversary
of the creation of ARES&#65533; will be next month (September). Over the past
months the committee has discussed this milestone and opportunity, and
is developing a publicity and recruitment campaign.The goal is to
increase awareness of radio amateurs' spirit of volunteerism. While
there will be acknowledgement of past events, the focus will be on the
present and future. The PRC noted that "despite all of the investment
made by government agencies, the volunteer assets of ARES&#65533; are still
called on for communications and other support, especially during the
first 48 hours of a crisis. Operators provide communications,
information and technical skills when other systems are down or
overloaded."

The ARES&#65533; community will be celebrating its 75th anniversary from
September through December 2010. The first mention of an organized

Amateur Radio emergency response organization appears in the September 1935 issue of QST Magazine. A September launch has the benefit of other related national campaigns such as National Preparedness Month and also is the height of hurricane season. The length of the campaign would be expected to be four months, but if successful can continue. The ARRL Marketing Department is planning for the sale of commemorative items including T-shirts, hats, and challenge coins. Packets with ideas and promotional materials will be mailed to every PIC (or SM if there is no PIC) for distribution to local PIOs in the area. Logo and more info <http://www.arrl.org/ares-anniversary>. -- Allen G. Pitts, W1AGP, ARRL Media and Public Relations Manager

==> TIPS: DEPICTION® SOFTWARE

Depiction® software is currently in use by northeastern Florida ARES® leadership for the planning, deployment and execution of ARES® assets, events and exercises. Depiction® provides planners with a full graphical display of the event shown on a single screen, including the planning, deployment and execution phases. The display screen changes and updates as elements of the event change and resources are moved or advanced.

In a single screen, users can track assets along a Depiction® drawn route in real time while monitoring live weather conditions, and sending and receiving live reports among one another. A feature enables updating Depiction® screens from remote locations.

Depiction® can also serve as a database for a group's members and resources. A single click on an icon representing a location will reveal the assigned operators, their personal information and the equipment available at that location.

Depiction® uses information available free from the public domain to display such items as weather radar, elevation data and a multitude of maps including roadmaps, topographical and aerial maps. The depictions that can be built can be placed over any of these maps at a single click. Depiction® will read and display GIS data that is available publicly on the Internet for states and counties including locations of EOCs, schools, shelters, police and fire stations. Tower site locations can be displayed and the software can even draw "lines of site" data for a given antenna on that tower. Depiction® can also display graphical representations of flooding based on user-defined information.

In Northeastern Florida, ARES® leaders are currently using Depiction® to help develop the plan for their upcoming MS-150 bike event. They are also importing data on local ARES® personnel and resources into Depiction® for future events and activations.

Depiction® can also be used for drafting your own personal emergency plans at home. For more information: Depiction

<http://www.depiction.com/>. Information specifically for radio amateurs can be found here <http://www.depiction.com/amateurradio>. -- Journal of the North East Florida D-STAR Repeater System, NE-FL D-STAR System <http://nefl-dstar.com/blog/>

==> LETTERS

Bike MS-150 Support

I read with interest your description of the support for the MS-150 in your July issue of the ARES® E-Letter. In Arizona, we have been supporting the MS-150 (now called Bike MS) for over 20 years. In years past, it wasn't uncommon to have 80-100 hams on a linked repeater net stretching from Phoenix to the Colorado River (~150 miles with 4-5 linked repeaters). The current event still spans 100+ miles, but is in a large loop. You are correct: It is a significant effort to adequately support this ride, and as a result, many changes were implemented locally.

In an effort to bridge all area clubs, a new organization was formed: the Maricopa County Emergency Communications Group <http://www.mcecg.net/>. This group's purpose was to include all clubs and provide a place for service-minded hams to come and exercise their need to use their radios for the good of the community.

Second, it led to the creation of an acclaimed training program, which has drawn participants from the entire state and even Canada. The training class is offered annually. The class materials include a 50-page public service manual, as well as copies of the multiple PowerPoint slide decks. Students receive all written materials, but are required to bring a VHF hand-held for a hands-on learning experience. The experience is enhanced by role-playing, a scripted but interactive training net, group problem solving and traditional lectures.

Event Coordinators create events on the Web site with a brief description of the event, the number of hams needed, and when the event goes "live" about 60 days in advance, registered hams can sign up to work the event(s). The Web site will stop accepting volunteers when the limit is reached, and should someone cancel, it will reopen automatically.

The MCECG has more than 500 members with 350 who have worked an event in the last two years. One to two hams are registered per month, and we support more than two dozen events each season. New hams are also encouraged to participate in the Arizona Emergency Net-Maricopa <http://www.aen-mar.org/> where they can hone their communications skills.

We support Runs, Walks, Bike Rides, Marathons, Triathlons, Mountain Bike Races, and, of course, disasters and emergencies. Our group has supported events in the Greater Phoenix area, Arizona, New Mexico, Colorado, Utah and Mexico in the last decade. MCECG has developed a

proficient group of hams who are more than communicators. The MS-150 is a good example: Hams are on their committees, run event logistics from start to finish including directing sag, supply and re-supply operations, and act as advisers to the event committee. We have been credited with saving life when a serious accident occurred: We were the first on the scene to report and support the rescue operation (including a helicopter landing zone, and managing both ends of the traffic detour). MCECG is a tremendous tool for developing communicators who can be used in times of disaster.-- Rick Aldom, W7STS, ARRL Section Emergency Coordinator, Arizona

Amateur Radio Resource Typing

Several times in the past you have placed information in your E-Letter about Amateur Radio Resource Typing from me. The Communications Resource Functions Guide
<http://garlandr.s412.sureserver.com/CRF%20Info/CRF%20Guide-Rev%20G1.pdf>
has been updated. Additions include Basic and Specialty groupings. The Specialty group has replaced Digital functions. The CRF-DH has been updated to enhance the Winlink <http://www.winlink.org/> modes and to make it more user friendly for MARS
<http://www.netcom.army.mil/mars/links.aspx>. The introduction has been rewritten as well and a distinction for Type I and Type II is made. All of this information is located at the following: Resource Typing
<http://garlandr.s412.sureserver.com/CRF%20Info/CRF%20resource%20data.html>.

Since over the last few years a number of groups across the country have used this concept or a modification of it, I would like to hear from these groups and hopefully add links to them for mutual aid resources. - John Galvin, N5TIM <n5tim@arrl.net>, ARRL Official Emergency Station, Dallas, Texas ARES/RACES

Disaster Prep and Planning

I am not yet a member of ARES&#65533;, but your newsletter articles gave me valuable information and helped me plan for Hurricane Ike, so I wanted to share some adjustments I have made for my home. Since I have a swimming pool in my yard, I don't store as much water in bottles. Instead I keep cheese cloth and pool shock on hand to filter and sterilize the water after a storm.

My gasoline storage is in several small cans and both vehicles. I fill them and add stabilizer to each before a storm. Fuel stabilizer is inexpensive and will keep the fuel usable for 3-4 months in the Texas heat.

I keep a Boy Scout Handbook <http://www.bsahandbook.org/> or field book in my emergency box. It is one of the best compilations of survival information. I also keep several 12-hour glow sticks - but change them out every year. These can provide enough light to navigate a dark room or even operate a station at night. -- Ralph E. Phillips, P.E., KE5HDF, Mustang Engineering

More on Planning

In your discussions of personal disaster planning you forgot to mention a large first aid kit, aspirin or Tylenol and other meds, and maybe an old set of eyeglasses. I'm going to buy a box of trash bags today, as recommended by Mr. Kountz, KE6GFF/T6EE, in your last issue. That was a great idea! -- Mike Jones, KD8DLD, Michigan

==> EMCOMM EAST, SEPTEMBER 18: ROCHESTER, NEW YORK

The third annual EmComm East emergency communications conference is an ARRL-sanctioned Amateur Radio event where operators can attend training sessions on technical topics, learn from served agencies, obtain VE testing for license upgrades, and interact with other operators from all over the country. It will be held on September 18, 2010, at St. John Fisher College, Rochester, New York, from 8 AM to 5 PM.

The featured speaker this year will be Steve Ewald, WV1X, supervisor of the ARRL Field Organization Team at ARRL Headquarters. Ewald is the lead staff liaison to ARRL Section Managers and ARRL Field Organization appointees. He edits the Public Service column in QST and helps support the ARRL efforts in emergency and public service communications.

Register on-line at the event Web site EmComm East <http://www.emcommeast.org/>. A $30 registration fee provides for continental breakfast and lunch. See you in September!

==> BIKE MS-150 NORTHEAST FLORIDA: OCTOBER 2-3, 2010

The MS-150 Bike Tour - Florida will take place October 2 and 3, 2010. This two-day event will cover three counties and involve many Amateur Radio operators from various regional groups. See the event's MS-150 Northeast Florida Web site <http://bikefln.nationalmssociety.org/site/PageServer?pagename=BIKE_FLN_Details>.

The MS-150 organizers are partnering with northeast Florida amateurs this year. Doug Carter, N4FPS, DEC Crown District ARES&#65533; and Mike Lee, WB6RTH, DEC East Coast District ARES&#65533; are teaming their two districts to form a unique communications structure for the entire MS-150 event. There will be a seamless communications network that involves two repeaters, one central command, one sweep vehicle, several SAG vehicles and multiple rest stop stations.

The planning has already begun. Participating radio amateurs are expected to attend at lease one of two dry runs prior to the actual event. The communications event will serve as the combined districts' ARES® 2010 Simulated Emergency Tests <http://www.arrl.org/chapter-2-simulated-emergency-test-set> (SET).

The effort will be conducted using the NIMS/ICS model. NIMS/ICS provides an ideal way to respond to an event whether large or small and can be used by government agencies at the federal, state, local, or tribal level, private sector entities, and non-governmental organizations (NGO's). It also provides a means for agencies and organizations from a variety of jurisdictions to cooperate and work together in response to an emergency or event. Communications is a component within the overall NIMS/ICS system.

==> EMCOMM "JUMP TEAM" COMPETITION IN TEXAS

An "Emergency Communications Team Competition" will be held September 5, 2010, at a South Texas park to be designated before the competition to pre-registered teams. The teams will be made up of four people each, and will compete to see which team can set up an operational communications (Jump Team) site and make 5 HF contacts in the least amount of time and in the proper manner. The competition will require teams to properly:

*Erect a six man sleeping tent and operations area (canopy) with chairs, tables and radio gear.

*Erect a food prep canopy with tables, chairs, stove, cooking supplies.

*Erect one 40 meter "Inverted V" antenna with coax back to the operations area with proper hazard flagging.

*Assemble one HF station powered by deep-cycle batteries.

*Assemble two solar panel assemblies and charge at least one deep-cycle battery.

*Filter ten gallons of water (as part of the setup responsibilities).

*Cook a simple meal in the food-prep area (enough to feed four people).

*Make at least 5 HF contacts on 40 meters SSB to stations outside the area with proper logging of contacts made. (Communications will begin only after all the setups have been accomplished).

This competition is not limited to any group or organization. Any four operators who have at least one licensed ham (General class or above) can compete. They will all be using the same equipment and gear supplied by the Bexar Operators Group <http://www.sanantoniohams.org/clubs/index.htm#W5BOG>.

See Emergency Communications Teams <http://www.texasmars.com/>. Pre-register by e-mail <W2IK@ARRL.NET> with a list of team members/call signs, contact e-mail and phone number. -- Robert Hejl, W2IK, San

Antonio, Texas [see W2IK's QRZ.com bio for his interesting background and work -- ed.]

==> HERNANDO COUNTY, FLORIDA: EMCOMM TRAINING CLASS A SUCCESS

The first training class for Hernando County (Florida) operators in emergency communications since 2005 was held July 26, as reported in the last issue. It turned out to be a fine first step towards reintroducing emcomm skills to local radio amateurs as well as others from surrounding areas. A total of fifteen people participated, representing regional ARES® and CERT organizations, and included leaders Jerry Dixon, WA6QFC, West Coast DEC and Gerry Brummer, W4GKB, the chairman and deputy director of Citrus County CERT <http://www.citizencorps.gov/cert/>.

Ron Wright, N9EE, led the class in message handling, with emphasis on regular and "booked" messages. Wright displayed and explained his go-kit used for deployment to a shelter, including a well-designed take-apart mast and emergency J-pole antenna made from 300 ohm "flat lead" wire.

Hernando County EC Alan McGrew, KC4MTS, followed up with information on NIMS <http://www.fema.gov/pdf/nims/NIMS_basic_incident_command_system.pdf> courses. The Hernando County EOC managers are encouraging radio amateurs to hold NIMS and ICS course certifications.

Also discussed was the use of the new WebEOC <http://esi911.com/esi/index.php?option=com_content&task=view&id=14&Itemid=30>® systems at the EOCs of both Citrus and Hernando counties. Future training on the WebEOC® system is to be held for radio amateurs volunteering at the EOCs.

A new Neighborhood Ham Watch program is in development for the Northern Florida ARRL Section. This program is designed to provide a communications link between individuals and emergency services when phone service is unavailable in a neighborhood. Coordinator Andy Gausz, KG4QCD <kg4qcd@arrl.net> developed a brochure to explain the program for both radio amateurs and the community at large. -- Alan McGrew, KC4MTS, <:%20kc4mts@bellsouth.net> Emergency Coordinator, Hernando County, Florida

==> NIMS COMPLIANCE FOR NEBRASKA RESPONDERS

FEMA Independent Study <http://training.fema.gov/is/crslist.asp> courses are now requirements for first responders assisting any agency in Nebraska during a disaster. NIMS <http://www.fema.gov/emergency/nims/> compliance is required in the state to ensure that emergency response personnel and other partners are working from one protocol by meeting certain guidelines in planning, exercises, and training. NIMS compliance is also a requirement for eligibility for federal grant dollars to the county and

all its response agencies as a whole.

An additional training requirement has been issued for local responders for FY 2010: This requires all responders who have previously taken the first ICS <http://www.fema.gov/emergency/nims/IncidentCommandSystem.shtm#item1> courses of IS100 and IS700 to also complete on-line courses for IS701.a, IS702., IS703.a, IS704. This means that anyone who took any ICS course before now has to take these four courses. Click the links to see the courses on the FEMA Independent Study page:

http://training.fema.gov/emiweb/is/is701a.asp

http://training.fema.gov/EMIWeb/IS/is702.asp

http://training.fema.gov/emiweb/is/IS703a.asp

http://training.fema.gov/EMIWeb/IS/IS704.asp

Estimates of the time required per course is between two to three hours. However, it is my experience that most students can review the material and take the on-line exam much quicker than the estimates. - Roger Hammond, KC0MWM, The Printed Circuit, June 2010 issue

==> TIP: D-RATS LOOKS GOOD FOR ARES APPLICATIONS

D-RATS <http://d-rats.danplanet.com/> is a file and messaging platform for D-STAR with ARES® applications for operations and planning. According to its Web site, features include instant-messaging style chat; multiple automatic messages at varying schedules, containing static or dynamic content; File Transfers; Online/offline status notifications; multi-platforms Linux/UNIX, Windows, and MacOSX; Canned messages; Chat logging; Tabbed chat interface to filter traffic based on a search string; Structured data (i.e. Forms) transmission with multiple form templates, graphical editor, and HTML exporting Form-to-e-mail gateway support for providing e-mail access to distant stations; Winlink2000 gateway; Automatic message forwarding; Arbitrary TCP forwarding over the RF channel; support for using a TNC or a network connection instead of a D-STAR radio; GPS position tracking, distance/direction calculation, static beacon support, and integrated map viewer <http://d-rats.danplanet.com/documentation/4/17-map-viewer> with offline caching; and a Network-linkable repeater/proxy co-application. Worth checking out! - K1CE

==> K1CE FOR A FINAL

A recent issue of the ARES E-Letter contained an item on regulatory aspects of emergency communications in the wake of the Haitian earthquake, and unfortunately it has been misinterpreted to be critical of all of the work done by radio amateurs involved in difficult relief missions. It was published out of context and that is my fault as editor: It was a response to the narrow scope of an e-mail inquiry I received. It absolutely was not a reflection nor condemnation of the

University of Miami/Project Medishare Ham Radio Mission, which I very proudly covered in an earlier issue that contained the excellent article by Mr. Jack Satterfield, W4GRJ. I apologize for my error.

ARES is 75 years old next month! I am proud of being associated with the program that has rendered so much assistance to the victims of disaster for so many years. It has also been a privilege to work with so many of you over those years who are some of the finest people I have ever known. You should be proud, too. See you next month! - 73, Rick K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

==> + ARRL IN ACTION: OKLAHOMA TOWN AGREES RFI ORDINANCE DOES NOT APPLY
TO HAMS

Acting on behalf of an ARRL member in Midwest City, Oklahoma -- who
had been sent a notice by the town asserting that he was in violation
of a town ordinance regarding radio frequency interference -- the ARRL
notified Midwest City officials that only the FCC is empowered to
regulate such matters. On August 4 -- two weeks after ARRL General
Counsel Chris Imlay, W3KD, sent the letter to town officials -- Midwest
City Assistant City Attorney Randal D. Homburg sent an e-mail to the
ham to let him know "the previously delivered notice is hereby
rescinded. There will be no citations issued and thus, the issue is
moot." Midwest City is in the Oklahoma City metropolitan area. Read

==> SPECTRUM DEFENSE MATTERS -- TO EVERYONE

In July 2010, the ARRL launched a newsletter called Spectrum Defense
Matters to keep its members informed on issues related to the
protection of Amateur Radio frequencies. This newsletter -- published
on the ARRL Web site a few times each year -- will cover both domestic
and international topics. Your financial support is vital to support
ARRL's work to protect your operating privileges by contributing
generously to the ARRL Spectrum Defense Fund.

Saying that ARRL volunteers and staff work tirelessly every day to
protect our spectrum access, ARRL Chief Executive Officer David Sumner,
K1ZZ, notes that the ARRL is in partnership "with radio amateurs
throughout the world, coordinating our efforts through the
International Amateur Radio Union. In future issues of this newsletter
we plan to report to you on the status of those efforts as we prepare
for the 2012 World Radiocommunication Conference and as we meet other
challenges."

"You can take an important step right now to support ARRL's commitment
to defending the Amateur Radio Spectrum," Sumner explained. "Please
make a generous contribution to the Spectrum Defense Fund by mail, on
the Web or by phone. Perhaps you'll consider a very easy way to
contribute by pledging $10 or $20 or $100 a month. Your financial
commitment, over and above your annual dues, will ensure that ARRL has
the resources to represent you and protect your operating frequencies."
Read more here
<http://www.arrl.org/news/spectrum-defense-matters-to-everyone>.

==> + FCC: ARRL FILES PETITION WITH FCC TO DENY APPLICATIONS WITH
RECONROBOTICS

On August 4, 2010, the ARRL filed a Petition to Deny Applications
with the FCC to deny 68 pending Public Safety Pool license applications
associated with the ReconRobotics Video and Audio Surveillance System.
Each license application is accompanied by a waiver request to permit
operation of the devices in the 433-445 MHz band. The applications were
coordinated by APCO International Inc Licensing Services -- the
frequency coordinator for the public safety land mobile radio services
-- and would allow the use of the Recon Scout product currently being
marketed by ReconRobotics pursuant to an FCC waiver. Read more here
<http://www.arrl.org/news/arrl-files-petition-with-fcc-to-deny-applications-w
ith-reconrobotics>.

==> + FCC: ARRL COMMENTS ON FCC 5 MHZ PROPOSALS

On July 13, the ARRL filed its comments in response to the FCC's
Notice of Proposed Rulemaking (NPRM) in ET Docket No. 10-98. The NPRM
was issued in response to an ARRL Petition for Rule Making -- RM-11353

-- filed in October 2006. In its 2006 Petition, the ARRL had sought modest improvements in operating privileges in the so-called "60 meter" band, which presently consists of five channels on which General, Advanced and Amateur Extra class licensees may use upper sideband (USB) emission and no more than 50 W effective radiated power (ERP) relative to a dipole antenna. Amateur use of these five channels is on a secondary basis and must not cause harmful interference to authorized stations in the mobile and fixed services. US amateurs were first authorized to operate on 60 meters in 2003-- thanks to agreement by the Interdepartment Radio Advisory Committee of the National Telecommunications and Information Administration -- that with such limits, amateur use would be compatible with federal government requirements. Read more here <http://www.arrl.org/news/arrl-comments-on-fcc-5-mhz-proposals>.

==> + FCC: FCC DENIES PETITIONS ON CALL SIGN USAGE, EXPANDED PRIVILEGES

On August 9, the FCC denied two Petitions for Rule Making: one to prohibit what the petitioner called "the false or unauthorized use of an Amateur Radio call sign," and one to expand privileges on the 15 meter phone band for General and Amateur Extra class licensees. Read more here <http://www.arrl.org/news/fcc-denies-em-petition-em-s-on-call-sign-usage-expanded-privileges>.

==> + AUTHORITIES BELIEVE GARY HAAS, N5VGH, AND WIFE KILLED BY ESCAPED CONVICTS

The remains of Gary Haas, N5VGH, and his wife Linda of Tecumseh, Oklahoma, were found in a charred camper on a remote ranch in eastern New Mexico on the morning of Wednesday, August 4. Authorities believe they were killed by convicts, along with an accomplice, who had escaped from an Arizona prison on July 30. Authorities said that the Haas' bodies and camper were found by a rancher on his property, not far from Santa Rosa, one of the New Mexico cities that the couple frequented; their truck was found in Albuquerque, 100 miles away. Read more here <http://www.arrl.org/news/authorities-believe-gary-haas-n5vgh-and-wife-killed-by-escaped-convicts>.

==> ON THE AIR: ROOKIES TO RAID THE AIRWAVES FOR SECOND SSB ROOKIE ROUNDUP

With the rip-roaring success of the first-ever ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> this past April -- modeled on the popular Novice Roundups from a decade or two ago -- the ARRL is pleased to announce that a second Rookie Roundup is coming this Sunday, August 15 from 1800-2359 UTC. You don't have to be a rookie to participate. For the purpose of the Rookie Roundup, a "rookie" is defined as someone who has been licensed for three years or less, regardless of license class. If you received your license in 2008, 2009 or 2010, you are eligible to compete as a rookie. Non-rookies are encouraged to work the rookies and be an Elmer to those just starting out. It is an immediate,

hands-on way to teach good operating practices to those just getting started. Read more here <http://www.arrl.org/news/rookies-to-raid-the-airwaves-for-second-ssb-rookie-rounduphttp:/www.arrl.org/news/rookies-to-raid-the-airwaves-for-second-ssb-rookie-roundup>.

==> ON THE AIR: "DARK TIME" IS THE RIGHT TIME FOR THE PERSEIDS

<http://www.arrl.org/images/view/News/perseidmap_strip.jpg> The last time the annual Perseids meteor shower happened during a run of moonless nights -- known by astronomers as "dark time" -- was in 2007; there was a new moon on August 10, so this is a prime time to view a spectacular sky show. Not only are the meteors fascinating to watch, they also leave short-lived streams of ionized gas in their wake. As hams have known for years, these meteor trails are excellent reflectors of radio waves. Read more here <http://www.arrl.org/news/dark-time-is-the-right-time-for-the-perseids>.

==> + ON THE AIR: INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND 2010

Almost 300 lighthouses in more than 40 countries and territories -- from Argentina to Wales -- will be on the air for 2010 International Lighthouse/Lightship Weekend (ILLW <http://illw.net/>), organized by Scotland's Ayr Amateur Radio Group (AARG <http://www.gm0ayr.org/>). The event, held for the 12th year in a row, takes place Saturday, August 21 0001 UTC through Sunday, August 22 2359 UTC. While not a contest, the ILLW is more of a QSO Party and Amateur Radio demonstration. The ILLW aims to raise public awareness of lighthouses and lightships and the need for their preservation and restoration, promote Amateur Radio and foster international goodwill. Stations at more than 40 US lights are expected to be on the air for the event, and several stations will identify with special event call signs. Participating lighthouse/lightship stations do not have to be inside the structure or on the vessel itself; a Field Day-type setup at or adjacent to the light is sufficient. More information about the event, including a registration form <http://illw.net/index.php?option=com_content&view=article&id=49&Itemid=56> and list of all lights scheduled to be on the air <http://illw.net/index.php?option=com_content&view=article&id=48&Itemid=55>, is available on the ILLW Web site <http://illw.net/>. The ILLW also has a Facebook page <http://www.facebook.com/pages/ILLW/108422039190274>.

==> + DAYTON HAMVENTION® COMMITTEE ANNOUNCES 2011 THEME

When the Dayton Hamvention <http://www.hamvention.org/>® opens May 20, 2011 for its 60th consecutive year, its theme -- Global Friendship -- will reflect an important part of ham radio, said 2011 Hamvention General Chairman Michael Kalter, W8CI: "The theme emphasizes how the technology continues to bond Amateur Radio operators from all over the world." The 2011 Dayton Hamvention runs May 20, 21 and 22 at Hara Arena, just outside Dayton in Trotwood, Ohio.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week:

Amateur Radio Newsline(tm) Report 1722 - August 13 2010

Amateur Radio Newsline report number 1722 with a release date of
Friday, August 13 2010 to follow in 5-4-3-2-1.

The following is a QST. Authorities across the West search for the
killers of a ham radio operator and his wife in rural New Mexico. Also
the FCC refuses to make the unauthorized use of a ham radio call a
form of identity theft or to expand voice privileges on 15 meters.
Find out the details on Amateur Radio Newsline(tm) report number 1722
coming your way right now.

RADIO CRIME: POLICE IN SOUTHWEST SEARCH FOR MURDERERS OF HAM OPERATOR
ANDHIS WIFE

Authorities across the Western United States and Canada are searching
for an escaped convict and his accomplice who may have been involved
in the brutal murder of Gary Haas N5VGH and his wife Linda. This
after their bodies were found in their burned out travel trailer in
Santa Rosa, New Mexico. Amateur Radio Newsline's Bill Pasternak,
WA6ITF, has the latest on this developing story:

--

The badly burned skeletal remains of a couple believed to be Gary, N5VGH,
and Linda Haas were found by a rancher in a charred trailer near Santa
Rosa, New Mexico, on Wednesday, August 4th. State Police have confirmed
that an Oklahoma couple by that name owned the trailer as well as a pick-up
truck that was later found abandoned in Albuquerque.

New Mexico State Police Major Robert Shilling said on Saturday, August 7th
that 45 year old John McCluskey has been linked through forensic evidence
to the couple's remains. Shilling declined to provide specifics and would
not say whether police think the other two people McCluskey is believed to
have been traveling with, Tracy Province and Casslyn Mae Welch, are also
tied to the killings.

Province was captured on August 9th in Wyoming. Also arrested was Claudia
Washburn, who is the mother of John McCluskey. She was taken into custody
in Jake's Corner, Arizona on allegations that she provided financial and
other types aid in the flight of her son, as well as Province, and Welch.

With Province now behind bars, most involved in the search believe that McClusky and Welch are hiding out in the Yellowstone Park area of Montana or Wyoming or may have even crossed into Canada. But in a bizarre twist, U.S. Marshals for Arizona say the escaped inmate and his fianc&#65533;e may be as far away as Arkansas. Authorities say that a couple who robbed a store in Gentry, Arkansas on Wednesday morning, August 11th fit the description of John McCluskey and his fianc&#65533;e, Casslyn Welch. Gentry is in northwest Arkansas, near Bentonville, where Welch's mother lives. Police are reportedly trying to obtain surveillance video from the robbery. No matter where they are, McCluskey and Welch are considered to be armed and extremely dangerous.

The two victims, Gary and Linda Haas were from Tecumseh, Oklahoma. Gary Haas and was believed to be a member of Tecumseh Amateur Radio Club.

According to a search warrant affidavit obtained by The Oklahoman newspaper, a relative told authorities that the Haas were traveling to Colorado for their annual camping trip. The relative told police they typically camped in state parks and they would often stay near Santa Rosa.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More on this story as soon as news updates are made available.

(KRQE, The Oaklahoman, NewsOK.com, US Marshalls Office release)

**

RADIO LAW: FCC SAYS NO TO PART 97 ID THEFT RULES CHANGE REQUEST

The FCC has dismissed a request from a California ham who wanted to make the unauthorized use of a ham radio call sign a form of identity theft covered under Part 97 of the the Amateur Service rules.

Back in November of 2009, Eric Hilding, K6VVA, of Morgan Hill, had filed a petition for rulemaking that requested Part 97 be amended to prohibit the false or unauthorized use of an amateur radio call sign. According to the dismissal order, the petition primarily expressed concern about the misappropriation of call signs on internet bulletin boards.

In his petition Hilding stated that this should be considered a form of identity theft. He proposed that Part 97 be amended to prohibit any misrepresentation or unauthorized use of someone else's amateur call sign over the public airwaves, on Internet packet cluster system postings, cellular or non-cellular telephone connections, electronic based communications or print media formats of any other nature.

But in dismissing Hilding's rules change request the FCC stated that Part 97 regulates only the Amateur Radio service. As such and that controlling other forms of communications would be beyond the scope of Part 97. Also, since Part 97 already prohibits amateur stations from transmitting false identification, the FCC concludes that the rules already in place address

the misuse of amateur call signs to the appropriate extent, and that Hilding's petition presents no grounds for amending it. (FCC)

**

RADIO LAW: FCC TURNS DOWN PETRION TO EXPAND VOICE PRIOVELEGES ON 15 METERS

The Federal Communications Commission has turned down a request from a New York ham to expand the spectrum available on 15 meters for phone operation.

In his December 2009 petition to the regulatory agency, Richard Ebeling, K2UTC, of White Plains had
proposed that the segment of the 15 meter amateur service band authorized to General Class and Amateur Extra Class licensees for voice emissions be increased by seventy-five and fifty kilohertz, respectively. In his petition Ebeling primarily argued that the frequency segment that General Class licensees may use for phone emissions in the 15 m band should be returned to what it was prior to the Commission's Incentive Licensing decision in 1967, which he believed unfairly disadvantaged General Class licensees.

But in its August 9th dismissal order the FCC noted that it had recently extended the spectrum amateur stations could use for voice communications in various amateur bands. In particular, the spectrum that General Class licensees may use for phone emissions in the 15 meter band was increased by twenty-five kilohertz. The FCC noted that Ebeling's Petition did not that action, or otherwise present evidence that the current amount of spectrum in the 15 meter band available for voice communications is inadequate. (FCC)

**

RADIO LAW: ARRL FILES MOTION TO DENY LICENSES FOR RECON ROBOTICS ROBOTS IN AMATEUR 70 CM BAND

The ARRL is again saying no to sharing the amateur radio spectrum with public safety robots. On August 4th the League filed a Petition to Deny Applications with the FCC to reject 68 pending Public Safety Pool license applications associated with the ReconRobotics Video and Audio Surveillance System.

Each license application is accompanied by a waiver request to permit operation of the devices in the 433 to 445 MHz band. The applications were coordinated by APCO International Inc Licensing Services and would allow the use of the Recon Scout product currently being marketed by ReconRobotics pursuant to an FCC waiver. APCO International Inc Licensing Services is the frequency coordinator for the public safety land mobile radio services --

Dan Henderson, N1ND, is the ARRL's Regulatory Information Manager. He says that while several issues factor into the League's Petition to Deny these applications, most notable is that the Commission has not acted on an earlier ARRL Petition for Reconsideration in WP Docket 08-63, which has

been pending since March of this year. Henderson sat that petition raises issues that should be addressed prior to any action on the individual applications. He says that granting applications based on the Docket 08-63 waiver, which is not final, would be premature.

Henderson goes on to note that there is the potential for significant interference from these devices to licensed operations in the amateur 70 cm band. Therefore the ARRL urges the FCC to take thoughtful and expedient action on our Petition for Reconsideration. (ARRL)

RADIO LAW: MIDWEST CITY RESCINDS VIOLATION NOTICE ISSUED TO LOCAL HAM

A follow-up to the story of the ham in Midwest City, Oklahoma who had been sent a notice by the town last June asserting that he was in violation of a local ordinance regarding radio frequency interference. That ham, now identified as David Box, K5DBX, has been posting on the situation to QRZ.com, and the latest is he reports is good but not great.

The good part is that on the evening of August 4th, Box says that he received an email from Midwest City and the office of its City Manager, that retracted the Notice and Order left at his address in June. The bad news is that the city has decided to retain the ordinance as written.

Box says that he has provided to the city, what he considers to be a more suitable solution through redrafting the ordinance to bring it into compliance with the Communications Act, rather than direct conflict with it. He says that he will have to see how the city will responds and address this portion of the matter.

By way of background, you may remember that two weeks ago we reported that ARRL General Counsel Christopher D. Imlay, W3KD, had written to Midwest City's political leaders. Imlay letter stated categorically that the city had absolutely no legal ground on which to enact or enforce its ordinance. He went on to state that Midwest City's ordinance 27-3(9), which purports to regulate RFI is preempted on its face by federal oversight and is therefore the city's ordinance is null and void. He also expressed his hope that it will not be necessary to submit the Midwest City ordinance to the FCC by way of a Request for a Declaratory Ruling but warned that would be the ARRL's planned course of action unless the ordinance is rescinded.

So far Midwest City has refused to comply with Imlay's demand to withdraw the RFI ordinance. But in his letter retracting the citation issued to

Box, Midwest City Assistant City Attorney Randal Homburg says that in the event there are future complaints from any citizen about a neighbor's use of these licensed devices, the city will direct the complaining party to file their complaints with the FCC. (K5DBX via QRZ.com, ARNewsline(tm), ARRL)

RADIO POLITICS: ARRL BOD MEETING HIGHLIGHTS

Some highlights from the recent ARRL Board of Directors Meeting held in Windsor, Connecticut. Of major concern to ham radio was a report from General Counsel Chris Imlay, W3KD, that the recently released National Broadband Plan could affect the amateur spectrum near 2.3 GHz. In hisd report W3KD noted that nothing is sacred and even spectrum occupied by the Department of Defense is being challenged.

On a more positive note, ARRL Legislative Consultant John Chwat reported that his office had received more than 2400 letters from amateurs supporting HR 2160 and S 1755. He noted that there are only a few more weeks left in the 111th Congress and that the ARRL must continue efforts its efforts to have the House consider these bills. He also reported on the progress of legislation concerning the tax deduction for personal vehicle mileage on behalf of charitable organizations and the ARRL's efforts to avoid impact on mobile operating in distracted-driving legislation.

The complete Minutes of the 2010 Second Meeting of the ARRL Board of Directors are available on the ARRL Web site. Its at www.arrl.org. (ARRL)

**

RADIO LAW: MONTGOMERY ALABAMA BANS NON EMERGENCY MOBILE COMMS

Hams operating mobile in Montgomery, Alabama, have won a rather narrow partial exclusion to the city's tough new distracted driver law, but only during emergencies. This after the Montgomery City Council passes an ordinance making hand-held cell phone use, including texting while driving a secondary offense.

Once the distracted driving ordinance takes effect in the coming weeks, a driver would have to violate one of the primary rules of the road, such as speeding or running a stop sign while using a cellphone before he or she could be cited for distracted driving.

The ordinance does allow for some exceptions. These include someone using their cell phone to report a traffic accident or a crime. Emergency personnel, employees of utility companies and an operator of an amateur radio are also excluded from the new ordinance, but only as long as their communications devices are being used during an actual emergency.

Whats not clear is whether the new ordinance applies only to cellular and texting devices or to other two way radio gear as well. In other words, would charting on your local repeater with a mic in your hand while driving

be considered a distracted driving practice and subject to the new law? And if it does, how would a police officer be able to determine if the ham radio was or was not of an emergency nature let alone what constitutes an emergency in any given instance. (montgomeryadvertiser.com)

RADIO ACCIDENTS: HIGH WINDS FELL WWVA TOWERS

One of the nations legendary AM broadcast stations was taken off the air on Wednesday, August 4th by the fury of Mother Nature. At about around 4 in the afternoon all three of Wheeling West Virginia's WWVA broadcast towers were knocked down due to severe storms and winds in excess of 70 mph. Weather experts say wind speeds at the top of the 400 foot towers could have been in excess of 100 mph at the time of the incident.

WWVA first began broadcasting in at 2:00 a.m. on December 13, 1926 using a home-built 50-watt transmitter in the basement of the home of inventor John Stroebel. One week earlier, the Federal Communications Commission had granted a broadcast license on 860 kHz to the radio station WWVA. In May 1941, the FCC moved WWVA to 1170 kHz, and in August of that same year, granted the ultimate power for AM stations of 50,000 watts and making it the most powerful AM station in the entire state of West Virginia.

In reality, the stations three tower directional array is located in near-by St. Clairsville, Ohio with its studio in Wheeling. According to a statement on the stations website, engineering crews are working to get some temporary antennas in place as soon as possible, so the station can return the programming to the 1170 signal. In the meantime, WWVA's programming can be heard on the 1400 kHz signal of its sister station WBBD which normally plays Adult Standards.

WWVA is currently owned by Clear Channel Communications. Images of the fallen array are on line at tinyurl.com/ towersdown (WWVA.com, Wikipedia)

THE SOCIAL SCENE: SWODXA DINNER MOVES TO NEW LOCATION FOR 2011

Turning to the ham radio social scene, 'Southwest Ohio DX Association president Don DuBon, N6JRL, has announced that 26th annual DX Dinner will be held on Friday, May 20, 2011in conjunction with Dayton Hamvention. The new venue for this longtime gathering will be the Dayton Marriott located at 1414 S. Patterson Boulevard. DuBon says that the Marriott has been recently remodeled and has a much larger capacity than the previous location. More information is on-line at www.SWODXA.org. (OPDX)

**

THE SOCIAL SCENE: THIRD ANNUAL ASIA PACIFIC DX CONVENTION NOV. 5 - 7

The 3rd Asia Pacific DX Convention or APDXC will be held at the Osaka International House in Osaka, Japan, between November 5th and the 7th. Presentations will be conducted in English and will include

discussions on some recent DXpeditions along with technical discussions. There will also be an opportunity to join a tour to visit the Icom factory and participate in a technical session led by the Icom High Frequency radio design team. Program details and updates will be posted on line at www.apdxc.org as they become available. (OPDX)

**

RADIO BUSINESS: CQ VHF MAGAZINE INTRODUCES NEW WEB DESIGN

And continuing its company-wide update of its magazine websites, CQ Communications, Inc. has announced the launch of a new and easier-to-navigate website for CQ VHF magazine. Like the recently updated sites for WorldRadio Online and Popular Communications, the new CQ VHF site features a cleaner look and a streamlined user interface to make it quicker and easier for visitors to find what they are looking for.

The CQ VHF Website update coincides with posting of the highlights for the Summer 2010 issue. Current highlights include sample pages in full-color layout. This to give prospective readers the ability to see what the magazine itself looks like in print. Also on the updated site are segments of previous issues reaching back to 2006.

CQ VHF is a quarterly magazine edited by Joe Lynch, N6CL devoted to "Ham Radio Above 50 MHz." First published in 1996, it combines articles designed for newcomers with historical and technical features best appreciated by more experienced VHF operators. You can browse the new web layout at www.cq-vhf.com. (CQ Publishing)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**;

CHANGING TECHNOLOGY: NZ ATV TO BE FORCED TO GO DIGITAL

Digital Amateur Television is coming to New Zealand, but not necessarily because the Kiwi ham community wants to make the change. Jim Meachen, ZL2BHF, is here with the details:

--

Hams down here in New Zealand will soon be forced to go digital if they wish to continue Amateur Fast Scan Television operations. This after our nations government regulators announce that all analogue modulated TV transmissions in the VHF and UHF broadcast bands, which include Channel 39 used by ham

radio, will close down in March 2015, or at some earlier date. At that time the upper end of the New Zealand UHF television allocation will be cleared of television, so that the vacated spectrum can be used for next-generation mobile communications.

One consequence of these decisions is that the existing television transmissions will need to convert to digital so as to fit into about half of the present spectrum, requiring that their transmission parameters need to be more closely defined than at present. For the Amateur Television service this means that each Radio License for analogue-modulated TV needs to be replaced by a Spectrum License for analogue-modulated TV. As part of the process, our government telecommunications regulator has cancelled all of the existing Radio Licenses for Channel 39 TV Repeaters. Operators of Channel 39 TV Repeaters need to close them down to avoid receiving an Infringement Notices from the regulatory agency.

Those wishing to operate their analogue-modulated Channel 39 ATV repeaters between now and the 2015 Digital TV Switch-Over, will be required to apply for a Spectrum License. However this Spectrum License for analog ATV transmitters will only exist until the Analogue shut down date. Ham Radio access to New Zealand Channel 39 which runs from 614 to 622 MHz was made by footnote to the nations telecommunications regulations many years ago when a chunk of the 432 MHz band was taken from the amateur radio service.

For the Amateur Radio Newsline, Im Jim Meachen, ZL2BHF, in Auckland

--

At airtime, its not known how many of the nations Amateur Television Repeaters will apply for a new Spectrum License to at least temporarily keep their analog systems operational and on the air. (NZART, ZL2BHF)

**

HAM RADIO IN SPACE: AO-51 BACK IN SERVICE AFTER OUTAGE

Turning to ham radio space related matters, AMSAT Vice-President of Operations, Drew Glasbrenner, KO4MA, reports that after a brief outage aboard AO-51 reported on Saturday, July 31 that the ham radio satellite had been restored to service. The 145.92 slash 435.300 repeater was set to run with the 67 Hz tone required to activate the satellite. Power output was reported as 740 milliwatts. (ANS)

**

HAM RADIO IN SPACE: AMSAT UK SPACE COLLOQUIOM VIDEOS ON-LINE

Videos of the presentations given at the recent 25th AMSAT-UK International Space Colloquium are now available on the web courtesy of the British Amateur Television Club. This includes a short video produced by the BATV group showing how club members go about covering events such as the colloquium using a lot of pro-sumer grade audio and video gear to bring you close to broadcast quality pictures and sound. These productions can be viewed and download them at www.batc.tv. Simply click on the 'Film

Archive' icon and then select an 2010 AMSAT video. (GB2RS, Southgate)

**

WORLDBEAT: EUROPE HAMS TOLD TO LISTEN FOR CHURCHERS ON 10 METER FM

Amateurs and SWL's across Europe are being asked to keep an ear on or about 28.265 FM. This for transmissions believed to be coming from churches with transmitters capable of delivering a signal strength well over S-9. Reception reports and all other information should be sent to the IRTS Intruder Watch Coordinator Ger McNamara, EI4GXB. His e-mail address is ei4gxb (at) gmail (dot) com. (IRTS)

**

THE CONTREST CORNER: ICOM UK TO HOST CONTEST UNIVERSITY UK IN OCTOBER

From the radiosports desk cones word that Icom UK will again be sponsoring Contest University UK on Saturday October 9th, This, in conjunction with the 2010 RSGB Convention, which will be held at the new venue of Horwood House near Milton Keynes.

Now in its 3rd year, Contest University UK is based on the highly successful international format that has seen many radio amateurs throughout the world learn about this exciting facet of amateur radio from experienced practitioners. As such it's a place where European hams can learn all the skills and secrets to start their journey in becoming a contester, and learn some of the secrets to stay ahead of competitors.

If you have any questions regarding Contest University UK, please contact course director Mark
Haynes, M0DXR atby e-mail to mark.haynes (at) yahoo (dot) co (dot) uk. (GB2RS)

**

DX

In DX, word that YJ0VK will be the call of the upcoming DXpedition to Vanuatu. The team is made up of four Australian hams who will be operating from August 27th through to September 2nd. on the High Frequency bands from Vanuatu's main Island of Efate. Special attention will be paid to the WARC bands. More information along with QSL routing is available on line at yj0vk.vkham.com

FK8IK, will be on the Chesterfields Islands as part of a scientific expedition through August 19th. Look
for him to be active during his spare time on 80 through 10 meters using CW with 100 watts into various dipoles. QSL only via his home address of P.O. Box 14639, 98803 Noumea, New Caledpnia.

EA4DB is reportedly operating from the Seychelles as S79DB. Modes used are CW, SSB, RTTY and PSK on 40 through 10 meters. QSL to his home call either direct or electronically via Logbook to the World or eQSL.

IW0QO, is working from portable 9A from Losinj Island. He should be there through August 18th. QSL via his home callsign either direct or via the bureau.

DK2MT plans to be active stroke F from Oleron Island until the 20th August. If you make contact. QSL via his home DK2MT direct or via the bureau.

Lastly, W2GD, will be active from Aruba as P40W between November 22nd and December 1st. His operation will include the CQWW DX CW Contest on November 27th and 28th as a Single-Op All-Band entry. Operations outside of the contest will be on 160, 30, 17 and 12 meters as time permits. QSL via Logbook of the World or direct to N2MM. Logs will be loaded on Logbook of the World on his return to
the USA.

(Above from various DX news sources)

THAT FINAL ITEM: FIRST TUBSAT TO BE MUSIC SAT

National Public Radio says that one of the first of the do it yourself low orbit satellite kits from Interorbital Systems has been purchased by professional astronomer. Alex Antunes says that he will use it to create natures own music from space.

As reported a few weeks ago here on Amateur Radio Newsline, California-based Interorbital Systems, is offering a personal satellite kit for $8000 called TubeSat that includes a ride into space. Now in an N-P-R interview Antunes says that the sun interacts with the Earth's magnetic field in the ionosphere and causes all sorts of activity. He says that his goal is to use his satellite to put something in orbit to convert that interaction directly to sound data so we can hear it.

The first TubeSats along with an amateur radio CubeSat are currently slated to launch on an Interorbital Neptune 30 rocket from Tonga at the end of this year. You can listen to the NPR interview with astronomer Alex Antunes at tinyurl.com/musicsat (NPR)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 15th August 2010

The news headlines

New national amateur radio society for Egypt

RSGB Convention bookings up

BATC special television activity day

The Egyptian Radio Amateurs Society for Development, ERASD, has been set up as the new national official representative body for radio amateurs in Egypt. According to the IARU Region 1 website, even though amateur radio has been present in Egypt since the early 1920s, there was no officially recognised society to represent radio amateurs in that nation. More information about it is online at www.qsl.net/eara.

The early bird savings available for the RSGB Convention bookings have been extended until 1 September. Bookings are up on last year but this is no problem as the new venue, Horwood House near Milton Keynes, is a larger venue. Check out the RSGB Convention website for details of tickets, overnight stays and lecture stream details at www.rsgb.org.uk/rsgbconvention.

The BATC is sponsoring a special television activity day on 22 August. Called Network Day, high power ATV stations will be located on high sites at Winter Hill, North Yorkshire Moors, Merryton Low, Brown Clee and Cambridge. A number of other stations will be active from North London and the Lincolnshire Wolds. These stations will all be equipped with analogue FM equipment and some will also have digital ATV transmitters. This is a great opportunity to contact many high power stations with equipment for 23cm, 13cm and 3cm. Several stations will have high power 70cm digital transmitters using 2 megasamples per second QPSK on 436 or 437MHz. Digital free to air DVB-S satellite receivers are very low cost and simple to install on your existing 23cm system and Network Day is a good opportunity to set up a digital receiver. The intention is to link some of the stations and create a network to relay signals over long distances. So dust off your ATV receivers and transmitters and try a contact with one of the stations. Call in for talkback will be 144.750MHz with working channels close by. This event coincides with the 5.7GHz cumulative contest and several of the stations will be working on the same high sites. Information and list of stations can be found at www.batc.org.uk/forum/

Gerald Wells, known as Gerry, is the curator of the British Vintage Wireless and Television Museum in Dulwich, London, which was featured in the December 2008 RadCom. His museum is not open to the general public, but guided tours are available by appointment. Dan Shepherd has recently finished making a radio documentary about Gerry for the BBC World Service. The programme will be broadcast at 9am BST on 20 August, although it is worth checking the BBC World Service website nearer the date as the schedule can change.

Following success in the June Advanced exam, a number of local amateurs have asked if a Morse class can be run in Bath. Steve Hartley, G0FUW, has agreed to arrange a course if there is sufficient interest. It is proposed to run the classes one evening each week 7 to 9pm from early September. Costs will be limited to classroom hire so the more that take part, the less it will cost. If there are any would-be key bashers in the Bath area they should contact Steve on 01225 464394 between 7 and 9pm or via email to G0FUW@tiscali.co.uk.

Videos of the presentations given at the 25th AMSAT-UK International Space Colloquium are now available on the web. They can be viewed and downloaded at www.batc.tv. Click on the Film Archive icon and then select a 2010 AMSAT video. The presentation given by RSGB Microwave Manager Murray Niman, G6JYB, called 2010 AMSAT What's New provides a good overview of the process involved in getting new amateur and amateur satellite service allocations. Currently there are no global primary amateur bands between 146MHz and 24GHz.

The summer Harlaxton amateur radio get-together and field day will take place on 28 and 29 August at the Sports and Social club, Harlaxton, near Grantham, which is postcode NG32 1HX. There will be amateur radio operations that visitors can join as well as plenty of tea and coffee. A barbecue is planned for the Saturday afternoon.

Welland Valley Amateur Radio Society, based in Market Harborough, is having an open evening. The club would like to invite anyone who has an interest in radio or electronics of any kind to visit them between 7 and 9pm on Monday 16 August in the Village Hall at Great Bowden. They plan to have a range of amateur radio equipment on display for the evening from VHF and UHF to short wave receivers and scanners. The operation will demonstrate voice, data, television and Morse communications.

John, G3XYF is coordinating information for the annual Churches and Chapels on the Air event that takes place this year on Saturday 11 September. If you are planning to put your local church or chapel on the air, please email John with the information to g3xyf@btconnect.com. For more information on Churches and Chapels on the Air, go to www.wacral.org.

The Plymouth Training Team is planning to run an Intermediate level amateur radio course in the near future. Potential candidates should contact Bob, G7NHB on 01752 343177 or by email to g7nhb@hotmail.co.uk.

Tamworth Amateur Radio Society will be starting a Foundation course on 11 September for three Saturdays. Enrolment is on Thursday 2 September between 8 and 9pm at St. Francis Church, Masefield Drive, Tamworth. Further details can be obtained from Bob, G1BCZ, via email to tamworthradio.training@gmail.com.

Leicester DX Amateur Radio Group is holding a field weekend from 20 to 22 August at Tilton on the Hill. Visitors will be very welcome. Contact Ellen, M6LDX by email to leicesterdx@mail2world.com or phone on 0788 524 5391 for details.

And now for the details of rallies and events for the coming week.

The Friskney & East Lincolnshire Communications Club Rally takes place today, 15 August, at the Friskney Village Hall, Church Road, Friskney, Lincs. This is about 6.5 miles south of Skegness. Doors open from 10am to 2.30pm and entry is ?1.50. Details from Bren, 2E0BDS, on 01754 820 204.

Next weekend, on 22 August, the Wildern Boot Sale Andover, takes place at Wildern Village Hall. The nearest postcode for the event is SP11 0JE for satnav users. Doors open at 10am and the entry fee is ?1.50. Pitches are ?6 and tables in the hall ?8. Details from Martin Smith on 01980 612 070.

Also on 22 August, the Rugby Annual Radio Rally takes place at Princethorpe College, Princethorpe, Rugby CV23 9PX. Doors open from 10am to 4pm and the entry is ?2. Contact Tony on 07759 684 411.

Now for the news of special events

Swansea ARS will be operating on the Helwick lightship at Swansea Marina on Saturday and Sunday, 21 and 22 August, for International Lighthouse and Lightship Weekend. Final planning for the event will take place at the preceding club meeting on the 19th. For details, please contact Roger, GW4HSH on 01792 404422.

Preston ARS is also taking part in the International Lighthouse and Lightship Weekend on 21 and 22 August from Ploverscar lighthouse in the Morecambe Bay area using the call GB2PSL. The plan to use the 80, 40 and 20m bands as well as 2m. More details can be found on qrz.com.

South Tyneside Amateur Radio Society will be working from Souter lighthouse with the callsign GB2SJ over the International Lighthouse and Lightship Weekend on 21 and 22 August. South Tyneside ARS will be working all modes and bands including data modes. Visitors are always welcome. Details can be found on the club website at www.starsradio.co.uk.

There are hundreds more stations going on the air from lighthouses and lightships all around the world for the International Lighthouse and Lightship Weekend on 21 and 22 August. For a full list of those stations taking part and other information on awards, visit http://illw.net.

PA10WSF will be on the air until 30 August to mark the World Statues Festival in Arnhem taking place on 28 and 29 August. It will be operating mainly CW and several digital modes. A special QSL is available via bureau, direct or by eQSL.

And now the HF DX news compiled from 425 DX News and other sources

There will be an IOTA expedition to Bothnian Sea Island, IOTA reference EU-126, between 19 and 22 August. Using the callsign OH9AA/P, they plan to use a Spiderbeam and ground plane. Then the team plan to put SI0TA on the air from Seskar in northern Sweden from 23 to 25 August. Check out the website www.iota.eu.tt.

Steve McAdams, GJ7DNI will be driving across France in a 1959 Commer camper van and will be working holiday style on the 40 and 80m bands between 16 and 30 August. He will be using 100 watts.

IK2NCJ will be active as D4C from Sao Vicente Island, which is IOTA reference AF-086, Cape Verde until 26 August. QSL via CT1ESV via the bureau, IZ4DPV direct or via LoTW.

Now the contest news

This coming week is a relatively quiet time for contesting. The final 4m Cumulative of the year takes place today, Sunday 15 August, between 1400 and 1600UTC. There's only a slim chance of Sporadic-E propagation in this one, because it's very late in the season. Using all modes, the exchange is signal report, serial number and locator.

In the WAE DX CW Contest, European stations work non-Europeans only. This takes place this weekend from 0000 on the 14th to 2350UTC on the 15th using all bands from 3.5 to 28MHz. The exchange is signal report and serial number.

On 17 August, the UHF UK Activity Contest takes place between 1900 and 2130UTC. Activity is on the 1.3 and 2.3GHz bands using all modes. The exchange is signal report, serial number and locator.

On the 22nd the 4th 2m Backpacker Contest is one in which you also have to exchange the first two letters of your postcode. Activity is between 1100 and 1500UTC and the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 2nd to the 8th of August, compiled by Neil Clarke, G0CAS on the 9th of August.

Solar activity varied between very low and moderate. A C class solar flare occurred on the 5th taking activity to low and then on the 7th to moderate when a M1 solar flare took place. A coronal mass ejection was associated with this flare. Solar flux levels were in the low 80's most days and averaged 83 units. The 90 day solar flux average on the 8th was 76 units. That's one unit up on last week. X-ray flux levels averaged B1 units and varied little day to day. Geomagnetic activity started at quiet levels, then at around 1700 hours on the 3rd a geomagnetic storm commenced, this last thorough till the 5th. This was in response to a

solar flare and an erupting filament that took place around the same time on the 1st. Both produced a coronal mass ejection. The 4th saw an Ap index of 42 units; this was the most disturbed day since the beginning of April. By the 6th activity had returned to quiet levels for the remainder of the period. The average was Ap 13 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 400 kilometres per second to 610 by the evening of the 3rd. Speeds then gradually declined to 320 kilometres per second by the end of the period. Particle densities were low except for the 4th which increased to 20 particles per cubic centimetre. Bz varied between minus and plus 4 nanoTeslas on the quiet days and between minus 12 and plus 15 nanoTeslas during the mag storm.

Bz remained negative for long periods which helped produce a VHF radio aurora between the evening of the 3rd and early on the 5th. Many contacts were reported, mostly on 50MHz, reaching all parts of Britain at times. Unfortunately, these mag storms are good news for the VHF operators but bad news for the HF men, when on the 5th MUFs dropped by several megahertz.

And now the solar forecast. This week solar activity is expected to be mostly very low. However, activity could increase on occasions to low, like it as done in recent weeks. Solar flux levels should be in the 80's for most of the week. Geomagnetic activity is expected to be quiet every day. A coronal hole disturbance is expected to arrive late in the day next Sunday, the 22nd. MUFs during daylight hours at equal latitudes should be about 19MHz for the south and 16MHz for the north. Darkness hour lows should be around 11MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of about 20MHz. The optimum working frequency with a 90 per cent success rate will be around 15MHz. The best time to try this path will be between 1000 and 1700 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 15 August Friskney and East Lincolnshire Communications Club has its rally. Contact Chris, M0MFP, on 01507 442240.

On Sunday 15 August Kettering & District Amateur Radio Society is having a social meeting. Details on the web at http://kdars.co.uk.

On Monday 16 August Gloucester Amateur Radio & Electronics Society is having a picnic and is operating at Saul Junction Canal. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 16 August South Birmingham Radio Society is having a natter night. Contact Don, on 0121 458 1603.

On Monday 16 August Welland Valley Amateur Radio Society has an open evening with displays, demonstrations and refreshments. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Monday 16 August Wythall Radio Club continues its Foundation course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 17 August Derby & District Amateur Radio Society is having a quiz night. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 17 August Kettering & District Amateur Radio Society has an operating night. Details on the web at http://kdars.co.uk.

On Tuesday 17 August Loughborough & District Amateur Radio Club has an HF operating night.. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 17 August Wythall Radio Club Homebrew. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 18 August Kettering & District Amateur Radio Society is having a gentleman's group afternoon. Details on the web at http://kdars.co.uk.

On Wednesday 18 August Lincoln Short-Wave Club is having a natter night and is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 18 August Midland Amateur Radio Society is on the air and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 18 August Telford & District Amateur Radio Society is preparing for HamFest. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 19 August Cheltenham Amateur Radio Association is having its Mobileers meet. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 19 August Kettering & District Amateur Radio Society is holding a training night. Details on the web at http://kdars.co.uk.

WIANEWS FOR WEEK COMMENCING AUGUST 15 2010.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING AUGUST 15 2010

-Top of the news-

HIGH FIVES AT VK100WIA CONTACT 10,000

Members of the Southern Peninsula Amateur Radio Club (SPARC) in Victoria
Australia are thrilled at having logged the 10,000 contact for the specialcallsign
VK100WIA.

Club Secretary John Ross VK3BJR reports that at 10.26am local time (0026
UTC) last Sunday the club activating VK100WIA at the Rosebud Scout Hall
put the online log of QSO's into five figures, by contacting Rob Tilbury
VK2LOZ at North Nowra in New South Wales.

There was an air of anticipation among club members leading up to the
milestone achieved by the contact on the 40m band with 59 signal reports
being exchanged both ways.

John VK3BJR said, "High fives were the order of the day as the goal of
taking the tally beyond 10,000 had been set at the start of our three daysof operation.

"SPARC has forwarded a Special Certificate to Rob prepared by the Club to
acknowledge him being logged as contact number 10,000."

The club knew that the 10,000th contact was within its grasp but that it required 274 contacts to be made to achieve the milestone.

Setting up the station at the Scout Hall helped take the activity to the public as the location is right beside the beach for which Rosebud is sofamous.

Over the three day period, SPARC logged more than 500 contacts working from its clubrooms, members' homes and the scout hall.

John VK3BJR said it was a most enjoyable activity for the Club and the level of activity encountered on the bands demonstrated the popularity of the Centenary of Organised Amateur Radio in Australia celebration.

Most stations contacting VK100WIA indicated they either had, or were working towards the WIA Centenary Award.
(Jlinton)

A STATISTICAL LOOK AT VK100WIA

An analysis of the online log shows that more than 20% of the contacts made so far were with stations outside Australia.

David Park VK3JDA has made an analytical examination of the highly successfully special callsign VK100WIA.

Some 2,000 DX contacts having already been made, and another ten weeks before the roster of WIA affiliated clubs ends, even more will be logged.

The initial hope of the WIA Centenary Committee that VK100WIA callsign will itself qualify for the DXCC, is now certain to be achieved.

About a third of the online log is for amateur stations who have made asingle contact.

Many of those making multiple contacts will be doing do with the intention of qualifying for the WIA Centenary Award.

The top band used for the special callsign is 40m recording 4,500 contacts, 80m around 2,200, 20m 1,500 and 2m accounting for 1,300.

Thank you David VK3JDA for his statistical insight on the VK100WIA log.(jlinton)

WIA CENTENARY AWARD UPDATE

So far more than 50 award applications have been received, verified and issued with an award certificate. These include the first awards being issued to New Zealand Gavin Reid ZL1TBA, Vladimir Medvedev RW0LIF Russia and Pehr Hending OH6IU Finland. Awards have also been issued to radio amateurs in all VK states, the Northern Territory and the Australian Capital Territory.

If the VK100WIA online log is any guide there are many more who have already qualified but not yet claim the award.(Jlinton)

VK100WIA GETS EU PILE-UP

The Hills Amateur Radio Group (HARG) in Perth Western Australia has created a YouTube video clip of a frantic dogpile on 20m chasing a contact with the special callsign VK100WIA.

Operating VK100WIA was Marty Martin VK6FDX, who is seen in the video dealing with what sounded like dozens of stations calling at once during the opening to Europe that lasted 180 minutes.

Marty VK6FDX said afterwards "It was a fantastic weekend and the most funI've ever had on HF".

He was joined in the shack with HARG President Martin Stretton VK6ZMS and club member Craig Lamb VK6FLAM.

HARG was successful in obtaining good local media coverage of its part in the world-wide celebration of the Centenary of Organised Amateur Radio inAustralia.

Martin VK6ZMS said the Hills Amateur Radio Group was "excited and proud to be taking part in such a historical celebration."

He added that during the weekend about a dozen people who visited the club's radio shack asked about the hobby, had their questions answered and informed about the training courses and licence assessments provided bythe Ham College.

ILLAWARRA CLUB ACTIVATION REPORT

The Illawarra Amateur Radio Society is today operating VK100WIA from the world renowned - Wollongong Science Centre.

Club President Tony Stone VK2TS says it's part of a practical demonstration day to celebrate the Centenary of Organised Amateur Radio inAustralia.

In a statement issued to local news media he explains how amateur radio has provided emergency communications on many occasions such as the Cyclone Tracy disaster in Darwin, the Indian Ocean Tsunami, Earthquakes in China and Haiti and the Victorian Bush Fires to name a few.

Tony VK2TS invites the public to attend the display, pick up a microphone and with some simple coaching, and have a radio conversation under the guidance of experienced operators.(jlinton)

EVEN MORE PUBLICITY FOR AMATEUR RADIO

ABC Ballarat in Victoria has carried a lengthy interview in relation to the Centenary of Organised Amateur Radio in Australia.

Let's now listen to part of the session then went to air last week. The first voice we hear is the breakfast program presenter Janine McKenzie.

Take note how the Central Goldfields Amateur Radio Club's Peter Rafferty effectively took on the role of a regional spokesman for amateur radio. (Play audio).

The interview also had Peter VK3CC explain the various aspects of the hobby and provide details how listeners could contact either his club, the Ballarat Amateur Radio Group or the Midland Amateur Radio Club.

As a result of the radio session and local newspaper articles there are now five people who had learnt about amateur radio and now ready to join the next Foundation Licence class.

CLUB THANKS THE WIA FOR ITS SUPPORT

The Oxley Region Amateur Radio Club has acknowledged the support it received from the WIA for its 35th annual field day weekend held at PortMacquartie in June.

Club President Henry Lundell VK2ZHE in a letter to the WIA President Michael Owen VK3KI said it was most appreciative of the great honour in having him attend this annual event.

The Field Day held on the 12th and 13th of June was recognised as a WIA Support Centenary Activity which added to the occasion.

Henry VK2ZHE said that the WIA Media Kit enabled the club to produce a professional media release which resulted in valueable press, radio andtelevision publicity.

He continued by saying 'the effort in producing this kit paid a handsome dividend in the hands of our club and I am pleased to see that other clubs are continuing to reap similar rewards for our hobby.'

The Oxley Region Amateur Radio Club believes that the personal involvement of the WIA President left a lasting impression, resulting in support of the Institute as it moves into its second century.

A LOOK AHEAD AT THE VK100WIA ROSTER

Illawarra Amateur Radio Society began its three-day roster slot today and will be heard during the Remembrance Day Contest, using HF and 2-metres. Listen for VK100WIA and give it a call.

The Macedon Ranges Amateur Radio Club takes over at 10am local time Wednesday through to 10am on Saturday, with plans to put VK100WIA on air initially from the homes of members and then the Woodend Scout Hall in Forest Street, Woodend on Friday.

That will be a public event with free tea and coffee, display of amateur and general radio and electronics equipment. The club will also involved local scouts and will be operating right up until the end of its rostered slot at 10am local time on Saturday.

The Macedon Ranges Amateur Radio Club has also contacted its local newspapers and community radio station seeking publicity for the Centenary of Organised Amateur Radio in Australia.

Next Saturday the Lockyer Valley Radio Electronics Club, the most western group in the Brisbane area, adopts the special callsign with rostered club members putting it on the HF bands, Phone, CW, PSK31, SSTV and ATV.

Its club rooms at the Laidley Youth Centre will be open to the public 8am to 5pm, where computer displays and PowerPoint presentations will show off satellite tracking, DX Clusters and past ATV activity.

Lockyer Valley Radio Electronics Club members will be available to answer any questions about the hobby, have the Foundation Licence Manual for sale and taking booking for a Foundation Licence training course.

A good attendance by the public is expected following plenty of publicity in the local news media.

And rounding out the roster for the month of August there will be the Mid South Coast Amateur Radio Club in VK2, the North East Radio Club from the Ardtornish School in St Agnes, South Australia, then VK100WIA is taken up by the Redcliffe And District Radio Club in Queensland.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The 2010 RD speech is available online at the WIA website and here is Peter Harding VK4OD with more on the event.

AMATEUR RADIO GETS PEOPLE TALKING

The WIA, as part of its Centenary Celebrations, is encouraging clubs, groups and individual radio amateurs to get on air on Saturday the 23rd of October to help promote amateur radio to the public.

The object of the event is to introduce potential operators to amateur radio, while also working as many stations as possible on any and all amateur bands using a variety of modes.

There will be two categories:

A Public Station is a station run by three or more radio amateurs operating on a single callsign from a public place, or clubrooms open to the public for the duration of the event.

And a Private Station is a station, which is an individual operating portable, mobile or from a private residence.

All contacts require a serial number consisting of familiar contest exchange of signal report and contact number, plus a suffix, Public Stations use the letter F for general contacts or G when a guest non-licensed operator makes their first contact.

Private Stations should use a suffix of H for a home, P for portable or Mfor mobile stations.

A scoring system has bonus points which can be gained through a range of options which include:

<.> When member of the public makes their first contact via amateur radio, for a station set up at a prominent public location

<.> The use of renewable energy

<.> Gaining of media publicity

<.> And the attendance of a local, state of federal politician

Amateur Radio Gets People Talking requires all stations to pre-register,
and each will receive a participation certificate.

Award certificates will go to the three highest scoring Public Stationsand Private
Stations.

Prepare now for your participation in the event will be held on Saturdaythe 23rd of
October.

Full details and the rules will be appearing in the September edition of
Amateur Radio magazine and the WIA website.

CALLBOOK 2011 CLUBS INFORMATION DEADLINE

The data for 2011 Call Book will be taken from your clubs' detail page on the WIA website,
_ON_ the 1st of September.
Please ensure that your club details are up to date becuase whatever is on the website will
be published in the next callbook.
If you are having difficulties updating your details or you need help with the password for
your page, please contact the WIA office.

HAMS ACROSS AUSTRALIA
VK0
VK1
VK2

Friday, 6th August 2010 ODARC had its Annual General Meeting, and the associated club elections.
The club members would like to put out a special thanks to the 2009/2010 club management team, and would like to also welcome in the new team. The new team is as follows;
Club President - Robert VK2ZRJ
Vice President - Bob VK2ABP
Secretary - Ross VK2ER
Treasurer - John VK2TUV
And the 3 Committee Members - Bruce VK2DEQ, Lez VK2SON and Lindsay VK2AMV
Recently the club has been having some great local media coverage on tv, radio and in the local newspapers. The media coverage has been for various things the club has been doing, notably the involvement in Glenroi Heights Public School in Orange, teaching the kids there some electronics and morse. Lez and Ross have been doing a great job with this each Thursday during school term. Additionally, the club had great exposure with the activation of the VK100WIA callsign and the open day held at the club rooms. From this we have gained some additional members, and people wanting to get licensed and on the air. One of the new members from the open day is now studying to get his foundation licence has already been involved at the weekly school event at Glenroi Heights.
It really is great to see so much positive exposure for our hobby in the local area.
This has been submitted by Bob VK2ABP

VK3
VK4 - QNEWS

TREC NEWS FROM Dale VK4DMC

As this news goes to air TREC members and other military radio enthusiasts are operating
from the Rocky Creek War Memorial near Atherton for 65th anniversary of VP (Victory in the
Pacific) Day.
On display are working WW2 radios including a WS-108 Mk2, a BC-611/SCR-536 and Korean War
vintage VRC-10, a PRC6 and an AN/GRC-9 along with more up to date amateur radio

transceivers.
Nick VK4YT, Chris VK4YCG, John VK4TL, Mike VK4MIK and Dale VK4DMC are demonstrating the equipment to a very interested public. They're are also making contacts for the Remembrance Day contest.
Next weekend will see TREC members operating from the Archer Point Lighthouse for the International Lighthouse/Lightship weekend. Archer Point is around 20 kms south of Cooktown in Far North Queensland and has been a lighthouse location since 1883. We are looking forward to contacting many other lighthouse stations both within VK and overseas. Listen out for VK4WAT on the bands and give them a cooee.

VK5

EGYPT FORMS NATIONAL HAM RADIO SOCIETY

The Egyptian Radio Amateurs Society for Development or ERASD has been established as the new national official representative body for radio amateurs in Egypt. According to the IARU Region One website, even though amateur radio has been present in Egypt since the early 1920's, there was no officially recognized society to represent radio amateurs in that nation for nearly the past eight decades. Now, thanks to the earnest efforts by a steering group composed of SU1GS, SU1SK, SU1AO, SU1HM and SU1SA, such a body has been formed. More about it is on-line at www.qsl.net/eara (IARU)

WEIRD AND WONDERFUL
Giant Morse Key
The amateur radio group of the Norman Lockyer Observatory, Sidmouth has unveiled its new morse key, designed and engineered by Nick, 2E0DIT.
The key was first used at the group's special event station GB2NLO at Astrofair 7th August, Nick has no plans to start making kits but is open to offers. His next project could be a microphone!

Asia Pacific DX Convention 2010, November 5-7

In addition to the usual presentations on recent DX-peditions, technical
sessions, DX dinners, and so forth, this convention offers something
special. Japan is where most of the amateur radio equipment is developed,
and you will have the opportunity to join a tour to the Icom factory,
participate in a technical session led by the Icom HF radio design team,and more.

And don't forget, all of the programs at APDXC are conducted in English!

For the non-ham members of your party, activities providing a chance to
experience Japanese culture, such as tea ceremony and flower arranging,are being prepared.

For more details, please visit the APDXC website at:http://www.apdxc.org/

[Audio uploaded]
THE BIG DXPEDITION HAS SPARKED GLOBAL INTEREST

The multi-operator DX0DX DXpedition to The Spratlys in the South China Sea
is a much anticipated event for 2011 that has been 18 months in the planning.
The licence has been issued and government approvals received for the 19-day
activation of this much sought after DXCC entity from the 6th to the 24thof January.

A multi-national team of 30 radio amateurs, including a contingent of eight
Australians, is set to operate from four dedicated operating camps for SSB,
CW, RTTY and 2m & 6m operation.

Within weeks of the DXpedition being announced major corporate sponsors gave
their endorsement (Icom America) by supplying ten top-line Icom IC7600 transceivers
plus one IC9100 transceiver, Amplifiers (from Acom International, OM Power
and THAMWAY Corp); Antennas (SteppIR, Spiderbeam and Mosley- Electronics);

Bandpass Filters (WX0B Array Solutions); Masts (Rohn Products); Head-sets (Heil Sound); and Feeders (The RF Connection) (plus Ham Radio Outlet).

Adding credibility to the exercise has been Bob Schenck N2OO agreeing to be the DX0DX QSL manager. So far 15 individual radio amateurs have given online to give financial support.

Experienced DXpeditioners (Charles Spetnagel W6KK and David Collingham K3LP) on the team have taken on the tasks of shipping the needed equipment and designing the station layout.

The team's medical doctors are ready to assist should anyone become unwell, and to also outreach to the island's residents as part of the DXpedition's humanitarian, health and welfare contribution.

Want to know more of to give the DXpedition your support, check out the DX0DX.netwebsite (Jim Linton VK3PC)

WW SPECIAL INTEREST GROUPS --- ATV (Every pixel tells a story) - Video [arrlnewsline audio]
CHANGING TECHNOLOGY: NZ ATV TO BE FORCED TO GO DIGITAL

Digital Amateur Television is coming to New Zealand, but not necessarily because the Kiwi ham community wants to make the change. Jim Meachen, ZL2BHF, is here with the details:
--

Hams down here in New Zealand will soon be forced to go digital if they wish to continue Amateur Fast Scan Television operations. This after our nations government regulators announce that all analogue modulated TV transmissions in the VHF and UHF broadcast bands, which include Channel 39 used by ham radio, will close down in March 2015, or at some earlier date. At that time the upper end of the New Zealand UHF television allocation will be cleared of television, so that the vacated spectrum can be used for next-generation mobile communications.

One consequence of these decisions is that the existing television transmissions will need to convert to digital so as to fit into about half of the present spectrum, requiring that their transmission parameters need to be more closely defined than at present. For the Amateur Television service this means that each Radio License for analogue-modulated TV needs to be replaced by a Spectrum License for analogue-modulated TV. As part of the process, our government telecommunications regulator has cancelled all of the existing Radio Licenses for Channel 39 TV Repeaters. Operators of Channel 39 TV Repeaters need to close them down to avoid receiving an Infringement Notices from the regulatory agency.

Those wishing to operate their analogue-modulated Channel 39 ATV repeaters between now and the 2015 Digital TV Switch-Over, will be required to apply for a Spectrum License. However this Spectrum License for analog ATV transmitters will only exist until the Analogue shut down date. Ham Radio

access to New Zealand Channel 39 which runs from 614 to 622 MHz was made by
footnote to the nations telecommunications regulations many years ago when
a chunk of the 432 MHz band was taken from the amateur radio service.

For the Amateur Radio Newsline, Im Jim Meachen, ZL2BHF, in Auckland
--

At airtime, its not known how many of the nations Amateur Television
Repeaters will apply for a new Spectrum License to at least temporarily
keep their analog systems operational and on the air. (NZART, ZL2BHF)

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

WW SPECIAL INTEREST GROUPS --- IOTA

"Deal Island IOTA OC -195

John VK3DQ , Lino VK3EI and Les VK3MLM will lead a ten strong team of  amateurs on a week long dxpedetion to Deal Island in March 2011 
Deal Island is part of the Kent group of Islands in the middle of Bass  Strait almost midway between Wilson's Promontory and the coast of Tasmania. Travel to the island will be by sea on VK3MLM's ocean going ketch  "Wanderlust II " 
They intend to take a full quota of equipment with them so to be  able to operate on most frequency bands and modes.

A search on google shows us that Deal Island is a granite island with  high cliffs and a lighthouse and a number of sandy coves so some effort  will be required to move their supplies from Wanderlust to the radio site  which will be located near the settlement (Deal Island has a population  of two persons) 
So on of the first requirements is to ensure that the level of fitness  is up to scratch which is going to come as a shock to some members of  the team. 
Jean VK3VIP has offered to conduct a fitness program to ensure they are  able to conduct the trip without too much huffing and puffing.

Ohh the things we do for the hobby!! hihi

More details of the trip will be on the web in due course.(John VK3DQ)

WW SPECIAL INTEREST GROUPS --- LIGHTHOUSES AND LIGHTSHIPS
[Audio uploaded]
Only days to go before the International Lighthouse and Lightship Weekend

Australia remains leader in terms of the number of registrations this year
currently at 58 and setting a new record for that country.

The very latest VK registration was made by the Summerland Amateur Radio
Club VK2SRC that will activate the Richmond Head lighthouse at Ballina.

Just before that registration, Trevor Close VK3ATX advised he will operate
from Gabo Island in far eastern Victoria Australia, while intrepid
portable QRP operator Peter Parker VK3YE has chosen the inner-suburban
Port Melbourne lighthouse which is at the end of a tram line.

Germany which has always strong support the weekend now has 55 registrations.

Australia and Germany combined account for one third of this year's nearly
390 registrations from 40 countries.

Geoff Crowley MM5AHO is adding even more interest to the weekend by
sailing to at least or possibly more of the rock mounted lighthouse on the
west coast of Scotland.

It's all happening on the weekend of the 21st and 22nd of August. To see
the full registration list or to register a lighthouse visit the websitewww.illw.net

651. SARL NEWS - SUNDAY 15 August 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-14 19:00:18 UTC
From: website@sarl.org.za
Message-ID: <20100814190006.83B7C33C57@panix2.panix.com>
Source record: 5470
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 15 August 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

Bill Gibson, ZS6ZC, also known as "Uncle Bill" to many radio amateurs, has become silent key on Monday the 9th of August after a long illness.

Our sincerest condolences to his relatives and friends.

(PAUSE)

In the news today:

RTA GOES TO PORT ELIZABETH NEXT SATURDAY

SA AMSAT CUBESAT PROJECT REMAINS NAMELESS

ICASA WRITING NEW REGULATIONS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

RTA GOES TO PORT ELIZABETH NEXT SATURDAY

The SARL Radio Technology in action 2010 symposium will be held in Port Elizabeth on Saturday 21 August on the Nelson Mandela Metropolitan University North campus. The venue is in building 23, lecture theatre M223.

The programme covers a wide range of interests. Find out how DSP can improve the audio from your receiver, get up to date with space weather research in South Africa, understand what the SKA project will hold for science in South Africa, learn about the first 3 unit CubeSat being built at the Cape Peninsula University of Technology and how to get started on Amateur Radio Direction Finding.

The registration fee, payable at the door, is only R50 which includes refreshments and a light finger lunch. It also includes entry into the attendance prize competition sponsored by RS Components and others. Learners and students enter free on presentation of their student cards.

The full programme can be down loaded from www.sarl.org.za. Click on the RTA button in the left hand menu on the home page. A map is also available from the RTA pages. To get a programme mailed to you, send an email to rta@sarl.org.za with PE RTA in the subject line.

Don't miss this great annual SARL event.

SA AMSAT CUBESAT PROJECT REMAINS NAMELESS

The SA AMSAT committee this week reviewed all the names proposed for its CubeSat project but found none of the names proposed suitable for the project. The committee decided to hold the naming of the project until the payloads have been finalised. Many different payload options were discussed but no final decision was made. The committee however narrowed down the options for a payload to two. The first option is centered around a payload that would promote satellite use by radio amateurs in South Africa and the second option is a project of a scientific nature that would also have appeal to the education sector.

The committee also decided to hold regular satellite nets to be called SATNET. It will be run on the basis of the Intecnet with host stations in various cities. The first SATNET is planned for Sunday 29 August at 19:30. The question of payloads for the CubeSat project will be the subject for discussion. More details will be on www.amsatsa.org.za and will be included in next week's SARL NEWS.

ICASA WRITING NEW REGULATIONS

ICASA is writing new regulations for all radio services. The regulations will complement the Table of Frequency Allocations published last week in the Government Gazette. In addition supplementary band plans will be developed which, in the case of amateur radio, will cover the amateur frequency allocations and specify the conditions under which the bands may be used, such as modes and permitted power levels.

In the table of frequency allocations amateur radio acquired a VLF allocation namely from 135,7 - 137,8 kHz. Use of this allocation will however have to wait till the supplementary band plan is promulgated. At the SARL - ICASA liaison meeting held during last week ICASA agreed as an interim measure to add the VLF allocation to the current radio regulations. This would require a notice in the Government Gazette. ICASA undertook to have this completed by the next liaison meeting in early November.

The SARL requested ICASA to expedite the SADC agreement which would allow radio Amateurs in SADC countries to operate in each other's countries without the need for additional licenses or permits. As the

SARL requested this action over a year ago, ICASA was urged to complete the agreement as soon as possible, also before the next meeting. The Chairman of the meeting indicated that this was already in place for commercial vehicle travelling across borders and that he would expedite the process.

Since the establishment of the Liaison committee a number of issues have been resolved including the expansion of the 40 metre band, operation in South Africa by all licensed amateurs during the recent World Cup Soccer event, operation by delegates attending the 2011 IARU Region One conference in August 2011 and simplification for applying permission to operate Spread Spectrum.

PAID-UP MEMBERSHIP REACHES 1 100

During the past week the paid up membership reached 1 100. However this is still a long way off the 1 600 target. If you have not yet renewed please do so as soon as possible before August 31. If you have already renewed, thank you for your support. If you would like to join as a new member, call Mariska at 011 675 2393 on Monday to get the details or visit www.sarl.org.za.

CONTEST NEWS

The results of the SARL 80 m Club Contest held on Wednesday 28 July have been released. The committee received 20 logs from three clubs. The committee is concerned about the lack of participation by other clubs.

1st West Rand ARC with 215 points from 14 logs; 2nd The ZS Contest Group with 79 points from 2 logs; 3rd The Southern African Antique Wireless Association with 56 points from 4 logs.

Thank you to all the participants, the next 80 metre Club contest is the digital contest on 29 September.

INTERNATIONAL LIGHTHOUSE WEEKEND

The Overberg Amateur Radio Club will be operating from Danger Point on International Lighthouse Weekend - 21/22 August. Other club members, ZS1AZ, ZR1NET & ZS1HR will be operating from Cape Infanta. Please call in if you hear them.

RAE COURSE

The Kempton Park Amateur Technical Society has started with their Class A RAE course for the October exam. On the 21st August 2010 they will present the HF operator's training in view of their HF assessment on the 9th October 2010. Any student is welcome to join them for these two days. Look at the club web page at www.zs6kts.co.za for contact information.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. August 11th marked the 46th day in a row with an official NOAA Sunspot number and this represents a new record for Solar Cycle 24. With the continuous stream of new sunspots, it looks like the record will stretch even longer. The previous best was set March 5th, 2010 with 45 days. On Wednesday there were 5 visible sunspot groups (1 093, 1 095, 1 096, 1 097 and 1 098). It now looks like only 1 093 and 1 098 remaining as the others have faded to simple magnetic plages. Sunspot 1 093 is an interesting double sunspot. The effective sunspot number is expected to be less than 25 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the late afternoons till after sunset. During sunset it will be good towards Europa. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 August - Logs for SARL HF phone competition must be in; 21 August - RTA symposium in Port Elizabeth; 21 August - HF operators course in Kempton Park, visit www.zs6kts.co.za for information; 21/22 August - International Lighthouse weekend; 24 August - Logs for the YL sprint to be in to zs4bfn@]netactive.co.za; 29 August - SATNET at 19:30 on the air; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

Hi all ,

Today finally start the new mailing list of SEECC.

If you have some news or information that you want to give at the
members, you have only to write to news@seecc.org and the mail will
come
sent to all the associates.

Information and news are wellcome, and SEECC infomation will be sent
every week ....

Stay tuned !! :)

PRESS RELEASE

August 14, 2010

Dear Media Organization or whom it may concern:

This letter is to inform the Media Organization
of the International Radio Emergency Support
Coalition present emergency activities:
Here is the back ground of IRESC as follows:
The main objectives of IRESC are to foster
efficient collaboration between Radio Amateurs,
extending friendships across the world and
providing international emergency communications in times of need.

IRESC is a worldwide coalition of volunteer
communicators, with dedicated members spread
around the globe, help can be provided at all times of the day or night.

Currently, IRESC has members in at least 38
countries and it continues to grow. Most members
are also affiliated with their respective
national organizations; for example, the
International Red Cross, the Magen David Adom,
the Salvation Army, RAYNET, local ARES and RACES
groups, along with many others.

The IRESC team uses several modes of
communication, including HF, VHF, UHF, amateur
satellites, and principally Echolink VoIP
communications. The IRESC Conference Server on
Echolink (*IRESC*) is node number 278173. The
trunk systems use the Internet to link
communications over vast distances without the
propagation and interference shortcomings of
radio paths. In this way, a disaster zone and the
point of best assistance can be joined even if
they are on opposite sides of the planet.

We are always looking for new members in any part of the world. IRESC is willing to collaborate with all emergency communicators and relief agencies to provide support and communications for any disaster. Being a truly international organization, IRESC strongly adheres to the principals that bind together the world amateur radio movement; working together regardless of race, religion, culture or political viewpoint.

At the present time IRESC is one of major emergency Ham operators operating in Pakistan with the approval of PARS Pakistan Armature Radio Society for Pakistan Government.

IRESC offered assistance and PARS then accepted and started asking for expertise and assistance. I Salvadore Torres as acting Senior Vice President/ Directors of Presidents, Call Sign W0SCT, then called a special Board meeting with IRESC International and with the approval IRESC President of Carl Caracol , Call Sign W2WRX IRESC alert protocol was activated immediately .

I Salvatore Torres then contacted out IRESC Presidents located in Turkey and India and they in turn contacted their sources.

The IRESC Turkey President, Urcun Canel, Call sign TA0U, then set up search and rescue operation for ECOM and air cargo and equipment and other actions for the Pakistan emergencies. The IRESC India President Devulapalli ?Bharathi? Prasad, Call Sign VU2RBI, then also set up her network and is a major operator for Pakistan operation on behalf of IRESC International. She is a well known world famous operator that is a known for her work in emergencies.

The International Coalition of IRESC the monitored and has been receiving traffic and we have actual ECCOMM traffic at this time. We will pass all life and death and health and welfare information that may be required.

We also are in direct contact with various government agencies and organizations throughout the world and have access as required for this emergency. Our government liaison and net control operator and manager Dennis Baumgarte, Call Sign AE2EE is in charge of these actions at this time.

We need the media to inform them of the above
stated activities concerning Pakistan.
IRESC then can assist as required regarding the
above stated in passing information and traffic
concerning emergencies. We are a nonprofit
organization with no monies and salaries but will
do the best we can as ham operators and emergency responders.
This information is critical for the public to know.

Respectfully Submitted

Salvatore TORRES
IRESC
Senior Vice President/ Director of Presidents IRESC

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 6th October next at 2 p.m. in the ComReg Offices in Dublin. The closing date for receipt of applications to sit the examination is Friday, 17th September.

For further information on the application procedure, exam fees and other details see 'Theory Examination' in the 'Information' section of the website. The 'Downloads' section of the website includes a very useful document 'Studying for the Amateur Radio Examination'.

The 'Links' section of the website under 'Radio Theory' contains much useful information for anyone studying for the licence examination.'

Dublin 2m News Interruption

During the latter half of August there may be a temporary interruption of the 11:45 two-metre news broadcast from Dublin on Sundays. This is unavoidably due to overlapping holiday commitments of the four regular newsreaders Tony(EI5EM), John (EI7JG), Frank (EI6EF) and Liam (EI3HK).

Every effort will be made to maintain the service. However, if by chance there is no transmission on a particular Sunday, please accept our apologies in advance and rest assured that the regular two-metre service will resume as soon as possible.

IARUMS news

Can amateurs & SWL's please keep a listening watch around 28.265 FM as there have been incursions by churches on this frequency heard throughout Europe at up to 59 +20db. Please send details of names etc used so we can identify locations and report them to ComReg for investigation.

All information can be sent to Ger McNamara EI4GXB who is the IRTS IARUMS co-ordinator at ei4gxb /at/ gmail or 087 2532512

Introductory to Amateur Radio Talk & Demo

There will be an introductory talk on Amateur Radio on Wednesday 18th of August at 6:30pm at 'TOG', located at Unit C Chancery Lane, Dublin.

This talk and demo is aimed at those with no knowledge of Amateur Radio on how to get involved and the different aspects of the hobby. It is part of a week long, technology related events, taking place.

Further details can be found on the website http://www.tog.ie

---

6m Oman

The Secretary General of the Royal Omani Amateur Radio Society, informs that the 6 metre band (50 - 52 MHz) has been allocated for the Amateur Radio and Amateur Radio usage by the Telecommunications Regulatory Authority in the Sultanate of Oman, on a secondary basis, effective June 2010.

Radio amateurs in the Sultanate of Oman hope to work you on the "Magic Band."

AMSAT -UK Videos

Videos of the presentations given at the 25th AMSAT-UK International Space Colloquium, held July 31-August 1, are now available on the web. They can be viewed and downloaded at

http://www.batc.tv/

Click on the 'Film Archive' icon and then select a 2010 AMSAT video.

The presentation given by RSGB Microwave Manager Murray Niman G6JYB called "2010 AMSAT what's New" provides a good overview of the process involved in getting new Amateur and Amateur Satellite service allocations. Currently there are no global Primary Amateur bands between 146MHz and 24GHz.

Limerick Radio Club News

Members of Limerick Radio Club will be activating Tarbert Lighthouse for the annual International Lighthouse Lightship Weekend on 21 & 22 August. The lighthouse number is IE0002 and the callsign in use will be EI4LRC/P.

Activity will be on all bands and look forward to working as many stations as possible over the weekend. QSL via EI4GXB

Rallies

North Cork Radio Group is pleased to announce their first annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on

Sunday September the 19th 2010

More information is available via the Groups website www.NorthCorkRadioGroup.com, traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb /at/ gmail.com as soon as possible.

For further details on Rallies please see www.irts.ie/rallies

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-August, through Sunday, 15th-August there were 205 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7X, 8P, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, SM, SP, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V8, VE, VK, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2C, CONWAY REEF. After the cancellation of the T31 DXpedition by Hrane/YT1AD, David/K3LP and friends, the team has now organized a 2011 DXpedition to the small beautiful island of Conway Reef (OC-112), part of the Fiji Islands in the South Pacific Ocean. Tentative schedule is as follows (in 2011):

September 28th - Team arrives in Nadi, Fiji.
September 29th - Team departure from Nadi.
September 30th - Team arrives on Conway Reef during the afternoon.
October 1-10th - Activity from Conway Reef.
October 11th - Team departs from Conway Reef to Nadi.
October 12th - Team arrives at Fiji during the afternoon.

Activity will be on 160-10 meters using CW, SSB, RTTY, SSTV and PSK31. They will also be on 6 and 2 meters using EME using WSJT65 A,B,C on the following frequencies: 50.375 MHz and 144.375 MHz. BEACON on 50 MHz at 50.095 MHz. The following are suggested frequencies:
CW - 1820, 3503, 7005, 10105, 14025, 18075, 21025, 24895 and 28025
SSB - 1835, 3795, 5403.5, 7082, 14190, 18150, 21295, 24950 and 28495
RTTY - 1835, 3582, 7035, 10145, 14081, 18100, 21081, 24920 and 28081
SSTV - 3723, 7035, 14230, 21335 and 28680
PSK31 - 1835, 3582, 7035, 10145, 14081, 18100, 21081, 24920 and 28081 kHz

Currently, the 3D2C team includes the following: Hrane/YT1AD, David/K3LP, Joe/AA4NN, Krassimir/K1LZ, Paul/N6PSE, Doug/N6TQS, Atilano/PY5EG, Roman/RZ3AA, Vangelis/SV2BFN, Alex/UA4HOX, Chris/VK3FY, Peter/VK3FGRC, Keith/VK3FT, David/WD5COV, Vojislav/YU7AV and Vel/YT3WW. Team helpers are: Aca/YU1AA (Pilot) and Dragan/YT3W. QSL Manager is YT1AD. QSL by the Bureau or direct to: Dr. Hrane Milosevic, 36206 Vitanovac, Serbia - EU (PLEASE send: QSL + SAE + SASE w/1 IRC or 1 USD for normal post, 2 USDs for airmail). The 3D2C Web page is up and running (some parts still under construction) at: http://www.yt1ad.info/3d2c/index.html

3Y8, ANTARCTICA. Lars, SM4TUV, will be working for The Norwegian Polar Institute in Antarctica starting November 2010. He will remain at the Norwegian Polar Research Station Troll, on Dronning Maud Land, until December 2011. He is expected to be active as 3Y8XSA. QSL via SM4TUV. For more details about the Norwegian Polar Expedition and the Norwegian Troll field station, visit the following Web pages: http://npweb.npolar.no/ ---or-- http://npweb.npolar.no/plattformer/troll

5H, TANZANIA. Ro, DL4ME, will be active as 5H3ME between now and August 30th. Activity will be on the HF bands mainly CW. QSL via his home callsign.

5R, MADAGASCAR. Eric, F6ICX, will once again be active as as 5R8IC from Saint Marie Island (AF-090) between November 15th and December 18th. Activity will be holiday style, operating CW, RTTY, and PSK63, and using 100 watts into various GPs or Inverted-Ls and a Hexbeam for 20-10 meters. There will be no online log during his activity. QSL via his home callsign (QRZ.com). View pictures of his last trips at: http://f6kbk.free.fr/5r8ic/5r8ic.htm

8Q, MALDIVES. Oku, JK1KSB, will once again be active as 8Q7SO from Mirihi Island (AS-013) between September 16&#65533;26th. Activity will be holiday style on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via his home callsign.

9H, MALTA. Alex, SQ9UM, plans to be active as 9H3UM from Qawra, Malta (EU-023) between September 8-22nd. Activity will also include operations from Marsalforn, on Gozo Island (EU-023). No other details about band/mode operations were provided. QSL via his home callsign.

C5, THE GAMBIA. Filip, ON4TA (ex-6O0F) will be active as C56FR from Kerr Sering between October 21st and November 11th. This is NOT a DXpedition but a "private visit". Activity will be active on 20 and 17 meters SSB using simple wire antennas and 100 watts. Filip also plans to experiment with Yagi antennas on 6m, 2m and 70cm. He mentions that there "might be an opening on 2m or 70cm across the Atlantic...". PLEASE QSL by the Bureau to ON4TA.

CQ COMMUNICATIONS, INC. PRESS RELEASE. Richard Moseson, W2VU, Editorial Director, sent out the following dated Tuesday, August 10th: "CQ VHF Magazine Launches Streamlined Website -- Continuing its company-wide update of its magazine websites, CQ Communications, Inc. today announced the launch of a new and easier-to-navigate website for CQ VHF magazine. Like the recently updated sites for WorldRadio Online and Popular Communications, the new CQ VHF site features a cleaner look and a streamlined user interface to make it quicker and easier for visitors to find what they are looking for. The CQ VHF update coincides with posting of the highlights for the Summer 2010 issue.
Current issue highlights include sample pages in full-color layout, to give prospective readers the ability to see what the magazine itself looks like in print. Highlights of previous issues reaching back to 2006 are available on the website with easier access than in the past. One new feature is a 'Current Events' page, which provides readers with access to information on upcoming events and activities that is more up-to-date than possible with a quarterly publication.
The site also includes links to clubs, ham radio reference sites, contact information for editors and columnists, direct links to advertisers' websites and to other CQ Communications publications. In addition, a link to the magazine's Facebook page makes it simple for readers to provide feedback and connect with other hobbyists.
CQ VHF is a quarterly magazine devoted to 'Ham Radio Above 50 MHz.' First published in 1996, it combines articles designed for newcomers with historical and technical features best appreciated by more experienced VHF operators. It is edited by Joe Lynch, N6CL, who is also the long-time 'VHF-Plus' editor of parent magazine CQ Amateur Radio.
CQ VHF is published by CQ Communications, Inc., which also publishes CQ Amateur Radio, Popular Communications and WorldRadio Online magazines. The new CQ VHF website may be accessed at: <http://www.cq-vhf.com>."

CW1, URUGUAY (Lighthouse Op). Members of the "Radio Club Uruguayo" will activate for the first time "Punta Brava Lighthouse" (ARLHS URU-012, 34° 56' 06"S/56° 09' 38"W, Grid Locator GF15wb) during the upcoming ILLW activity between 1500z Friday, August 20th, and 2359z Sunday, August 22th. Activity will be on 80-10 meters using CW, SSB and the Digital modes with at least two stations, and also VHF and UHF, with one station using the special event callsign CW1A. QSL for this activity

is only direct to: Radio Club Uruguayo, P.O. Box 37,11000, Montevideo,
URUGUAY, SOUTH AMERICA (w/SAE and IRC or 2 green stamps).

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that
the following operation is approved for DXCC credit:
9UXEV • Burundi; 2010 operation
If you had this QSO rejected in a recent submission, please send a note
to dxcc@arrl.org. Please check either your LoTW account or the live
online daily DXCC listing, when credits are updated they will appear at
these locations.

EA8, CANARY ISLANDS (WFF Op). Stan, EI6DX, is now on Fuerteventura Island
(DIE S-006, WLOTA L-0883) and is expected to be active as EA8/EI6DX
until August 30th. He mentions that he is considering taking part in the
RDA International Contest next Sunday (August 22nd) as EA8/EI6DX/P from
Corralejo National Park (EAFF-063). Activity will be 20 meters CW/SSB
only using a K3 radio with poles and a wire for an antenna. He is also
expected to activate National Park of Jandia (EAFF-065), but the dates
are not yet announced. QSL via RX3RC, direct or by the Bureau. For updates,
watch Stan's Twitter page at: http://twitter.com/ei6dx

GM, SCOTLAND (IOTA and SCOTIA Ops). Operators Alex/GM0DHZ and Andre/GM3VLB
are planning to activate many SCOTIA (SCOTtish Island Award) islands
during a 3 week DXpedition in September to the two IOTA groups -- Orkney
(IOTA EU-009, SCOTIA OI14) and Shetland (IOAT EU-012, SCOTIA SI11) Islands.
Using the callsigns GM0DHZ/p and GM3VLB/p, all islands being considered
for activation are uninhabited, except two of them. Operators will fly
to North Ronaldsay Island (OI33) on August 31st. Then on September 2nd,
they will take a fishing boat to Helliar Holm Island (OI15).
PLEASE NOTE: The following islands listed below are expected to be
activated, but all depend on WX conditions. Also, there are "NO" definite
dates for any particular islands, but the following are listed as most
likely to be activated in order of "likelihood":
September 3-15th - Shetland Island Group: Noss (SI09), Papa (SI06),
Hildasay (SI07), Vaila (SI10), Bigga (SI19), Hascosay
(SI21) and Linga (SI23). Other possibilities, but not
ruled out are: Vementry (SI13), Papa Little (SI14),
West Linga (SI16), Linga (SI17) and Balta (SI25).

September 16-20th - Orkney Island Group: Papa Stronsay (OI25), Linga
Holm (OI21), Cava (OI09) and Calf of Eday (OI29).
Other possibilities, but not ruled out are: Swona
(OI01), Switha (OI03), Copinsay (OI12), Muckle
Green Holm (OI20), Eynhallow (OI24), Holm of Scock
Ness (OI26) and Faray (OI28).

H81, PANAMA (Lighthouse Op). Members of the PCARA (Panama Canal Amateur
Radio Association) will activate Panama Canal Miraflores Locks Lighthouse
(PAN-030) with the special callsign H81L on August 22nd. QSL via address
on QRZ.com.

HG8, HUNGARY (WFF Op). Members of the Association Radio Amateurs of Vesztoi (HA8KWO) will activate the historical place named Veszto-Magor from eastern Hungary in Koros-Maros National Park (HAFF-008) between now and August 21st. The callsigns to be used are HG8SDS (QSL via HA8PH) and HG8WFF (QSL via HA8MT). Activity will be on all HF bands.

IOTA NEWS.....
EU-009. Members of the Orkney Amateur Radio Club will once again activate the Noup Head lighthouse (BARLS A3736, ARLHS SCO-158, WLOTA L-0945, WAB HY44) on Westray Island (EU-009, IOSA OR02, SCOTIA OI31) in the Orkney Islands between now and August 27th. Their main activity will be during the International Lighthouse/ Lightship Weekend (August 21-22nd). Using the callsign GB1OL, they hope to have 3-4 stations on all bands using CW, SSB and the Digital modes. Logs will be uploaded to LoTW and eQSL. For a paper QSL, send direct to MM5DWW and enclose either 2 USDs or 1 IRC w/SAE. NO BUREAU QSLS PLEASE. For more info, go to: http://eu009.webplus.net/gb1ol.html

EU-012. A group of YL operators will be active as GB2SLH from the Sumburgh Head Lighthouse (BARLS A3766, ARLHS SCO 232, WLOTA L-0867, WW Loc. IO99IU, WAB HU40) on the southern tip of main-land Shetland (EU-012, IOSA SH01, SCOTIA SI11) between now and August 27th. Activity will be mainly during the Inter-national Lighthouse/Lightship Weekend (August 21-22nd). QSL via M5YLO. For more details, visit the Web site at: http://www.radioclubs.net/gb2slh

EU-097. Operators Jari/OH1BOI, Kalle/OH1FEQ and Hannu/OH1JJO will be active as OH1AV/2 from Vormo Island (WW Loc. KP20ca, OHC208 Inkoo) between August 20-22nd. Activity will be on all bands, propagation permitting. QSL via OH1BOI, direct or by the Bureau.

EU-142. Operators Silvia/EA1AP (YL), Juanjo/EA1CJ, Alberto/EA1SA, Javier/EA2JB, Juan/EA2RC and Roberto/EA2RY will be active as EG1OTA from Mouro Island between August 28-29th. Activity will be all bands from 80-10 meters. QSL via EA2RC.

EU-147. Operators Mikhail/RA1ALA, Dmitry/RA1ALK and Alex/RX1AW will be active as homecall/1 from Russky Island between August 16-28th. Activity will be on the HF bands. QSL via their home callsigns.

EU-172. Ric, DL2VFR, will be active as OZ0FR/p from the Vesborg Fyr Lighthouse (DEN-046) on Samsoe Island (DIA JY-008) between now and August 20th. Activity will be mostly CW, with some SSB, and on all HF bands using 100 watts. QSL via DL2VFR, by the bureau or direct. DO NOT QSL via the OZ Bureau!

NA-029. George, K3GV, will be active as K3GV/VY2 from Prince Edward Island (NA-029, CISA PE-001, WLOTA 0523) between September 1-30th. Activity will be on 15 and 20 meters around the usual IOTA frequencies. QSL via his home callsign, direct or by the

Bureau.

KH6BZF PROPAGATION FORECAST/REPORT (For August 9-15th)....
Aug 16 AN SOLAR REFERENCE KEYS
Aug 17 AN --------------------
Aug 18 AN BN - Below Normal
Aug 19 AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 20 AN LN - Low Normal
Aug 21 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 22 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

N3, UNITED STATES (911 Special Event). Look for special event station "N3U/United Flight 93" to be activated between September 9-13th, to remind "Amateur Radio Operators World-Wide" of the tragic events that happened near "Shanksville (Pa), New York City and Washington DC on September 11, 2001." This operation (along with the prior "P41USA" operations from Aruba Island) will be sponsored by the "Blair Amateur Radio Society" (W3PN) along with various local, state and government agencies (City of Altoona, Blair County Pa, Red Cross, EMA/911, LEPC, PEMA, DHS). The "N3U/United Flt 93" operators will include: Bob/W3BTX & P49T, Roy/W3TEF and various other W3PN club members. They also intend to be active on different bands and modes during this "first-ever" initial upcoming operation in September 2010. Suggested operating frequencies are (+/- QRM):
CW - 1810, 3530, 7030, 10120, 14030, 18090, 21030, 24895 and 28030
SSB - 1850, 3820, 7195, 14240, 18130, 21300, 24930 and 28485 kHz
6m - 1810/CW and 1850/SSB

QSL N3U/Flt 93 via W3PN, by the Bureau or direct (Please include SASE and enough return postage. If additional postage is needed...your QSL will be returned via the BUREAU). SPECIAL NOTE: USA postage rates will increase in 2011. PLEASE no eQSL or LoTW at this time. For more details, see QRZ.com.

ON, BELGIUM (Special Event). Members of the Radio Club of Binche (ON7RY) will activate the special event station ON4WAR between September 4-5th. This activity is to commemorate the sacrifice of the Belgian Resistance (WWII) and especially those of the Refuge B 40 in Waudrez, Belgium. The timetable of the activities are as follows:
Sept. 4th - Saturday between 9:00 AM and 06:00 PM local time (1100-1800z)
Sept. 5th - Sunday between 08:00 AM and 04:00 PM local time (1000-1600z)
PLEASE NOTE MODES OF OPERATIONS: At the top of the hour up to the hour and a half, CW transmissions with a Whaddon Paraset MK VII on 3.560 MHz, 3.579 MHz, 3.583 MHz and 7.025 MHz. At the hour and a half up to the next hour,

SSB transmissions on the HF bands. QSL information via ON7RY, direct or by the Bureau. For more info about the ON4WAR station and about the history of Refuge B 40, visit the Web site at: http://www.on7ry.be

OZ, DENMARK (IOTA and WFF Op). Look for Enrico "Ric", OZ0FR, to be active as OZ0FR/p during the following locations and dates:
August 14-20th - From Samso Island (IOTA EU-172, Danish Island Award JY-008); activity on CW and SSB. QSL via DL2VFR.
August 21-27th - From the National Park Mols Bjerge (WFF: OZFF-002); activity on CW and SSB. QSL via DL2VFR.

PJ2, NETHERLANDS ANTILLES. Some of members of the Caribbean Contesting Consortium (CCC) will once again activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2T during the CQWW DX SSB Contest (October 30-31st) as a Multi-Multi entry. Operators mentioned are Geoff/W0CG (PJ2DX), John/K6AM, Gary/K9SG, Bob/N8NR, Wayne/K8LEE, Joe/W9JUV, Helmut/ DF7ZS, Sam/DL5RDO and Bernhard/DL5RDP. QSL PJ2T via N9AG or LoTW. ADDED NOTE: Remember that this island could be a possible new DXCC entity as of October 10th, 2010. So do not be surprised if you hear some of the above operators active before the contest as PJ2/homecall or their own PJ2 callsign.

PJ4, NETHERLANDS ANTILLES (Update). Members of the South East Europe Contest Club (SEECC) are planning to be active from Bonaire (SA-006 and WLOTA L1279) for the "2011" CQWW DX SSB Contest. The operation will take place between October 25th and November 1st. It is expected that this will be a new DXCC entity by then. Operators mentioned are: Romeo/ S52RU, Dale/N3BNA, Marko/YT2T, Maurizio/IV3ZXQ, Zvonko/Z35W, Fabrizio/ IW3SQY, Acim/YU1YV and Noah/K2NG. Activity will be on 160/80/40/20/15/10/6 meters using CW, SSB and RTTY. QSL Manager is YU1YV. More details and updates are available at: http://www.seecc.org/PJ4_EXPEDITION/index.html

PJ4, NETHERLANDS ANTILLES. Kelly, N0VD, informs OPDX, stating "a DXpedition is in the planning stages that will activate Bonaire (PJ4, IOTA SA-006, WLOTA L1279) for two weeks in anticipation of the new DXCC status on 10/10/10. A multi-national team is being formed with 6 locations expected to be on the air including the Radio Netherlands relay facility. Current list of operators include Peter/PJ4NX, Hans/PJ4LS, Peter/PA8A, Fred/PA8F, Rob/PA3GVI, Bert/PE2KY, Marco/PE2MC, Jo/PA9JO, Henk/PD5TS, Michiel/PG4M, Kelly/N0VD, John/K6AM, Ken/W0LSD and Scott/W4PA." Currently a Web site is under construction and is expected to feature real time logs in additional to the typical log search, at: http:// www.bonaire2010.com
A full press release is expected in the near future.

PJ4, NETHERLANDS ANTILLES (Late Breaking News about Bonaire [PJ4]). The following news will probably affect the above operation. On August 14th, "Radio Netherlands Worldwide" reports: "Bonaire referendum postponed again -- A referendum on the political future of Bonaire, planned for 3 September, has been postponed indefinitely. The decision was taken by the island's governing council on Friday afternoon.
The referendum commission had requested a postponement until 1 October, to provide more time to inform the public about the poll. But when, or

even whether, it will now be held is unclear. A referendum planned for March of this year also never took place.
On 10 October 2010, the Netherlands Antilles, of which Bonaire is the main island in a five-island group off the coast of South America, will be dissolved as a single political entity. The islands of Curacao and Sint Maarten will become independent countries within the Kingdom of the Netherlands. The islands of Bonaire, Saba and Sint Eustatius will become 'special councils' of the Netherlands.
But on Bonaire itself there is considerable resistance to the consequences of integration within the Netherlands."

OLD OUTGOING QSLS FOUND! Al, VE1AL, reports: "I am ashamed to admit that I have found a box of QSLs that I thought had been sent via the Bureau many years ago. The cards are for QSOs with CY9DXX, CY0DXX,

VE1AL and VF1L, plus a few for other callsigns I have used. I am integrating my 2010 QSLs for VE1AL with these cards, and they should be in the mail to the Bureau within the next few weeks. Well over 1000 QSLs are involved, and I regret that many will probably be returned due to various reasons. All of my computerized logs have been uploaded to LoTW, but that does not include the CY9 or CY0DXX logs. I'd appreciate it if the various bulletin editors would let their readers know this information."

QSLS VIA LoTW: 9M2TO, 9M6YBG, AB5EB/KL0, CN8KD, CP1FF, DT8A, GR2HQ, HG7T, HK1X, KP2M, LX0HQ, OG6N, ON4LR, ON6NP, PT5T, S52OP, S50HQ, R3AT, TI4HAS, TM7C, UR4EWT, UT7QF, YI9PSE, YL2KF, YL4HQ, YO9HP, ZF1A and ZL4PW

QSLS RECEIVED VIA MAIL: 5Z4ES, BH4QAK, E4X, EA1GA, FP/K9OL, GB111HP, H44WG, HA8RM, IS0R, J5V, J6/G3PJT, MU/PA4N, PJ4NX, T22ZL, T30XG, T32MI, TC07DX, TK9E, TS8P, TT8PK, TX3D, VE9MY, VP9GE, XR9JA, XW1B and ZS6CCY

QSLS RECEIVED VIA THE BUREAU: 3D2YA, 6W/PD9DX, 6Y0FF, 8P2K, 9A3IW, 9A3SM, 9A4W, 9A5W, 9A800VZ, AH2Y, AO8HQ, CS6AFATI, CS6A, CT1CDP, CU2DX, DJ3HJ, DK0EE, DK9BF, DL1ICB, DL1SWN, DL9MEN, DQ4T, DR800GRZ, DR09ANT, DS5DNO, DS5FNE, EA1DFU, EA3GLB, ED7AJR, EU2MM, EW7KF, F4RST, F5MK, F5PU, F6GCP, F6HSJ, F8FAZ, FY/LA0BY, HB10DX, HB9AAA, HB9EIV, HB9FAX, HB9WDU, HI3TEJ, IK2QIN, IK4WMA, IK0YVV, IW6DGJ, IZ5ILF, JG1IEF, JX9JKA, K8CC/C6A, KB7OBU/KH2, KH7S, KP4KE, LA1H, LA2NRA, OH9SCL, OM8A, ON6DP, PE1DTU, PU2MTS, RA0CFA, RD3BZ, RT6A, RW2F, RX3DTN, RZ3DC, TK/DF6ZY, US0KW, VP2V/DL7VOG, VP2V/OK1DRX, VP8/LZ1UQ, VP8YLE, XE2YWH, YO8OK, YO9WF and ZP6CW

SILENT KEY. Chip Margelli, K7JA, from Heil Sound, informed everyone on the "Contest Reflector" this past week: "I am deeply saddened to report that Dr. Len Kaufer, KH0AC, became a Silent Key today (August 12th) in his home on beautiful Saipan. Len, formerly KG6SW, went out to the Trust Territory of Saipan in the 1960s as a Jesuit priest. He brought his longtime love of Amateur Radio with him, and eventually met an island girl named Connie Tenorio. Connie won out over the priesthood, and they eventually got married after a personal letter from the Pope (!) convinced Connie's strict father that it really would be OK if she married a "former" priest. Len was everyone's Saipan multiplier for many years...." OPDX and its readers would like to send out our deepest sympathy to the family and friends of KH0AC.

TK, CORSICA. Tano, IZ8GCB, will be active as TK5A during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via IZ8GCB only direct. For more details, see: http://www.aribenevento.it/contest_dx.html

TO7, ST. BARTHELEMY. Operators Lot/DJ7ZG and Babs/DL7AFS will be active as TO7ZG from Flamand Beachn(NA-146, DIFO FJ-001, WLOTA L-0377) between October 6-20th. Activity will probably be on 80-6 meters with operations mainly on RTTY, PSK and SSB. QSL via DL7AFS, either by the DARC Bureau or direct. For updates, watch: http://www.qsl.net/dl7afs

V5, NAMIBIA. John, HB9PHJ, will be active as V5/HB9PHJ between now and August 30th. Activity is on all HF bands. QSL via his home callsign.

WEBINAR (Contesting in Africa). The Potomac Valley Radio Club (PVRC) from Washington DC will hosts a Webinar (seminar on the Web) on "Contesting in Africa" on August 22nd, at 1900z. You can watch the live-streaming presentations on the InterNet present by Mike Fulcher/KC7V and Roger Western/G3SXW, members of the Voo Doo Contest Group. They provide a look at the challenges and excitement of operating the CQWW DX Contest from various West Africa countries. The presentation is based on Roger's book "Contesting in Africa" <http://www.idiompress.com/books-contesting-africa.html>.
They state, "DXpeditions typically are complex operations, especially where the goal is to win a major contest. Long lists of details must be attended to, including licensing, visas, vaccinations as required, transportation, clothing, tools, accommodation, siting, not to mention organizing tons of radio equipment and antennas at the right place at the right time." Space is limited, so reserve your Webinar seat now at: https://www2.gotomeeting.com/register/821204658

Ohio/Penn DX Special Bulletin No. 972.1
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 972.1
BID: $OPDX.972.1
August 16, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W3BTX, KH6BZF, N0VD and "Bonaire Reporter" for the following DX information.

N3, UNITED STATES (911 Special Event/Correction/Update). The 6 meter frequencies listed in yesterday's bulletin were mixed up with the 160 meter frequencies. Look for "N3U/United Flight 93" on 50130 kHz (SSB) and 50090 kHz (CW). Bob, W3BTX, informed OPDX today that "We decided to send a QSL out to 'everyone worked' either via direct or by the Bureau." Remember to look for this special event station to be activated between September 9-13th. See OPDX.972 or QRZ.com for more details.

NETHERLANDS ANTILLES (More on Bonaire, the 10/10/10 Break-up and a full Press Release on the Upcoming Operation). Kelly, N0VD, provides more info to OPDX regarding the postponed referendum, and wanted to clarify a few points that may be confusing for those not following the political process on Bonaire. He states, "In short, the referendum has no affect on 10.10.10 transition date. It was simply an attempt by some of the minority political leaders to gauge the opinion of the Bonaire people as to whether they agree or disagree with how the whole political process has taken place and the eventual outcome."

He quotes the "Bonaire Reporter" dated August 16th: "On Friday, the 13th, Bonaire's planned referendum was postponed until further notice. The Island Council adopted an amendment stating a referendum would be held 'on a date to be determined later per Island Ordinance.'"
"The action effectively cancelled the Island' Government's attempt to test the mood of the people prior to the integration of the island with Holland on October10, 2010. The Referendum's outcome in any case would not have affected the integration."
"The amendment was offered by independent councilman Anthony Nicolaas. Opposition leader Ramonsito Booi asked for a vote but his four-person faction got up and left without voting, leaving the amendment to be accepted by the four Democratic party members and Nicolaas."

"The Referendum Committee had asked to postpone the poll from September 3 to October 1 to have more time to organize it properly. One of the matters that came up during the meeting was that the cost of conducting the referendum was estimated to be NAf 500.000. The budget approved earlier was only NAf 350.000."

Kelly, states, "So in essence, the referendum (or lack of) has little affect on our planned DXpedition." He also mentioned that they anticipate to have their group's Web site to go live this week.

The following is a full press release on the upcoming Bonaire operation:

Press Release: 10-10-2010, New DXCC activation of PJ4, Bonaire
>Date: 11 August, 2010

The end of a country - The Netherlands Antilles With a 99% certainty, many things are about to change for the people and all radio amateurs in the Netherlands Antilles. On October 10, 2010 the Netherlands Antilles will cease to exist as a country within the Kingdom of the Netherlands and the islands will emerge with several new statuses:
* St. Maarten and Cura&#65533;ao will become an independent country within the Kingdom and will be granted the same status that Aruba attained in 1986.
* Bonaire, Saba and Sint Eustatius (also called BES islands) will be given the status of a public body (a kind of special municipality) in the Netherlands and will therefore fall directly under Dutch rule.

What does this mean for radio amateurs?

The two current DXCC entities of PJ2/PJ4 (Leeward Islands) and PJ5/PJ6/PJ7
(Windward Islands) are expected to be deleted. However, several new entities are likely to emerge on 10-10-2010.
* Both St. Maarten (PJ7) and Curacao (PJ2) will become a new DXCC entity.
* Bonaire (PJ4) will become a new DXCC entity.
* Saba (PJ6) along with St. Eustatius (PJ5) will become a single DXCC entity due to their proximity to each other.

In short, 2 entities will be disappearing, but 4 will come back!

Activities from Bonaire

Everyone knows what an activation of a new DXCC country means and that's why a group of hams from Bonaire, Germany, The Netherlands and the United States have joined forces to successfully activate Bonaire.

From six locations around the island, a group of between 15 and 20 amateurs will activate Bonaire between October 10-24, 2010. The primary focus will be all HF bands from 160 to 10 meters including the WARC bands. Due to the time of year, 6 meters will not likely produce much activity, but it will be a consideration. The team will focus on all modes including SSB, CW and various digital modes.

Callsigns

Callsigns will be announced prior to the activation. However, we expect the prefix to continue to be PJ4 even after October 10th. Further information about the callsigns to be used will be published on our website - http://www.bonaire2010.com

Radio Netherlands

With 6 locations around the island, there should be plenty of opportunity for a QSO. However, our premiere location is that of the short-wave transmitter site, Radio Netherlands. Bonaire is home to a large relay station and its impressive aerial park which provides up to 21 dBd gain. We are extremely pleased to announce that with the co-operation of the World Service, our group of hams has been granted use of the antennas during their "dead hours" on the HF bands.

In addition to our other locations, we anticipate being active on HF daily between 12:30 and 18:30 UTC from the Radio Netherlands facility. We expect to utilize this opportunity on 30, 20, 15 and 17 meters. Radio Netherlands is also expected to air a special program dedicated to the new status of the radio amateurs on Sunday, October 10th.

More information will be available on the Radio Netherlands' website <www.rnw.nl> or on the DXpedition website - <www.bonaire2010.com>.

Contacts with schools

Between October 11th-15th, the World Service's facility will also serve another purpose. A group of schoolchildren from Bonaire will be contacting another group of children in the Netherlands who will be the guest of Dutch ham PD1DX. This will provide an opportunity for the group of new Dutch country citizens to ask each other questions in order to get to know one other a little bit better.

QSL cards

All QSOs will be QSL'd through the services of Global QSL who will be responsible for printing and distributing cards to all QSL bureaus worldwide. If you do not use a QSL bureau or would like to send for a direct confirmation, all QSL information will be published on our website ? http://www.bonaire2010.com

Website with online log

Up to date information will be published on our website - http://www.bonaire2010.com
Information on Bonaire, sponsors, activation plans and the participants will be listed. In addition, we expect to have an on-line log.

Given the expected pile-ups, we kindly ask everyone who works us after 10-10-2010 and who finds themselves in the log not to call again. We want to give a new country to as many people as possible.

Participating hams

At the time of release of this bulletin the following amateurs will join
the activation:
Bonaire : PJ4GT, PJ4LS, PJ4NX
Germany : DL9USA, DJ8NK
Netherlands : PA8A, PA8F, PA3GVI, PE2MC, PE2KY, PG4M
United States : K6AM, N0VD, W4PA, W0LSD
Puerto Rico : WP3UX

This list is subject to change. For the latest news about the
participants, please visit our website.

See you in the pile-ups on 10-10-2010!

PRESS RELEASE

August 14, 2010

Dear Media Organization or whom it may concern:

This letter is to inform the Media Organization of the International Radio Emergency Support Coalition present emergency activities:

Here is the back ground of IRESC as follows:
The main objectives of IRESC are to foster efficient collaboration between Radio Amateurs, extending friendships across the world and0 providing international emergency communications in times of need.

IRESC is a worldwide coalition of volunteer communicators, with dedicated members spread around the globe, help can be provided at all times of the day or night.

Currently, IRESC has members in at least 38 countries and it continues to grow. Most members are also affiliated with their respective national organizations; for example, the International Red Cross, the Magen David Adom, the Salvation Army, RAYNET, local ARES and RACES groups, along with many others.

The IRESC team uses several modes of communication, including HF, VHF, UHF, amateur satellites, and principally Echolink VoIP communications. The IRESC Conference Server on Echolink (*IRESC*) is node number 278173. The trunk systems use the Internet to link communications over vast distances without the propagation and interference shortcomings of radio paths. In this way, a disaster zone and the point of best assistance can be joined even if they are on opposite sides of the planet.

We are always looking for new members in any part of the world. IRESC is willing to collaborate with all emergency communicators and relief agencies to provide support and communications for any disaster.

Being a truly international organization, IRESC strongly adheres to the principals that bind together the world amateur radio movement; working together regardless of race, religion, culture or political viewpoint.

At the present time IRESC is one of major emergency Ham operators operating in Pakistan with the approval of PARS Pakistan Armature Radio Society for Pakistan Government.

IRESC offered assistance and PARS then accepted and started asking for expertise and assistance.

I Salvadore Torres as acting Senior Vice President/ Directors of Presidents, Call Sign W0SCT, then called a special Board meeting with IRESC International and with the approval IRESC President of Carl Caracol , Call Sign W2WRX IRESC alert protocol was activated immediately .

I Salvatore Torres then contacted out IRESC Presidents located in Turkey and India and they in turn contacted their sources.

The IRESC Turkey President Urcun Canel, Call sign TA0U, then set up search and rescue operation for ECOM and air cargo and equipment=20 and other actions for the Pakistan emergencies.
The IRESC India President Devulapalli =93Bharathi=94 Prasad, Call Sign VU2RBI, then also set up her network and is a major operator for Pakistan operation on behalf of IRESC International. She is a well known world famous operator that is a known for her work in emergencies.

The International Coalition of IRESC the monitored and has been receiving traffic and we have actual ECCOMM traffic at this time. We will pass all life and death and health and welfare information that may be required.

We also are in direct contact with various government agencies and organizations throughout the world and have access as required for this emergency. Our government liaison and net control operator and manager Dennis Baumgarte, Call Sign AE2EE is in charge of these actions at this time.

We need the media to inform them of the above stated activities concerning Pakistan. IRESC then can assist as required regarding the above stated in passing information and traffic concerning emergencies. We are a nonprofit organization with no monies and salaries but will do the best we can as ham operators and emergency responders.

This information is critical for the public to know.

Respectfully Submitted

Salvatore TORRES
IRESC Senior Vice President/ Director of Presidents IRESC

DXNL 1689 - Aug 18, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

CE - CHILE
Hector,CE3FZL, Ricardo,CE3HDI, Hugo,CE3BBC, Cristian,CE3PCN, and
Esteban,XQ7UP, will be active in SSB and CW signing XR2A from the
lighthouse in Punta Angeles (Valparaiso, ARLHS CHI-001) during the
upcoming International Lighthouse Weekend (ILLW) on Aug 21/22.
QSL via CE3BBC.
Find more information online at: http://www.qrz.com/db/xr2a

Ismael,CE1TUW, and other OPs will activate the lighthouse in
Punta Tetas (ARLHS CHI-075) signing CE1Z in SSB and digital modes on
40m, 20m, 15m and 10m during the ILLW. QSL via CE1WNR.

CP - BOLIVIA
Rene,CP6/DF9GR, is staying in Bolivia for one week now and will stay
there until Aug 26. He works in CW, SSB, RTTY and PSK on 80m-10m with
focus on the 80m band. He uses an IC706, an Inverted-L for 80m and a
12m Spiderbeam. QSL via bureau or direct to his homecall, LoTW or eQSL.

CX - URUGUAY
Some members of the "Radio Club Uruguayo" will activate the lighthouse
at Punta Brava (ARLHS URU-012) for the first time during the ILLW from
Aug 20, 1500 UTC until Aug 22, 2359 UTC. They will work with two radios
signing CW1A in CW, SSB and digital modes on 80m-10m.
Unfortunately QSLs only direct via Radio Club Uruguayo, PO Box 37,
11000 Montevideo, Uruguay.

A team of the "Centro de Radioaficionados de Rocha" (CX1TA) will be QRV
as CW0T from the lighthouse in Cape Santa Maria during the ILLW.
QSL via EA5KB.

GU - GUERNSEY, EU-114
Bob,M0MCV, is signing MU0MCV from Guernsey (EU-114) on HF and VHF

from Aug 16-21. QSLs direct or via bureau to his homecall.

HS - THAILAND
E2E is a new clubstation in Thailand which opened on Aug 8 and will be activated not only in contests. E2E has a licence for all HF bands. QSL via HS0AC.

OJ0 - MARKET REEF, EU-053
A few members of the "Scandinavian Amateur Radio Teleprinter Group" (SARTG) will activate Market Reef (EU-053) during the 40th SARTG WW RTTY Contest (Aug 21/22). Kari,OH2BP, Vaino,OH9GIT, Charlie,SM4RGD, Jan,SM5FUG, and Ewe,SM7BHM, will use the special callsign OJ0SARTG as multi single. They also work as OJ0/homecalls in CW and SSB one day before and after the contest. QSLs for OJ0SARTG via SM7BHM, via bureau or direct (2 US$, 2 Euro or 1 IRC).

TA - TURKEY
The TC Special Wireless Activity Team (TCSWAT) cooperating with the Canakkale Onsekiz Mart University issue the "World Universities Congress 2010 Award". Besides of the headquarter station TC2010WUC (Canakkale Onsekiz Mart University) following special event stations are activated during the months of August, September and October:
TC1WUC - Istanbul European Side University
TC2WUC - Istanbul Asian Side University
TC3WUC - Izmir Dokuz Eylul University
TC6WUC - Giresun University
TC9WUC - Kars Kafkas University
The awards are available in gold, silver and bronze and for the basic award you have to make at least one QSO with TC2010WUC and there is also a special SWL version.
More detailed rules can be found at: http://www.tcswat.org/awards/WUC

VP8/A - ANTARCTICA, AN-016
Gianni,I1HYW, writes that the first direct QSLs for AT10BP were sent out by him. Mail sent to India cannot be processed before OM Bhagwati returns home in December. Until then Bhagwati is working from the Indian Antarctic base "Maitri" only in SSB as follows: 20m (14300 kHz), 15m (21300 kHz) and 40m (7150 kHz) +/- QRM. If you want to arrange a sked with AT10BP please send an e-mail to Bhagwati using his e-mail address: bplovemaitri@rediffmail.com

V5 - NAMIBIA
John,V5/HB9PHJ, is working on all HF bands until Aug 30.
QSLs also via bureau to his homecall.

5H - TANZANIA
Ron,DL4ME, is very active on HF mainly in CW signing 5H3ME till Aug 30.
QSLs via bureau to his homecall.

FRANCE, SPECIAL EVENT STATION
The Radio Club Pau remembers the 400th day of death of King Henry IV. by activating TM400H between Aug 13 and Sep 26.

QSL direct or via bureau to F6KDU.

GREECE, SPECIAL EVENT STATIONS
Members of the Radio Amateur Association of West Greece (RAAWG) may
use the special prefix SX25 until Oct 27. They are celebrating the
25th anniversary of the RAAWG. More information including a special
award can be found at: http://www.qrz.com/db/sx25a

UKRAINE, SPECIAL EVENT STATION
The special event station EM75MSD is working in all modes on all bands
until Aug 31. This call remembers the coal miner Alexey G. Stakhanov
who achieved the record of mining 102 tons of coal in 5 hrs and 45 min
on Aug 31, 1935. QSLs via UX7MA.

WFF activities: Members of the club HA8KWO are activating the national park
"Koros-Maros" in SSB and CW working as HG8SDS (QSL via HA8PH) and
HG8WFF (QSL via HA8MT) from Aug 14-21.

DXCC: QSL cards of 9UXEV (Burundi, 2010) are accepted for DXCC credit now.

SILENT KEY: Dr. Len Kaufer,KH0AC, passed away on Aug 12 in his house on
Saipan. He started there as a Jesuit priest in 1960 and amateur radio
has always been his big love. Len was a good multiplier in all major
contests. We will miss him.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
A new website of ZS8M (who is off air due to QRL until Aug 19) with
photos of Marion Island and a logsearch can be found at:
http://www.iz8epy.it/html/zs8m.html

More information about the "International Lighthouse Weekend" (ILLW),
taking place on Aug 21/22, is available at: http://illw.net

UPCOMING CONTESTS

Aug 21/22: SARTG RTTY Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-077, JA6, Kyushu Island, main: The special call 8J6AIRA will be aired
to celebrate the founding of the city Aira on Kyushu from Aug 23-31.
QSL via JARL bureau.

EU-009, GM/MM, Orkney Islands: GB1OL is hitting the airwaves from the
island of Westray (IOSA OR02, SCOTIA OI31) from Aug 14-27.
QSL direct (see QRZ.com).

EU-052, SV, Ipeiros/DytikiEllas Region Group: Rolf,SV8/DL6ZFG/p, will be QRV from Kerkira (aka Corfu, GIOTA INS 042, WLOTA 4132) from Aug 21-28. He works in all modes "holiday style" with his IC706, 100 watts and a Triple-Leg for 20m. QSL via DL6ZFG.

EU-113, SV, Peloponnisos (Lakonia) Kythira Region Group: Fred,SV8/PA1FJ/p is going to hit the airwaves from Kythira (GIOTA INS-004) from Aug 23-30. QSL via homecall (direct/bureau/eQSL).

EU-126, OH9, Lappi Province Group: Rug,DJ3XG, and Mario,DL5ME, will be QRV as OH9AA/p from Syvaeletto Island from Aug 18-22. QSL via DL5ME.

EU-139, SM2, Norrbotten County Group: Rug,DJ3XG, and Mario,DL5ME, will be QRV as SI0TA from Seskaroe Island from Aug 23-25. QSL via DL5ME.

EU-172, OZ, Jylland East&Fyn Group: Peter,DL4AMK, Dieter,DK1AW, Lutz,DH8WW, Joachim,DJ2AS, and Lutz,DL3ARK, will sign OZ/homecalls from the island of Aro (DIA JY-03) from Aug 21-28. More info at: http://www.dxclub.net

QSLs for B4R/5 and B4R: QSLs of B4R/5 (AS-138) are managed ONLY by BA4TB, while all QSL requests for B4R should be sent to BY4RSA.

QSLs arrived direct: Letter of UA4WHX with 20 (!) QSL cards after sending two SAE.

Egyptian Radio Amateurs Society for Development (ERASD)

Egypt announces the establishment of "The Egyptian Radio Amateurs Society for Development" (short ERASD), the national official representative body for radio amateurs in Egypt. Despite the fact that amateur radio has been present in Egypt since the early twenties of the last century, there was no officially recognized society to represent radio amateurs in Egypt for nearly the past eight decades.

The ARRL Contest Update

Published by the American Radio Relay League
*****************************************

August 18, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Hilltoppers Holiday - ARRL 10 GHz and Up Contest
- Who Are You? North American QSO Party - Phone
- ARRL Contest Blog Returns
- Land of Lookouts
- Who Do the Voo Doo?
- Expanded ARRL DX Phone Results
- Marshmallow Safety
- Feel the Burn on RMOB
- Music Quiz Answers
- Amok Time

NEW HF OPERATORS - THINGS TO DO

The North American QSO Parties are a great introduction to HF
contesting and don't require a full weekend of time. The SSB contest is
this Saturday - just exchange your name and state. You can work
stations on all six HF contest bands from 160 to 10 meters.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Aside from getting Hank N8XX's call wrong in the last issue, it was
relatively untarnished.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

August 21-22

- ARRL 10 GHz and Up Contest
- SARTG WW RTTY Contest
- Russian District Award Contest
```

- Silent Key Memorial Sprint--CW
- North American QSO Party--Phone
- New Jersey QSO Party
- Run For the Bacon--CW

August 28-29

- Hawaii QSO Party
- YO DX Contest
- SCC RTTY Championship
- Kansas QSO Party
- Ohio QSO Party
- ALARA Contest
- South Africa DX Contest--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

ARRL Contest Branch Manager, Sean KX9X notes that the Contest Branch Blog <http://www.arrl.org/arrl-contest-branch> is once again active on the ARRL Web site. While visiting, VHF+ contesters should take note of the discussion about the use of non-amateur means to solicit QSOs during contests.

Array Solutions <http://www.arraysolutions.com/Products/as-43a.htm> has released a new product that is a digital upgrade to the popular Bird 43 wattmeters. The AS-43A kit replaces the analog meter with a backlit digital display that can be read "from across the room". Running on alkaline batteries, the display kit works with your current meter housing and sensing elements (a.k.a. "slugs"). (Thanks, Jay WX0B)

Roger G3SXW has announced that the VooDoo Contest Group <http://www.voodoocontestgroup.com/> will be operating as 9L5VT in the CQ WW CW contest this year, in honor of Vince K5VT who became a Silent Key earlier this year. If you ever wondered about how the group was named, this reprint of a 1997 CQ Contest article <http://www.custommetalworks.com/voodoo_file/1996_5v7a_article.html> makes great reading and explains the mystery. (Thanks, Tom K7FA)

Tom VE3CX has created a new Yahoo group called Contest_Canada. To join, please send an email to Contest_Canada-subscribe@yahoogroups.com. Tom's intention is to create a forum where issues of interest to Canadian contests can be discussed.

A new release of the Super Check Partial <http://www.supercheckpartial.com/> database files is now available. This version has 41,164 calls in the main database and 9,772 in the RTTY file. The next SCP release will occur about a week before CQ World Wide <http://www.cqww.com/> SSB in October. To check the version of the SCP files you are currently using, look for a call beginning with "VER". Every SCP file includes the version number in the list of calls in the format VERYYYYMMDD. Your editor notes that it is a good thing to update your software and supporting files well in advance of the contest. (Thanks, Bob WA1Z)

Here's a good story about ham radio in the Caymans <http://www.compasscayman.com/observer/2010/07/25/Hamming-it-up/>, one of the most popular contest expedition destinations. (Thanks, Tom K1KI)

Craig K1QX notes that the "Beyond Landschiedt <http://www.landscheidt.info/>" Web site is recommended by Accuweather <http://www.accuweather.com/> as having done a superior job of predicting solar activity. Unfortunately, the site predicts a drop in activity after this current burst of solar enthusiasm - we shall see! And why might that drop in solar activity occur, anyway? A recent BBC article <http://www.bbc.co.uk/news/science-environment-10967292> relates the changing duration and amplitude of the solar cycle to changes in the speed at which plasma circulates in the north and south solar hemisphere.

Chip K7JA reports that, "Dr. Len Kaufer KH0AC <http://dx-world.net/2010/kh0ac-silent-key/>, became a Silent Key in his home on beautiful Saipan. Len, formerly KG6SW, went out to the Trust Territory of Saipan in the 1960s as a Jesuit priest. Len was everyone's Saipan multiplier for many years."

Web Site of the Week - Hams love high spots, particularly the VHF+ contesters. Finding these gems is easier if you use the Former Fire Lookout Sites Register <http://www.firetower.org/>. There are also links to the National Historic Lookout Register <http://www.nhlr.org/> and the Forest Fire Lookout Association <http://www.ffla.org/> to supplement the FLSR listings. Most reports are for the typical non-ham visitor, but there is no reason for the VHF+ enthusiast not to add a note. (Thanks, JD VA7OTC)

WORD TO THE WISE

Papain - No, that's not the pronunciation of "pain" after you are stung by an insect. Papain <http://en.wikipedia.org/wiki/Papain> is an enzyme used in some meat tenderizer powders to break down protein in the meat. It is obtained from the papaya and breaks down the venom proteins, too. Stings from wasps, hornets, and bees can be a big problem during tower or antenna work, so keeping a small shaker of it in the tool kit might be a good idea. Applying it in a paste <http://www.drgreene.com/article/treatment-bee-stings> to the sting is one way to soothe the pain. Don't use seasoned meat tenderizer as the spices can cause inflammation of their own accord. An antihistamine such as Benadryl <http://en.wikipedia.org/wiki/Diphenhydramine> can provide temporary relief from allergic reactions, but if you have any symptoms such as swelling or breathing difficulties, call 911 immediately.

==> SIGHTS AND SOUNDS

The Potomac Valley Radio Club <http://www.pvrc.org/> (PVRC) will host a Webinar on 'Contesting in Africa' on August 22nd, at 1900Z. The Webinar is presented by Mike KC7V and Roger G3SXW, members of the Voo Doo Contest Group, and takes a look at the challenges and excitement of

operating the CQWW DX Contest from various West Africa countries. Registration <https://www2.gotomeeting.com/register/821204658> (free) is required, but the Webinar will be archived for future viewing.

WRTC-2010 fans will enjoy these collections of photos and videos:

(Thanks, Rytis LY4U and Bob N6TV)

The ARRL Propagation Bulletin for August 13th (ARLP032) included links to this series of videos <http://tinyurl.com/20100807mflare> taken at different wavelengths of the August 7th M-class flare by the Solar Dynamics Observatory satellite. While you are viewing movies, be sure to check out the simulation <http://tinyurl.com/20100803cme> of Earth's magnetosphere on August 3 in which you can see the arrival (about 30 seconds into the video) and then the passing of the coronal mass ejection from the multiple-eruption event of August 1, 2010. The massive filament eruption <http://tinyurl.com/20100801filament> associated with the C-class flare of August 1 was also captured.

How about a new way of lifting a line over those tall trees? Watch <http://vimeo.com/6194911> the Hexakopter <http://MikroKopter.com> do its tricks! Able to lift 1 kg, it's interesting watch the attitude-maintenance algorithm deal with the swinging weight. (Thanks, Rick K6VVA)

Frequent flyers will enjoy this graphic flight-blog called, "The Red-Eye <http://niemann.blogs.nytimes.com/2010/08/03/red-eye/>" by Cristoph Niemann. (Thanks, Steve K6AW)

Just as drivers slow to look at car wrecks, hams look at tower failures. Here is a photo album <http://www.wwva.com/cc-common/gallery/display.html?album_id=244870> of

the three self-supporting towers (well, not any more they aren't) of WWVA that blew over in high winds on August 4th. Ouch!

And who can resist a photo album of strange CW keys <http://sites.google.com/site/oh6dccw/strangecwkeys>? (Thanks, Matt N0MSA)

==> RESULTS AND RECORDS

The expanded results for the 2010 ARRL DX Phone contest <http://www.arrl.org/contest-results-articles> are now online. More than half of over 100 pages of content were written by Regional authors looking out for your scores, stories, and pictures. Take a look through the Top Ten and read about accuracy, records, and trends!

This weekend also saw the phone bands playing host to the second ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> contest. Thanks to all the non-Rookies that got on and handed out QSOs. As of Tuesday at 1845Z, 102 Rookies had submitted scores via the online score submission page <http://www.arrl.org/rookie-roundup-score-submission> - a big increase from April's initial event. Results will be online Wednesday and electronic certificates will follow shortly.

WRTC-2010 log-checking reports <http://www.wrtc2010.ru/result_table.php> are now online. If you'd like a look at how the best operators did it, here is your chance! (Thanks, Harry RA3AUU)

The REF Contest Committee announces that the results of the 2010 REF Contest <http://concours.ref-union.org/contest/> (a.k.a. Coupe du REF) are now available online. (Thanks, Pascal F5LEN)

New Top Operator rankings <http://www.radio-sport.net/> have been published by radio-sport.net and a long-time leader has been replaced! There's a good story about the upcoming NAQP SSB, as well.

OPERATING TIP

Order - of the information in an exchange is important to efficient operating. In general, try to give out the information in the same order in which the contest rules specify it. Changing the order is confusing to the receiving operator and increases errors. For example, if the rules specify an exchange of signal report, serial number, and S/P/C (state, province, or country), don't switch the serial number and S/P/C information. You'll find everything runs much smoother without "surprising" the other operator!

==> TECHNICAL TOPICS AND INFORMATION

Marshmallows are a sweet idea and might even be a safety aid! A friend recently told of an incident during antenna work in which he walked directly into the tip of an element. If he hadn't been wearing glasses, he might have lost an eye! Placing a colored item on the small element tips of an antenna can prevent that accident from happening to you - a

tennis ball or ping-pong ball would work and would eventually fall off. A marshmallow is guaranteed to dissolve in the sun and rain - or a bird will eat it. At any rate, save the eye-patches for pirate costumes!

Jim KK6MC recently undertook another Rover ramble, but his post-contest report had a bad ending as his car caught fire! Apparently not radio-related (yes, he did save the logs), the sad saga pointed out the need to carry one or two fire extinguishers. The ensuing discussion featured this electrical safety wisdom from Southwestern Division Vice Director, Marty N6VI, "I strongly suggest you put a Class T fuse as close to the battery terminal as possible. Class T's contain arc-squelching powder and carry an amp-interrupt rating in the tens of thousands of amps. Without one, you may have not just a fire but an explosion in case of a system short. [They] are available through marine retailers and off-grid distributors."

Here are some links to tower-climbing and related safety equipment; LHR Services & Equipment <http://www.lhrservices.com/>, Conney Safety <http://www.conney.com/>, PK Safety <http://www.pksafety.com/>, and US Safety Equipment <http://www.ussafetyequipment.com/>. Gravity isn't our friend when atop the tower! (Thanks, Ken K5RG)

The NOAA Spaceweather <http://spaceweather.com/> site is a treasure trove of information and novel e-gadgets to view it. Jake K9WN found a good Java applet - this scrollable view of the sunspot numbers <http://spaceweather.com/java/archive.html>. Click on any value in the year window so that it is highlighted, move the cursor away from the year list and use your mouse's scroll wheel to zoom back and forth through the years.

Using your mobile rig "hands-free" doesn't have to mean giving up the full suite of microphone buttons and rig controls. Flynn KD7FDK found a project <http://dajjhman.hawks2010.info/ham-radio/mobile-radio-hack> showing how to connect a throat-mounted microphone intended for mobile phones to a regular hand mike.

For constructing RF switching networks, Dave K6LL relays that Top Ten Devices <http://www.qth.com/topten> uses these inexpensive Panasonic relays <http://parts.digikey.com/1/parts/747811-relay-pwr-spdt-10a-12vdc-pc-mnt-jw1fsn-dc12v.html> useful at full legal power on HF. W8ZR recommends the Schrack/Tyco RTD14012F relay and uses it in his StationPro controller <http://www.w8zr.net/stationpro/index.htm> (see the August 2010 QST for more information). Beyond the contact current ratings, other important considerations for using inexpensive relays is the isolation across the contacts and voltage breakdown ratings, both across the contacts and to the coil and armature.

If you're getting ready for contest season or the fall-winter Top Band DXing season, a one-tower "Poor Man's Four-Square" is described in this 1998 Dayton Antenna Forum presentation on the "Spitfire Array

<http://www.yccc.org/Articles/Spitfire/spitfire.htm>" by Fred K1VR. (Thanks, Craig K1QX)

Rick O'Keefe, a reader of the Towertalk reflector <http://lists.contesting.com/mailman/listinfo/Towertalk>, sent news of two Yahoogroups that may be of interest. A lightning protection <http://tech.groups.yahoo.com/group/LightningProtection/> group and a power-quality <http://tech.groups.yahoo.com/group/PQ_Forum> group. Read the home page for information about the mission and scope of each before joining and, as always, search the archives before jumping in with a question that has already been answered.

Amplifier builders constructing bias networks know that high-power Zeners are getting harder to find and more expensive, too. G3SEK has constructed a "programmable Zener <http://www.ifwtech.co.uk/g3sek/boards/triode/triode-manual.pdf>" using a voltage regulator IC and pass transistor as described on page 11. (Thanks, Mike G8TIC)

Technical Web Site of the Week - If you're interested in meteor scatter communications, check out the Radio Meteor Observation Bulletin <http://www.rmob.org/>. The archives are full of information about MS communications and are a great way to keep up with the meteors and those who ping them.

==> CONVERSATION

Amok Time

Star Trek fans will recognize the title as that of an episode in which the normally logical, unemotional Mr Spock suffers through pon farr, the Vulcan mating urge. His behavior changes dramatically - even challenging Captain Kirk to a fight-to-the-death and apparently prevailing, to his extreme dismay. But for the subterfuge of Dr McCoy, the story would not have had its TV-style happy ending. Here in real life, we have our own amok times - they are called "election years".

One of Amateur Radio's mantras - not always followed - is to refrain from discussing politics (and religion and sexual topics) over the air. Unfortunately, it's easy to hear what happens when that advice is not followed - the results are generally unpleasant for the parties involved and anyone tuned in. During the political "silly season", we should redouble our efforts at restraint, particularly in such an energetic year as this one is proving to be.

The many off-the-air channels of Amateur Radio - club newsletters, Web sites, on-line forums, email reflectors, etc - are just as worthy of restraint and consideration for the views and feelings of others. It is all too easy to poison the collegial atmosphere of a club with an injection of non-amateur politics. When a member is made to feel uncomfortable, nothing may be said outright, but he or she will often find something else to do on meeting night or find a better use for membership dues. That's a loss to all of Amateur Radio.

The best policy is to "check politics at the door" in any amateur group or forum without an obviously political mission. This suggestion has nothing to do with limiting one's freedom of expression - except to acknowledge the concomitant responsibility to use that freedom wisely and act accordingly. Before pressing that PTT switch or hitting the ENTER key, ask yourself if there isn't a better forum for making a politicized comment.

Does a political signature line really need to be part of emails about electronics or operating? Does a club newsletter really need to include items promoting a particular political viewpoint or issue? There are many alternate forums for expressing political views in which debate is encouraged - use them. Editors, officers, and moderators need to keep a steady hand on the tiller when navigating the rough seas in the political windy season. (See the editorial in August 2006 QST for information on IRS restrictions of 501(c)3 non-profit organizations <http://www.irs.gov/charities/charitable/article/0,,id=163395,00.html> with respect to political campaigns.)

Amateur Radio and by extension, amateur organizations, should be a refuge from the hurly-burly of politics. That's one of our great strengths - the hobby is open to kings and paupers on an equal basis with many great over-the-air friendships between people from wildly different walks of life. It can remain that way but only if each and every one of us works at it - I'm no different in having to watch out for (and sometimes recover from) the urge to throw in one's two cents. Like Star Trek and elections there's always another episode, but hurt feelings and resentment can last a lifetime.

73, Ward N0AX

Answers to the 4 August Music Quiz - thanks again to Andy N2NT!

EASY CATEGORY
K1AR + Mrs. K1AR - the Doors; K2UA - Rush; W3LPL - Donovan

REQUIRES SOME THOUGHT

9V1YC + WB6ACU - James Gang; N6AN + W2REH + K8AZ - David Clayton Thomas (credit given for Blood, Sweat & Tears); W3LPL + K2MM - Frank Zappa; S50A + G3VTT - Tina Turner; NN3W + K1ZZ - Donna Summer; W7OM + K3MM - Rod Stewart

HIGH DEGREE OF DIFFICULTY

F6BEE + G3SXW + G3TXF - The Bee-Gees; W2NSD + K2NT - Green Day; EX-W4OI - Another Bee-Gees if you didn't get the first one; K1TO/m in Pittsburgh - Steely Dan

==> CONTESTS

August 18 through August 31

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the

sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

SARTG WW RTTY Contest--Digital, from Aug 21, 0000Z to Aug 22, 1600Z. Bands (MHz): 3.5-28. Frequencies (MHz): Multiple operating periods. Exchange: RST and serial. Logs due: Oct 9. Rules <http://www.sartg.com/contest/wwrules.htm>

Russian District Award Contest--Phone,CW, from Aug 21, 0800Z to Aug 22, 0800Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Russian district. Logs due: 30 days. Rules <http://rdaward.org/rdac1.htm>

Silent Key Memorial Sprint--CW, from Aug 21, 1500Z to Aug 21, 1800Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, QRP ARCI mbr nr or pwr. Logs due: Sep 15. Rules <http://qrparci.org/>

North American QSO Party--Phone, from Aug 21, 1800Z to Aug 22, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and state. Logs due: 14 days. Rules <http://ncjweb.com/>

New Jersey QSO Party--Phone,CW, from Aug 21, 2000Z to Aug 22, 0700Z and Aug 22, 1300Z to Aug 23, 0200Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): Multiple operating periods. Exchange: Serial and NJ county or S/P/C. Logs due: Sep 13. Rules <http://www.qsl.net/w2rj>

Run For the Bacon--CW, from Aug 23, 0200Z to Aug 23, 0400Z. Bands (MHz): 1.8-28. Monthly on the third Sunday local time. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.com/fpqrprun.php>

Hawaii QSO Party--Phone,CW,Digital, from Aug 28, 0700Z to Aug 29, 2200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and HI location ID or S/P/C. Logs due: 30 days. Rules <http://www.karc.net/>

YO DX Contest--Phone,CW, from Aug 28, 1200Z to Aug 29, 1159Z. Bands (MHz): 3.5-28. Exchange: RS(T), serial or YO district. Logs due: 30 days. Rules <http://www.hamradio.ro/>

SCC RTTY Championship--Digital, from Aug 28, 1200Z to Aug 29, 1159Z. Bands (MHz): 3.5-28. Exchange: RST, 4-char year first licensed. Logs due: Sep 15. Rules <http://lea.hamradio.si/%7Escc/rtty/rtty.htm>

Kansas QSO Party--Phone,CW,Digital, from Aug 28, 1400Z to Aug 29, 0200Z and Aug 29, 1400Z to Aug 29, 2000Z. Bands (MHz): 3.5-28, 50,144, Frequencies (MHz): CW--40 kHz above band edge; Phone--3.840, 7.240, 14.240, 21.340, 28.440. Exchange: RS(T) and KS county or S/P/"DX". Logs due: Oct 1. Rules <http://www.ksqsoparty.org/>

Ohio QSO Party--Phone,CW, from Aug 28, 1600Z to Aug 29, 0400Z. Bands (MHz): 3.5-28. Exchange: Serial and S/P or "DX". Logs due: 30 days. Rules <http://www.ohqp.org/>

ALARA Contest--Phone,CW, from Aug 28, 0400Z to Aug 28, 1359Z and Aug 29, 0400Z to Aug 29, 1359Z. Bands (MHz): 3.5-28, 144,440, Frequencies (MHz): Multiple operating periods. Exchange: RS(T), serial, ALARA nr, name. Logs due: Sep 30. Rules <http://alara.org.au/>

South Africa DX Contest--CW, from Aug 29, 1400Z to Aug 29, 1600Z. Bands (MHz): 3.5-14. Exchange: RS and serial. Logs due: 15 days. Rules <http://www.sarl.org.za/>

VHF+ CONTESTS

ARRL 10 GHz and Up Contest--Phone,CW,Digital, from Aug 21, 6 AM to Aug 21, 12 AM. Bands (MHz): 10G+. Exchange: 6-character grid locator. Logs due: Oct 21. Rules http://arrl.org/contests

New Jersey QSO Party--Phone,CW, from Aug 21, 2000Z to Aug 22, 0700Z and Aug 22, 1300Z to Aug 23, 0200Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): Multiple operating periods. Exchange: Serial and NJ county or S/P/C. Logs due: Sep 13. Rules <http://www.qsl.net/w2rj>

Kansas QSO Party--Phone,CW,Digital, from Aug 28, 1400Z to Aug 29, 0200Z and Aug 29, 1400Z to Aug 29, 2000Z. Bands (MHz): 3.5-28, 50,144, Frequencies (MHz): CW--40 kHz above band edge; Phone--3.840, 7.240, 14.240, 21.340, 28.440. Exchange: RS(T) and KS county or S/P/"DX". Logs due: Oct 1. Rules <http://www.ksqsoparty.org/>

ALARA Contest--Phone,CW, from Aug 28, 0400Z to Aug 28, 1359Z and Aug 29, 0400Z to Aug 29, 1359Z. Bands (MHz): 3.5-28, 144,440, Frequencies (MHz): Multiple operating periods. Exchange: RS(T), serial, ALARA nr, name. Logs due: Sep 30. Rules <http://alara.org.au/>

==> LOG DUE DATES

August 18 through August 31

August 18 - DMC RTTY Contest
<http://digital-modes-club.org/index.php?option=com_content&view=article&id=58&Itemid=56%E2%8C%A9=en>

August 18 - ARRL Rookie Roundup, SSB
<http://www.arrl.org/rookie-roundup-score-submission>

August 19 - RSGB 80m Club Sprint, CW
<http://www.rsgbcc.org/hf/rules/2010/rsprint.shtml>

August 21 - North American QSO Party, CW
<http://www.ncjweb.com/naqprules.php>

August 22 - Run for the Bacon QRP Contest
<http://www.fpqrp.com/fpqrprun.php>

August 23 - 10-10 Int. Summer Contest, SSB
<http://www.ten-ten.org/Forms/QSOPartyRulesRevised.pdf>

August 30 - WAE DX Contest, CW
<http://www.darc.de/referate/dx/contest/waedc/en/rules/>

August 31 - Venezuelan Ind. Day Contest
<http://www.radioclubvenezolano.org/rules.htm>

August 31 - European HF Championship
<http://lea.hamradio.si/%7Escc/euhf/euhfcrules.htm>

==> ACKNOWLEDGEMENTS

ARRL Contest Update wishes to acknowledge information from WA7BNM's Contest Calendar <http://www.hornucopia.com/contestcal> and SM3CER's Contest Calendar <http://www.sk3bg.se/contest>.

The ARRL Contest Update is published every other Wednesday (26 times each year). ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/contests/update/.

Ohio/Penn DX Special Bulletin No. 972.2
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 972.2
BID: $OPDX.972.2
August 18, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and W8GEX for the following DX information.

For Immediate Release

Southwest Ohio DX Association (SWODXA) recently announced that the 26th annual DX Dinner, which is held in conjunction with Dayton Hamvention, will be at a new location for 2011. It will be on Friday, May 20, at the Dayton Marriott, located at 1414 S. Patterson Blvd., Dayton, OH 45409. This is less than a five minute drive from the previous location.

On August 20, 2010, the Marriott will open more rooms to be booked. Should anyone need accommodations, their phone number is 1-800-228-9290 or the website is http://www.marriott.com/hotels/travel/dayoh-dayton-marriott. NOTE: The additional rooms will not be available before August 20.

When dinner tickets become available, more information will be posted on our website at www.SWODXA.org.

We look forward to seeing everyone at the DX Dinner at the Marriott and at Hamvention. Good Dxing!

** IMPORTANT NOTICE/REMINDER ** The Ohio/Penn DX Bulletin now has a new FAX number. Contributors can now send/fax their DX information to the following number: 1-419-828-7791 (F A X only!)

SPECIAL NOTE BY EDITOR: If you are having a problem receiving bounced mail by sending mail to me via " kb8nw@barf80.nshore.org ", please send mail to me via " kb8nw@arrl.net "..... TNX de Tedd KB8NW

** MS: PERSEIDS 2010 REVIEW at MMMonVHF **

First IMO reports (based on visual observations worldwide)
indicate that in 2010, Perseids meteor activity has been in very
good agreement with predictions. Predicted ï¿½traditionalï¿½ maximum
has been relatively broad as expected, with ZHR > 50 hr-1 for
about 2 days. Maximum took place in the late afternoon of Aug.
12th, with ZHR about 100 hr-1, due to a strong subpeak noticed on
Aug. 12th, 17.20 UT. This time is in quite good agreement with
expected time of encounter with year 1479 dust trail (predicted
by J. Vaubaillon) so this subpeak may actually be related to that
dust stream. Have a look to a review of 2010 Perseids meteor
shower activity on our MS-Propagationpage: www.mmmonvhf.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** EMEï¿½r Meeting in Weinheim sat 11.09.2010 10:30 utc **

Dear Gentlemen, i would like to invite you to an EMEr meeting in
Weinheim on sat 11.09.2010. Meeting point, like last year, in
front of the main entrance at 12:30 mesz (10:30 utc) We can eat
something at the grill station there and after that look for a

free room upstairs for some further discussions. A short feedback
of interested stations would be welcome. If you need my mobile
number, just let me know by mail. 73s and cu in Weinheim...

** New DXCC activation of PJ4, Bonaire **

The end of a country - The Netherlands Antilles With a 99%
certainty, many things are about to change for the people and all
radio amateurs in the Netherlands Antilles. On October 10, 2010 the
Netherlands Antilles will cease to exist as a country within the
Kingdom of the Netherlands and the islands will emerge with several
new statuses: * St. Maarten and Curaï¿½ao will become an independent
country within the Kingdom and will be granted the same status that
Aruba attained in 1986. * Bonaire, Saba and Sint Eustatius (also
called BES islands) will be given the status of a public body (a
kind of special municipality) in the Netherlands and will therefore
fall directly under Dutch rule... So very soon, 2 DXCC entities
will be disappearing, but 4 DXCC will come back!
Press Release: 10-10-2010, Date: 11 August, 2010 via OPDX #972.1

** Open 2010 LY VHF/UHF/SHF Championship **

On behalf of the Lithuanian Radio Amateur Society (LRMD) we would
like to invite all radio amateurs to participate in the annual
LY VUSHF Championship which is scheduled to take place, as usually
on the third Saturday of August which is 21th of August 2010
Bands 144MHz-10GHz - Full rules of the contest are here:
http://www.lrmd.lt/utb/en/vushfcontest.html

After the cancellation of the T31 DXpedition by Hrane/YT1AD, David
/K3LP and friends, the team has now organized a 2011 DXpedition to
the small beautiful island of Conway Reef (OC-112), part of the
Fiji Islands in the South Pacific Ocean. Tentative schedule is
as follows (in 2011):
September 28th - Team arrives in Nadi, Fiji.
September 29th - Team departure from Nadi.
September 30th - Team arrives on Conway Reef during the afternoon.
October 1-10th - Activity from Conway Reef.
October 11th - Team departs from Conway Reef to Nadi.
October 12th - Team arrives at Fiji during the afternoon.
Activity will be on 160-10 meters using CW, SSB, RTTY, SSTV and
PSK31. They will also be on 6 and 2 meters using EME using WSJT65
A,B,C on the following frequencies: 50.375 MHz and 144.375 MHz.
BEACON on 50 MHz at 50.095 MHz. More in detail read or USE or

** LOG from Grid Expedition to EM69xw **

We did got a transfer from the Log of the Grid Expedition to
EM69xw (near Fishers Indiana 7-8 August 2010) by Joe, K9MRI
Total of 63 QSO's during 1.5 days of operation. Three hour period
with severe power line noise Several large birdies near frequency
of 144.149 MHz... See: http://www.mmmonvhf.de/review.php
Set Call (K9MRI/p) or Locator (EM69) in the Toolbox...
SOURCE: tnx to Joe, K9MRI via Johan, ON7UC direct to MMMonVHF

** ZP4KFX on 6m EME **

It is with great pleasure that I welcome Pino, ZP4KFX to the EME
community! He made the first ever 6m EME contact from ZP this
afternoon when we completed a contact during his moonset. Pino
is running around 800w from a Harris Channel 2 TV amplifier module
to a homebrew 10 element YU7EF yagi. He is horizon-only and has
great ground gain. I first copied calls from him when his moon
was up around 30 degrees, and then I copied him again around 25
degrees elevation and we completed around at around 19 degrees.
SOURCE: Lance, W7GJ via Magic Band EME

** YL3AG on 6m EME **

Congratulations to YL3AG for the first 6m EME from Latvia! What a
surprise it was today to see Vitauts and complete for a new DXCC
;-) Vitauts is running a pair of 5 element yagis (I think) and a
kw. MNI TNX to Vitauts for the new DXCC #159 (#107 via 6m EME) ;-)
SOURCE: Lance, W7GJ via Magic Band EME

** IQ0FM qrv in LH-Weekend **

Look for IQ0FM/p to take part in the International Lighthouse
/Lightship Weekend (21-22 August) from Monte Orlando lighthouse in
Gaeta. They will operate mainly SSB on the HF bands and 6 metres.
All of the QSOs will be confirmed automatically via the bureau;
direct cards should be sent to IZ0GZW.
SOURCE: [TNX IZ0EGC] via 425 DX NEWS # 1005

** Laci, HA0HW qrv again from J48, GREECE (& also LZ) **

Laci, HA0HW, will once again be active as J48HW from Thassos Isl.
(IOTA: EU-174, GIOTA: NAS-037, MIA: MG-124, WLOTA: LH-4186, QRA:
KN20HS) between August 28th and September 7th. He usually operates
mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands
(mainly on 40/30/20/17 meters) and on 6 meters. His rigs are a
FT-840 with a MOS-FET amplifier and an IC-706 (for 6m only).
Antennas are a monoband Gps and dipoles on fishing poles. QSL via
his home callsign, direct or by the HA Bureau. Laci informs OPDX

that he will spend one day in Bulgaria (LA), and will operate from
the LZ9W super contest station as LZ/HA0HW.
SOURCE: Ohio/Penn DX Bulletin #971

** Holidaystyle - Activity from GU **

Bob, M0MCV will be active as MU0MCV from Guernsey (EU-114)
on 16-21 August. He will operate holiday style on the HF and
VHF bands SSB. QSL via home call, direct or bureau.
SOURCE: [TNX M0MCV] 425 DX News #1006

** HF and 6m Activity from Republic of Palau **

Taki JH3QFL (T88TB) and Harry JH3KEA (T88KH) will be active
from Koror Island, Republic of Palau (OC-009, Grid Loc. PJ77)
on 19-22 September 2010. QRV on 80-6m using SSB, CW and RTTY.
QSL via their respective home calls, direct or by the JARL bureau
SOURCE: [NG3K] via ICPO Bulletin (12 - 20 August 2010)

** TO7, ST. BARTHELEMY Activity on HF and 6m **

Operators Lot/DJ7ZG and Babs/DL7AFS will be active
as TO7ZG from Flamand Beach (NA-146, DIFO FJ-001, WLOTA L-0377)
between October 6-20th. Activity will probably be on 80-6 meters
with operations mainly on RTTY, PSK and SSB. QSL via DL7AFS,
either by the DARC Bureau or direct. For updates, watch:
http://www.qsl.net/dl7afs - SOURCE: Ohio/Penn DX Bulletin #972

** PJ4 Bonaire Isl. - CQ WW DX SSB 2011 CONTEST EXPEDITION **

LATEST UPDATE by the SEECC, dated 2010-08-14: Members of the South
East Europe Contest Club (SEECC) are planning to be active from
Bonaire (SA-006 and WLOTA L1279) for the "2011" CQWW DX SSB Contest
The operation will take place between October 25th and November 1st
It is expected that this will be a new DXCC entity by then.
Operators mentioned are: Romeo/S52RU, Dale/N3BNA, Marko/YT2T,
Maurizio/IV3ZXQ, Zvonko/Z35W, Fabrizio/IW3SQY, Acim/YU1YV and
Noah/K2NG. Activity will be on 160/80/40/20/15/10/6 meters using
CW, SSB and RTTY. QSL Manager is YU1YV. More details and updates
are available at: http://www.seecc.org/PJ4_EXPEDITION/index.html
SOURCE: Ohio/Penn DX Bulletin #972

** URUGUAY Lighthouse Operation by CW1A **

Members of the "Radio Club Uruguayo" will
activate for the first time "Punta Brava Lighthouse" (ARLHS URU-
012, 34ï¿½ 56' 06"S/56ï¿½ 09' 38"W, Grid Locator GF15wb) during the
upcoming ILLW activity between 1500z Friday, August 20th, and
2359z Sunday, August 22th. Activity will be on 80-10 meters using
CW, SSB and the Digital modes with at least two stations, and also
VHF and UHF, with one station using the special event callsign
CW1A. QSL for this activity is only direct to: Radio Club Uruguayo
P.O. Box 37,11000, Montevideo, URUGUAY, SOUTH AMERICA (w/SAE and

IRC or 2 green stamps). SOURCE: Ohio/Penn DX Bulletin #972

** N3, UNITED STATES (911 Special Event) **

Look for special event station "N3U/United Flight 93" to be
activated between September 9-13th, to remind "Amateur Radio
Operators World-Wide" of the tragic events that happened near
"Shanksville (Pa), New York City and Washington DC on September
11, 2001." This operation (along with the prior "P41USA"
operations from Aruba Island) will be sponsored by the "Blair
Amateur Radio Society" (W3PN) along with various local, state
and government agencies (City of Altoona, Blair County Pa, Red
Cross, EMA/911, LEPC, PEMA, DHS). The "N3U/United Flt 93"
operators will include: Bob/W3BTX & P49T, Roy/W3TEF and various
other W3PN club members. They also intend to be active on
different bands and modes during this "first-ever" initial
upcoming operation in September 2010. Suggested operating
frequencies are (+/- QRM): CW - 1810, 3530, 7030, 10120, 14030,
18090, 21030, 24895 and 28030 SSB - 1850, 3820, 7195, 14240,
18130, 21300, 24930 and 28485 kHz 6m - 1810/CW and 1850/SSB
QSL N3U/Flt 93 via W3PN, by the Bureau or direct (Please include
SASE and enough return postage. If additional postage is needed
your QSL will be returned via the BUREAU). SPECIAL NOTE: USA
postage rates will increase in 2011. PLEASE no eQSL or LoTW at
this time. For more details, see QRZ.com.

==> + AMATEUR RADIO AND SCOUTING: K2BSA -- AMATEUR RADIO FUN IN THE
WARM VIRGINIA SUN

<http://drsamgray.smugmug.com/Hobbies/k2bsa-video-tour/13114388_jqU7z#9529642
70_SurNs>
The 2010 National Scout Jamboree -- celebrating the 100th anniversary
of the Boy Scouts of America -- was held July 26-August 4 at Fort AP
Hill in Virginia. According to ARRL Rocky Mountain Division Director
and K2BSA Station Coordinator/Manager Brian Mileshosky, N5ZGT, ham
radio was a big part of the event that attracted more than 43,000
participants from across the nation and around the world. Read more
here
<http://www.arrl.org/news/k2bsa-amateur-radio-fun-in-the-warm-virginia-sun>.

==> + FCC: ARRL AMENDS PETITION TO DENY TO INCLUDE 16 ADDITIONAL RECON
SCOUT APPLICATIONS
```

On August 16, ReconRobotics -- in response to the ARRL's Petition to Deny Applications , filed with the FCC on August 4 -- filed an Opposition to Petition to Deny with the FCC, arguing that the ARRL's Petition is "frivolous." The ARRL's Petition asked the FCC to deny 68 pending Public Safety Pool license applications associated with the ReconRobotics Video and Audio Surveillance System, specifically the Recon Scout device. The Salina (Kansas) Police Department had asked the FCC for a waiver to operate the Recon Scout in the band 433-445 MHz. The FCC returned the waiver request to Salina, noting that the frequency band requested was not consistent with the waiver Order that requires that the first unit licensed to an eligible entity operate in the 436-442 MHz band. Read more here <http://www.arrl.org/news/arrl-amends-em-petition-to-deny-em-to-include-16-additional-recon-scout-applications>.

==> + ON THE AIR: 2010 FIELD DAY LOGS POSTED

The 2010 Field Day logs received list has been posted <http://www.arrl.org/logs-received>. It includes all logs received -- applet, non-applet e-mail and paper. Any changes/corrections/missing inquires should be sent to ARRL Field Day Manager Dan Henderson, N1ND, via e-mail <fdinfo@arrl.org>.

==> + HINTS AND KINKS: LOOP AND HOOK SKYHOOK

Randy Quinton, WQ7Q, of Sammamish, Washington, sent us this idea for a quick emergency antenna. Contact Randy via e-mail <quinton.rhq@comcast.net> for more information

An emergency flexible antenna can greatly extend the performance of a handheld transceiver. The best attachment point to hang the antenna always seems just out of reach. This simple wire hook made from a coat hanger makes it easy to hang and retrieve the antenna.

Using about 18 inches of wire, bend a hook to match the attachment point. Below the hook, form a loop to which the antenna line is tied. Below the loop, bend a downward pointing V-shaped pin with a little elbow on the side to prevent the pin from slipping completely inside the lifting tube (see Figure 1). The hook is lifted by a tube or tube section attached to a pole. Tension on the antenna wire keeps the pin in the tube until the antenna has been placed. The antenna is retrieved by reversing the process (see Figure 2).

Quinton said he keeps a loop and a short section of PVC pipe with tape around in his emergency kit, using it to turn a broom or branch into a lifting pole. As always, don't hang an antenna on electrical wires or anyplace in the vicinity of power lines.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint, you will receive $20. Send your hints via e-mail <h&k@arrl.org> or to ARRL Headquarters, Attn: "Hints and Kinks," 225

Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> + ON THE AIR: EXPANDED RESULTS FOR ARRL INTERNATIONAL DX SSB CONTEST NOW ONLINE

Expended results for the ARRL International DX SSB Contest are now available on the ARRL Web site <http://www.arrl.org/contest-results-articles>. Find close to 100 pages packed with results from around the world and your ARRL Division, including line scores and lots of photos, graphs and charts. You can also read all of the interesting Soapbox comments from the participants and review the Top 10 in every category, tracked since the top of Solar Cycle 23. There were lots of new records set in this contest -- come see how an active Sun affects an all-band DX contest!

==> + TECHNOLOGY: ARRL, TAPR ANNOUNCE 29TH ANNUAL DIGITAL COMMUNICATIONS CONFERENCE

Aficionados of digital communications are gearing up for the 29th annual ARRL/TAPR Digital Communications Conference, September 24-26 near Portland, Oregon. The ARRL/TAPR DCC is an international forum for radio amateurs to meet, publish their work and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical applications. Read more here <http://www.arrl.org/news/arrl-tapr-announce-29th-annual-digital-communications-conference>.

==> + SOLAR UPDATE

Tad "For shame the Sun will never show himself <http://www.vcu.edu/engweb/transcendentalism/authors/thoreau/thoreaupoems.html#rain>"
Cook, K7RA, reports: Sunspot numbers and solar flux declined this week, with the average daily sunspot numbers down nearly 17 points to 36.1, and the average daily solar flux down nearly 1 point to 83.6. In the previous week, average daily sunspot numbers had risen nearly 33 points to 53. New sunspot groups appeared on August 11, 13 and 16, but on Tuesday and Wednesday (August 17-18), total sunspot area was one-fifth what it was on August 16, less than one-seventh the area on August 14, and less than one-fourteenth the area of August 12. On August 12, 14, 16 and 18, the daily sunspot number was 50, 31, 39 and 23. Projections for solar flux over the next 10 days -- August 19-28 -- are 81, 80, 80, 80, 81, 82, 82, 85, 84 and 82. Predictions for planetary A index over those same days are 5 on August 19-23, 12 on August 24, 8 on August 25 and 5 on August 26-28. Geophysical Institute Prague predicts quiet conditions for August 20-22, quiet to unsettled August 23 and unsettled August 24-26. Look for more information -- including a look at some mail from readers and an article suggesting a theory on what may be responsible for this long solar minimum -- on the ARRL Web site on

Friday, August 20. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Henry David Thoreau's The Summer Rain <http://www.vcu.edu/engweb/transcendentalism/authors/thoreau/thoreaupoems.html#rain>.

==> THIS WEEK ON THE RADIO

This week:

- August 20 -- NCCC Sprint Ladder
- August 21-22 (local time) -- ARRL 10 GHz and Up Contest <http://www.arrl.org/10-ghz-up>
- August 21-22 -- SARTG WW RTTY Contest; North American QSO Party (SSB)
- August 21-23 -- New Jersey QSO Party
- August 25 -- SKCC Sprint; QRP Fox Hunt

Next week:

- August 27 -- NCCC Sprint Ladder
- August 28-29 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party; YO DX HF Contest; SCC RTTY Championship
- September 1 -- QRP Fox Hunt

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

WIANEWS FOR WEEK COMMENCING AUG 22 2010.

Documents show aviation fears over power line networks

WIA Centenary Update

Tune-in to the world - Amateur radio gets people talking

Central Highlands AGM stop press date change

Hams play role in welfare and recovery efforts after Pakistan's floods

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010
ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING AUGUST 22 2010

WIA Centenary Update

Award

A total of 90 award claims have been checked and verified, and award
certificates issued.

Japan and New Zealand each have two awards with other DX stations qualified
being in Finland, Russia and the USA.

Each Australian state, the Northern Territory and the ACT are represented
in proportion to their numbers of radio amateurs.

Clearly many more will have already qualified for this limited time operating
award and are yet to make their claim.

Another from the WIA Centenary Media File:

An article in the Macedon Ranges Leader Newspaper in Victoria gives the local
club a great publicity boost.

The story, like so many that are appearing across the nation, is about the
celebration of the centenary of organised amateur radio in Australia.

The Macedon Ranges Amateur Radio Club is the newest such club in Victoria.

Pictured and quoted in the article is the club secretary Graeme McDiarmid VK3NE who has held a licence for more than 30 years.

He says he continues to find it an interesting hobby and is often on air for about 90 minutes each day.

The club hopes that the publicity and its use of the special callsign VK100WIA will generate new local radio amateurs and members.

VK4's Locker Valley club news item a big website hitter

The Gatton Star newspaper ran an article on the 4th of August headlined '100 years of amateur radio' and on its website and for the past three week's it has been the third most read news item.

The Lockyer Valley Radio and Electronics Club Treasurer and promotions guy, Alan Shannon VK4SN also reports that Brisbane's Channel 7 is also continuing to promote the club and its participation in the WIA centenary celebrations.

This is being done over a four week period in the TV station's community notice board each morning

This weekend Lockyer Valley Radio Electronics Club in Queensland continues to do great things with the special callsign, and its associated public display at the Laidley Youth Centre, William Street, Laidley.

The online log already records the contacts being made for VK100WIA by this club which is rostered until Monday.

On earlier broadcasts mention has been made of the local media publicity achieved by the Lockyer Valley Radio Electronics Club and we hope to have a wrap-up report on its activities in the future.

In fact all clubs rostered for VK100WIA are encouraged to file their activity reports to the WIA Centenary Committee via email centenary@wia.org.au

Now looking ahead to Tuesday through to Thursday this week it will be the Mid South Coast Amateur Radio Club planning a DX operation on SSB and CW on the 80m 4om and 20m bands.

This relatively small club does not have clubrooms, never the less it's getting right behind VK100WIA with a roster of enthusiastic club members.

The special callsign then moves across to South Australia and the North East Radio Club for Friday the 27th through to Sunday the 29th of August.

VK100WIA will be operating at Ardtornish School in St Agnes on HF - 80m, 40m, 20m bands ? plus 2-metres FM and D-STAR.

The online log of the special callsign clearly shows that D-STAR has been chosen by a number of clubs and it's certainly playing a role in giving overseas radio amateurs an opportunity to snare a VK100WIA contact.

The North East Radio Club is inviting visitors to its activity at the Ardtornish School and will be heavily promoting the Foundation Licence

training that is available.

Then into next week, the Redcliffe And District Radio Club will operate HF, 2m and 70cm from its club rooms in Klingner Road, Redcliffe ? Monday the 30th of August through to Wednesday the first of September.

Club President Trevor Quick VK5ATQ says visitors are most welcome come to and see a display of amateur radio equipment and learn more about the hobby.

Tune-in to the world - Amateur radio gets people talking

The WIA National Field Day - Saturday the 23rd of October

As part of its program of Centenary Celebrations, the WIA is asking that clubs, groups and individual radio amateurs to get on air for this inaugural promotional event taking amateur radio to the public with the aim of attracting new members and new radio amateurs.

There will be two categories:

A Public Station is a station run by three or more radio amateurs operating on a single callsign from a public place, or clubrooms open to the public for the duration of the event.

A Private Station is a station, which is an individual operating portable, mobile or from a private residence.

Highly important is that Public Stations actually engage members of the public rather than just having them look on, and then walk away as often happens with displays of all types.

That means Public Stations need plenty of planning to work out who is best within a club to 'greet' visitors to the stations, talk to them in plain language (avoid jargon), hand out the WIA's Calling CQ brochure, and where possible get their contact details for later follow up.

And of course encourage them to give amateur radio a try by taking part in a radio contact.

The WIA has display posters available and calling CQ brochures should clubs require additional stocks, it is recommended to request stock well in advance.

Will you or your radio club be involved? Check out www.wia.org.au for more information including the rules of the WIA National Field Day all happening on Saturday the 23rd of October.

Amateur Radio Gets People Talking / (this is the catchphrase for the National Field day .. we are using the catch phrase used at the main highlight (heading) for publicity for this event and the words national field

as the sub heading. Unfortunately National field day has little meaning to the public and tends to send the wrong message to we amateurs, it is not a field day where you and set up in the field, rather it is a public day where you set up in public somewhere, a bunnings car park eg)

Prepare now for your participation now. See the complete rules, check-lists and other information on the web page, simply click the following Link www.wia.org.au/members/contests/tuneintotheworld/

Details will also be published in the September edition of Amateur Radio magazine.

TIME GENTLEMAN TIME

Peter 4OD our RD manager is trying to find out the significance of the RD Starting at 08:00 utc as the Official document was signed at 09:00 to 09:23, He suspects that would have been Japanese war time?
Any help to rd@wia.org.au

Also if you DID take part in the RD send your log in today.. to either vk4od QTHR or rd@wia.org.au

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking about running our radio clubs.

Over the years the format of club meetings has had a certain consistency based on traditions of debate and management as detailed in a recognised handbook. These days more of our clubs have taken advantage of the provisions of the incorporated associations acts, around the country. One feature of club management is that, if the Model Rules have been adopted, the management committee or executive have a more formal responsibility for running the day to day activities.

Perhaps this is a good feature but it does place much responsibility on the secretary, who is also the public officer, to ensure compliance with the constitution, Act and Regulations. If you are like most of us, the thought of lengthy formal meetings is a turn off. In the dark days, before colour was added to TV pictures, most of us were familiar enough with the rules of meeting procedure. Now most of us prefer not to know.

Back then it was important to argue the point and not, like parliament today, attack the person. I think we need to remember to deal with process not personality. After all, we want our clubs to grow not wither..... and that the radio amateur is considerate.....

I'm Geoff Emery, VK4ZPP and that's what I think.....what about you?

Central Highlands AGM stop press date change

The date for the famous and popular Central Highlands Amateur Radio Club AGM at Camp Fairbairn near Emerald has been CHANGED !
Due to unforeseen circumstances, planetary alignments, solar eruptions, magma displacements and plasma flaring the AGM will now be held from 4pm Friday 24th to Midday Sunday 26th September 2010

G'day all, this Dale VK4DMC with news from the Tablelands Radio and Electronics Club (TREC) in Far North Queensland.

As the news goes to air this week TREC members are at the Archer Point Lighthouse approximately 150 kilometres north of Cairns in Far North Queensland for the International Lighthouse/Lightship weekend event.
We are operating with the club call-sign VK4WAT and are getting many contacts with other lighthouse stations all around VK and overseas.
It is a very exposed and windy location but the antennas are standing up well.

Have a listen around 14.188 or 7.088 and if you hear VK4WAT say G'day.

Last weekend saw TREC members and friends at the VP Day memorial which was held at Rocky Creek near Atherton. It was a great day with many displays of wartime memorabilia including WW2 military radio equipment.

This has been Dale VK4DMC.

ACMA NEWS

In May, the Nine Network, SBS and WIN sought ACMA authorisation for temporary trials of 3D TV in Brisbane, Newcastle, Sydney, Wollongong, Melbourne, Adelaide and Perth. The ACMA authorised trials for only a limited, two-month period this allowed the authorisation of transmission in 3D of the State of Origin series and the 2010 FIFA World Cup.
The ACMA is now considering applications for further short-term free-to-air trials and more generally expects to release a paper in the next few months on the future of 3D trials.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

LEBANON REPORTEDLY ARRESTS GERMAN HAM

Lebanese army intelligence has reportedly arrested a German engineer and amateur radio operator in eastern Lebanon on suspicion of spying for Israel. This, according to several on-line media reports.

The Nahar Daily said that the army raided the "Liban Light" cheese factory in the town of Talya and arrested an individual.

He was identified in several reports as the engineer in charge of maintenance of the factory's machines. The reports says that the army is questioning the 58 year old over his use of radio transmitters.

According to several other postings the actual identity of the person reportedly detained may be DL6SN.

Hams play role in welfare and recovery efforts after Pakistan's floods

The medical and food support being provided to the many people affected by the flood disaster in Pakistan affecting six million people is being assisted by the combined efforts of radio amateurs, a group of four wheel drive enthusiasts and the Pakistan Academy of Family Physicians (PAFP).

Around a quarter of the country has been affected by the floods over the last three weeks that were triggered by intense summer monsoon rainfall swelling the Indus River into Pakistan's worst ever flood.

The United Nations estimates 20 million have been affected in Khyber-Pakhtunkhwa, Punjab and Sindh provinces and 1600 lives lost.

One of those involved with the Pakistan Amateur Radio Society (PARS) emergency communications effort, Asad Marwat AP2AUM reports that more than 20 hams are keeping lines of communications open and the plan is to increase this to 30 in a week's time.

With both landlines and mobile phone services failed in the flood affected areas, he said that most of the radio traffic is through a 2-metre band repeater which is now linked to two homebrewed 2m/70cm cross-band repeaters or translators extending coverage to a radius of almost 300 miles.

A few stations are monitoring 7.040MHz but due to poor propagation is currently of little use, but should be kept clear for disaster use.

Asad AP2AUM advises that PARS has teamed up with the Islamabad Jeep Club which is a group with members who own and drive 4WD sport utility vehicles (SUVs).

Their expertise in driving on most difficult terrains is proving to be of great assistance to deliver essential relief supplies and medical help immediately after the flood.

They are also working in collaboration with the Pakistan Academy of Family Physicians.

PARS President, Nasir Khan AP2NK expresses its thanks for the offers of support that have been received from the amateur radio community.

Pakistan's national radio society is seeking to finalise arrangements including those from neighbouring countries to contribute to and help sustain the emergency communications that will be required for a considerable time to come.

Record year for lighthouse weekend

Australia has achieved a record 58 registrations for the International Lighthouse and Lightship Weekend - which is currently underway.

The enthusiasm by VK radio amateurs has steadily grown from the beginnings in 1998 when there was only four Australian registrations.

In the early years the parks authorities in New South Wales were very sceptical about having radio amateurs set-up at lighthouses. These days, in most cases, doing all they all they can to make sure the weekend is a success.

Also at the beginning lots of people in initially doubted that the event would get support during the southern hemisphere winter - but it has indeed become very popular.

The uptake of this fun but not contest activity has also been strong in other countries too. In second place on this year's country tally is Germany with 57, the USA 53 and the United Kingdom 39.

As this broadcast was being compiled there were 430 registrations from 46 countries, and there was a chance of breaking the record of 443 set last year.

Throughout the remainder of today have a listen around the bands, particularly the 40-metre band and see how many lighthouses you can work.

(Jim Linton VK3PC)

Waitakere Sprints 2010.

This year's Waitakere Sprints are now over and I thank all who participated. Forward your logs to prc@ihug.co.nz
For more on logs and rules see our qsl.net/zl1vk site.

Numbers were a little down on previous years but I did

have more than 70 emails returned undelivered.

If you did not receive advice please send an email to
prc@ihug.co.nz with 'Sprints' in the subject line so
your address can be correctly added to the list.

Next year I will send notice out a couple of months
earlier so we can get the info into club newsletters.

Thanks
David ZL1DK

Hi I'm Marilyn VK3DMS on behalf of Lesley VK5LOL, Alara's Contest Manager.
We would like to remind everyone that the Alara Contest is on again next
weekend August 28th & 29th.

The rules can be found in the August edition of AR on page 46.

It has always been known as a girly contest and we look forward to hearing
from everyone, YLs and OMs, during the weekend.

IARU Region 3 ARDF Championships head downunder

Planning has begun for this Biennial event to be held in late 2011 in
Australia and hosted by the IARU member society the IARU, the Wireless
Institute of Australia (WIA).

Fond memories remain of the event held in Ballarat Victoria in 2003 which
was a great success attended by 100 ARDF competitors from Australia, China,
Japan, Korea, Kazakhstan and the USA.

The event in 2011 will be held in regional Victoria (VK3) although a location
and venue is yet to be announced.

With the knowledge and experience gained from the 2003 championships held
at Ballarat, and there been a strong following including ARDF competitors
at an international level living in Victoria it is certain to be another
success.

WIA ARDF Coordinator and an International Class Referee Jack Bramham VK3WWW
has taken on responsibility for the organisation and management of the event,
assisted by the resources of the Victorian ARDF Group (www.ardf.org.au) with
the WIA (www.wia.org.au_ providing administrative support.

The event held at Ballarat in 2003 had the assistance of a number of amateur
radio groups not normally involved with ARDF with volunteers needed for a
range of basic but essential tasks.

Organisers have indicated the same approach will be taken when the ARDF
Championships return to Australia in 2011.

24.890 to 24.990
28.000 to 29.700

The US Military is on the RF nose in Japan

United States military forces in Japan have caused havoc by transmitting illegally -- in Japan -- using US-bought baby monitors.

The monitors are on the same frequencies as local mobile telephones and radio communications, which is against the law. The devices had disrupted local taxi and lorry companies' communications near bases in in Okinawa, Tokyo, Kanagawa, and other areas.

It could be called a "cultural thing", except that it is also an "interference and legal thing".

Interference is not funny if you're on the receiving end. You can contact the WIA about any issues you have.

For National Radio news, Peter Ellis VK1PE

Churches and Chapels on the Air

Not to be confused with the annual Churches and Chapels on the Air event Saturday 11 September.

Amateurs and SWL's across Europe are being asked to keep an ear on or about 28.265 FM. This for transmissions believed to be coming from churches with

transmitters capable of delivering a signal strength well over
S-9.

Reception reports and all other information should be sent to the
IRTS Intruder Watch Coordinator Ger McNamara, EI4GXB. His e-mail address
is ei4gxb@gmail.com

Documents show aviation fears over power line networks

The Register reports that both the BBC and the Civil Aviation Authority are
concerned that power line networking will damage their services.

Earlier this month the UK regulator Ofcom hosted a meeting on Power Line
Telecommunications (PLT). At that meeting PA Consulting presented its latest
study into the risks associated with the use of power line networking (PLN)
equipment.

But the minutes show that the study came under attack from the BBC and the CAA,
and that evidence was presented that PA's proposals would lead to greater
interference, not less.

http://www.theregister.co.uk/2010/08/12/power_line_networking/

RETREAD

A paper showing how vehicle wireless tire pressure monitoring systems may
compromise privacy and pose a security threat has been issued by a team at
South Carolina University in the USA

It is understood that tire pressure systems operate on 315 MHz in the USA & on
433.920 MHz in the 70cm Amateur Radio band in the British Isles and Europe.

The team intercepted signals more than 30 feet from cars using a simple
antenna. They were able to analyse the radio signal and reverse-engineer the
code using common laboratory instruments. With that knowledge, they built a
transmitter that spoofed a sensor's wireless message.

The researchers were able to send false signals from one car and trigger a
"low tire pressure" light in another while driving next to each other at
35 miles per hour. They were also able to trigger the dashboard "check tire
pressure" light while driving next to each other at 65 miles per hour.

At least one tire pressure system could be damaged through spoofed wireless
signals.

qdg.com.au

CHANGING TECHNOLOGY: NZ ATV TO BE FORCED TO GO DIGITAL

Digital Amateur Television is coming to New Zealand, but not necessarily because the Kiwi ham community wants to make the change.

ZL Hams will soon be forced to go digital if they wish to continue Amateur Fast Scan Television operations. This after government regulators announce that all analogue modulated TV transmissions in the VHF and UHF broadcast bands, which include Channel 39 used by ham radio, will close down in March 2015, or at some earlier date. At that time the upper end of the New Zealand UHF television allocation will be cleared of television, so that the vacated spectrum can be used for next-generation mobile communications.

One consequence of these decisions is that the existing television transmissions will need to convert to digital so as to fit into about half of the present spectrum, requiring that their transmission parameters need to be more closely defined than at present. For the Amateur Television service this means that each Radio License for analogue-modulated TV needs to be replaced by a Spectrum License for analogue-modulated TV. As part of the process, our government telecommunications regulator has cancelled all of the existing Radio Licenses for Channel 39 TV Repeaters. Operators of Channel 39 TV Repeaters need to close them down to avoid receiving an Infringement Notices from the regulatory agency.

Those wishing to operate their analogue-modulated Channel 39 ATV repeaters between now and the 2015 Digital TV Switch-Over, will be required to apply for a Spectrum License. However this Spectrum License for analogue ATV transmitters will only exist until the Analogue shut down date. Ham Radio access to New Zealand Channel 39 which runs from 614 to 622 MHz was made by footnote to the nations telecommunications regulations many years ago when a chunk of the 432 MHz band was taken from the amateur radio service.

At airtime, its not known how many of the nations Amateur Television Repeaters will apply for a new Spectrum License to at least temporarily keep their analogue systems operational and on the air.

FIRST TUBSAT TO BE MUSIC SAT

National Public Radio says that one of the first of the do it yourself low orbit satellite kits from Interorbital Systems has been purchased by professional astronomer. Alex Antunes says that he will use it to create natures own music from space.

As reported a few weeks ago here on Amateur Radio Newsline, California-based Interorbital Systems, is offering a personal satellite kit for $8000 called TubeSat that includes a ride into space. Now in an N-P-R

interview Antunes says that the sun interacts with the Earth's magnetic field in the ionosphere and causes all sorts of activity. He says that his goal is to use his satellite to put something in orbit to convert that interaction directly to sound data so we can hear it.

The first TubeSats along with an amateur radio CubeSat are currently slated to launch on an Interorbital Neptune 30 rocket from Tonga at the end of this year.

You can listen to the NPR interview with astronomer Alex Antunes
tinyurl.com/musicsat

AO-51 BACK IN SERVICE AFTER OUTAGE

AMSAT Vice-President of Operations, Drew Glasbrenner, KO4MA,
reports that after a brief outage aboard AO-51 the ham radio satellite had been restored to service. The 145.92 slash 435.300 repeater was set to run with the 67 Hz tone required to activate the satellite. Power output was reported as 740 milliwatts.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

MONTGOMERY ALABAMA BANS NON EMERGENCY MOBILE COMMS

Hams operating mobile in Montgomery, Alabama, have won a rather narrow partial exclusion to the city's tough new distracted driver law, but only during emergencies. This after the Montgomery City Council passes an ordinance making hand-held cell phone use, including texting while driving a secondary offence.

Once the distracted driving ordinance takes effect in the coming weeks, a driver would have to violate one of the primary rules of the road, such as speeding or running a stop sign while using a cell phone before he or she could be cited for distracted driving.

The ordinance does allow for some exceptions. These include someone using their cell phone to report a traffic accident or a crime. Emergency personnel, employees of utility companies and an operator of an amateur radio are also excluded from the new ordinance, but only as long as their communications devices are being used during an actual emergency.

What is not clear is whether the new ordinance applies only to cellular and texting devices or to other two way radio gear as well. In other words, would charting on your local repeater with a mic in your hand while driving be considered a distracted driving practice and subject to the new law? And if it does, how would a police officer be able to determine if the ham radio was or was not of an emergency nature let alone what constitutes an emergency in any given instance.

The news headlines

Ofcom clarifies interference investigation changes

AO-51 comes back into service after break

National Hamfest Award

The Society has now obtained clarification from Ofcom about the changes in responsibilities for interference investigation. The position is that the BBC is now responsible for investigating interference affecting domestic TV & radio broadcast reception. The Ofcom website provides some initial advice to those experiencing problems with TV & radio reception and a link to the BBC to report interference & request assistance. Ofcom remains responsible for investigating interference to the amateur service, and to broadcast services originating outside the UK. Ofcom tells us that its website is undergoing significant changes, but that the new site will make clear the division of responsibilities, and include a web form for reporting interference to the amateur service. In the meantime, the web form for reporting cases of abuse on amateur frequencies can also be used for reporting interference, for example, from PLA devices.

Vice-President of Operations, Drew Glasbrenner, KO4MA, reports that after a brief outage aboard AO-51, the amateur radio satellite has been restored to service. The cross band 145.92 to 435.300MHz repeater is set to run with the 67Hz tone required to activate the satellite. Power output was reported as 740 milliwatts.

The National Hamfest co-hosts, The Lincoln Short Wave Club, will offer an award for the Ham Week UK. A special event station is being set up for the National Hamfest. GB10NH will be on air from 28 September until 10 October. The station will be mainly on 40m and 80m, although some 2m operation is also likely. To gain the award, stations must work GB10NH and four other UK special event or club callsigns. It is open to all amateurs and short wave listeners. No QSLs will be required. Other special event stations that plan to be on the air during Ham Week UK include GB2GW at Gleaston Water Mill, Ulverston, GB2RAF from the RAF Air Defence Radar Museum at RAF Neatishead Norfolk, GB2SPY in Dover and Furness Amateur Radio Society with G4ARF using Field Day aerials. Claims to be made to Lincoln Short Wave Club, BSA Social Club, Aisthorpe, Lincoln LN1 2SG. More information can be obtained by e-mailing

chris@nationalhamfest.org.uk.

IARU representatives have a busy schedule with CEPT and WRC-12 preparatory meetings. Representatives from the UK need to attend these meetings to protect existing amateur radio services and to progress WRC-12 agenda items. CEPT Spectrum Engineering 24 is a group that studies, amongst other matters, Short Range Devices, Ultra Wide Band and Short Range Radars. Some of these devices are of particular interest to the amateur services, with most short range devices active within the 70cm band. Vehicle anti-collision radars use 24 and 76GHz and talks are aimed at ensuring that no interference is caused to the amateur services. Peter Chadwick, G3RZP will be present at the next meeting that takes place in Montegrotto, Italy between the 30 August and 3 September. A meeting of CEPT Conference Preparatory Team Project Team C will take place in Kristiansand, Norway between 1 and 3 September. This group is studying a number of WRC-12 agenda items including 1.23, which is the proposal for an amateur allocation around 500kHz. Colin Thomas, G3PSM is the CEPT Coordinator for this item and national delegations will include John, Gould G3WKL.

The Irish Radio Transmitters Society has asked that amateurs and short wave listeners keep a listening watch around 28.265MHz FM as there have been incursions by churches on this frequency heard throughout Europe at up to 5 and 9 plus 20dB. The IRTS is collecting information on these broadcasts to send to the national regulator, ComReg. All information can be sent to Ger McNamara, EI4GXB who is the IRTS IARUMS co-ordinator by e-mail to at ei4gxb@gmail.

GB50ATG has been on the air as part of the British Amateur Radio Teledata Group's Golden Jubilee. The station has been operated a different locations all around the UK for the last years and made nearly 8000 QSOs during that time. Special QSLs and awards are available. Check the BARTG website for full details.

And now for the details of rallies and events for the coming week

Today, 22 August, the Wildern Boot Sale Andover, takes place at Wildern Village Hall. The nearest postcode for the event is SP11 0JE for satnav users. Doors open at 10am and the entry fee is ?1.50. Pitches are ?6 and tables in the hall ?8. Details from Martin Smith on 01980 612 070.

Also on today, 22 August, the Rugby Annual Radio Rally takes place at Princethorpe College, Princethorpe, Rugby CV23 9PX. Doors open from 10am to 4pm and entry is ?2. Contact Tony on 07759 684 411.

Next Sunday, 29 August, the Milton Keynes ARS Rally takes place at Bletchley Park, Sherwood Drive, Bletchley, Milton Keynes MK3 6EB. There will be trade stands, special interest groups and entry is ?2 for adults and 50p for youngsters under 14 years of age. Doors open at 9.30am. Why not make this a family day and visit the Betchley Park museum too? Details from Steve Goodall, G6KJU, on 07866 673 192.

On Bank Holiday Monday, 30 August, the Huntingdonshire ARS Rally is being held at the St Neots Community College, Barford Rd, St Neots, PE19 2SH. Doors open at 10am and you will find trade stands, an RSGB bookstall and a Bring and Buy amongst the attractions.

Now for the news of special events

Today, 22 August, is the final day for this year's International Lighthouse and Lightship Weekend event. Listen out for the hundreds of stations before they go off air for another year. Members of South Tyneside ARS will be running GB2SJ from Souter lighthouse, working all modes and bands. They will also have a special event station on the air to help raise awareness and support for the RNLI and, in particular, Sunderland lifeboat. This event runs from 11am today, 22 August, until 4pm. The callsign for this event is GB1SLB. Visitors are, as usual, welcome at both events and the organizers of GB1SLB would like to thank Snowdonia radio for the donation of antennas for the event. There will be demonstrations by RNLI lifeboats, lifeguards and RAF rescue helicopter so it will be a fun day for all the family.

Cray Valley Radio Society will be celebrating a Festival of Amateur Radio from the highest point in South London on Saturday 28 August between 12 noon and 6pm, located in the garden of The Bull Hotel, Shooters Hill, London, SE18. For further information contact Cliff G4HSU by e-mail to secretary@cvrs.org. Please quote GB4SH in the header line.

8J6AIRA will be on the air to celebrate the founding of the city Aira on Kyushu Island, is IOTA reference AS-077, from 23 to 31 August. QSL via JARL bureau.

John, G3XYF is coordinating information for the annual Churches and Chapels on the Air event that takes place this year on Saturday 11 September. If you are planning to put your local church or chapel on the air, please e-mail John with the information to g3xyf@btconnect.com. For more information on Churches and Chapels on the Air, go to www.wacral.org.

And now the HF DX news compiled from 425 DX News and other sources

YJ0VK will be the call of the forthcoming DXpedition to Vanuatu. The team is made up of four Australian amateurs who will be operating from 27 August to 2 September. They will be operating on HF from Vanuatu's main Island of Efate and special attention will be paid to the WARC bands. More information along with QSL routing is available on line at yj0vk.vkham.com.

GB1OL will be on the air from the island of Westray in Orkney until 27 August. This is IOTA reference EU-009. For QSL information, please check out qrz.com.

Rolf, SV8/DL6ZFG/P will be operating from Corfu, IOTA reference EU-052, from 21 to 28 August. He will be operating holiday style with his IC706, 100 watts and a triple-leg for 20m. QSL via DL6ZFG.

Fred, SV8/PA1FJ/P is going to hit the airwaves from Kythira, IOTA reference EU-113, from 23 to 30 August. QSL via his home callsign either direct or via the bureau. Fred is also happy to eQSL.

Now the contest news

Today, 22 August, the 4th 2m Backpacker Contest takes place. It is the contest in which you also have to exchange the first two letters of your postcode. Activity is between 1100 and 1500UTC and the exchange is signal report, serial number, locator and postcode.

On 24 August it's the 50MHz UK Activity Contest, which runs from 1900 to 2130UTC. You can use any mode and your exchange must be signal report, serial number and locator.

The RSGB 80m Club Sprint series started this month with the CW leg on the 12th. Now it's the turn of SSB on 25 August. Work everyone, but remember that once you have made a QSO as the result of calling CQ, you have to vacate the frequency. Remember also that the contest exchange is different for the Club Sprints, being serial number and your name but no signal report. The event takes place between 1900 and 2030UTC.

The IRTS 2m Counties Autumn Contest takes place on Sunday 29 August. If you're outside EI/GI, work EIs and GIs only, giving them a signal report and serial number. Expect to receive a signal report, serial number and their county. In the 2008 and 2009 running of this contest no entries at all were received from outside of EI, so if a UK station had made just one QSO it would have put him in top spot. That said, if any GIs are active, their proximity to EI means you'll have to do well to beat them. It's only 2 hours long between 1300 and 1500UTC but you can use all modes on the 2m band.

31 August sees the 70MHZ UK Activity Contest take place between 1900 and 2130. You can use any mode on the band and your exchange should be signal report, serial number and locator.

And now the solar factual data for the period from the 9th to the 15th of August, compiled by Neil Clarke, G0CAS on the 16th of August.

First, the latest smoothed monthly sunspot numbers for November, December 2009 and January 2010 are now available and are 7.6, 8.3 and 9.3. Sunspot minimum took place in November 2008 with a smoothed monthly sunspot number of 1.7. The smoothed monthly solar flux minimum occurred a month early with a figure of 68.2 solar flux units. There is also a geomagnetic cycle which is almost in line with the sunspot cycle. This minimum took place in August 2009 with a smoothed monthly Ap index of 3.8 unit.

The solar disc had 4 or 5 sunspot groups visible for the first few days. That's the highest number of groups visible so far this cycle. This dropped to only 2 groups by the 14th and the 15th. Solar activity started at very low levels but on the 14th and the 15th increased to low when C class solar flares took place on both days. The C4 solar flare on the 14th was associated with a coronal mass ejection. Solar flux levels

hovered around the mid 80's all week and the average was 85 units. The 90 day solar flux average on the 15th was 77 units. That's one unit up on last week. X-ray flux levels varied little day to day and averaged B1 units. Geomagnetic activity started at just unsettled levels with an Ap index on 10 units on the 9th and the 11th. The most likely cause was the arrival of a weak coronal mass ejection that left the Sun on the 7th. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase to 500 kilometres per second on the 10th and the 11th but then declined to 330 by the 13th. Particle densities were low every day. Bz varied no more than minus 6 and plus 7 nanoTeslas at the start of the period and between minus 4 and plus 2 nanoTeslas on the quiet days.

And now the solar forecast. This week solar activity is expected to be at very low levels. There is a slight chance that activity could increase to low with the occasional C class solar flare taking place. Solar flux levels should be in the low 80's for most of the week. For the next couple of days geomagnetic activity should be unsettled due to a recurring coronal hole. Expect an Ap index in the teens for both days. Activity is expected to decline to quiet levels for the remainder of the period. MUFs during daylight hours at equal latitudes should be about 19MHz for the south and 16MHz for the north. Darkness hour low should be around 10MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 1100 and 1600 hours. The second half of August normally signals the end of the summer sporadic-E season. Saying that, opening should still take place on some days, however, openings will be shorter in duration and less intense now with openings on 144MHz not expected.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 22 August Kettering & District Amateur Radio Society is having a social meeting. Details on the web at http://kdars.co.uk.

On Sunday 22 August Welland Valley Amateur Radio Society is visiting the Rugby Radio Rally. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Monday 23 August Gloucester Amateur Radio & Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 23 August South Birmingham Radio Society is having a contest planning meeting and aerial review. Contact Don, on 0121 458 1603.

On Monday 23 August Wythall Radio Club continues its Foundation course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 24 August Derby & District Amateur Radio Society has a technical topics evening. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 24 August Kettering & District Amateur Radio Society has its operating night. Details on the web at http://kdars.co.uk.

On Tuesday 24 August Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 24 August Mid-Warwickshire Amateur Radio Society has its chairman's barbecue. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 24 August Wythall Radio Club is having a natter night and is on the air. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 25 August Kettering & District Amateur Radio Society is having a gentleman's group afternoon. Details on the web at http://kdars.co.uk.

On Wednesday 25 August Lincoln Short-Wave Club is putting G5FZ on the air and planning for contests. More information from Pam Rose, G4STO, on 01427 788356.

On Wednesday 25 August Midland Amateur Radio Society is holding training classes and planning what rallies to visit. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 25 August Telford & District Amateur Radio Society is having a foxhunt at Telford Town Park. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 26 August Kettering & District Amateur Radio Society is having a training night. Details on the web at http://kdars.co.uk.

On Thursday 26 August Wythall Radio Club is holding a Foundation exam. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Friday 27 August Coventry Amateur Radio Society is operating 6m, 4m and satellites.. Contact John, G8SEQ, on 07958 777363.

On Friday 27 August South Birmingham Radio Society has a construction evening. Contact Don, on 0121 458 1603.

On Saturday 28 August Lincoln Short-Wave Club is putting G5FZ on the air and doing jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 28 August Wythall Radio Club commences its weekend event, running a special event station at Landrover Show, Stoneleigh. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Sunday 29 August Kettering & District Amateur Radio Society is having a social meeting. Details on the web at http://kdars.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 23 August Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 23 August Bolton Wireless Club has a 2m direction finding event starting from the Britannia Hotel. For details, send an email to boltonwireless@gmail.com.

On Monday 23 August South Manchester Radio and Computer Club has its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Tuesday 24 August Morecambe Bay Amateur Radio Society is having a social evening. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

On Tuesday 24 August Otley Amateur Radio Society is taking part in the 50MHz UKAC and having a natter night. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 25 August Hornsea Amateur Radio Club is taking part in the 80m SSB Club Sprint. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 26 August Preston Amateur Radio Society is on the air. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 26 August Ripon & District Amateur Radio Society is on the air and having a natter night. More information from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 26 August Scarborough Amateur Radio Society is closed. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Thursday 26 August South Manchester Radio and Computer Club is having a talk on the Bletchley Park expedition by Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 26 August Wakefield & District Radio Society is having a talk on antennas by Dave Evans, G0EVA. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 27 August East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 28 August Wakefield & District Radio Society continues its Foundation course. Contact Ken, 2E0SSQ, on 07900 563117.

On NW Wednesday 25 August Chorley & District Amateur Radio Society is having a talk on repeaters by RSGB President Dave Wilson, M0OBW. Contact Alan, G4PF, on 07740 582316.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 24 August Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 24 August Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, on 07740 946192.

On Wednesday 25 August West of Scotland Amateur Radio Society has construction projects and licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 26 August Aberdeen Amateur Radio Society is having a talk. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 27 August West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle and a quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 22 August Andover Radio Amateurs Club has its autumn boot sale. Details from Martin, M0MWS, on 07776 181646.

On Sunday 22 August Milton Keynes Amateur Radio Society is taking part in Lighthouse Weekend at Beachy Head lighthouse. For more information go to www.mkars.org.uk.

On Monday 23 August Milton Keynes Amateur Radio Society is having a portable night. For more information go to www.mkars.org.uk.

On Tuesday 24 August Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 24 August Dorking & District Radio Society is having a fish and chip supper. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 24 August Horndean & District Amateur Radio Club has a talk on interference by Paul, G0VEP. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 25 August Hastings Electronics and Radio Club is looking at interference problems. Details from Gordon, on 01424 431 909.

On Wednesday 25 August Darenth Valley Radio Society is preparing for HF field day. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 25 August Farnborough & District Radio Society is having a club night. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 25 August Newbury & District Amateur Radio Society is looking at the G6ALU 80m SSB kit. Details from Richard, G3ZGC, on 01635 46241.

On Wednesday 25 August Norfolk Amateur Radio Club has an informal, construction, workshop and Bright Sparks evening. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 25 August Worthing & District Amateur Radio Club is putting GX3WOR on the air for the 80m SSB Sprint contest. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 26 August Bittern Dx Group Club meeting planning SSB Field Day. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 26 August Edgware & District Radio Society is having a natter night. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 26 August King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 26 August Lowestoft & District Amateur Radio Club is having a club night at the shack. Details from Phil, G0JSG, on 01502 585448.

SARL NEWS - SUNDAY 22 August 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

Louw du Plessis - ZR6ATZ passed away very suddenly at home on Monday 16th August 2010 at the age of 66. He will be sorely missed by his Wife Gwen, children and Grandchildren.

Senator Fransesco Cossiga, IqFCG, passed away on Tuesday the 17th in Rome. After being Italian minister of Interior affairs, he later became Prime Minister and then President of Italy from 1985 to 1992.

During his tenure as President he operated a station from his offices
He was quite active as a DXer and h&#65533; was member of the "CQ Hall of fame".

Our sincerest condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

SAT NETWORK

ANOTHER LOOK AT PLT REGULATIONS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

Aficionados of digital communications are gearing up for the 29th annual ARRL/TAPR Digital Communications Conference (DCC), September

24-26 near Portland, Oregon. The ARRL/TAPR DCC is an international forum for radio amateurs to meet, publish their work and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical applications.

The DCC is for all levels of technical experience - not just for the expert. Not only is the three day conference technically stimulating, it is a weekend of fun for all who have more than a casual interest in any aspect of amateur digital electronics and communications; introductory sessions are scheduled throughout the conference to introduce new technical topics for both beginners and experts. Topics at the DCC include, but are not limited to: Software defined radio (SDR); digital voice (D-STAR, P25, WinDRM, FDMDV, G4GUO); digital satellite communications; Global Position System (GPS); precision timing; Automatic Position Reporting System (APRS); short messaging (a mode of APRS); Digital Signal Processing (DSP); HF digital modes; Internet interoperability with Amateur Radio networks; spread spectrum; IEEE 802.11 and other license-exempt systems adaptable for Amateur Radio; using TCP/IP networking over Amateur Radio; mesh and peer-to-peer wireless networking; emergency and Homeland Defense backup digital communications; using Linux in Amateur Radio; updates on AX.25, and other wireless networking protocols.

SAT NETWORK

SA AMSAT has introduced SAT NETWORK, a regular discussion on satellite on an INTECNET basis. The first SAT NETWORK will discuss the payload options for the proposed SA AMSAT payload. It will be on the air on Sunday 29 August 2010 at 19:30. John Williscroft, ZS6EF, will introduce the subject with a presentation on an imaginary satellite and its multi payloads built on the back of fold-out solar panels. The idea is to set the scene for a useful discussion. You are invited to join the discussion. By courtesy of the SARL, SAT NETWORK will be facilitated by the same team as the President's Net and Intecnet on a repeater in the Cape Town area, the Eastern Cape repeater network, Durban and Gauteng. Marten, ZS6ZY, will relay ob 3 718 kHz and Chris, ZS6FCS, will take care of Echolink and the Webcast.

SO67 OPERATIONAL ON ALMOST A DAILY BASIS

SO67 will be operational over South African on almost a daily basis. The availability over South Africa is somewhat limited due the current image downloading schedule. Details are on www.amsatsa.org.za.

WHO SAYS CHRISTMAS COMES ONLY ONCE A YEAR?

For Fred Scheepers, ZS1FCS, it came early this when he was the lucky winner at the Cape Town Radio Technology in Action 2010 event of a surprise package donated by Kobus Conradie, ZS1K, of Let's Play Radio. Kobus donated a Yaesu FT60E, Twin-band Wide Receive Handheld

Transceiver. The radio valued at R1 900 was one of the many prizes in the attendance draw. Attending a RTA can be more than fun, it could be profitable. Thanks to Kobus and congratulations to Fred.

ANOTHER LOOK AT PLT REGULATIONS

Towards the end of last year, ICASA technical staff finalised the PLT regulations and submitted them to the ICASA board for approval and publication in the Government Gazette. From the discussion at the SABS TC73 committee dealing with EMC matters held last week it appears that Workgroup 6 who originally dealt with PLT will have an opportunity to relook at the draft before it will be resubmitted to the ICASA Board. The delays were brought about by changes on the ICASA Board with the designated councillor having retired. The SARL is represented on TC73 and our representative is the convener of workgroup 6. The current draft, while not including all the SARL proposals, includes a reasonable mitigation clause should interference affect HF users in an area where PLT is employed.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The sun is nearly blank of sunspots and the current streak of daily spots which stands at 53 may soon come to an end. The effective sunspot number is expected to be less than 25 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the late afternoons till after sunset. During sunset it will be good towards Europa. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings, late afternoons and during the evenings as well as over the shorter distances.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

21/22 August - International Lighthouse weekend; 24 August - Logs for the YL sprint to be in to zs4bfn@]netactive.co.za; 29 August - SATNET at 19:30 on the air; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to

www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

****

>From The Editor Break-In ZL3IB

The invoice that came with your Break-In shows the wrong rebate. The correct rebate is $15 NOT $10 as printed.

****

>From The Business Manager ZL2TDM

Debby Says...

A very special thank you to all members of the Taupo branch who so vigorously searched for the culprit of an abusive phone call that I received here at HQ.

I am sincerely grateful to you all for the time and effort you put in to finding out who would be so rude.

I would like to apologise if it appeared that I was blaming the entire Taupo branch, I confess, I really didn't think it would have been a branch member, nor in fact a member of NZART who would act in this way as 99% of members are very supportive and also follow the code of ethics accorded to all amateurs.

Membership subscriptions have been posted out and were included with your August Break In. If you have not received the invoice, please first check the Break In wrapper as the membership expiry date may not require payment. I.E you may have already paid in advance.

Talk soon...Debby ZL2TDM

****

Doug Gorman Frequency Measuring Contest

This contests runs again on Monday 6th September 2010 at 2100 NZST (0900 UTC).

The revised rules brings the contest up to the modern standard that amateurs can now reach with home brew equipment.

Gone is the measuring of three frequencies spread across the 80 m amateur band. For maximum points a total of five frequencies must be measured within +/-5 kHz of 3895 kHz. There are now three grades of measuring, John McKim Cup (Simple equipment to 100 Hz readout resolution), Norm Edwards Shield (equipment better that 10 Hz readout resolution), or Ultra Category (equipment directly referenced to an atomic standard during the contest)

The Branch award is still available and certificates will be provided to all entries with an average deviation of 100 Hz or better.

The contest takes care of all measuring methods now available to the amateur.

How about giving it a go again this year, to celebrate the 58th year of running this contest!

Jamie Pye ZL2NN

For full details please see:

****

HTML or PDF For Infoline E-mail?

HQ Infoline is send to subscribers as an embedded (enclosed, contained within) HTML file. To branches an attached MSWORD copy is added.

Several subscribers to Infoline have approached me asking for Infoline to be in PDF format when sent. It would have to go as an attachment to the e-mail. I will leave it up to you to decide on what you would like by sending me one of the e-mails below.

Jamie ZL2NN

PLEASE NOTE: The links below are e-mails with pre-defined subject-line text

====

Subject:SUBSCRIBE TO HQ INFOLINE HTML-infoline
as it has been for some time

SIZE: ~60 kB with MSWord formatting. This format has been the standard up to now.

====

Subject:SUBSCRIBE TO HQ INFOLINE ATTACHED PDF-infoline

SIZE: 100 kB plus - largest. Images easily added with an increase in sent size.

====

>From the NZART Web at:

http://www.nzart.org.nz/infoline/index.html

E-mailed 2010 Infolines are available in MSWORD, PDF and HTML formats.

An Infoline starts life as a HTML file.

Jamie ZL2NN

****

Ten Characters Not to Use in a Filename

You may think that naming a file is an easy task. However, there are some important restrictions on the characters that you are allowed to use.

Windows file and folder names may be up to 255 characters long, and Windows prohibits specific characters from appearing in filenames, such as:

< (> : " : / \ | ? *

These characters are all forbidden, while these other ones...

= [ ]

...can only be used with certain restrictions.

When browsing through files on Windows, the backslash \ is used to separate the components of a path (ex C:\Documents\), while the period is used to

separate the base file name from the extension, example .doc (word document) In addition, the dot (.) is not allowed as the first or final character of a filename. Whenever the user tries to type a forbidden character in a filename, Windows complains with a clear error message.

When creating a filename on your Windows computer you should: include a date reference, an indication of what the file may include, what type of document it is, ensuring that the order of the information follows a logical order, and last but not least remember that you are only allowed to use the characters below!

$ { } ^ [ ] ' = , ; . _ -

a b c d e f g h i j k l m n o p q r s t u v w x y z

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

669. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-22 06:05:01 UTC

Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, KH2AR/W4, NG3K & ADXO, N4AA & QRZ DX, N7OU, K8YSE, W8GEX (60m News), AT International, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, G0DHZ, G3LDI, HP1AC, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VU2PTT, YO2DFA and ZS1HF/ZS8M for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-August, through Sunday, 22nd-August there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PY, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VP2V, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Franz, DK1II, will once again be active as 3D2II between August 22nd through September 10th. Activity will be limited to his spare time from Lautoka on the main island of Viti Levu (OC-016), because he is involved with the Rotary Club of Lautoka in a project to build Rotahomes <see http://rotarycc.com/html/rotahomes_project.html>. Franz will be on CW, using his K3 radio and 12m DX-Wire pole for 10-40 meters.

QSL via his home callsign or the LoTW.

8P, BARBADOS. John, G0OPA, will be active as 8P9LJ between September 12th and November 8th. No other details were provided.

9M2/9M8 AND V8, WEST/EAST MALAYSIA AND BRUNEI. Hans, DF5UG, will once again be active from West & East Malaysia (9M2QQ, 9M8QQ) and Brunei (V85QQ) for the next three weeks. No other details were provided.

BARTG NEWS (Major Changes/Second 75 Baud Sprint). Roger, G3LDI, Chairman of BARTG, informs OPDX that BARTG has recently made some fundamental changes to the way it operates which they hope will bring some exciting changes to the RTTY contesting world:
1) The post of BARTG Contest Manager has been replaced with a Contests/DX/Software Sub-group, consisting of Phil/GU0SUP and Ian/GM4KLN, assisted by John/GW4SKA and Arf/G1XKZ. Thanks are due to John, their BARTG President, for 20 years plus of excellent service to the contesting world, and for initiating many of the rules, concepts and so on that other contests have now also adopted. John's vast knowledge and experience is still available to them as he is remaining within the Sub-group, but his work-load will be reduced.

2) The same applies to the post of Awards Manager. This has been replaced with an Awards/QSLs Sub-group, consisting of Phil/GU0SUP and Andrew/M5AEX, assisted by Arf/G1XKZ. Phil has also given years of service to the Awards scheme, but is now being assisted by Andrew and Arf. They hope to have some new designs and a more exciting range in the near future.

3) The rules of the existing BARTG HF and BARTG Sprint will be re-written to remove current ambiguities, clarify and update.

4) An additional contest - the Sprint75 has been introduced after its successful pilot this year.

5) New software is being developed that will allow quicker, easier log submission, accommodating a wider range of log formats consistent with the revised rules. Final adjudication will still be done by a human being!

Please bear with them while they implement these major changes, and feel free to join them at <http://www.bartg.org.uk>; donations always welcome! Please note: They are also in the process of updating their highly successful awards; why not check those out too. They hope soon to be able to automatically notify contesters whether they qualify for any of their awards shortly after each of their contests.

Email changes
---
ian@ secretary@ G4EAN@ all for Ian G4EAN
ska@ for John GW4SKA
bartg@ which is the catchall and goes to Ian, GM4KLN, their Web master (and should continue to do so please)

awards@ is redirected to all members of the awards sub-group
contests@ is redirected to all members of the contests sub-group
logs@ is obviously the proposed new recipient of incoming log
submissions, but where and how and so on, yet to be determined.

BARTG Sprint 75

Following the success of the first 75 Baud Sprint and many requests for
a second, BARTG is running another this year. The second Sprint 75 is
being held as follows: Sept. 18th 1700-2100z, on 80/40/20/15/10 meters
and on RTTY 75 Baud only. The Rules/Scoring for the Sprint 75 can be
found on the BARTG Web site at: http://bartg.co.uk

ADDED NOTE (GB50ATG). Special event station, GB50ATG, made nearly 8000
QSOs during the BARTG Golden Jubilee Year which ended on June 30th.
Special QSLs and awards are available. Check the Web site for full
details.

E51, SOUTH COOK ISLANDS. Bill, N7OU, informs OPDX that he is once again
returning to Rarotonga (OC-013), and will be active as E51NOU between
October 18th and November 13th. Activity will be limited to his spare
time because of his Global Volunteer work on the island.
http://www.globalvolunteers.org/cook/default.asp
http://www.globalvolunteers.org/1main/cook/volunteer_in_cook_islands.htm
Operations will be on 40-10 meters running 100 watts into a vertical.
QSL via N7OU.

GM, SCOTLAND (Update to OPDX.972/IOTA and SCOTIA Ops). In last week's
bulletin we mentioned that operators Alex/GM0DHZ and Andre/GM3VLB were
planning to activate many SCOTIA (SCOTtish Island Award) islands during
a 3 week DXpedition in September (between 2-20th) in two IOTA groups --
Orkney (IOTA EU-009, SCOTIA OI14) and Shetland (IOAT EU-012, SCOTIA
SI11) Islands, using the callsigns GM0DHZ/p and GM3VLB/p. All islands
are WX dependant. This week, Alex, G0DHZ, provided the following suggested
frequencies that they will focus on:
CW - 1820, 3520, 7020 and 14020 kHz
SSB - 1830, 3700, 7060 and 14257 kHz
Alex states that they may possibly use higher bands (17m - plus).
For more details, please refer to OPDX.972.

HI7, DOMINICAN REPUBLIC. David, K3LP, will be active as HI7/K3LP from
Punta Cana between September 24th to October 4th. Activity will be limited
as this is a family holiday, so look for him during the late evening and
early morning hours. QSL via his home callsign. For more updates, visit
the following Web page at: http://www.k3lp.com/hi7_k3lp.htm

IOTA NEWS.....
AS-025. (RARE IOTA!) Sergey, UA0FUA, from the town of Kurilsk on Iturup
Island (RDA SL-14 and RR-15-04) in the South Kuril Islands
Group. Activity has been on 20/10 meters SSB and 20 meters
CW. Watch mostly between 1200-1730z.

AS-077. Look for special event station 8J6AIRA to be active until August 31st. Activity is to celebrate the anniversary of the city Aira on Kyushu Island (JIIA AS-077-001, WLOTA LH-0963, Kagoshima Prefecture). QSL via the JARL Bureau.

EU-008. Six members of the Middlesex DX Group will be active as GB2MUL from a cottage in West Carsaig Bay on the Isle of Mull (WAB NM52, SCOTIA CN10 and OS REF NM54521) between September 18-24th. Operators mentioned are Simon/2W0VAG, John/G0KLX, Kevin/G1KAW, Jason/M1PRO, Carl/2E1IDC and Mark/G7AFC. Activity will be on 80-10 meters using SSB and the Digital modes, as well as 6 and 2 meters, depending on the propagation. There will also be a chance for the team to visit the Tresnish Isles (EU-108) dependant on the weather. QSL via 2W0VAG, by the Bureau or direct. For more details and updates, visit their Web page at:
http://www.dxcc.myfreeola.com/gb2mul_dx-pedition.html

EU-029. Operators Ulli/DD2ML and Martina/DD7MR will be active as 5P5L from Lolland Island (DIA SJ-015, WLOTA LH 2773, Grid Loc. JO55) bewteen September 4-18th. Activity will be 80-2 meters using CW, SSB and RTTY. QSL direct or by the Buerau to DD2ML.

EU-042. Harald, DF6BL, will once again be active as homecall/p from Langeness Island (N-19 for the German Islands Award, WLOTA 1245) between now and August 29th. Activity will be on 80-10 meters. QSL via his home callsign, direct or by the Bureau (preferred). Visit his Web site at: http://www.df6bl.eu

EU-052. Rolf, DL6ZFG, will be active as SV8/DL6ZFG/p from Kerkira (GIOTA INS 042, WLOTA 4132) until August 28th. Activity will be holiday style on all modes using his IC-706 w/100 watts and a Triple-Leg for 20 meters. QSL via DL6ZFG.

EU-057. Andreas, DL2AGB, will be active as DL2AGB/p from Ruegen Island (O-007 for the German Islands Award, WLOTA LH 1712) between September 12-16th. Activity will be on 80-10 meters, propagation permitting. QSL via his home callsign, by the Bureau or direct.

EU-123. (Update) Look for 13 members of Sands Contest Group and four members Workington Radio Club, along with Brendan Minish/EI6IZ to be activating the Isle of Aran off the coast of southwestern Scotland between September 18-25th, operating under the callsign MM0SCG. They will be operating on VHF, HF, SSB, CW and the Digtal modes. The island has lighthouses and the following reference numbers are good: SCOTIA Island number CS14 and IOSA number CL01. They will also activate SOTA summits, time permitting. The team will be using 4 Elecraft K3 radios with amplifiers and a Yaesu FT2000D. Most of the antennas will be verticals, but they intend to experiment with phasing these where possible. The daily logs will be uploaded to their Web site at: http://www.m0scg.org.uk
For updates, visit their BLOG page at:

http://m0scg.blogspot.com/2010/08/dxpedition.html

NA-118. Operators Frank/VE7DP and Klaus/VE7KDU, who were active from Digby Island (NA-061) this past week, will also attempt to activation one of the qualifying Dundas Islands sometime between August 24-28th.

NA-141. Robert, KB2VMG, will be active as KB2VMG/4 from Key Biscayne Island between August 24th and September 3rd. Activity will be active on SSB and PSK. QSL via his home callsign, by the Bureau or direct.

OC-172. Craig, VK4LDX, will be active as VK4LDX/P from Fitzroy Island between October 16-22nd. He will be on the island with his wife, so his activity will be holiday style. Operations will be on 40/20/15 meters using SSB, PSK31 and RTTY. His equipment will be an Icom IC706MKIIG with verticals. Craig states, "I've managed to book a beach side cabin, so I hope to get the verticals close to the water. There is a clear take off short path to JA/Asia, short path to Europe/Middle East/Africa and long path to North America. There may be some blocking from the hills of the island to short path North America and/or long path Europe." QSL via his home callsign, by the Bureau or direct (w/SAE and one USD or an IRC [VK operators - just send a SASE], if you send your card direct with no return postage, QSL will be sent to you via the Bureau). He does not eQSL or use LoTW. For updates, visit his blog at: http://vk4ldxoc172.blogspot.com

JW, SVALBARD. Operators Joe/JA1LZR and Yutaka/JQ2GYU will be active as JW/HB9LEY and JW/JQ2GYU, respectively, from the JW5E club station in Longyearbyen between October 10-14th. Activity will be focused on the lower bands and the 30/17/12 meter bands using CW and SSB. QSL both callsigns via JQ2GYU.

KG4, GUANTANAMO BAY. Members of the Virginia DX Century Club will be active from here between October 5-19th. Operators mentioned are Tip/N4SIA (KG4AS), Clyde/K4CQW (KG4QW), Stu/K4MIL (KG4SS) and Will/W4VW (KG4VW). Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsigns.

KH6BZF PROPAGATION FORECAST/REPORT (For August 23-29th)....
Aug 23 HN-AN SOLAR REFERENCE KEYS
Aug 24 AN --------------------
Aug 25 AN BN - Below Normal
Aug 26 AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 27 AN LN - Low Normal
Aug 28 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 29 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Operators Gerard/PE1BBI, Kees/PA5WT, Frans/PC5T, Rob/PE1ITR
and Theo/PA1TK will be active as LX/homecalls between September 2-5th.
Their main focus will be the VHF Contest (September 4-5th) as LX/PA1TK,
but they will be on the HF bands (80-10 meters) the days before the
weekend contest using CW and SSB. Also look for them on 70 MHz! They
will have large Yagi antenna systems for 144 MHz, a SpiderBeam and
dipoles for HF, and a 5 element beam for 70 MHz. QSL LX/PA1TK via PA1TK
and all other calls via their home callsigns. For pictures and their
story, visit: http://www.vhfcontesten.nl

* Hawaii QSO Party is coming up next weekend between August 27-29th.
For more Hawaii QSO Party info and contest rules, click on "Operating
Events" at: http://karc.net

* Ohio QSO Party is also next weekend on August 28th, between 1600z
Saturday and 0400z Sunday. For more Ohio QSO Party info and contest
rules, go to: http://www.ohqp.org

SV5, DODECANESE. Peri, HB9IQB, will once again be active as SV5/HB9IQB
from Rhodes Island (EU-001) between August 23-28th. Activity will be on
CW on the 30/17/12 meter bands using a K2 radio w/100 watts and wire
loop antennas. QSL via LoTW (preferred).

SV9, CRETE. George, SV1ELF, will be active as SV9/SV1ELF from Heraklion,
capital of Crete (EU-015, GIOTA KRS-005, MIA MGC-005, WLOTA LH 1400),
until August 28th. QSL via LoTW or by the Bureau.

TF, ICELAND. Operators Rene/DL2JRM and Netti/DO6XX are to be active as
TF/homecall/p from Iceland (EU-021, WLOTA LH 2975) between September
18-23rd. Activity will be on 80-10 meters CW, using 100 watts into GP.
QSL via their home callsigns, direct or by the Bureau. NO eQSL!! See
Rene's Web site at: http://www.qsl.net/dl2jrm

TO2, MAYOTTE. Operators Fabio/PY2AAZ/AC2AC, Anderson/PY2TNT, Fred/PY2XB
and Alex/PY2WAS will be active as TO2FH between September 3-10th (not
in 2011 as first announced). No other details were provided.

VK0M, MACQUARIE ISLAND. Reports indocate that Kevin, VK4KEV, is expected
to be operating as VK0KEV from Macquarie Island (AN-005) sometime between
the end of October and beginning of December 2010 for possibly up to 18
months. Activity will be mostly on 40 and 20 meters using SSB and the
Digital modes. Presently, Kevin is operating as VK4KEV/VK7, in Hobart,
Tasmania, while undergoing training for his upcoming long stay on
Macquarie. More details are forthcoming.

VU, INDIA (6m News). Prasad, VU2PTT (also W2PTT), Contest Manager for
the- Amateur Radio Society of India (ARSI), reports: "We have news from
our Ministry of Communications that the 6 meter band has finally been
allocated for Amateur Radio use. The new allocation says:
50-54 MHz on F1B, F2B, F3E, F3C modes using 25 watts.
We are hoping there is a typo here and will try to get clarifications
as the old allocations allowed CW & SSB among other modes on VHF/UHF
which is no longer the case.
The licensing structure has now been rationalized with only two classes
of license - Restricted & General - and licenses can now be acquired
either for 20 years or for the lifetime of the holder.
The other interesting development is that 400 watts DC input power has
been allowed on all HF bands for the General class licence. Earlier the

limit was 150 watts input with 400 watts being allowed in very small sub-bands for the old Advanced class licence holders.
The full details of the new allocations and license structure is available at: http://wpc.dot.gov.in/DocFiles/amateur_new_guidelines.pdf "

YJ0, VANUATU (Reminder/Update). Four Australian amateurs will be activating Vanuatu (YJ0) as YJ0VK between August 27th and September 2nd. Operators Chris/VK3QB (Leader), Allan/VK2CA, Luke/VK3HJ and Brenton/VK3CBV will spend six days and nights from the Island of Efate. The team will be focusing on the HF bands (with special attention to the 30/17/12 meter bands) and hopes to hand out a QSO to everyone they hear. Their stations will be fairly simple with power limited to 100 watts and antennas being verticals and dipoles. QSL via VK2CA, direct or bureau. For more information, please refer to their Web site which will be updated regularly between now and the trip at: http://yj0vk.vkham.com
Depending on the InterNet availability on the island, they hope to update their online log at least once per day.
YJ0VK PRESS RELEASE (dated August 21st -- edited): "The YJ0VK team is fully prepared now. We fly out of the eastern seaboard of VK on Thursday, August 26th. We expect to be operational on 20 meters by 0000z on August 27th. Other bands will come on-line throughout the day. Our vertical antennas are constructed and tested and by all accounts are working very well.
We will be placing a special focus on the WARC bands, so please QRV for us on the following frequencies. The YJ0VK suggested operating frequencies are (+/- QRM):
CW - 1820, 3511, 7011, 10107, 14011, 18077, 21011, 24897 and 28011
SSB - 1860, 3611/3791, 7170, 10130, 14170, 18118, 21270, 24935 and 28470 kHz

* All frequencies are subject to band usage at the time
* We will work split up 1-3 kHz on CW/Digital and up 5 kHz on SSB where possible
* RTTY/PSK31 will be on traditional frequencies split up 1-3 kHz where possible

We have a limited station for 160 meters, but we'll certainly have it operational each day at our sunrise and sunset. We welcome all QSLs; please send them to the address on our Web site or via the Bureau the team hopes to achieve DXCC during these six days.
73, and we hope to hear you on the bands -- The YJ0VK Team"

YO DX HF CONTEST. Ovidiu, YO2DFA, informs that the Romanian Amateur Radio Federation (FRR) is inviting all radio amateurs all over the world to participate in the annual YO DX HF Contest, August 28-29th (from 1200-1200z). Ovidiu is this year's Contest Manager. Rules can be found on the following Web page at: http://www.yodx.ro/en/hf-contest/rules
Results of 2009 edition could be found at:
http://www.yodx.ro/en/hf-contest/2009/final-results
All the participants who fulfill the necessary requirements during the contest will receive a free an "YO 45 P (1st class) Award" without requesting an award from the manager. In 2009, there were 71 radio

amateurs who received the "YO BZ P (1st class) Award".

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, informs OPDX: "The ship departed from Cape Town, and we have a team of 50 construction workers trying to complete the new base. The ship returns in November to collect them. ZS8M is back and operational again, but I need to watch my operating times very carefully as I don't want to create any problem with management. The SteppIR vertical is still in the box and will stay there until Wx conditions allow it to be installed, or until I can install it at the new base."

Ohio/Penn DX Special Bulletin No. 973.1
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 973.1
BID: $OPDX.973.1
August 23, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and K4UEE for the following DX information.

For Immediate Release------August 22, 2010

From Bob Allphin, K4UEE
Saba 2010 DXpedition leader

The Saba 2010 team has completed all preparations for the activation of Saba beginning 10/10/10. As you know by now, that is the likely date that the Netherlands Antilles will cease to exist and several new DXCC entities will be created as a result. One of those new countries should be Saba/St. Eustatius due to their close proximity. Although, this is not a 100% certainty, it is likely enough to plan an operation.

Two teams, comprised mostly of members of the Southeastern DX Club (SEDXC) will operate over a two-week period beginning October 10th and ceasing operations the morning of October 23rd.

A reconnaissance trip was conducted to Saba Island in March of this year, and two QTHs were selected. They are a minimum of 500 ft above the sea with a clear shot to the main target areas of JA, NA and EU. In March, this location produced many QSOs all over the world with low power and wire antennas. We should be loud! Combine this QTH and with excellent operators and we believe DXers worldwide will have a great chance of making QSOs for a brand new one.

We have created a website (www.saba2010.com) and we will be updating it periodically. It is our intent to upload to LOTW from Saba often.

Please note that this operation is entirely self-supporting. The operators themselves will bear all the costs and provide their personal equipment for the stations and antennas.

Radio News Bulletin
Sunday 22nd August 2010

Acknowledgement

The family of the late Pat Maher E13AV, Knockearl, Cloughjordan, wish to thank most sincerely all of the Radio Club members who attended Pats Removal, Requiem Mass and Burial, those who sympathised with us on our sad loss, who sent Mass Cards and Certs of Enrolment. As it would be impossible to thank everyone, individually, please accept this acknowledgement as a token of our appreciation.

The Holy Sacrifice of the Mass has been offered.

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 6th October next at 2 p.m. in the ComReg Offices in Dublin. The closing date for receipt of applications to sit the examination is Friday, 17th September.

For further information on the application procedure, exam fees and other details see 'Theory Examination' in the 'Information' section of the website. The 'Downloads' section of the website includes a very useful document 'Studying for the Amateur Radio Examination'.

The 'Links' section of the website under 'Radio Theory' contains much useful information for anyone studying for the licence examination.'

Dublin 2m News Interruption

During the latter half of August there may be a temporary interruption of the 11:45 two-metre news broadcast from Dublin on Sundays. This is unavoidably due to overlapping holiday commitments of the four regular

newsreaders Tony(EI5EM), John (EI7JG), Frank (EI6EF) and Liam (EI3HK).

Every effort will be made to maintain the service. However, if by chance there is no transmission on a particular Sunday, please accept our apologies in advance and rest assured that the regular two-metre service will resume as soon as possible.

Appeal from Pakistan Amateur Radio Society

The Pakistan Amateur Radio Society is asking the International and National Ham Community to provide the following equipment, if possible.

1. Cross band repeater radios (any brand) 3 (144-430 MHz)

2. Coaxial Cable 100 ftx3 with connectors

3. Power supplies x 3

4. Hi gain dual band antennas x 3

5. Handhelds (any brand vhf 2meter) x 5

The equipment could be new or used but should in a workable condition.

In order to facilitate collection and shipping of donated equipment from EI to our counterparts in Pakistan. Please contact Conor at email ei4jn /at/ aren.ie Conor's mobile 087 7993085 for further information or pledges of donations.

Conor would like top make the first shipment in approx 1 week time.

IARUMS news

It is requested that amateurs & SWL's please keep a listening watch around 28.265 FM as there have been incursions by churches on this frequency heard throughout Europe at up to 59 +20db. Please send details of names etc used so we can identify locations and report them to ComReg for investigation.

All information can be sent to Ger McNamara EI4GXB who is the IRTS IARUMS co-ordinator at ei4gxb /at/ gmail or 087 2532512

IOTA activation EU-123

For the week starting 18th September, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland, operating under the callsign MS0SCG.

They plan to operate on VHF, HF, SSB, CW and data modes. The location is IOTA island number EU123 and SCOTIA island number CS14.

For more information and an up to date blog on the event, Please checkout the group's website http://www.m0scg.org.uk

---

International Lighthouse and Lightship Weekend

The International Lighthouse and Lightship Weekend being held this Weekend sees some 430 registrations in 40 countries setting the scene for a great weekend.

Members of Limerick Radio Club will be activating Tarbert Lighthouse. The lighthouse number is IE0002 and the callsign in use will be EI4LRC/P.

Activity will be on all bands and look forward to working as many stations as possible over the weekend. QSL via EI4GXB

Charlie EI8JB, John EI6GHB and David EI7GEB will be operating /P from St Johns Point Lighthouse. The Lighthouse number is IE0005 Activity will be on HF, Digi & Satellite.

Those who can't go portable and operate from a lighthouse or lightship this weekend can still lend their support for the fun event by listening around the bands and working as many as possible.

The website www.ILLW.NET is an excellent guide andchecklist.

Special event station Sail 2010

The Special event station is active during Tall Ships Sail 2010 in Amsterdam August 19-23.

Callsign PD10SAIL

ISS cooling system affects ARISS contacts

A cooling system failure on the International Space Station has impacted ARISS operations. On August 11th, NASA astronauts successfully completed the second of three to four space walks in an effort to replace a faulty ammonia pump module on the International Space Station's truss. One that has forced cutbacks abroad the orbiting outpost including time that astronaut hams are spending on the air.

Since July 31st the space station has been operating at half its usual cooling capacity utilizing the one remaining cooling pump. This forces the astronauts to power down equipment to prevent overheating on the ISS.

Rallies

North Cork Radio Group is pleased to announce their first annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 19th 2010

More information is available via the Groups website www.NorthCorkRadioGroup.com, traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb /at/ gmail.com as soon as possible.

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1872 The first telegraph messages between London and Adelaide were exchanged.

1932 The British Broadcasting Corporation (BBC) began its first experimental TV broadcast in England.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

673. [DXNL] DXNL 1690 (Aug 25, 2010)

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-23 20:34:04 UTC
From: Robert Busch - DL7VOA <dxnl@dxhf.darc.de>
Message-ID: <525458421.20100823223043@dxhf.darc.de>
Source record: 5492
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

DXNL 1690 - Aug 25, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

BV - TAIWAN, AS-020
Dennis,BW/KT8X will be QRV from Taiwan (AS-020) from Aug 27 till Sep 6.

SV5 - DODEKANES, EU-001
Peri,SV5/HB9IQB, is staying on Rhodos (EU-001) from Aug 23-28 and
plans to work in CW mainly on the WARC bands.
QSLs via bureau, direct or LoTW via his homecall.

SV9 - CRETE, EU-015
SV9/SV1ELF is working from Crete (EU-015, GIOTA KRS-005, MIA MGC-005,
WLOTA LH 1400) from Aug 21-28. QSLs via bureau to his homecall or LoTW.

XV - VIETNAM
Stefan (Sten),DL1ATR, writes that his license has not been issued yet.
Right now he is working as a guest op at XV2A which is the call of the
president of the Vietnamese radio club. Stefan is active in CW on
18080 kHz every day starting around 0745 UTC. In the moment he is only
able to copy stations from BY, USA and VK. He cannot hear any European
station in the noise. His flight back is scheduled for mid September.
Vietnamese licenses have to be paid for every single band.

YJ - VANUATU, OC-035
Chris,VK3QB, Allan,VK2CA, Luke,VK2HJ, & Brenton,VK3CBV, in co-operation
with the ODXG (Oceania Amateur Radio DX Group Inc) will show up from
Efate Island (OC-035) signing YJ0VK between Aug 27 and Sep 2. They will
operate two stations simultaneously on 160m-10m running 100 watts with
verticals and wires. Special emphasis will be put on the WARC bands.
Following operating frequencies were announced:
CW: 1820, 3511, 7011, 10107, 14011, 18077, 21011, 24897, 28011 kHz
SSB: 1860, 3611/3791, 7170, 14170, 18118, 21270, 24935, 28470 kHz
RTTY: the usual DX frequencies.
They listen 1-3 kHz up in CW and digital modes and 5 kHz up in SSB.
QSLs via bureau or direct to VK2CA or LoTW.

More details can be found online at: http://yj0vk.vkham.com
If the team has internet access on the island they will upload their
logs as well.

3B8 - MAURITIUS, AF-049 / 3B9 - RODRIGUES ISLAND, AF-017
OM Giorgio,IZ4AKS, will stay on Rodrigues Island (AF-017) between
Aug 28 and Sep 4. He is going to hit the airwaves as 3B9/IZ4AKS mostly
in SSB on 10m-40m but also in CW and RTTY QRV. Giorgio will work in
"holiday style" using a FT-897D with 100 watts and a vertical. Giorgio
also plans an activity as 3B8/IZ4AKS from Mauritius (AF-049) before
and after this time. QSL via homecall, unfortunately only direct.

3D2, FIJI, OC-016
Once again Franz,DK1II, is active as 3D2II from Viti Levu (OC-016)
between Aug 22 and Sep 10. His QTH will be Lautoka on the main island
where he helps to build so-called Rotahomes for a social project of
the local Rotary club. Franz is working mainly in CW on 10m-40m using
a K3 and a 12m DX-Wire pole. QSL via bureau or direct to DK1II or LoTW.

ITALY, SPECIAL EVENT STATION
The Italian submarine "Leonardo da Vinci" is formally taken out of
service and the special event station II1IALV will be QRV in La Spezia
from Aug 27-29. QSLs via bureau or direct via IK8XVA.

SPAIN, SPECIAL EVENT STATIONS
The Federacion Digital EA will activate several special event stations
during the 75th bicycle race La Vuelta a Espana from Aug 27 till Sep 20
AM7LV Aug 27 until Sep 2
AM5LV Aug 31 until Sep 7
AM3LV Sep 5-10
AM1LV Sep 8-18
AM4LV Sep 16-20
QSLs with 1 IRC direct to FEDI-EA, PO Box 3050, 08200 Sabadell, Spain
or you follow the instructions on: http://fediea.org/lavuelta

DXCC: Oil rigs do not count for the DXCC (though the call has no /mm). This
applies also to 4K0GNY who is situated on an oil rig in the Caspian Sea

SILENT KEYS: The former Italian prime minister Francesco Cossiga passed away
at the age of 82 on August 17. He was licensed as I0FCG and was elected
into the "CQ Amateur Radio Hall of Fame" in the year 2006.
Other silent keys of the last week are: Vittorio Dell'Amico (I1VTI),
Kenneth A. Larsen (N2JTZ), Vladimir I. Zhukov (RA3YA) and
Viktor G. Kalashnikov (UT3FM).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Aug 28/29: YO DX Contest
Aug 28/29: SCC RTTY Championship

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-049, SV, North Aegean Islands: Niels,OZ7FOC, is going to hit the airwaves
Samos (GIOTA SAS-006) between Aug 29 and Sep 3. QSL via homecall.

EU-129, DL, Usedom Island: Fred,DL8DXL, is activating the islands Usedom and
Goermitz from Aug 21-28. Maybe he will also activate other islands like
Ruden (EU-057). QSL via homecall (direct/bureau).

EU-142, EA1, Oviedo/Santander Province Group: Some Spanish HAMs will be on
the air from Mouro Island signing EG1OTA on Aug 28/29. QSL via EA2RC.

EU-147, R1N, White Sea Coast Group: RA1ALA/1, RA1ALK/1 and RX1AW/1 are
working from Russkiy Kuzov Island until Aug 28. QSLs via homecalls.

EU-174, SV, Makedonia/Thraki Region Group: Laci,HA0HW, will sign J48HW from
Thassos Island (GIOTA NAS-037) between Aug 28 and Sep 7. QSL via HA0HW.

NA-118, VE7, British Columbia Province Group (Dundas Isl.): Frank,VE7DP/7,
and Klaus,VE7KDU/7, are planning an activity from the Dundas Islands
from Aug 24-28. QSLs via homecalls (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

Amateur Radio Newsline(tm) Report 1723 - August 20 2010

Amateur Radio Newsline report number 1723 with a release date of Friday, August 20 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Pakistan lead relief efforts in the wake of monsoon flooding, a cooling system failure on the International Space Station has impacted ARISS operations, unlicensed consumer devices come to the 70 centimeter repeater input subband in New Zealand and researchers say to be careful using green lasers. Find out why on Amateur Radio Newsline(tm) report number 1723 coming your way right now.

RESCUE RADIO: PAKISTANI HAMS IN HUMINATERIAN FLOOD RELIEF EFFORT

The Pakistan Amateur Radio Society in association with Islamabad Jeep Club and Pakistan Academy of Family Physicians are leading a humanitarian relief effort in the wake of massive flooding in that nation. Amateur Radio Newsline's Burt Hicks, is here with the details:

--

Monsoon rains have hit Pakistan the past few weeks followed by disastrous floods the likes of which have not been seen in some regions for the last eight decades. Communications is at a premium with cellular and wire line telephone service out as a result of the storms. Restoration of cellular service and landlines phones could take months.

In order to address the communication outage, the Pakistan Amateur Radio Society better known as PARS, working in association with Islamabad Jeep Club and Pakistan Academy of Family Physicians. Together they have begun a series of relief activities by providing communications as well as food, tents and medical support to the flood effected areas.

PARS and the Islamabad Jeep Club have so far dispatched five relief teams. One is catering to the communications needs of northern cities by linking Islamabad with Peshawar, Nowshera and Charsadda. The other would connect the central Pakistani cities of Sargodha, Lahore and Faisalabad and Multan. The other three are assigned to emergency supply preparation and delivery to those in outlying areas.

PARS has already installed 2 meter repeater at one emergency location but its signal is fairly weak in the areas where its most needed. Plans are to relay it into remote regions using a cross-band linked system if equipment can be found or donated to make it happen. This says PARS would result in effective communication through the use hand-helds rather then reliance on base stations where electric mains service is spotty and intermittent.

If you have any spare gear that can be used in this relief effort, you can contact PARS president Nasir Khan AP2NK by e-mail to ap2nk dot nasir at gmail dot com.

For the Amateur Radio Newsline, I'm Burt Hicks in Los Angeles.
--

These floods have impacted millions of Pakistanis who need help from the international community. More on this aspect of the story is on-line at tinyurl.com/36nqfzv (PARS, W7VOA)

**

HAM RADIO IN SPACE: ISS COLLING SYSTEM AFFECTS ARISS CONTACTS

A cooling system failure on the International Space Station has impacted ARISS operations. On August 11th, NASA astronauts successfully completed the second of three to four space walks in an effort to replace a faulty ammonia pump module on the International Space Station's truss. One that has forced cutbacks in other word abroad the orbiting outpost including time that astronaut hams are spending on the air.

Since July 31st the space station has been operating at half its usual cooling capacity utilizing the one remaining cooling pump. This forces the astronauts to power down equipment to prevent overheating on the ISS.

As this newscast is prepared, it has already taken almost 16 hours space walks or E-V-A's for astronauts to remove and replace the failed cooling pump in an effort to bring the ISS back to full capacity. As a result, ARISS ham radio operations which include both voice and packet have been given a low priority until the problem is resolved.

Back at Johnson Space Center in Houston, Texas, Space Station Program Manager Michael Suffredini says that a third space walk was planned to install the replacement and a fourth likely will be needed to put the defective pump into its storage place. These may have taken place by the time this newscast goes to air.

Attempts are being made to carry out scheduled ARISS contacts, but with the understanding that they may be cancelled at the last minute.

(NASA NEWS, ARISS, ANS, VOA)

**

RADIO RULES: NZ MED CREATES 70 CM REPEATER INTERFERENCE

The New Zealand Ministry of Economic Development has relaxed the conditions of use of unlicensed Short Range Devices in a key ham band. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Auckland with the latest:

--

The new conditions or rules were put in place without any consultation with our national society the NZART. They permit the use of walkie-talkies, wireless headphones, wireless audio senders and other such consumer gear in the input band of most of nations 70 centimeter amateur repeaters.

The previous rules had permitted the same 433.05 to 434.79 MHz frequency range but with an output power limited to 25 milliwatts and restricted the use to Telemetry and Tele-control modes that had far shorter transmissions. The new devices now given access to 433.05 to 434.79 MHz typically have very annoying, long duration transmissions causing significant interference to licensed amateur radio operations.

It should be noted that all of the New Zealand National System repeaters use input frequencies above 434.79 MHz and are not affected by the change. Those owned and operated by individual Kiwi hams operating with input channels below 434.79 MHz are the ones suffering from access by these consumer electronic devices.

From down-under in Auckland, New Zealand, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

As if this were not enough, there is also a new allocation in New Zealand from 3.640 to 4.040 MHz for Auditory Aids. These hold the potential to interfere with amateur signals in the amateur 75 and 80 meter bands. (Adapted from NZART News)

**

PROPAGATION: HERE COMES THE SUN

Some good news on the propagation front. Better days may be on their way.

Researchers at Boston University's Center for Space Physics have announced they have what they term as sub-visual evidence that a new cycle of solar wind activity around Earth is finally starting. This based on observations of recent appearances of aurora near the North Pole accompanied by dimmer glows well south of that.

What has fascinated space scientists in recent years is the delayed onset of such effects this time around. Typically, the Sun has an activity cycle of about 11 years, with flares, C-M-E's and ejection of electrically

charged particles called the Solar Wind. These cause changes in the Earth's magnetic field or magnetosphere that produce luminous auroral emissions in the northern most latitudes high in the Earth's atmosphere.

Such effects are subdued during so-called solar minimum years such as the case in 1996 to 1997. They are also very prominent in solar maximum years as they were in 2001 to 2002.

According to this cycle, called Cycle 24, a new wave of solar activity had been expected to start last year but the Sun remained dormant. This had some solar observers predicting that we might be headed for a historic solar minimum. Now the Boston group says there are finally signs of the new cycle 24 appearing and you can read more about it at tinyurl.com/34bk2pp. (World Science Net)

RADIO SAFETY: UNIDENTIFIED MAN FALLS FRIM HAM TOWER

The Southwest Riverside News Network reports that a man who may be an amateur radio operator was taken to a hospital after he fell about 25 feet off a ham radio transmitting tower in Ocean Beach, California on August 8th. According to a police report., the unidentified man hit his back and head when he fell around 3:30 p.m.. Officer Jane Jacobsen said the man was breathing when officers and paramedics arrived but the extent of his injuries were not immediately known. The news story did not say if the person who fell was the towers owner or someone hired to work on it. (Riverside Net News)

**

PUBLIC SERVICE: BICYCLE TOUR OF NJ NEEDS MORE HAMS

The Newark Amateur Radio Society in New Jersey says that it needs at least 33 additional volunteer ham radio operators to provide communications for the upcoming Bicycle Tour of Newark. The event takes place on Saturday, September 18th running from 7:00 AM to 3:00 PM Eastern U-S time. In case of rain, a back-up date of Saturday, September 25th has been set.

The Bicycle Tour of Newark is comprised of both 5 mile and a 25-mile courses. The staging area for the event is downtown Newark and there will be a designated parking area for those who bring vehicles. Public transportation is by New Jersey Transit trains from New York's Pennsylvania Station.

If you have the day free and wish to volunteer please contact Leon Grauer, N0TAZ by re-mail to n0taz (at) NewarkAmateurRadio (dot) com. (QRZ)

RESCUE RADIO: BROADCAST STATIONS ENCOURAGED TO JOIN DIRS

The FCC Media Bureau is encouraging broadcasters to register and participate in its Disaster Information Reporting System or DIRS. According to Doug Lung writing TV Technology Magazine, registered users input data on the status of their broadcast facilities, communications links, generator fuel and other items. They also provide emergency contact information the FCC can use to contact them to assist with disaster recovery and assistance from the FCC's federal partners.

Lung notes that updates are easy to do using the DIRS website, but he encourages stations with group management or sister stations outside the disaster area to consider having someone outside listed as a D-I-R-S participant. This, so the engineer within the disaster area doesn't have to struggle to find a working Internet connection. Rather the engineer at the affected station can quickly update that person, who could then update the DIRS website and handle inquiries. (RW)

**

COMMUNICATIONS LAW: FCC GREEN-LIGHTS CERTAIN MOBILE-ONLY TV RECEIVERS

The FCC has conditionally approved a request from Dell Computer, LG Electronics USA and Hauppauge Computer Works. This, to permit the importation and sale in the United States of television receivers designed for mobile use that exclude analog and, in some cases, standard non-mobile digital reception capability.

In granting the joint request the FCC said that it concludes that a waiver is in the public interest. This is because it would facilitate the introduction of television receivers with Mobile DTV tuners that are designed to be used in motion.

But the regulatory agency did add one proviso to the grant. It is requiring the three companies to clearly disclose to consumers that a specific device does not have the capability to receive analog signals, and, where applicable, standard non-mobile digital signals. (FCC, CGC)

**

FUTURECOMM: BROADBAND ADOPTION FALLING IN USA

Adoption of broadband by citizens of the United States has slowed dramatically this year, and a majority believes that making high-speed Internet access affordable should not be a major government priority. This, according to a study by the Pew Research Center's Internet & American Life Project.

The research found that two-thirds of Americans currently use broadband at home, a number that's statistically the same as a similar Pew study

conducted the same time in 2009. The research firm last year found 63% of Americans were broadband adopters.

The study also found that the majority of Americans did not believe high-speed Internet access to everyone in the United States should be a top priority for the federal government. Fully 53% of Americans said affordable broadband access should not be attempted by government or was simply not too important of a priority. More is on-line at tinyurl.com/24dqcmb (Information Week OnLine)

**

RADIO BUSINESS: SANGEAN SIDESTEPS PORTABLE HD RADIO INTRO

Radio World reports that Sangean now says it is not planning to introduce a portable HD Radio that was to have included analog AM in the U.S. this year. Responding to a question from the newsletter, a Sangean spokesman said the company decided not to go ahead with production of the DT-600 HD. The Sangeen representative could not say why but did add that Amazon dot com is not accepting pre-orders for the unit.

IBiquity had a prototype of the unit in its booth at winter Consumer Electronics Show and also at the spring National Association of Broadcasters shows both held earlier this year in Las Vegas. The multicast-capable unit was also designed to support program associated data services and feature iTunes tagging via a USB port. (RW)

**

RADIO BOOKS: NEW AM RADIIO LOG FROM THE NATIONAL RADIO CLUB

And this one for SWL's or hams who enjoy medium wave DXing. Word from Wayne Heinen, N0POH, that the new 31st edition of the National Radio Club's AM Radio Log is hot off the press and ready to be shipped.

The AM Radio Log is a source for information on AM Radio Stations in the United States and Canada. The latest edition contains 278 pages of data and cross references, and 18 pages of instructions in 8-1/2" x 11" size, 3-hole punched, U.S. loose leaf format. This publication fits nicely into a 1" three-ring binder and for the visually handicapped the print may be read by most standard O C R systems.

According to Heinen. there have been nearly 10,000 updates since last year's 30th Edition of the log. Additional reference lists include call letters of FM simulcasts, listings of regional groups of stations in the groups section, and a cross reference of those stations that are licensed to use In Band On Channel digital audio.

To find out more or to order a copy of you very own, simply take your web browser to www.nrcdxas.org.

THE SOCIAL SCENE: RESERVATIONS UP AT RSGB CONVENTION

Turning to the ham radio social scene, word from the United Kingdom that the early bird savings available for the RSGB Convention bookings have been extended until September 1st. The Radio Society of Great Britain says that while reservations are up on last year but this is no problem as the Horwood House near Milton Keynes is a larger venue.

The RSGB Convention takes place between the 8th and 10th of October. There will be a wide variety of talks and lectures over the weekend as well as displays and demonstrations of the latest gear. More information on this UK ham radio show is on-line at www.rsgb.org.uk/rsgbconvention. (RSGB)

**

THE SOCIAL SCENE: FIRST NORTH CORK RALLY SEPTEMBER 19

If you are planning to be in Ireland this fall you might want to attend the first ever North Cork Radio Group Rally and Electronics Fair at the Blarney Golf Resort, Tower on Sunday September 19th. Doors open to the public at 11.30 a.m. local time and the rally will run until about 5pm. Among the equipment dealers on hand will be South East Communications, Long Communications and JBT Trading. Further details about this event is on line at www.northcorkradiogroup.com. And for those of you not aware the term rally is the same as we call a hamfest on this side of the great Atlantic pond. (IRTS News)

**

NAMES IN THE NEWS: CHARLIE HELLMAN, W2RP, ON THE AIR AT AGE 100

And a word of congratulations to Charlie Hellman, W2RP, of Hastings On Hudson, New York. This on having hit the grand old age of 100.

Alan Brennglass, K2ACB, says over eHam dot net that he recently spoke to Charlie on the air. At that time he learned that W2RP got his first license in 1925 at age 15.

In honor of reaching this milestone of life, his family threw a nice party for him and the QCWA sent him a beautiful plaque for this honor. Charlie told K2ACB that he had been inactive on the High Frequency bands for several months but is now back on the, especially on 20 meters. (K2ACB, eHam)

COMMUNICATIONS RESEARCH: SOME FIREFLIES DO GLOW TO MATE

For decades, scientists have speculated about why some fireflies exhibit synchronous flashing in which large groups produce rhythmic, repeated flashes in unison. At times enough to light up an entire forest at once. Now, the first experiments on the function of this phenomenon suggest that synchronous flashing preserves female fireflies' recognition of suitable mates.

To reach this conclusion, researchers collected females of the synchronous species from the Smoky Mountains National Park in Tennessee. In the laboratory, they exposed the females to groups of light-emitting diodes meant to mimic male fireflies. Each individual LED produced the species-specific pattern of flashes for type of fly but the experimenters varied the degree to which the flashes were in synch with one another.

Their conclusion is that Fireflies which are actually a type of beetle produce bioluminescence as a mating tool. One in which males display a species-specific pattern of flashes while cruising" through the air looking for females. These patterns consist of one or more flashes followed by a characteristic pause, during which female fireflies, perched on leaves or branches, will produce a single response flash if they spot a suitable male.

Of the roughly 2,000 species of fireflies around the world, scientists estimate that only about 1 percent synchronize their flashes over large areas. The results of this novel communications item was reported in the July 9 issue of Science. (Adapted from Science Daily)

INTRUDER WATCH: 6 METER QRM LINKED TO EAST EUROPE TV

Talk about a strange and unwanted 6 meter beacon. The IARU Region 1 Monitoring System reports on a humming noise in the 50 MHz band that sounds like a defective power supply. Its most often heard during Sporadic-E openings and turn out to be carriers from East-European TV transmitters.

Wolfgang Hadel, DK2OM, was the one who actually found the carrier. Using a Wavecom 61 monitor DK2OM also located the related audio portion of the transmissions in wideband FM 5 MHz higher in frequency. (IARUMS)

HAM RADIO IN SPACE: PACESAT PROJECT ANNOUNCED IN TIWAN

Yet another new ham radio satellite is on the drawing boards. A team from the Taiwan Department of Aeronautics and Astronautics and the Department of Electrical Engineering at the National Cheng Kung University has announced a CubeSat development project named Platform for Attitude Control Experiment or PACEsat for short. This cubesat will feature three-axis stabilization utilizing a miniature momentum wheel and magnetic coils. Attitude determination will use a three-axis magnetometer, a three-axis gyro, and coarse sun sensors. Temperature sensors will monitor the thermal environment inside the satellite.

The new bird is designed for a 600 km near-circular orbit with a 98 degree inclination. Mission lifetime is planned to be 2 months. Frequencies discussed in the satellite design documentation include 145 MHz for uplink and downlink communication and 433 MHz CW and AX.25.

Technical details on PACEsat can be found on-line at tinyurl.com/2evtd7a (ANS)

**

HAM RADIO IN SPACE: SA AMSAT CUBESAT PROJECT REMAINS NAMELESS

A planned South African ham radio satellite is still in search of a name. The South Africa AMSAT committee has reviewed all the names proposed for its new CubeSat project but found none of those proposed suitable for the project. As a result, the committee decided to hold the naming of the project until the payloads have been finalized.

The committee has however narrowed down the options for a satellite payload to one of two. The first is centered around a payload that would promote satellite use by radio amateurs in South Africa and the second is a project of a scientific nature that would also have appeal to the education sector. A decision on both a name and a final mission purpose will be made at a later date. (SARL)

**

QSL CORNER: HOW TO QSL CYPRESS DX STATIONS

The QSL Bureau of the Cyprus Amateur Radio Society says that it is receiving large numbers of QSLs that cannot be delivered to the intended recipient. This is because that station has a QSL manager outside Cyprus.

According to 5B4AHJ who is the society's QSL Bureau Manager, the problem is threefold. Those generating the QSLs are not bothering to check to see if the station has a manager. And, even if a manager's call is written on the QSL, many QSL Bureaus are still sending the QSL to Cyprus. Lastlt. QSLs for calls 5B DXcalls are being sent to Cyprus when either they should be sent to the operators QSL manager, or in the absence of a manager, they should be sent to the bureau for the home call.

5B4AHJ says that he has produced a list of stations with foreign managers for Cypress stations. It's on line at tinyurl.com/cypruscalls. (OPDX)

**

DX

In DX, word that VK6LC will be will be operational as XV2LC through September 10th from Ho Chi Minh City and as XV4LC from the Mekong Delta. Listen out for him primarily on CW with some SSB. QSL via VK6LC.

IZ4AKS will be active stroke 3B9 from Rodriguez Island from August 28th through September 4th. His operation will be holiday style on 40 through 10 meters SSB with the possibly of some RTTY and CW as well. QSL direct only to IZ4AKS at his Callbook address.

IK2NCJ will be active as D4C from Sao Vicente Island near Cape Verde until August 26th. QSL either via CT1ESV to the bureau, or direct to IZ4DPV or electronically using Logbook of the World.

GJ7DNI will be driving across France in a 1959 Commer camper van and will be working holiday style on the 40 and 80m bands between through August 30th. He will be running only 100 watts so you will have to listen out carefully for hi. If you do make contact please QSL as directed on the air.

Lastly, the "Buddies in the Caribbean" DXpedition group which specializes in 100 watt or less radios and the Buddipole portable antenna systems will be back on the Island of St. Lucia from December 8th to the 13th. The group says that it wants to demonstrate what it terms as "Ultralite DXpeditioning" from the islands magnificent "vista" locations. This, by operating a field portable battery-only radio with back-packable and lightweight antennas from St. Lucia's beaches or scenic mountain tops.. There will also be three villa stations in operation on 160 on 10 meters using CW, SSB, and RTTY. QSL via Logbook of the World, eQSL, or mail to the individual operator's home call sign with a self addressed stamped envelope.

(Above from various DX news sources)

THAT FINAL ITEM: GREEN LASERS CAN BE AN EYE HAZARD

And finally this week, green laser pointers have become a popular consumer item by delivering light that's brighter to the eye than red lasers. But stories have been circulating on the Web about the potential hazards of some inexpensive models. Now, a team led by physicist Charles Clark at the National Institute of Standards and Technology has put some numbers to the problem. Amateur Radio Newsline's Jim Davis has more:

--

Late last year, the research team from the National Institute of Standards and Technology purchased three low cost green laser pointers advertised to have a standard power output of 10 milliwatts. Scientific measurements showed that one unit emitted dim green light but delivered infrared levels of nearly 20 milliwatts. That's a level said to be powerful enough to cause retinal damage to an individual before he or she is aware of the invisible light. The National Institute of Standards and Technology researchers repeated the tests with several other laser pointers and found similarly intense infrared emissions in some but not all units.

So why the disparity? The researchers believe that the problem stems from inadequate procedures in manufacturing quality assurance. They note that inside a green laser pointer, infrared light from a semiconductor diode laser pumps infrared light at a wavelength of 808 nanometers into a special transparent crystal lens causing a conversion to even deeper in the infrared, at 1064 nanometers. This light then passes through another crystal of potassium titanyl phosphate which emits light of half the wavelength at 532 nanometers which is the familiar color of the green laser

pointer.

But say the researchers, if the crystal is misaligned, little of the 1064 nanometer energy is converted into green light, and most of it comes out as infrared. Excess infrared leakage can also occur if the coatings at both ends of the crystal that act as mirrors for the infrared laser light are too thin.

The NIST team says this problem could be solved by incorporating an inexpensive infrared filter at the end of the laser, which could reduce infrared emissions by 100 to 1000 times depending on quality and cost. Although these filters exist in modern digital cameras and more expensive green laser pointers, they often are left out of the inexpensive models.

The bottom line. The research team says to never point a laser pointer at anyone for any reason.

Im Jim Davis, W2JKD.

--

The researchers that conducted this project are all members of the Joint Quantum Institute. This is , a collaboration between the National Institute of Standards and Technology and the University of Maryland. (Science OnLine)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita, California, 91350

Before we go, just a reminder that Saturday and Sunday, August 21st and 22nd is the 2010 Huntsville Hamfest at the Von Braun Center in downtown Huntsvills. Several Newsline staffers including our producer Bill Pasternak, WA6ITF and this reporter will be there to present the 2010 Young Ham of the Year Award to Cody Anderson, KI4FUV. The presentation will take place at around 2 P,M. on Saturday on the front podium of the main exhibit hall. If you are at the Huntsville Hamfest, please join us in honoring this fine young man for his contributions to our great hobby.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

>
> The study also found that the majority of Americans did not believe
> high-speed Internet access to everyone in the United States should be a t
op
> priority for the federal government. Fully 53% of Americans said
> affordable broadband access should not be attempted by government or was
> simply not too important of a priority. More is on-line at
> tinyurl.com/24dqcmb (Information Week OnLine)
>

I think there are several reasons for this:

1) all the early adopters and middle adopters are already on-line.

2) The people left are ones who aren't interested in the world around
them.
They don't read newspapers, magazines, or use other information
sources.
The internet is just another media source that doesn't interest
them.

3)Broadband internet access is just too expensive.
Broadband Cable internet access requires you to buy Cable TV,
before you can get cable broadband access.
In many cases this doubles Internet access costs.
For example, I have to buy Cable TV at $58.95/month and cable
broadband costs $49.00 more, plus if i don't get
POTS ($18.00) "bundled" with
```

cable service; the Cable TV the Cable access would be $64.95 plus
$54.95 for Internet.

4) In many residential areas DSL in not available.
Residential areas are too far from the phone company connect
point.

5) In many areas "broadband" just isn't.
My ISP says I have a 5Mb connection. There are so many other users on
the same cable line that my effective speed is 384Kb.
Why pay for service that you aren't getting?

Dan

Aloha to all - We have returned for just a few days. I will be
active in the higher elevations here at EK55. This is due mainly
to the hieght of the jungle here and the antenna being on the
ground. Also due to my lovely Crissa working until late hours on
her job and me being with her when she is working in the jungles.
I would enjoy just 13 more new grids for VUCC before I leave here.
As the moon comes and goes threw the trees, I have been answering
any CQ's I hear. I have good visability above about 35 degrees
elevation. Please use grid EK55 to see my moon position with your
software. I am on and calling CQ or chasing signals when moon is
above at least 35 deg for me. So look for me early AM's Zulu from
the 26th threw 30th moons, then we leave V3 for good. 0430z and
later is good times to find me. Internet is not good from station
usually none. v31ja ek55 is 140.141 usually 1st. 600watts, 5wl
long Yagi. www.w7eme.org/v31ja SOURCE: Jeremy, v31ja, via MoonNet

** N1, UNITED STATES (Special Event) **

Members of the Symbol Technologies Amateur Radio Club will
sponsor a special event station honoring those who lost their
lives during the horrific terrorist attacks on U.S. soil of
9/11/2001. Club station W2SBL will be multi-operated as N1Y
on Saturday 1500z, September 11th, through 1500z Sunday,
September 12th. Operations will be from grid FN22 in Delaware
County, NY. Activity will be on the HF bands using SSB/CW/
PSK31/SSTV, and on 70cm/2m/6m SSB. QSL is 100% via a SASE or
by the Bureau via W2SBL. SOURCE: Ohio/Penn DX Bulletin #970

** LATEST CY0 (SABLE ISL.) NEWS RELEASE - August, 2010 **

Operation dates have been modified slightly due to logistics
matters: October 21 - 29, 2010. Unfortunately, Murray, WA4DAN
has had to withdraw from the dxpedition, due to business conflicts
He was the original organizer and has been involved with all of the
planning, since early in 2009. Gary Bartlett - VE1RGB has been

recruited as the 4th operator. Gary is a skilled CW operator, active competitor in contests, experienced in handling pileups, a great technical background. In addition, a plus is that Gary has previously operated from Sable Island. Call signs are: CY0/AA4VK CY0/AI5P, CY0/N0TG, CY0/VE1RGB. QSL "all" callsigns DIRECT Via N0TG or the preferred QSL route is VIA the ONLINE QSL REQUEST Service. QSL instructions and options are listed on our website: www.CY0dxpedition.com (Click on How to QSL) SOURCE: GOLIST

** 50 MHz License in HS/E2 - Support Needed **

RAST - The Radio Amateur Society of Thailand - seeks support by contest club's and OM's for renewing of the 50 MHz license - HS/E2 Ham's - at the National Telecommunication Commission of Thailand Therefore we ask everybody to send us supporting letters - 50 MHz which could help us with the renewal and extension of the 50 MHz license. Letters and attachments could be posted in our topic http://rastforum.co/index.php?topic=577.0 or via email to admin(at)rastforum(dot)com - Further informations about RAST on our website www.qsl.net/rast or on the forum rastforum.com Thank you very much for your support - hope to work you soon on 50MHz. ==> + PUBLIC SERVICE: PAKISTANI AMATEURS TEAM UP TO PROVIDE
COMMUNICATIONS, RELIEF SUPPORT FOR FLOOD VICTIMS

According to the Pakistan Amateur Radio Society (PARS) -- that
country's IARU Member-Society -- radio amateurs in Pakistan have teamed
up with the Islamabad Jeep Club and Pakistan Academy of Family
Physicians to provide relief activities in those areas of Pakistan
devastated by floods. The groups will supply food, tents and medical
support to the northern flood affected areas of Nowshera, Charsadda and
central Sargodha districts.

"The cellular services are down and so is the landline," the PARS
Web site reports. "Last week, the joint team carried out a survey in
the north and the center of the country, and to its dismay, the
situation isn't promising. Restoration of cellular services and
landlines could take months."

On August 21, hams reached the town of Dharkhanawala, looking to set up
communications, but had to turn back because the equipment had not
```

arrived; however, teams were able to distribute food in Dharkhanawala and Chauki Darab. Read more here <http://www.arrl.org/news/pakistani-amateurs-team-up-to-provide-communications-relief-support-for-flood-victims>.

==> ARRL WEB SITE: USING THE "YOUR FAVORITES" FEATURE AND RETRIEVING FORGOTTEN PASSWORDS

By ARRL News Editor S. Khrystyne Keane, K1SFA

Since we introduced the new ARRL Web site this past April, we have received inquiries on how to retrieve forgotten passwords, as well as how to use the "Favorites" function -- a "bookmark" feature -- on the new site.

Have you forgotten your password? You can easily retrieve it by clicking on the "Forgot Password? <http://www.arrl.org/forgot-password>" link, located directly under the log-in box at the top of the page (see photo <http://www.arrl.org/images/view/News/ForgotPassword.JPG>). You can either request to receive a temporary password via e-mail (you must use the e-mail you originally used to register for the previous ARRL Web site), or you may retrieve a temporary password immediately by providing your user name (for hams, this is usually your call sign) and your ARRL member ID number (you can find this on your QST mailing label). You must also provide either your call sign or your last name. Click here <http://www.arrl.org/forgot-password> to receive a temporary password. First time Web users can get an online user name and password by clicking in the "Register" link, located next to the "Forgot Password?" link.

Once you have successfully logged in to the Web site, you will see a drop-down box that says "Your Favorites" right underneath your name (see photo <http://www.arrl.org/images/view/News/YourFavorites.JPG>). Now navigate to any page on the ARRL Web site. Would you like to find it in just one step the next time you need it? The "Your Favorites" feature will do just that! When you are on the desired page, just click on the "Your Favorites" drop-down

menu, click "Add to Favorites" then click the "Go" button. Now you have stored that Web page as one of your favorites; each time you wish to go to that page, you can just access it through the "Your Favorites" drop-down menu (see photo <http://www.arrl.org/images/view/News/YourFaveSignIn.JPG>).

If you have any questions or concerns about the new ARRL Web site, please direct them to Katie Glass, our Digital Content Manager. You can send them via e-mail <kglass@arrl.org> or call Katie directly at (860) 594-0250.

==> + ARRL ELECTIONS: SUMMER SECTION MANAGER ELECTION RESULTS

Southern Florida and Oklahoma will have new Section Managers starting in October, and the incumbent Section Manager of Ohio was re-elected in the summer Section Manager election cycle that concluded on Tuesday, August 24; election ballots were counted August 24 at ARRL Headquarters. Terms for new Section Managers will begin on October 1, 2010. Read more here <http://www.arrl.org/news/summer-section-manager-election-results>.

==> + THE DOCTOR IS IN: SWR

Bil Paul, KD6JUI, of Dixon, California, wrote to the ARRL's Doctor, noting that he noticed when he was tuning for optimal background noise while in receive mode, it came close to -- but didn't match -- the dial positions for minimal SWR while transmitting. He asked which of the two antenna tuner dial settings would result in the most transmitted energy while in transmit mode. He also wants to know if minimal SWR always indicates the most transmitted energy going to the antenna system.

Here's what the Doctor had to say:

In answer to the first question, by setting the antenna tuner to an SWR of 1:1, you have transformed the impedance at the bottom of your antenna feed line to 50 ohms, just what your transceiver is designed to deliver its rated power into. If your receiver input impedance were exactly 50 ohms, then that setting would likely also be the position that would yield maximum receiver noise. As it happens, there is no such guarantee that the input impedance of the receiver will be exactly 50 ohms. Although it should be pretty close, a slight change may yield a stronger signal into the receiver.

Regarding the second question, the transceiver is rated to provide its design output power into 50 ohms, usually within a specified SWR range. As was pointed out by Eric Nichols, KL7AJ, in a QST article last year ["Keeping Current with Antenna Performance," Feb 2009, pages 34-36], an SWR of 1:1 does not generally result in the maximum power output. By building a transmission line current meter, such as described by Eric, or later by Paul Danzer, N1II ["A Simple Transformer to Measure Your Antenna Current," Sep 2009, page 35], you can actually tune the antenna tuner to get the highest output. This corresponds to the maximum current into the antenna, which may occur at some setting different from either of the above.

Be careful, though: If you exceed the maximum rated SWR, the resulting voltages or currents in the final amplifier or output filter of the transceiver will exceed design specs and damage may result. The likely small increase in transmitted power is likely neither worth the trouble nor the risk, in my opinion.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to The Doctor, ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> SUPPORT ARRL: ARRL ENCOURAGES MONTHLY GIVING

The ARRL Development Office is dedicated to raising funds for those programs not funded entirely by member dues. Whether your interest is focused on protecting Amateur Radio operating frequencies, expanding ARRL's national initiative promoting science and math education, or securing the future of the W1AW, The Hiram Percy Maxim Memorial Station, your financial support is vital.

"Now it's easier than ever to make a commitment to ARRL," said ARRL Chief Development Officer Mary Hobart, K1MMH. "By contributing as little as $10, $20 or $100 per month, you can be part of a strong financial forecast for those programs that are at the heart of our service." More and more ARRL members are taking advantage of this option to contribute to the Diamond Club, the Spectrum Defense Fund, the Education & Technology Fund and the W1AW Endowment Fund. Read more here <http://www.arrl.org/news/arrl-encourages-monthly-giving>.

==> + ARRL VEC VOLUNTEER EXAMINER SESSION PARTICIPATION WEB PAGE RETURNS

If you're an ARRL Volunteer Examiner (VE <http://www.arrl.org/become-an-arrl-ve>) who is interested in seeing how many ARRL exam sessions you've taken part in, you can find the answer on the VE Session counts <http://www.arrl.org/ve-session-counts> Web page. On this page, you'll be able to access a list that shows the total number of exam sessions that each ARRL VE has conducted. The listings are listed first by state and then in alpha-numeric call sign order (call area number, then suffix letters). The state where an individual VE record is located is based on the VE's official address on file with the ARRL Volunteer Examiner Coordinator. Only currently accredited ARRL VEs will be displayed on the Web page. ARRL VEC Manager Maria Somma, AB1FM, said she is "thrilled" that the enhanced page now includes the VEs name, as well as the call sign and session participation total: "Incorporating the name field in the lists added a higher level of authentication when determining a VE's accreditation status and participation. We applaud the volunteers whose dedication and service make the VE program successful. Your hard work and contribution of countless hours of your time helps ensure the future of Amateur Radio. Your efforts matter and we thank you. Our VEs should be very proud of their accomplishments."

==> + SOLAR UPDATE

Tad "Shadows stalled against the pitiless scope of the Sun <http://poems.com/poem.php?date=14818>" Cook, K7RA, reports: This week saw three days -- August 21-23 -- with no sunspots, and the average daily sunspot numbers for the week -- August 19-25 -- declined more than 28 points to 8, compared to the previous week. The average daily solar flux was down five points to 75.3. The last period of three days or more of no sunspots ended on May 20, 2010, around 100 days ago. Sunspot group 1100 disappeared on August 21, only to return August 25. In this case, the sunspot group didn't transit the non Earth-facing

side of the Sun, but it just faded from view, returning just as it is about to rotate off of the Sun's western limb. Sunspot group 1101 appeared on August 24, and on August 25, it had grown to three times its initial size. Daily sunspot numbers for August 24-25 were 11 and 23. Remember: the sunspot number is not the same as the number of sunspots. The smallest non-0 sunspot number is 11. Each spot gets 10 points for being a sunspot group and one point for containing one sunspot. The sunspot number of 23 on August 25 represents two sunspot groups, at 10 points each, one containing one sunspot (1 point) and the other containing two sunspots (2 points). On August 25, it appears that a new smaller sunspot may be emerging between the eastern horizon and sunspot group 1101. A stiff solar wind from a coronal hole increased geomagnetic activity. The planetary A index for August 21-25 was 3, 4, 7, 18 and 20. Thursday's projection shows this decreasing, with the planetary A index on August 26-28 at 15, 10 and 8, followed by a quiet reading of 5 for the next three weeks. Solar flux for the same period is expected to be 75 for August 26-31, then 76 and 80 for September 1-2, and 85 on September 3-5. Several weeks from now is the fall equinox, which is a good time for HF propagation. The autumnal equinox will be at 0309 UTC on September 23, 2010. Look for more information on the ARRL Web site on Friday, August 27. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Melissa Green's August <http://poems.com/poem.php?date=14818>.

==> + ON THE AIR: ARRL EME CONTEST COMING SEPTEMBER 4-5

The 2.3 GHz+ version of the ARRL EME Contest <http://www.arrl.org/eme-contest> will be 0000 UTC September 4 through 2359 UTC September 5. The objective is to work as many stations in as many different 2 degrees • 1 degree grid squares as possible via the Earth-Moon-Earth path on any authorized amateur frequency above 2.3 GHz. Two other EME contests are scheduled for October: the 50-1296 MHz version will be October 2-3 and October 30-31. See the ARRL Contests page <http://www.arrl.org/contests> for more information.

==> + SILENT KEY: ORNITHOLOGIST ARLO RAIM, KB9LLF (SK)

Arlo Raim, KB9LLF, of Danville, Illinois, was killed by a southbound Canadian National freight train on the morning of Friday, August 20. He was 67. Raim had been in Pratt's Wayne Woods Forest Preserve -- part of the Forest Preserve District of DuPage (Illinois) County -- to monitor the effect of increased train traffic on cardinals. "He was one of, if not the best, bird tracker in the world," said Dr Mike Ward, Coordinator of the Critical Trends Assessment Program at the Illinois Natural History Survey and one of Raim's supervisors. "He used radio telemetry to track animals as varied as peregrine falcons, coyotes, turtles and northern cardinals." According to Ward, Raim's most noteworthy research may have been the 2002 tracking that showed crows changed roosts every two days, a discovery that shed light on why West

Nile virus is able to spread so rapidly. Read more here
<http://www.arrl.org/news/ornithologist-arlo-raim-kb9llf-sk>.

==> THIS WEEK ON THE RADIO

This week:

- August 27 -- NCCC Sprint Ladder
- August 28-29 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party;
YO DX HF Contest; SCC RTTY Championship
- September 1 -- QRP Fox Hunt

Next week:

- September 4 -- Russian RTTY WW Contest; Wake-Up! QRP Sprint; AGCW
Straight Key Party
- September 4-5 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
All Asian DX Contest (Phone); Colorado QSO Party; Brazil Independence
Day BPSK31 CDX Contest
- September 5 -- WAB 144 MHz QRP Contest (Phone)
- September 5-6 -- Tennessee QSO Party
- September 6-7 -- Michigan QRP Labor Day CW Sprint
- September 7 -- ARS Spartan Sprint
- September 8 -- QRP Fox Hunt
- September 8-9 -- CWops Mini-CW Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

==> UPCOMING EVENTS

- August 27-29 -- ARRL New England Division Convention
<http://www.boxboro.org/>, Boxboro, Massachusetts
- September 17-19 -- ARRL Southwestern Division Convention
<http://www.sandarc.net/Convention2010/index.html>, San Diego,
California
- October 15-17 -- ARRL Pacific Division Convention
<http://www.pacificon.org/>, San Ramon, California

Amateur Radio Newsline(tm) Report 1724 - August 27 2010

Amateur Radio Newsline report number 1724 with a release date of Friday, August 27 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The last suspects in the murder of Gary Haas, N5VGH, and his wife Linda are captured, more on ham radios role in the wake of massive flooding in Pakistan, India gives its hams access to 6 meters, baby monitors purchased in the United states are causing havoc to two way radio communications across Japan and Cody Anderson, KI4FUV is presented the 25th annual Amateur Radio Newsline Young Ham of the Year Award at the Huntsville Hamfest. Come join in the celebration on Amateur Radio Newsline(tm) report number 1724 coming your way right now.

(Billboard Cart Here)

**

RADIO CRIME: ALLEGED MURDERERS OF N5VGH AND HIS WIFE CAPTURED

The last two of three alleged killers of Gary Haas, N5VGH, and his wife Linda have been captured in Arizona. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here with the details:

--

Authorities in Arizona say it was the suspicions of a forest ranger about an unattended campfire and a vehicle backed into trees which helped lead to the arrests of John McCluskey and Casslyn Welch.

They say the two were hiding out in a campground southeast of the Sunrise Ski Resort in Apache County, Arizona, when the ranger made the discovery and called federal authorities.

After checking the license plate of the car, authorities found it matched a vehicle missing from Santa Rosa, New Mexico and suspected McCluskey and Welch were responsible for the theft.

Investigators say the car came from an area where authorities discovered the bodies of Gary Haas and his wife in a burned-out trailer.

In charging documents released by the U.S. Attorney's office in New Mexico, graphic details of events leading up to the couple's murder were spelled out.

Investigators say McCluskey, Welch, and another man, identified as Tracy Allen Province carjacked the couple's pickup truck and their camper trailer on Aug. 2 at a rest area off Interstate 40 in Quay County, New Mexico.

Authorities allege the trio forced the couple to drive to an area between Tucumcari and Santa Rosa, New Mexico where they stopped. It was there, investigators say, McCluskey took the couple at gunpoint to the camper trailer and shot them, killing both.

With the bodies still in the camper, the fugitives drove to a remote area of Guadalupe County in New Mexico where they unhitched the camper trailer and set it on fire with the couple's bodies still inside. The burned out trailer with the couple's remains inside was found August 4th.

That led to a massive manhunt for McCluskey, Province and Welch. It is believed Welch helped McCluskey and Province and another inmate, Daniel Renwick to escape from a private prison in Arizona.

Renwick split from all of them right away and was captured in Colorado a few days after the breakout.
Province then split from the couple and was captured in Wyoming on Aug. 10.
McCluskey and Welch, who were first cousins and fianc&#65533;es, remained on the lam for another nine days.

All are jailed in lieu of very high bail and facing a host of serious charges ranging from kidnapping to murder.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

--

If found guilty at a federal trial, McCluskey, Province and Welch would face either life in prison without the possibility of parole or death by lethal injection. (ARNewsline(tm) from US Marshall's Office Press Release)

**

HAM HELP: ASSISTANCE ASKED TO FIND MISSING ARIZONA HAM

Police and family members are asking for the public's help to locate David Wile, KE7SWL, of Glendale Arizona. Wile was last seen on Saturday, August 21st at around 11:30 a.m. at his home near 43rd and Maryland Avenues in Glendale.

David Wile, KE7SWL, is a white male, 30-years old, 5 feet 10 inches tall, weighing between 180 and 190 pounds, with brown hair and brown eyes. ABC 15 dot com says that his silver 2003 Honda Accord, with Arizona license plate 505 VGA, is also missing.

KE7SWL's brother is Alun Wile. He told ABC 15 dot com that he became worried after David missed a competition that he was scheduled to attend on Saturday at Paragon Dance Studio in Tempe, Arizona.

Anyone with information on David Wile's where-abouts is asked to contact the Glendale Arizona Police Department. A photo of David Wile is on-line

at tinyurl.com/37tcdu8 (KE7JDO, AMC15.com, QRZ.com)

**

RESCUE RADIO: HAM HELPS HAM IN ARKANSAS ROAD ATTACK

Whether it was road rage or an attempted robbery nobody is quite sure. But on the morning of August 22nd, David Terrell, N5YLG, was driving on Interstate 30 between Texarkana, Texas, and Malvern Arkansas when someone rammed the rear of his car two or three times. Terrell works for a drug company delivering to nursing homes and hospitals. Luckily his company car is a retired police cruiser that had the speed to outrun the would-be attackers.

At the time of the skirmish, Terrell was in an area where there is no cell phone coverage. However he was able to contact Timothy Leet, K5RQO through the 147.120 repeater in Benton Arkansas. Leet, who is a former emergency dispatcher was able to make phone contact with the Arkansas State Police and Clark County Sherriff's office. Working with the sheriff, he was able to coordinate an intercept to assist N5YLJ. Authorities located Terrell and found that was alright except for some aches and pains. At airtime, the person or persons who rammed Terrell's car are still at large. (KC5JUQ)

**

RESCUE RADIO: HAM RADIO CONTINUES TO ASSIST IN PAKISTAN FLOODING

Ham radio continues as a lifeline in the flooding situation in Pakistan. WIA newsman Jim Linton, VK3PC, has the latest:

--

The medical and food support being provided to the many people affected by the flood disaster in Pakistan affecting six million people is being assisted by the combined efforts of radio amateurs, a group of four wheel drive enthusiasts.

Around a quarter of the country has been affected by the floods over the last three weeks that were triggered by intense summer monsoon rainfall swelling the Indus River into Pakistan's worst ever flood.

The United Nations estimates 20 million have been affected in Khyber-Pakhtunkhwa, Punjab and Sindh provinces and 1600 lives lost.

One of those involved with the Pakistan Amateur Radio Society emergency communications effort is Asad Marwat, AP2AUM. He reports that more than 20 hams are keeping lines of communications open and the plan is to increase this to 30 in a week's time.

With both landlines and mobile phone services failed in the flood affected areas, he said that most of the radio traffic is through a 2-metre band repeater which is now linked to two homebrewed 2m/70cm cross-band repeaters or translators extending coverage area.

PARS has teamed up with the Islamabad Jeep Club which is a group with members who own and drive 4WD sport utility vehicles. Their expertise in driving on most difficult terrains is proving to be of great assistance to deliver essential relief supplies and medical help immediately after the flood. They are also working in collaboration with the Pakistan Academy of Family Physicians.

I'm Jim Linton, VK3PC

--

Word is that ham radio operations in support of flood relief efforts will be ongoing for the foreseeable future. (WIA News)

**

WORLDBEAT: UK REGULATOR OFCOM WILL STILL PROTECT THE HAM BANDS

Some good news on the interference mitigation front for hams in the United Kingdom. The Radio Society of Great Britain has obtained clarification from telecommunications regulator Ofcom about the changes in responsibilities for interference investigation.

In a nutshell. the position of Ofcom is that the British Broadcasting Corporation is now responsible for investigating interference affecting domestic UK television and radio broadcast reception. The Ofcom website provides some initial advice to those experiencing problems with TV and radio reception and a link to the BBC to report interference and request assistance.

However, and this is very important to UK hams. Ofcom remains responsible for investigating interference to the amateur service, and to broadcast services originating outside the UK.

Ofcom tells the RSGB that its website is undergoing significant changes, but that the new site will make clear the division of responsibilities. It will also include a web form for reporting interference to the amateur service. In the meantime, the web form for reporting cases of abuse on amateur frequencies can also be used for reporting interference, for example from BPL related devices.

As reported several weeks ago, an initial news release from Ofcom had stated it was turning interference mitigation over to the BBC. Because of the incomplete wording in the release, many hams in nthe British Isles were fearful that protecting the amateur bands from interference would no longer be an Ofcom responsibility. However, Ofcom now says this is not the case.

**

RESTRUCTURING: INDIA GIVES ITS HAMS 6 METERS

Hams in India have been granted a new allocation on 6 meters. According to the Ohio Penn DX Newsletter, the new allocation permits F1B, F2B, F3E, F3C modes from 50 to 54 MHz using 25 watts maximum power. Modes overlooked or purposely not allowed are CW, SSB and several others popular on the VHF and

UHF bands.

In addition to the new 6 meter allocation, India's licensing structure has now been restructured with only two classes of license. These are the Restricted and the General and both will be issued with either a 20 years or lifetime license term. (VU2PTT, OPDX)

WITH NEWSLINE: THE 2010 YHOTY AWARD PRESENTED TO CODY ANDERSON KI4FUV

Saturday, August 21st was a special day for 17 year old Cody Anderson, KI4FUV, when he was presented the 25th annual Amateur Radio Newsline Young Ham of the Year Award. The ceremony took place before a packed house at the 2010 Huntsville Hamfest and was emceed by Amateur Radio Newsline's producer Bill Pasternak, WA6ITF. He enumerated some of the points that the judging committee considered in selecting Cody Anderson for the award:

--

WA6ITF: "He answers calls with the Harriman Fire Department as a volunteer Explorer, and with as much concern for life and property as the paid staff, and serves his fellow man with concern and passion.

His nominator sums it up this way: 'Cody is a mature and outstanding young man who demonstrates unselfish work for his community and for others, and is truly an ambassador of amateur radio and its role in public service.' "

--

But it was Rich Moseson, W2VU, of corporate underwriter CQ Magazine who told the crowd of Cody Anderson's life saving action:

--

W2VU: "His radio club had sponsored a CPR class and he took the class. And just a couple of months later he was out providing communications for a race when a runner who had just passed his check point collapsed and went into cardiac arrest. Cody, after calling for help on his radio, along with another runner, performed CPR until the Paramedics got there. Due to their efforts and the quick radio response, that runner recovered completely."

--

And with all these accolades, Cody Anderson's acceptance speech was what those who know this amazing 17 year old have come to expect:

--

KI4FUV: "I would just like to say that I appreciate Amateur Radio Newsline, Yaesu and CQ Magazine for all that they have done for me, and I'm just honored to receive the award and I appreciate it."

--

In addition to a plaque from Amateur Radio Newsline, Cody received several gifts from the awards corporate underwriters. Vertex Standard gave Cody his trip to the Huntsville Hamfest along with a Yaesu FT-817ND back-packer transceiver. Heil Sound provided Cody with an ultra-lightweight mic and earphone boomset. CQ awarded Cody with an expense paid week at Spacecamp Huntsville that KI4FUV generously donated back to the Spacecamp Scholarship Office. This so that it can be used to provide tuition to Spacecamp to some needy youngster at some future date.

Also present at the ceremony were two former Young Ham of the Year recipients. Christopher Arthur, NB4V and Andrea Hartlage, KG4IUM, had words of praise for Cody and we will have that part of the story in next weeks Amateur Radio Newsline report. Meantime, our thanks to Chairman Charlie Emmerson, N4OKL and his staff at the Huntsville Hamfest for once again hosting this years Amateur Radio Newsline Young Ham of the Year Award. (ARNewsline)

**

RESCUE RADIO: SEPTEMBER IS NATIONAL PREPAREDNESS MONTH

September is National Preparedness Month and if you haven't done so already, you might want to consider joining your radio club or repeater group to the National Preparedness Month Coalition.

National Preparedness Month is designed to encourage Americans to take simple steps to prepare for emergencies in their homes, businesses, and communities. Membership in the National Preparedness Month Coalition is open at no cost to all public and private sector organizations. By joining the Coalition your organization would agree to promote emergency preparedness during the month of September.

Once you register you will receive access to the National Preparedness Month Web site where you can find a toolkit that includes templates, resources, and tips to assist you with promoting emergency preparedness. You will also find an National Preparedness Month calendar where you can post your events and see what other organizations are doing in your community. In addition, can share your success stories and read about the successes of others.

To learn more about National Preparedness Month visit www.ready.gov. So far, more than 2,800 organizations have signed up. The goal is 3,200. (READY Campaign release)

**

RADIO TERRORISM: KRKO TOWERS REINSTALLED

Two towers a a Washington state radio station's transmitter site that were toppled last September in an apparent act of eco-terrorism were to be reinstalled on August 16th. A spokesman for KRKO 1380-AM that serves the Everett area said on August 12th that the 349-foot and 199-foot towers will be lifted by crane at the station's site and restore the station to full power.

Station General Manager Andy Skotdal told the HeraldNet that even though it took longer that he expected, he was proud that the station never stopped broadcasting. Skotdal said that his staff had the ability to transmit in multiple ways, from that and other sites.

Last September, the two radio towers were toppled by heavy equipment. A cloth was hung on a fence nearby with a message that read: "Wassup? Sno Cty? ELF"

ELF is the acronym for the Earth Liberation Front, a known eco-terrorism group. (RBR)

RADIO LAW: US-PURCHASED BABY MONITORS INTERFEREING WITH RADIO COMMS IN JA

Two way radio communications used by taxi and other motor vehicle drivers in Japan are being affected by disruptions caused by baby monitors on United States operated military bases. Officials in Tokyo said that U-S purchased baby monitors used by parents on bases were emitting signals strong enough to interfere with other nearby domestic Japanese transmissions.

According to the Japanese internal affairs and communications ministry, the devices emit strong signals on the same frequencies as those used for mobile telephones and other two-way radio communications in that nation. The devices have disrupted local taxi communications near bases in Okinawa, Tokyo, Kanagawa and other areas, the ministry added.

A U-S official said the military discouraged the use of US-bought baby monitors by its personnel. The US has some 47,000 military personnel stationed at bases in Japan. (WIA News)

RADIO LAW: FCC SAYS CONSUMER COMPLAINTS OVERALL ON NTHE INCREASE

The FCC has released its report on inquiries and complaints processed by the Consumer & Governmental Affairs Bureau during the first quarter of 2010. The total number of inquiries for all four reported categories increased more than 7%, from 24,496 in the 4th quarter of 2009 to 26,240 in the first quarter of 2010. The bulk of the radio and television broadcasting inquiries, 52%, pertained to broadcast programming issues.

Complaints for the first quarter of 2010 rose 2305 overall to 177,589, driven by a giant 1259% increase in radio and television complaints to 132,416. The majority of complaints involved broadcast indecency as the Commission received 127,655 out of 130,651 indecency complaints. (FCC)

**

RADIO MEMORIAL: PA CLUB TO HOLD ON-AIR 911 OPERATION

Look for special event station N3U slash United Flight 93 will be on the air between September 9th to the 13th. This to commemorate the lives lost in the wanton acts of terrorism against the United States by agents of al Quida that took place on September 11, 2001.

This operation is to be sponsored by the Blair Amateur Radio Society, W3PN, along with various local, state and government agencies. These include the City of Altoona, Blair County Pennsylvania, the Red Cross and several others. Operators at N3U will include W3BTX, W3TEF and other W3PN club members.

Listen for N3U slash United Flight 93 on 160 through 6 meters using CW and SSB. QSL N3U/Flt 93 via W3PN, by the Bureau or direct. Please include Self Addressed Stamped Envelope with enough postage to reach your location.

For more details, see the call N3U, the Pennsylvania Memorial Station For the Sept 11th, 2001 Attacks on QRZ.com. (Via e-mail)

EMERGING TECHNOLOGY: SILICOM GRAPHITE LION BATTERY HOLDS DOUBLE THE POWER

Imagine doubling or tripling the time you can operate your H-T on a single battery charge. Researchers at Austria's Institute for Chemistry and Technology of Materials of Graz University of Technology have developed a new method that utilizes silicon for lithium-ion batteries. Its storage capacity is ten times higher than the graphite substrate which has been used up to now, and promises considerable improvements for users.

In the newly developed process, researchers utilize a silicon-containing gel and apply it to the graphite substrate material. In this way the graphite works as a buffer, cushioning the big changes in volume of the silicon during the uptake and transfer of lithium ions. As silicon has a lithium-ion storage capacity some ten times higher than the up-to-now commercially used graphite, the new material can store more than double the quantity of lithium ions without changes to the battery lifetime.

The new findings came to light in the "NanoPoliBat" EU project. They have been recently submitted to the patent office by researchers together with their co-operation partner Varta Microbattery. (Science OnLine)

**

WORLDBEAT: NEW AM TRANSMITTER TESTED ON YAP

And word that V6AI at 1491kHz from Colonia on the island of Yap in the Federated States of Micronesia will be back on the air with 10,000 Watts of non directional power, possibly by the time you hear this newscast. This, after the former AM transmitter malfunctioned on January 20, 2009 requiring it to be replaced.

Since then, the station has been operating as 500 Watts FM only as KUTE on 88.1 MHz. But due to the terrain the majority of the people of Yap, especially those in the outlining villages and the neighboring islands, have had no radio reception from the government for over 19 months.

Even after the new Nautel transmitter passes proof of performance, AM radio will not be in full operation and may discontinue broadcasting from time to time. This, until such time as new programs are produced and an approved schedule is in place. (W8HDU)

**

HAM RADIO IN SPACE: SO67 OPERATIONAL ON ALMOST A DAILY BASIS

Turning to ham radio news from space, the Sumbandillasat SO-67 South African ham radio satellite is again operational over that nation on almost a daily basis. However, its availability is somewhat limited due the current image downloading schedule. More details are on line at www.amsatsa.org.za. (SARL)

**

HAM RADIO IN SPACE: TWO ARISSATS TO HEAD TO RUSSIA IN SEPTEMBER

Two ARISSat Amateur Radio satellites should be shipped to Russia in September with a launch slated for January 2011. Both birds are now manifested on Progress 41P to get ARISSat's to the ISS.

Actually four ARISSat satellites have been assembled in Orlando, Florida. The two Russian flight units are assembled, electronics are undergoing operational tests, software is close to being the final version and the team expects to have the satellite complete and ready for vibration tests shortly. However no date has been finalized for the vibration test to take place.

According to the team building the birds NASA has been very instrumental in getting ARISSat an export license, arranging for transportation to Russia and helping clarify how the satellite will be attached to the Progress vessel. Shipping the two satellites to Russia in September will provide enough time to install the Kursk experiment, test their battery with the satellite and do additional tests before shipping to Baikonur Cosmodrome in

Kazakhstan for launch. (WA4SXM)

RADIOSPORTS: IARU REGION 3 ARDF CHAMPIONSHIP IN AUSTRALIA IN 2011

From the radiosports page comes word that planning has begun for this Biennial IARU Region 3 Amateur Radio Direction Finding or ARDF Championships to be held in Australia in late 2011. This, with the Wireless Institute of Australia hosting the games.

The 2011 event will be held in regional Victoria State although an exact location and venue is yet to be announced. Wireless Institute of Australia ARDF Coordinator and an International Class Referee Jack Bramham, VK3WWW, has taken on responsibility for the organization and management of the event. He is assisted by the resources of the Victorian ARDF Group with the Wireless Institute of Australia providing administrative support.

The same event was held down-under back in 2003 and had the assistance of a number of amateur radio groups not normally involved with ARDF. Organizers have indicated the same approach will be taken when the Amateur Radio Direction Finding Championships return to Australia in 2011. (VK3PC)

**

DX

In DX, the Saba 2010 team has completed all preparations for the activation of Saba beginning beginning on October 10th. As you know by now, that is the likely date that the Netherlands Antilles will cease to exist and several new DXCC entities will be created. One of those new countries should be Saba/St. Eustatius due to their close proximity. Although, this is not a 100% certainty, the ham radio team believes that this is likely enough to plan the operation. More information is on line at www dot saba2010 dot com.

Meantime, DK1II is on the air from Fiji as 3D2II through September 10th. His operation is limited to his spare time because he is involved with the Rotary Club of Lautoka project. He's reportedly operating CW using an Elecraft K3 and DX-Wire pole for 10 through 40 meters. QSL via his home callsign or the Logbook of the World.

G0OPA, will be active as 8P9LJ between September 12th and November 8th. No other details of his operation are known at this time. If you work him, QSL as directed on the air.

DF5UG, will be operational from West Malaysia, East Malaysia and Brunei for the next three weeks. Callsigns to listen out for are 9M2QQ, 9M8QQ and V85QQ. Again QSL this one as directed on the air.

N7OU is returning to Rarotonga and will be operational as E51NOU between October 18th and November 13th. Operations will be on 40 through 10 meters as time permits. QSL via N7OU.

Members of the Virginia DX Century Club will be active from Gunantanamo Bay, Cuba, between October 5 to the 19th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL each operator via his home call as directed on the air.

Lastly, K3LP will be active stroke HI7 from Punta Cana in the Dominican Republic through October 4th. His operation will be limited as this is a family holiday, so look for him during the late evening and early morning hours only. QSL via his home callsign.

(Above from various DX news sources)

**

THAT FINAL ITEM: ARES TURNS 75

And finally this week, its Happy Birthday to ARES as the service turns 75. Pete Summers, KL2GY, has the details:

--

The Amateur Radio Emergency Service, ARES, will be celebrating its 75th anniversary from September through December 2010. This program of the ARRL the national association for Amateur Radio has provided "ham radio
"
emergency communications for agencies such as the American Red Cross, Salvation Army, countless Emergency Operations Centers and other responders in the worst of times.

Their specially trained radio communications volunteers give thousands of hours of community service for free. Right here in your community, or maybe even in your neighborhood the Amateur Radio Emergency Service has been providing this service for many years.

The fastest way to turn an emergency into a disaster is to loose communications. In events from ice storms to Hurricane Katrina and Haiti, when normal communications systems were down or overloaded, the Amateur Radio operators of the ARES programs filled requests for communications aid.

Over the years the program name and equipment has changed but the vision remains. The modern communications nets that ARES can quickly create to blanket whole regions - without the need for other infrastructure - remain critical in emergency planning. In the first hours and days of a major event, Amateur Radio is often the source of initial information on the type, scope and reactions needed to save lives. Recognition of this capability led to formal agreements with DHS, FEMA, NOAA and other federal, state and local agencies. When the Internet, cell phone and electricity go out they call on us, the hams.

The first mention of an organized Amateur Radio emergency response organization appears in the September 1935 issue of QST Magazine. We are 75, and still growing.

--

You can hear and download the full 4 minute version of this report at www.arrl.org/ares-anniversary. Meantime, we say a very happy 75th birthday ARES, and congratulations to all who have participated in this ham radio gift of public service to all of mankind. (ARES)

WIANEWS FOR WEEK COMMENCING AUG 29 2010.

DELAY IN ISSUING CERTIFICATES OF PROFICIENCY

commendable on air effort by the Lockyer Valley Amateur Radio Club

SEARCH FOR ALLEGED KILLERS OF N5VGH

Queensland Club President's lunch

Special Event Station ON4WAR

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING AUGUST 29 2010

SHORT DELAY IN ISSUING CERTIFICATES OF PROFICIENCY

The Australian Communications and Media Authority (ACMA) has requested that
the WIA temporarily suspend the issue of Certificates of Proficiency. This
is due to some issues which have arisen regarding the instrument delegating
this power to the WIA.

To address this it is anticipated the ACMA will remake the delegation at its
next Board Meeting on the 9th September 2010. The WIA would then expect to
recommence issuing certificates of proficiency.

Additionally, processing of a small number of applications for licences
following recent examinations will also be delayed, as the licences cannot

be issued by ACMA until certificates of proficiency have been issued.
If you are waiting for a certificate of proficiency or a new licence, please be patient as it is hoped the any backlog will be dealt with very promptly after 9 September.

Michael Owen
WIA President

WIA Centenary Update

A commendable on air effort by the Lockyer Valley Amateur Radio Club

During its three-day slot with the VK100WIA callsign the club contacted some 25 countries including two special event stations 8J1A at the Japan Ham Fair in Tokyo and VR100S (victor-romeo-one-hundred-sierra) the centenary station for the Hong Kong Scouts.

The Lockyer Valley Amateur Radio Club set out to work DX and scored 337 contacts using SSB, CW, PSK31, EchoLink and ROS, with about 80 per cent of its log being with DX stations.

It picked up a number of stations during the International Lighthouse and Lightship Weekend too, much to the delight of those operating at lighthouses around Australia and overseas

Speaking of the ILLW, this year was from all accounts a fantastic two days.

There was a record 447 registrations, four more than last year. On the country tally Germany came out on top with 60 registrations, five up on 2009.

Australia was the improver with 57, eight more than its record set last Year.

Often heard during QSOs with lighthouse stations were comments from others seriously thinking about being involved in the future.

Such is the enthusiasm demonstrated for the fun event that already 30 registrations have been made for next year online at the website ILLW.NET

Also in the feedback section are various reports from last weekend, for example Rizal 9M2RDX of West Malaysia detailing how he was part of a team of seven radio amateurs at the Gelang Lighthouse.

Gert PA2LO who went portable with three friends to the Netherland's Vischpoort lighthouse and enjoyed every minute of it, making many DX contacts.

It was more than a great weekend from the perspective of the Amateur Radio Victoria team VK3WI at the Williamstown Lighthouse and Timeball Tower in the inner west of Melbourne.

Up to 40 other lighthouses were logged, mostly VK but also in ZL and G-land.

The 20m band opened up both days with DX worked from Europe, Africa, North America and Martique, plus back-to-back QSOs with a R1 station in Russian Antarctica and then Canada.

Want to know more? Then check out the website ILLW.NET or the
International Lighthouse and Lightship Weekend Facebook page.

WIA National Field Day - Saturday 23 October 2010

Plan your participation in this great public relations event to help promote
amateur radio to the public and have fun.

The event's catch-phase... Tune Into the World ? Amateur Radio Gets People
... is now depicted in a logo that is a simple yet highly effective branding
tool for all types of promotional media.

The logo has a stylised globe emphasising the Australian continent. Four
stick figures representing a middle-aged man, a young woman and a young man,
and mature aged woman, each talking into a different style of microphone.

The logo has been mocked up on clothing and it looks great.

While on a vertical banner or A-frame display, with additional marketing
words encouraging people to give amateur radio a try, the logo put a
professional touch to it all.

The logo will appear on a media release letterhead template and other material
for use by participating clubs.

Details of the event, that provides a focus to attract new members and new
radio amateurs, can be found on the WIA website and will appear in the
September edition of Amateur Radio magazine.

Registrations are now open for all radio clubs, or three or more radio amateurs,
who intend to operate an amateur radio club in a public place on Saturday
23 October.

To register go to the WIA website and check out the online registration form
via the WIA Centenary of Contest sections.

HAMS ACROSS AUSTRALIA.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been checking
the diary.

It seems that with the RD , International Lighthouse and the ALARA contest,
this weekend, the amateur radio calendar is entering the busy period running
up to the summer months and the interest of different propagation modes
during the Aussie Christmas holiday period.

In this area, our club has done some fund raising outside the hardware store. There are some community projects to support with provision of radios and operators as well as the hope of making visits to a couple of the upcoming "hamfests" and these apart from the usual club meetings.

Of course, the big event will be hosting the VK100WIA station - it's not every day you get to participate in a centenary celebration let alone run a station with a collectible call sign. As well, the club is hoping to make a showing in the first National Field Day.

So I don't know how the rest of you are going but in this part of the world, there is going to be a regular feast of amateur radio for the next few months.

I'm Geoff, VK4ZPP and that's what I think and how's your diary looking?

Greetings from Rockhampton and District Amateur Radio Club, The RADAR Club, this is Les VK4VIL reporting.

The Radar Club had another interesting week.

Firstly, delivery has been taken of a new, 5 element, 3 band Yagi and rotator to be installed at our Rockhampton Heritage Village site. The antenna will sit on a 30m extendable tower, with the only restriction being Council regulations. This should be a real buzz for members with set-up restrictions due to small allotments at their private QTH.

Now to the International Lighthouse weekend. What a tremendous concept! Seven members of the club had a great weekend, with the non-contest format allowing a relaxed atmosphere at Cape Capricorn Lighthouse. Although only 30 Australian and 8 overseas lighthouse contacts were made, those attending could be excused for the average result due to constant attacks from wildlife, including mackerel, flathead, whiting and mud crabs . These were dispatched, cooked and diluted with a responsible amount liquid refreshments. All of this in wonderful seaside surroundings.

It was certainly worth the 7 hour boat trip to the lighthouse.

A good number of the couple of hundred contacts not situated at lighthouses also added another dimension to the weekend, actively pursuing their own list of lighthouse contacts.

Those attending have already booked for next year.

I'm Les, VK4VIL on behalf of the Rockhampton and District Radio Club.

TARC Does the Theatre Restaurant

TARCadians and friends will once again be thoroughly entertained when they head along to this years Townsville Choral Society Theatre Restaurant where once again host Rod Wilson and a stellar supporting cast regale the audience with Music - Comedy - Songs - Sketches and stunts designed to keep the name of Thuringowa alive and well.

This year TARC is attending the Friday evening November 5th session. Roll up around 6-30pm to get a parking spot. Doors open 7pm with everyone to be seated by 7-15pm.

A fantastic show, great food and excellent company and it only costs
$40 per head.

See the Master of Time and Space - Iain VK4IGM to book and pay for your seats.

Act Now - as the event is very popular and places will go in a flash !

The Queensland Club President's lunch will be held again this year.
The host club for the lunch will be the Rockhampton & District Amateur Radio Club.

The venue will be the Rockhampton Leagues Club, George Street, Rockhampton.

The doors will open at 12:00 on Sunday 14th November, to start lunch at 12:30.
Prior to the lunch, Michael Owen will visit the radio museum at the Rockhampton
Heritage Village, starting at 08:30am, and will participate in the news callback
on the 2 metre repeater at 9:45am.

Following lunch, presentations on WIA, and amateur radio issues, will be made by
WIA President Michael Owen. There may be additional speakers, to be advised.

The WIA will sponsor the cost of the room, and the cost of lunch will be $24-, to
be paid on the day by each attendee. This will include a served meal of beef,
chicken, or fish, followed by a desert. Special dietary requirements can be
arranged if required.

The intention of the lunch is to have as many Queensland clubs represented as
possible.

The RADAR Club will be able to assist with transport from airports and railway
stations if required.

Please advise if you wish to attend. Please advise the lunch organiser
RADAR Club Secretary Clive Sait vk4acc@wia.org.au

Regards,

Don Wilschefski VK4BY

WIA Queensland Advisory Committee Chairman

HOME OF THE GOOD GUYS

The WIA extends its congratulations to Pierce Healy VK2APQ on the celebration
of his 99th birthday on 13 August 2010. Pierce gained his Amateur licence at
the beginning of World War 2 but could not get on air at that time. In the 1950's
he was a member of NSW Division Council and later President.

Whilst President, Pierce prepared and read the VK2WI morning bulletin. He served
many years as VK2 Federal Councillor. Pierce was particularly well known for his
Amateur radio notes that were published in Radio and Hobbies, the predecessor of
Electronics Australia.

Pierce is a Life Member of the WIA and ARNSW.

He is still a regular voice on VK2WI Sunday callbacks. We extend our best wishes
to Pierce on this momentous occasion and wish him well as he enters his centenary
year.

And a word of congratulations to Charlie Hellman, W2RP, on having hit the grand old age of 100.

W2RP got his first license in 1925 at age 15.

In honour of reaching this milestone of life, his family threw a nice party for him and the QCWA sent him a beautiful plaque for this honour.

Hot on the heels of this "Good News" comes word of an Aussie SK, sadly I have to announce that Col VK1AU passed away on 22nd August aged 90. One of the real gentleman of the air...

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Pakistan flood disaster update

The Pakistan Amateur Radio Society (PARS) reports that emergency communications support for ham radio amateurs have been extended in the past week to three more villages.

PARS emergency communications organiser Asad Marwat AP2AUM said food and non-food items have been provided to around 1,000 families in the Charsadda and Nowshera areas.

He said that a medical camp was also established which treated almost 700 patients mainly suffering from Skin and Gastro diseases.

The United Nations estimates 20 million have been affected across Pakistan by the flood disaster and 1600 lives lost.

Asad AP2AUM said that the area is not covered under the 2-metre repeater footprint so communications have been restriction to simplex operation within the group.

He said that about 30 hams are providing help to those who have fled the flooded areas.

Additionally hand-held radios and cross band repeaters and antennas have been offered from Turkey. Once they arrive, said Asad AP2AUM, the relief operation can be successfully expanded into Inner Punjab Province.

PARS continues working in collaboration with Islamabad Jeep Club members with their 4WD sport utility vehicles delivering essential relief supplies, with medical help being provided by the Pakistan Academy of Family Physicians.

(Jim Linton VK3PC, Chairman, IARU R3 Disaster Communications Committee)

Prasad, VU2PTT reports, and I quote:

"We have news from our Ministry of Communications that the 6 meter band has finally been allocated for Amateur Radio use.

"50-54 MHz using 25 watts".

"The licensing structure has now been rationalized with only two classes of license - Restricted & General - and licenses can now be acquired either for

20 years or for the lifetime of the holder.

"The other interesting development is that 400 watts DC input power has been allowed on all HF bands for the General class licence. Earlier the limit was 150 watts input with 400 watts being allowed in very small sub-bands for the old Advanced class licence holders.

The full details of the new allocations and license structure is available
http://wpc.dot.gov.in/DocFiles/amateur_new_guidelines.pdf

The Montenegrin Amateur Radio Pool (MARP), formed in October 2008, has been accepted as the International Amateur Radio Union (IARU) member society.

65 votes were returned to the IARU International Secretariat with 63 votes in favour of admission and 2 abstentions.

The Republic of Montenegro (4O) declared its independence on June 3, 2006 following a national referendum and was admitted as the 192nd member of the United Nations on June 28, 2006.

BROADBAND ADOPTION FALLING IN USA

Adoption of broadband by citizens of the United States has slowed dramatically this year, and a majority believes that making high-speed Internet access affordable should not be a major government priority. This, according to a study by the Pew Research Centre's Internet & American Life Project.

The research found that two-thirds of Americans currently use broadband at home, a number that's statistically the same as a similar Pew study conducted the same time in 2009. The research firm last year found 63% of Americans were broadband adopters.

The study also found that the majority of Americans did not believe high-speed Internet access to everyone in the United States should be a top priority for the federal government. Fully 53% of Americans said affordable broadband access should not be attempted by government or was simply not too important of a priority.)

RADIO CRIME:
AUTHORITIES CONTINUE SEARCH FOR ALLEGED KILLERS OF N5VGH AND HIS WIFE

An story from ARNewsline now on the hunt for the alleged murderers of a Utah ham and his wife. Bill Pasternak, WA6ITF, is in the AR newsroom with the latest:

Authorities across the nation continue to search for escaped Arizona prison inmate John McCluskey and accomplice Casslyn Welch. The two, along with captured fugitive Tracy Province are believed responsible for the murders of Gary Haas, N5VGH, and his wife Linda at a remote campsite not far from Santa Rosa, New Mexico more than two weeks ago.

The charred remains of the elderly couple were found in their burned out camper by a rancher living in the area.
Police say that they have forensic evidence that direct links John McCluskey to the murder scene.

According to a report from the ARRL, the Haas were married 35 years. They were high school sweethearts who married while Linda was still in college and Gary was in the US Air Force. Both followed career paths that led them to work at the General Motors plant in Oklahoma City, leaving when it closed in 2006.

Meantime, the US Marshals Service believes that McCluskey and Welch, are still in western Montana near the Canadian border. Federal agents tracking the two fugitives are focusing on that area despite reports that they may have been connected to an armed robbery in Arkansas two weeks ago. A release from the Marshals Service says that agents have been unable to confirm that McCluskey and Welch committed the robbery, and that the last credible sighting of the two was in Billings, Montana on August 6th.

By way of background, Welch is suspected of helping McCluskey and two other inmates, Daniel Renwick and Tracy Province, escape from a privately-run state prison in Kingman, Arizona, on July 30th. Renwick was captured in Colorado two days after the breakout, and Province was captured in Wyoming August 10th.

Meantime, Police believe McCluskey and Welch have changed their appearance recently. McCluskey may have dyed his hair dark and grown facial hair. Welch is believed to have dyed her hair blonde.

A $35,000 reward is being offered for information leading to the arrest of McCluskey and Welch. They are considered armed and dangerous.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

New Zealand's Doug Gorman Frequency Measuring Contest

This contests runs again on Monday 6th September 2010 at 2100 NZST (0900 UTC).

The revised rules brings the contest up to the modern standard that amateurs can now reach with home brew equipment.

Gone is the measuring of three frequencies spread across the 80 m amateur band. For maximum points a total of five frequencies must be measured within +/-5 kHz of 3895 kHz. There are now three grades of measuring, John McKim Cup (Simple equipment to 100 Hz readout resolution), Norm Edwards Shield (equipment better that 10 Hz readout resolution), or Ultra Category (equipment directly referenced to an atomic standard during the contest)

The ZL Branch award is still available and certificates will be provided to all entries with an average deviation of 100 Hz or better.

The contest takes care of all measuring methods now available to the amateur.

(Jamie Pye ZL2NN)

Get Your Feet Wet CW Event

The 2010 Get Your Feet Wet CW Event begins 0000 UTC on Friday, 10 September and goes to 0000 UTC 13 September.

The event is sponsored by FISTS, but any licensed operator can enter. Operators new to CW, (even if you've had a license a long time) and experienced brass pounders are all encouraged to participate.

No programmable keyers, code readers, or computer assistance in sending and receiving code are allowed; just human-powered CW from straight keys, cooties, iambics and human powered keyers.

For more detailed rules and even down-loadable log sheets, go to wia.org.au and read the text version of this weeks National News.

www.fists.org

Check under the activities heading "Get Your Feet Wet Weekend"

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club (TREC)

Last weekend TREC members activated the Archer Point Lighthouse AU0065 for the 2010 International Lighthouse/Lightship Weekend. Archer Point is some

200kms north of Cairns in Far North Queensland on a very exposed headland.

TREC members travelled up from the Atherton area a 600 km round trip. Archer Point is a very isolated location with no facilities available so we had to be totally self sufficient. Tents, camping gear, batteries and generators were the order of the day.

Antennas were erected on the Friday and VK4WAT, the TREC callsign, was on air at 0001 Zulu on Saturday morning. Whilst erecting a portable mast the wind was so strong that caused one of the aluminium poles to break allowing the vertical antenna to crash to the ground with a resounding thud. No damage to the antenna fortunately. We set up two stations, one from a vehicle right next to the lighthouse and the other station a little way below the lighthouse in a slightly less windy location.

Conditions proved to be very good on 20, 40 and 80 metres.

A total of 36 other lighthouse amateur radio stations were contacted around Australia, New Zealand and the United States of America. Lighthouse stations in every state of Australia were contacted.

We also worked many other amateur radio stations world-wide including Marion Island in the southern Indian Ocean, Nevus in the Caribbean New Caledonia plus many other Australian and International Amateur Radio Stations.

Thanks to all the stations who worked VK4WAT this year and sorry for mentioning our 28° temperatures especially to the operators at Cape Leeuwin who shivered in only 3° temps.

We are looking forward to working ILLW again next year.

Dale McCarthy VK4DMC.

Saba 2010 DXpedition

The Saba 2010 team has completed all preparations for the activation of Saba beginning 10/10/10.

That is the likely date that the Netherlands Antilles will cease to exist and several new DXCC entities will be created as a result.

One of those new countries should be Saba/St. Eustatius due to their close proximity. Although, this is not a 100% certainty, it is likely enough to plan an operation.

Two teams, comprised mostly of members of the Southeastern DX Club (SEDXC) will operate over a two-week period beginning October 10th and ceasing operations the morning of October 23rd.

A website (www.saba2010.com) will be updated periodically.

(southgate)

The Vanuatu DXpedition YJ0VK is taking place through September 2, 2010.

They are said to be placing special focus on the WARC bands [10/18/24 MHz],
so pls QRV on the following frequencies:

CW SSB
10.107 10.130
18.077 18.118

Belgian Special Event Station ON4WAR

Amateur Radio operators from the Radio Club of Binche (ON7RY) will activate
the special event station ON4WAR between September 4-5th.

This activity is to commemorate the sacrifice of the Belgian Resistance (WWII)
and especially those of the Refuge B 40 in Belgium.

The timetable of the activities are as follows:
Sept. 4th - Saturday between 9:00 AM and 06:00 PM local time (1100-1800z)
Sept. 5th - Sunday between 08:00 AM and 04:00 PM local time (1000-1600z)

PLEASE NOTE MODES OF OPERATIONS:
At the top of the hour up to the hour and a half,
CW transmissions with a Whaddon Paraset MK VII on 3.560 MHz, 3.579 MHz,
3.583 MHz and 7.025 MHz.

At the hour and a half up to the next hour,
SSB transmissions on the HF bands.

QSL information via ON7RY, direct or by the Bureau.

For more info about the ON4WAR station and about the history of Refuge B 40,
visit the Web site at:

NZ MED CREATES 70 CM REPEATER INTERFERENCE

The New Zealand Ministry of Economic Development has relaxed the conditions of use of unlicensed Short Range Devices in a key ham band. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Auckland with the latest:

The new conditions or rules were put in place without any consultation with our national society the NZART. They permit the use of walkie-talkies, wireless headphones, wireless audio senders and other such consumer gear in the input band of most of nations 70 centimetre amateur repeaters.

The previous rules had permitted the same 433.05 to 434.79 MHz frequency range but with an output power limited to 25 milliwatts and restricted the use to Telemetry and Tele-control modes that had far shorter transmissions. The new devices now given access to 433.05 to 434.79 MHz typically have very annoying, long duration transmissions causing significant interference to licensed amateur radio operations.

It should be noted that all of the New Zealand National System repeaters use input frequencies above 434.79 MHz and are not affected by the change. Those owned and operated by individual Kiwi hams operating with input channels below 434.79 MHz are the ones suffering from access by these consumer electronic devices.

>From down-under in Auckland, New Zealand, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

As if this were not enough, there is also a new allocation in New Zealand from 3.640 to 4.040 MHz for Auditory Aids. These hold the

potential to interfere with amateur signals in the amateur 75 and 80 meter bands.

Toshiba to launch first 3D TV without glasses

Japanese electronics giant Toshiba plans to market the world's first 3D television that doesn't need special glasses later this year.

Toshiba will unveil three models of the television, which will cost several thousand dollars, before Christmas.

The company has developed a new system that emits a number of rays of light with various angles from the screen so that viewers can see stereoscopic images without glasses.

Operate the ham radio station in Barcelona Cathedral

The Spanish amateur radio team ARMIC ONCE EA3RKR has received special authorisation to set-up a ham radio station and transmit from inside Barcelona Cathedral - something unheard of since its construction.

The event will take place on the 18th of September, and the team would like to invite any radio ham who may be travelling to, or on vacation in Barcelona on this date, to come and operate the station.

Interested amateurs should contact EA3RKR

PACESAT PROJECT ANNOUNCED

Yet another new ham radio satellite is on the drawing boards. A team from the Taiwan Department of Aeronautics and Astronautics and the Department of Electrical Engineering at the National Cheng Kung University has announced a CubeSat development project named Platform for Attitude Control Experiment or PACEsat for short.

This cubesat will feature three-axis stabilization utilizing a miniature momentum wheel and magnetic coils. Attitude determination will use a three-axis magnetometer, a three-axis gyro, and coarse sun sensors. Temperature sensors will monitor the thermal environment inside the satellite.

The new bird is designed for a 600 km near-circular orbit with a 98 degree inclination. Mission lifetime is planned to be 2 months.

Frequencies discussed in the satellite design documentation include 145 MHz for uplink and downlink communication and 433 MHz CW and AX.25.

Technical details on PACEsat can be found on-line at tinyurl.com/2evtd7a (ANS)

ISS COLLING SYSTEM AFFECTS ARISS CONTACTS

A cooling system failure on the International Space Station has impacted ARISS operations. On August 11th, NASA astronauts successfully completed the second of three to four space walks in an effort to replace a faulty ammonia pump module on the International Space Station's truss. One that has forced cutbacks in other word abroad the orbiting outpost including time that astronaut hams are spending on the air.

Since July 31st the space station has been operating at half its usual cooling capacity utilizing the one remaining cooling pump. This forces the astronauts to power down equipment to prevent overheating on the ISS.

As this newscast is prepared, it has already taken almost 16 hours space walks or E-V-A's for astronauts to remove and replace the failed cooling pump in an effort to bring the ISS back to full capacity. As a result, ARISS ham radio operations which include both voice and packet have been given a low priority until the problem is resolved.

Back at Johnson Space Centre in Houston, Texas, Space Station Program Manager Michael Suffredini says that a third space walk was planned to install the replacement and a fourth likely will be needed to put the defective pump into its storage place. These may have taken place by the time this newscast goes to air.

Attempts are being made to carry out scheduled ARISS contacts, but with the understanding that they may be cancelled at the last minute.

This is Bob, VK6POP, reminding you that there's about six weeks to go for Jamboree On The Air. Again some 500,000 Scouts and Guides worldwide will take part in Jamboree On the Air and Jamboree On The Internet.

Every year there is a theme for JOTA-JOTI, and this year the theme for Jamboree On the Air 2010 is directly related to article 12 of the Convention of the Rights of the Child: "The Right to be Heard". This year is the 20th anniversary of the Convention.

As in previous years, Amateurs around the world will be invited to help out with a JOTA activity, and many will accept the challenge. We live in hope that Old Sol will grow a few spots in October, giving us some good propagation. Nevertheless, only a couple of children can speak on the radio at a time, so an interesting programme, based on the theme and the Scout/Guide award scheme, and worked around the radio activities, will ensure an enjoyable weekend for the young folk.

Unlike a contest, JOTA is not competitive, but it has the same excitement as a contest, because we know the bands will be well used, and whatever propagation exists will be used for maximum effect.

There is growing interest by Scouts in JOTA and Amateur Radio, so there's no time like the present to give the hobby a boost by introducing it to young people.

If you are approached by a Scout or Guide Group to help out with JOTA and/or JOTI, please consider saying yes. I would also like to point out that most States have laws relating to working with children, and I advise you to find out from your Scout or Guide Contacts what the rules are in your State or Territory. It's better to do this well before the event to allow the process time to work.

Information about JOTA and JOTI can be found at
www.international.scouts.com.au

Look for the JOTA-JOTI Menu Item. Check this site for updates regularly as the event comes closer. JOTA-JOTI is on October 15th to 17th.

USA's 2010 National Scout Jamboree -- celebrating the 100th anniversary of the Boy Scouts of America -- was held July 26-August 4 at Fort AP Hill in Virginia. According to ARRL Rocky Mountain Division Director and K2BSA Station Coordinator/Manager Brian Mileshosky, N5ZGT, ham radio was a big part of the event that attracted more than 43,000 participants from across the nation and around the world.

GB2RS NEWS

Sunday 29th August 2010

The news headlines

Final preparations underway for SSB Field Day

Amateurs assisting in Pakistan floods

Deep space lecture for the RSGB Convention

The ever-popular RSGB SSB Field Day taking place on 4 and 5 September starts the month's HF contesting. There are Open and Restricted sections, the Restricted having become slightly more popular than the Open over the past decade. In recent times the winning team in the Open section have generally logged well over 1000 QSOs, while the winning Restricted team have generally logged about 1000 QSOs. A spot of advice to participants, have a suitable number ready to give participants in the All Asia DX Contest that runs concurrently. The Asians will be looking for your age, rather than a serial number. Unfortunately, the long range forecast looks like unsettled weather for the whole country, so it could be a rather damp, but enjoyable, event.

The IARU reports that the medical and food support being provided to those affected by the flood disaster in Pakistan is being assisted by the combined efforts of radio amateurs, a group of four wheel drive enthusiasts and the Pakistan Academy of Family Physicians. More than 20 amateurs are keeping lines of communications open and the plan is to increase this number. With both landlines and mobile phone services failed in the flood affected areas, most of the radio traffic is through a 2m repeater that is now linked to two homebrewed 2m/70cm cross-band repeaters extending coverage to a radius of almost 300 miles. A few stations are monitoring 7.040MHz but due to poor propagation it is currently of little use, but should be kept clear for disaster use. Pakistan's national radio society is seeking to finalise arrangements including those from neighbouring countries to contribute to and help sustain the emergency communications that will be required for a considerable time to come

There will be a lecture on deep space reception techniques covering the 2.2, 8.4 and 32GHz bands by Paul Marsh, M0EYT at the RSGB Convention. He plans to give an overview as to what can be received with a modest ground station using a small dish. There is also the matter of locating the deep space object and dish pointing. Paul will show how to accurately point your antenna. The lecture should be of interest to weak

signal microwavers, frequency and time fans and software defined radio users. The RSGB Convention takes place on 8th to 10th October at Horwood House near Milton Keynes and Paul's lecture will take place on Sunday 10th at 2pm. More details can be found at www.rsgb.org.uk/rsgbconvention.

At the end of last week, the Montenegrin Amateur Radio Pool was accepted as an IARU Member Society.

India's amateur radio operators now have access to the 6m band. The new allocation says 50 to 54MHz on F1B, F2B, F3E, F3C modes using 25 watts. Indian amateurs are hoping there is a mistake and are seeking clarification as previous allocations allowed CW and SSB among other modes on VHF/UHF. The other interesting development is that 400 watts DC input power has been allowed on all HF bands for the General class licence. Earlier the limit was 150 watts input with 400 watts being allowed in very small sub-bands for the old Advanced class licence holders.

The 22nd Foundation course run by the Chelmsford Amateur Radio Society starts on 2nd September at the Danbury Village Hall near Chelmsford and will run for 6 Thursday evenings. A 5 week Advanced revision course starts on Thursday 28th October, with the exam taking place on Monday 22nd November. To book a place on a course contact Clive, G1EUC on 01245 224577 or by e-mail to training2010@g0mwt.org.uk.

Following success in the June Advanced exam, a number of local amateurs have asked if a Morse class can be run in Bath. Steve Hartley, G0FUW, has agreed to arrange a course if there is sufficient interest. It is proposed to run the classes one evening each week 7 to 9pm from early September. Costs will be limited to classroom hire so the more that take part, the less it will cost. If there are any would-be key bashers in the Bath area they should contact Steve on 01225 464394 between 7 and 9pm or via e-mail to G0FUW@tiscali.co.uk

For the week starting 18th September, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland, operating under the callsign MS0SCG. They plan to operate on VHF, HF, SSB, CW and data modes. The location is IOTA island number EU123 and SCOTIA island number CS14.

It is hoped that the Orkney Wireless Museum amateur radio station will be in operation from its premises at Kiln Corner, Kirkwall between Thursday 2 September and Wednesday 8 September during the 20th Orkney International Science Festival. Using the callsign GB2OWM, probable operating periods will be weekdays and Sunday afternoons between 2.30 and 4.30pm and Saturday morning between 10am and 12.30pm. Operation will be primarily on HF SSB. More information can be obtained from Bill, GM3IBU by e-mail to bill@gm3ibu.plus.com.

And now for the details of rallies and events for the coming week.

Today, 29 August, the Milton Keynes ARS Rally takes place at Bletchley Park, Sherwood Drive, Bletchley, Milton Keynes MK3 6EB. There will be trade stands, special interest groups and entry is ?2 for adults and 50p for youngsters under 14 years of age. Doors open at 9.30am. Why not make this a family day and visit the Bletchley Park museum too? Details from Steve Goodall, G6KJU, on 07866 673 192.

Tomorrow, Bank Holiday Monday, 30 August, the Huntingdonshire ARS Rally is being held at the St Neots Community College, Barford Rd, St Neots, PE19 2SH. Doors open at 10am and you will find trade stands, an RSGB bookstall and a Bring and Buy amongst the attractions.

The annual Telford HamFest takes place on Sunday 5 September at Telford Enginuity, Coalbrookdale, Telford, with the sat nav location TF8 7DU. As well as the varied traders and specialist groups that will be present, a guest speaker, Nick Miers, from Bletchley Park Code Breakers Centre will be giving a presentation covering the World War 2 activities at that famous Centre, and bringing an original German Enigma machine for a hands-on demonstration. The rally opens at 10:30am, with a talk-in facility on 2 metres and via the local repeater GB3TF, using the callsign GB4THF. Further information from Martyn, G3UKV on 01952 255416, or via the group's website www.telfordhamfest.co.uk

Now for the news of special events

1st September sees the start of several special event licences. GB2BCL will be on the air from Barmoor Castle in Northumberland, GB0PC is part of the Peterlee Carnival and GB0SMA will be active from Stowe Maries Aerodrome in Maldon.

GB4BLR will be on the air from 3 September at the Battlefield Line Railway in Leicestershire and GB2LGR will be active from Langar Airfield in Nottinghamshire.

Then from 5 September, GB2EFF will be on the air for the Epping Forest Festival.

And now the HF DX news compiled from 425 DX News and other sources

VK6LC will be operational as XV2LC from 10 September from Ho Chi Minh City and as XV4LC from the Mekong Delta. Listen out for him primarily on CW with some SSB. QSL via VK6LC.

IZ4AKS/3B9 will be active stroke from Rodriguez Island until 4 September. His operation will be holiday style on 40 through to 10 meters SSB with the possibly of some RTTY and CW as well. QSL direct only to IZ4AKS at his Callbook address.

Niels, OZ7FOC, is going to hit the airwaves from Samos between 29 August and 3 September. QSL via homecall.

Four Australian amateurs will be on Vanuatu, YJ, until 2 September. This will be a fairly low-key operation, running just 100 watts to verticals and dipoles, but is one of the few expeditions slated for September.

Laci, HA0HW, will sign J48HW from Thassos Island until 7 September. QSL via HA0HW.

Moving on to another non-RSGB events, the All Asian DX SSB contest kicks off on 4th and 5th. Exchange a signal report plus your age. If shy about their age, YL ops can send `00'.

Now the contest news

The IRTS 2m Counties Autumn Contest takes place today, Sunday 29 August. If you're outside EI/GI, work EIs and GIs only, giving them a signal report and serial number. Expect to receive a signal report, serial number and their county. In the 2008 and 2009 running of this contest no entries at all were received from outside of EI, so if a UK station had made just one QSO it would have put him in top spot. That said, if any GIs are active, their proximity to EI means you'll have to do well to beat them. It's only 2 hours long between 1300 and 1500UTC but you can use all modes on the 2m band.

Tuesday, 31 August, sees the 70MHz UK Activity Contest take place between 1900 and 2130. You can use any mode on the band and your exchange should be signal report, serial number and locator.

The ever-popular SSB Field Day on 4th and 5th starts September's HF contesting. There are Open and Restricted sections, the Restricted having become slightly more popular than the Open over the past decade, >From 1300 to 1300UTC, the event covers the 3.5 to 28MHz bands and the exhcnage is signal report and serial number.

On VHF, the first weekend of the month is a busy one, with the 144MHz Trophy on 4th and 5th and the final 144MHz Backpacker of 2010 on the 5th. To ensure there is a period during which weak-signal QSOs can take place between Backpacker entrants, there's a period of peace and calm in the final hour after the 144MHz Trophy ends. The 144MHz Trophy takes place between 1400 and 1400UTC using all modes. The exchange is signal report, serial number and locator. For the backpacker Contest, the times are 1100 to 1500 UTC, again all modes with an exchange of signal report, serial number and locator.

Overlapping the two RSGB 2m events taking place on Sunday 5th is the WAB 144MHz QRP, meaning 10 watts, Phone Contest. Multipliers are WAB squares and DXCC countries. The event take place between 1000 and 1400UTC and the exchange is signal report, serial number and WAB square.

Moving on to another non-RSGB events, the All Asian DX SSB contest kicks us off on 4th and 5th. Exchange a signal report plus your age. If shy about their age, YL ops can send `00'.

And now the solar factual data for the period from the 6th to the 22nd of August, compiled by Neil Clarke, G0CAS on the 23rd of August.

Solar activity for the first three days started at low levels with C class solar flares taking place on those days. The largest flare was a C4 which occurred on the 18th, when the spot group had rotated out of

sight a day earlier. The remaining days activity declined to very low levels. The solar disc became spotless on the 21st and the 22nd. Solar flux levels declined from 85 units on the 16th to 75 by the 22nd. The average was 79 units. The 90 day solar flux average on the 22nd was the same level as last week at 77 units. X-ray flux levels declined from B1.4 units on the 16th and the 17th to A4.9 by the 22nd. The average was A8.2 units. Despite several coronal mass ejections caught on camera by the SOHO spacecraft none headed our way and geomagnetic activity remained at quiet levels everyday with the average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds declined gradually from 410 kilometres per second on the 16th to a slow 260 by the 22nd. Particle densities were low throughout. Bz with a quiet magnetic showed variations no more than minus 6 and plus 5 nanoTeslas for the period.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Solar activity on occasions could increase to low, but most days should remain at very low levels. Solar flux levels are expected to be into the 80's for most of the week or the 90's if any substantial groups unexpectedly appear. Geomagnetic activity is expected to be at quiet levels everyday. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1000 and 1300 hours. Just a remainder that the summer sporadic-E season is just about over but for the coming few weeks, short localised openings can still take place on some days. Also, the winter season will take place from the middle of December to the middle of January. GB2RS will remind you nearer the time.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 29 August, Kettering & District Amateur Radio Society has a Social Meeting. Details on the web at http://kdars.co.uk.

On Monday 30 August, Gloucester Amateur Radio & Electronics Society plan to enjoy Bank Holiday operating at Crickley Hill. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 30 August, South Birmingham Radio Society has no meeting due to the Bank Holiday. Contact Don, on 0121 458 1603.

On Tuesday 31 August, Derby & District Amateur Radio Society has a Night on the Air. Contact Richard Buckby, by e-mail to radio@dadars.org.uk.

On Tuesday 31 August, Wythall Radio Club has a Natter and On Air night arranged. Details from Christopher Pettitt, G0EYO, by e-mail to g0eyo@blueyonder.co.uk.

On Wednesday 1 September, Bolsover Amateur Radio Society has a natter night planned. For details, send an e-mail to postmaster@g4rsb.org.uk.

On Wednesday 1, September Lincoln Short-Wave Club will have an SSB Field Day briefing. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 1 September, Midland Amateur Radio Society will be on the air and enjoying a ragchew. Training classes will also take place. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 1 September, South Birmingham Radio Society has a lecture in the main hall. Contact Don, on 0121 458 1603.

On Wednesday 1 September, South Notts Amateur Radio Club has a talk on inductors by G4EDX. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 1 September, Telford & District Amateur Radio Society HamFest - final prep. Night. + Committee (if time). Contact Mike, G3JKX, on 01952 299 677.

On Friday 3 September, Coventry Amateur Radio Society has a talk on military radios by Ivan Thomas, M0IRT. Contact John, G8SEQ, on 07958 777363.

On Friday 3 September, Lincoln Short-Wave Club will be preparing the SSB Field Day site from 3pm. For more information contact Pam Rose, G4STO, on 01427 788356.

On Friday 3 September, South Birmingham Radio Society has planned a construction evening and ragchew. Contact Don, on 0121 458 1603.

On Saturday 4 and Sunday 5 September, Lincoln Short-Wave Club will be taking part in SSB Field Day. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 4 September Telford & District Amateur Radio Society will be setting up for the Telford Hamfest. Setup starts at 5pm. Contact Mike, G3JKX, on 01952 299 677.

On Saturday 4 September, Wythall Radio Club has Session 1 of the Advanced Course. Details from Christopher Pettitt, G0EYO, by e-mail to g0eyo@blueyonder.co.uk.

On Sunday 5 September, Midland Amateur Radio Society will be visiting the Telford Hamfest. Details from Norman, G8BHE, on 01214 229 787.

On Sunday 5 September, South Birmingham Radio Society has a club stand at the Telford Hamfest. Contact Don, on 0121 458 1603.

On Sunday 5 September, Spalding & District Amateur Radio Society has a barbecue and Fun Day organised at the Portakabin. For more information contact Graham Boor, G8NWC, on 07947 76448.

On Sunday 5 September, Telford & District Amateur Radio Society will be involved in the Telford Hamfest. Contact Mike, G3JKX, on 01952 299 677.

NEWS FOR NORTHERN IRELAND

GB2RS welcomes information from all RSGB affiliated clubs. We invite club secretaries to e-mail details of forthcoming meetings to GB2RS@rsgb.org.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 30 August, Angel of the North Amateur Radio Club has no meeting due to the Bank Holdiay. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 30 August, Scarborough Amateur Radio Society has no meeting due to the Bank Holiday. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 30 August, Sheffield Amateur Radio Club are putting the final preparations together for SSB Field Day. There is also a social evening. For more information contact Trevor Wood, M0TWS, by e-mail to trevorwood6@yahoo.co.uk.

On Tuesday 31 August, Morecambe Bay Amateur Radio Society will enjoy a film night. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

On Tuesday 31 August, Otley Amateur Radio Society will be taking part in the 70MHz UK Activity Contest. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 1 September, Halifax & District Amateur Radio Society is holding its AGM. Contact Anthony Vinters, on 01422 822636.

On Wednesday 1 September, Hornsea Amateur Radio Club has a talk on the Audio Signal Generator Project by Bob, M0GAP. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 2 September, Brigg & District Amateur Radio Club will be enjoying the Moonbounce experience with Howard Ling, G4CCH. Details from John, 2E0III, on 01652 632938.

On Thursday 2 September, South Manchester Radio and Computer Club has a talk on WSPR by Ron, G3SVW. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 3 September, East Cleveland Amateur Radio Club has a night on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 3 September Hornsea Amateur Radio Club is setting up and getting ready to take part in the SSB Field Day. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Saturday 4 and Sunday 5 September, Hornsea Amateur Radio Club will be taking part in SSB Field Day. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Saturday 4 and Sunday 5 September Ripon & District Amateur Radio Society will be taking part in SSB Field day using the callsign G4SJM. They have designed a special QSL card for the event. More information from Rob Hall, M0RBY, on 0787 608 5631.

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-28 19:00:14 UTC
From: website@sarl.org.za
Message-ID: <20100828190008.102D633CC3@panix2.panix.com>
Source record: 5502
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 29 August 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

Jac Roux, ZS6QA, for 32 years a member of the Pretoria Amateur Radio Club and very involved in motor rallies, became silent key on 26 August. Our condolences to his wife Ann, daughters Clair and Jessica

(PAUSE)

In the news today:

SAT NETWORK

US AMATEUR RADIO EMERGENCY SERVICES CELEBRATE 75 YEARS OF SERVICE

WHERE HAVE OUR TECHNOLOGISTS GONE?

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SAT NETWORK

SA AMSAT's first SAT NETWORK will be on the air this evening at 19:30. Join the discussion on the payload options for the proposed SA AMSAT CubeSat. John Williscroft, ZS6EF, will introduce the subject with a presentation on an imaginary satellite and its multi payloads built on the back of fold-out solar panels. The idea is to set the scene for a useful discussion. By courtesy of the SARL, SAT NETWORK will be facilitated by the same team as the President's Net and Intecnet on repeaters in the Cape Town area, the Eastern Cape repeater network, Durban and Gauteng and North West. Marten, ZS6ZY, will relay on 3 718 kHz and Chris, ZS6FCS, will take care of Echolink and the Webcast. Clubs wishing to arrange a last minute link for their repeater should

send an email to armi@sarl.org.za by 11:00 this morning.

US AMATEUR RADIO EMERGENCY SERVICES CELEBRATE 75 YEARS OF SERVICE

The US Amateur Radio Emergency Service, ARES, will be celebrating its 75th anniversary from September through December 2010. This programme of the ARRL has provided "ham radio" emergency communications for agencies such as the American Red Cross, Salvation Army, countless Emergency Operations Centers and other responders in the worst of times.

Their specially trained radio communications volunteers give thousands of hours of community service for free. The fastest way to turn an emergency into a disaster is to lose communications. In events from ice storms to Hurricane Katrina and Haiti, when normal communications systems were down or overloaded, the Radio Amateurs in the ARES programmes filled requests for communications aid. The first mention of an organized Amateur Radio emergency response organisation appeared in the September 1935 issue of QST Magazine.

ZU LICENSE IS AN INTRODUCTION INTO AMATEUR RADIO

When the SARL convinced the authorities at the time that South Africa needed an introductory license to introduce teenagers into amateur radio it was with that understanding that the ZU license was introduced as a stepping stone into amateur radio for young people who had not yet reached the educational level to be able to study for the ZS or class A license. While the regulations did not pin down an age limit, it is still perceived by ICASA that the ZU license is aimed at the young.

In the past imposing an age limit has been suggested. Should it be 18, should it be 25 which is the current age limit for SARL student membership. With the current rewrite of the regulations, all radio regulations, the question will undoubtedly be raised again. We have to wait and see what will come out of the wash when the draft regulations are published for comment in the Government Gazette. When is still unknown, perhaps in the next few months. Draft regulations are gazetted for comment. Comments are then considered before the final regulations are promulgated.

The ZU license stands apart from novice licenses in other countries and is not internationally recognized. The SARL is still standing by its original request to the then regulatory authorities and urge clubs to promote the ZU license as an introduction to amateur radio for young people. That is what is always was meant to be.

If you would like to comment and share your views send an email to armi@sarl.org.za

WHERE HAVE OUR TECHNOLOGISTS GONE?

It is difficult to believe that only entries from overseas have been received in the Innovation competition that is being sponsored by the

SA Amateur Radio Development Trust and ICOM. "Innovation in Amateur Radio" is an eighteen month project aimed at promoting innovation in Amateur Radio. "While Amateur Radio is one of the oldest and still the most rewarding of all the scientific hobbies, there comes a time when one has to look at innovation, new ideas and new technologies to keep the activities relevant and exciting". This is the view of Hannes Coetzee, ZS6BZP, a technologist and a member of the Board of Trustees of SAARDT. Hannes was one of the principle architects of the Amateur Radio payload on SumbandilaSat.

Radio amateurs and technologists are invited to submit projects that will innovate amateur radio whether is it software, amateur radio and the Internet, the development of compact HF antennas for flat and complex dwellers or innovation in Emergency Communications. Read more about it on www.amateurradio.org.za and visit the innovations page. See how D-star is changing the amateur radio experience in other countries.

COMPETITION NEWS

The ZS6JVT 40 metre HF Youth Spring competition will take place on Saturday 4 September between 10:00 and 12:00 CAT.

Please carefully read the rules in the Competition Handbook prior to joining the competition. The frequencies to be used are 7,130 - 7,200 MHz. Competitors are earnestly requested not to use just one frequency, please move around.

ZS6JVT will be on the lookout for other young friends on 40 m and wish one and all strength for the competition.

CLUB NEWS

At the AGM of the Magalies Radioamateur Club held on 22 August, the following members were elected to serve on the committee for the 2010/2011 period: Chairman: Thys Maree, ZS6MJM; Vice Chairman: Nic Smit, ZR6NSP; Secretary: Johann Du Plessis, ZS6PSS; Treasurer/finance: Louis Mitchell, ZS6LWM; Technical: Sam van Zyl, ZS6JZ; Teenspanning: Marko Nel, ZS6MJ.

Many thanks to the previous committee for their leadership and work during the past year and strength to the new committee for the year ahead.

ACHIEVEMENT IN ANOTHER FIELD

Nico Schoonwinkel, ZS4NS, from an amateur family in Welkom, is known for his achievements on the 6 m band. He and his son Coenie, were members of a team of marksmen who took part in an air gun and .22 rifle target shooting competition from 26 July to 6 August in Plzen of the Czech Republic. Nico brought back one medal, Coenie a few m&#65533;re and the team the gold medal. Congratulations, weel done!

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Currently Sunspot 1 101 is big but quiet. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the late afternoons till after sunset. During sunset it will be good towards Europa. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings, late afternoons and evenings as well as over the shorter distances.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

29 August - SATNET at 19:30 on the air; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 4 September - ZS6JVT 40 metre HF Youth Spring competition between 10:00 and 12:00 CAT; 18 September - RTA symposium in Gauteng.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

684. Paddles ??

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-29 06:00:38 UTC
From: Pete Moscatt <pgmoscatt@optusnet.com.au>
Message-ID: <BImeo.40448$wJ1.17800@newsfe08.iad>
Source record: 5503

Hi to All,

This may seem to be an odd-ball question but need to ask to ensure I understand what 'Paddles' are.

I have been a Radio Amateur for 30 odd years now. One of the modes I enjoy most is good ol'e CW.

I have always used a Straight Key and will into the future.

One thing that always puzzled me was, what does a paddle have over a straight key. I have had a little play on a paddle but appear to be some-what awkward to use or am I not using it correctly?? I see that one paddle deals out the dit's whilst the other the dah's.

Cheers.

Pete VK4CCV

Well, there are several things you might be referring to as "paddles".
Their stated benefits, over a straight key, can be "better speed",
"cleaner and more copy-able code", and "reduced physical strain on the
operator." All of these depend on experience and training, of
course... a skilled straight-key operator will outperform a novice
using a two-paddle keyer.

As I understand it (and I'm a very long way from being an experienced
CW operator - I rarely use it) you may find the following sorts of
paddle keys or key-sets:

- A simple one-direction "side swiper" - essentially a straight key
turned on its side. Press sideways with thumb (or chosen finger),
allow spring- or magnet-return to open the contacts. Manual timing
of both dits, dahs, and pauses.

- Two-contact "side swiper", which will close its contact when
pressed either left or right. Similar to a one-direction
side swiper, but you move the paddles back and forth with thumb and
forefinger. Manual timing of dits and dahs and pauses (and you
can make either a dit or dah by pressing either left or right).

- Bug - the first type of semi-automatic paddle or key system. Use a
a mechanical spring-and-weight arrangement to create a set of
automatically-timed "dits" and pauses when the paddle/lever is
pressed in one direction. Pressing the paddle in the other
direction allows the sending of either dits or dahs (with manual
timing).

- Two-contact, one- or two-paddle keyer. Press one way for a series
of properly-timed dits, the other way for dahs. Pressing both
paddles at once usually creates an alternating series of dits and
dahs, depending on the keyer configuration.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 29th August 2010

Echo Ireland

The August issue of Echo Ireland, which will be posted to members early next week, includes a report by the members of the IRTS Examinations Board on the most recent Amateur Radio Licence Examination, held in July. This report should be of interest to everyone who sat the examination and to those studying for future exams. Radio amateurs involved in tutoring students will also find this report useful.

The new Echo Ireland also includes an article on the Worked All Ireland awards scheme; the society is planning to re-kindle interest in this scheme. Other articles in the August Echo Ireland cover issues ranging from the construction of valve receivers in the 1960s to the latest news on amateur radio satellites. The usual update on DXing includes news of a number of upcoming DXpeditions. All in all, plenty of reading for everyone interested in amateur radio!

IRTS Morse testing at North Cork Radio Group Rally.

Morse testing can be made available if required, at the upcoming North Cork Radio Group Rally on 19th September. Anyone wishing to sit a morse test should contact Ger McNamara EI4GXB on 087 2532512 or ei4gxb /at/ gmail.com

---

Closing Date for Theory Examination

It is now less than three weeks to the 17th of September which is the closing date for applications to sit the next theory examination for an Amateur Station Licence. The next exam will be held on Wednesday the 6th of October at 2 p.m. in the ComReg Offices in Dublin.

For further information on the application procedure, exam fees and other details see 'Theory Examination' in the 'Information' section of the IRTS website atwww.irts.ie

---

Dublin 2m News Interruption

During the latter half of August there may be a temporary interruption of the 11:45 two-metre news broadcast from Dublin on Sundays. This is unavoidably due to overlapping holiday commitments of the four regular newsreaders Tony(EI5EM), John (EI7JG), Frank (EI6EF) and Liam (EI3HK).

Every effort will be made to maintain the service. However, if by chance there is no transmission on a particular Sunday, please accept our apologies in advance and rest assured that the regular two-metre service will resume as soon as possible.

Change of 40M WAI Frequency

It was deceided at the recent IRTS Committee Meeting to Change the WAI Frequencey from 7.068 to 7.170

Upcomming 2m Contest & IRTS Field Day

The 2m Counties contest will be held Today Sun 29 August 2010 and The SSB Field Day will be held over the weekend of Sat / Sun 4/5 September 2010 more details on the IRTS Website.

Theory Classes in Clane

There will be classes running on Monday nights over 10 weeks in Scoil Mhuire, Clane for bookings please phone 045 868255

MAR Visit

Members of the Mid-Ulster Amateur Radio Club paid a visit by coach to the vintage radio museum in the Martello tower in Howth on Sunday 22 August. The trip was organised by Davy Gregg 2I0IRZ the club treasurer. The large group was welcomed by Pat Herbert the curator along with local amateurs Andy (EI4ERB), Bill (EI8BC), Joe (EI4FV) and Joe Guilfoyle. The craic was mighty and a good day was had by all.

The visitors QSYed for a meal and refreshments before returning northwards after a very enjoyable day in Howth. The Mid-Ulster Club meets on the second Sunday of each month at the Browlow Resource Centre in Craigavon but is currently closed for summer recess until Sept. 12 /at/ 3pm when the club AGM will be held.

The club's website is www.muarc.com. Any other clubs or groups would be most welcome to visit the vintage radio museum in Howth. The museum web site is www.ei0mar.org and the email address is info /at/ ei0mar.org

---

Shannonbasin Radio Club

Shannonbasin radio club Will again be hosting the annual SSB field day on the 4/5 September In Garbally collage Ballinasloe.

This is an ideal venue for this contest and all clubs are welcome.

Shannonbasin radio club will also host there now famous BBQ and all are welcome.

The Club's recent trip with the Galway radio club to Inisbofin for this years IOTA Contest is now on YOUTUBE under the heading "IOTA CONTEST 2010"

Internet Discussion Forum

There is a new discussion group is located at radiotopics.com

Here you can discuss all matters from Radio and TV to Internet topics to Amateur radio itself. It is hoped that there will be sufficient activity on getting more sub groups in the Amateur Radio Section,

---

Appeal from Pakistan Amateur Radio Society

The Pakistan Amateur Radio Society is asking the International and National Ham Community to provide equipment if possible. AREN's goal is the donation / purchase of 5 HTs and 5 magmount antennas. Already 3 HTs have been donated and need cash to buy dual band antennas and spare batteries. All donations should me made by next Tuesday. The equipment could be new or used but should in a workable condition. In order to facilitate collection and shipping of donated equipment from EI to our counterparts in Pakistan. Please contact Conor at email ei4jn /at/ aren.ie Conor's mobile 087 7993085 for further information or pledges of donations.

IARUMS news

It is requested that amateurs & SWL's please keep a listening watch around 28.265 FM as there have been incursions by churches on this frequency heard throughout Europe at up to 59 +20db. Please send details of names etc used so we can identify locations and report them to ComReg for investigation.

All information can be sent to Ger McNamara EI4GXB who is the IRTS IARUMS co-ordinator at ei4gxb /at/ gmail or 087 2532512

International Lighthouse and Lightship Weekend

Last weekend, members of Limerick Radio Club activated Tarbert Island Lighthouse as part of International Lighthouse weekend. Over 900 QSO's were made, and the recently acquired Cushcraft A4S HF beam certainly proved itself.

Members who took part were Tony EI2AW, Dermot EI2GT, David EI2GBB, Mike EI2IX, Gerry EI3JU, Ger EI4GXB, John EI6IW, Simon EI7ALB, Alan EI8EM, Kris EI9GAB, Dave EI9GBB and Brendan EI9GHB. A great weekend was enjoyed by all and the new licensees got a chance to go on the air and work some DX.

The lighthouse non contest weekend saw over 440 registrations in 40 countries setting the scene for a great weekend.

Charlie EI8JB, John EI6GHB and David EI7GEB were operating /P from St Johns Point Lighthouse. Lighthouse number is IE0005 and TIM EI5GVB was operating /p from Boradhaven IE0006

There are some reviews and photos listed in the Feedback 2010 area of the organizers website atillw.net

---

LRC Special Event Station

LRC members are this weekend putting on a special event station at Atlantic Airventure in Shannon. Co. Clare to celebrate 100 years of Irish Aviation. Activity will take place on all bands on SSB and CW and the club call EI4LRC will be used.

Rallies

North Cork Radio Group is pleased to announce their first annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 19th 2010

More information is available via the Groups website www.NorthCorkRadioGroup.com, traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb /at/ gmail.com as soon as possible.

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1887 Edison patents 'Kinetoscope' device produces moving pictures.

1891 Thomas Edison applied for a movie camera patent.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd-August, through Sunday, 29th-August there were 207 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, JA, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, VU4, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUEZ ISLAND (Update/Reminder). By the time you read this, Giorgio, IZ4AKS, will be active as 3B9/IZ4AKS from Rodrigues Island (AF-017) between now and September 4th. Activity will be limited to his free time as this is a holiday style operation and not a dedicated DXpedition. Look for activity on 10-40 meters, mainly SSB, but possibly

RTTY and CW. He will use a FT-897D with 100 watts into a vertical antenna placed near the ocean. QSL only direct with SAE and 2 USDs (NO IRC, NO BUREAU QSLs). He now has a Web page available at: http://www.iz4aks.com/3b8-3b9

9H, MALTA. Ariel, LU4OO, will be active as 9H3OO between August 30th and September 4th. Activity will be on the HF bands using SSB. QSL via his home callsign.

9X, RWANDA (Update). Tom, DL2RUM, in Kigali, has announced that he will be extending his stay through September, and will continue to be active as 9X0TL through the following weeks:
August 29th through September 9th
September 19th through September 28th
Remember, he is here on business, so activity will be limited to his spare time. Operations will be on 80-6 meters using CW, SSB and RTTY. Equipment: K3 w/600 watt solid state PA, Butternut HF-9V, HB9CV (6m) and wire antennas. QSL via DL2RUM. More info and an online log will be available at: http://dl2rum.de

B7, CHINA. Operators Terry/BA7NQ, JinQuan/BA7JC, Wu/BA7IA, Yang/BA7JA, Yan/BA7JG, BA7IAG, David/VR2YDC, Yang/BD7IXG, BD7IBS, Lv/BD7MFB and Paul/BA7JS will be active as B7P during the CQWW DX SSB Contest (October 30-31st) as a Multi-Multi entry. QSL via BD7IXG.

BV, TAIWAN. Dennis, KT8X, will be active as BW/KT8X from Taiwan (AS-020, WLOTA L-0022) between now and September 6th. QSL via his home callsign or by the LoTW.

CQ COMMUNICATIONS PRESS RELEASE. Richard Moseson/W2VU, Editorial Director, sent out the following on August 26th: "Monitoring Gulf Oil Spill Response Highlights September Pop'Comm -- Highlights of the September issue of Popular Communications magazine have been posted on the magazine's website, <http://www.popular-communications.com>, including a QuickTime preview of an upcoming October feature!
September's cover story is on monitoring the ongoing response to the oil spill disaster in the Gulf of Mexico. Scanner monitors and shortwave listeners in a large part of the U.S. will be able to tune in to at least some portion of related radio activity. The article includes six full pages of suggested frequencies to monitor in different areas.
Additional features of the September Pop'Comm include a guide to finding and eliminating radio frequency interference and a 'First Look' at Uniden's revolutionary 'Home Patrol' scanner (including a link to a video preview). The complete table of contents and full-page samples from inside the magazine are on the website as well, along with an audio sample of pirate radio airchecks, previewing a feature in the October Pop'Comm. To see - and hear - all this and more, just go to <http://www.popular-communications.com>, where you may also subscribe onine.
Popular Communications is published monthly by CQ Communications, Inc., publishers of CQ Amateur Radio, CQ VHF and WorldRadio Online."

CY0, SABLE ISLAND (Update). Randy, N0TG, reports: "Operation dates have been modified slightly due to logistics matters: October 21 29th, 2010. Unfortunately, Murray, WA4DAN, has had to withdraw from the DXpedition, due to business conflicts. He was the original organizer and has been involved with all of the planning since early in 2009. Gary Bartlett, VE1RGB, has been recruited as the 4th operator. Gary is a skilled CW operator, active competitor in contests, experienced in handling pileups, and a great technical background. In addition, a plus is that Gary has previously operated from Sable Island. Callsigns are: CY0/AA4VK, CY0/AI5P, CY0/N0TG and CY0/VE1RGB. QSL 'all' callsigns DIRECT via N0TG or the preferred QSL route is VIA the 'ONLINE QSL REQUEST Service'. QSL instructions and options are listed on our Web site: http://www.CY0dxpedition.com (Click on How to QSL)."

DX0, SPRATLY ISLANDS (Update/Operators Needed). Chris, VK3FY, Team Leader of DX0DX, reports: "As we have had a number of operators unfortunately withdraw from the forthcoming Spratly Islands DXpedition, either due to work commitments or health reasons, we still have places available if any operator wishes to join us on DX0DX. If interested, please E-mail Chris at: chris@vk3fy.com
For more details about the 2011 January DX0DX DXpedition to Thitu Island in the Spratlys, visit: http://www.dx0dx.net

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
9X0TL Rwanda; 2010 Operation

ED8, CANARY ISLANDS. Luis, EA8AY, will be active as ED8T from Tenerife Island (AF-004) during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via LoTW. Visit Luis's Web page at: http://www.ea8ay.com/cw4evr/index.html

EG3, SPAIN (Lighthouse/WFF/FEA Op). Members of the URE, LYNX and DXCITING from the EA3 and EA5 districts will activate EG3LH from the Faro el Galacho, Punta Corballera Lighthouse between September 4-5th. This Lighthouses is valid for the following awards programs: ARLHS SPA-058, FEA (Diploma faros de Espana) FEA E-0371.2 and the WFF EAFF-116 Delta de l'Ebre, and is located in Punta de la Banya Area, ALFACS BAY, Sant Carles de la Rapita, TARRAGONA, SPAIN. This is the first time a DXpedition has operated there, and it took 3-4 years to prepare for it. It is almost impossible to gain access/permission to the Delta de l'Ebre Natural Park, and also very difficult to get a license. They will travel there by ship. Activity will be on all HF bands using CW, SSB and RTTY. The team of operators are: Javi/EA3AGB, Gabriel/EA3AKA, Manel/EA3EGB, Joan/EA3ESZ, John/EA3GHZ, EA5EOR, Juan/EA5KA, Francisco/EA5RU and Jose/EA5WP. QSL via EA3GHZ, by the Bureau or direct. For more details, see: http://eg3lh.blogspot.com

INDEPENDENCE DAY BRAZIL BPSK3 CDX Contest. The Cantareira DX Group (CDX) has the honor to invite the radio amateurs all over the world to participate in the "Independence Day Brazil Contest (BPSK3) between 1200z, September 4th and 1200z, September 5th. The contest is to establish as many contacts as possible between radio amateurs around the world and

radio amateurs in the South America. Everybody can work everybody. Complete details are available at:
http://brcontest.com/modules/tinyd0/content/RULES2010INGL.htm

IOTA NEWS.....
EU-051. Raul, IC8ATA, will be active as IE9/IC8ATA from Ustica Island between now and September 4th. Activity will be on the HF bands. QSL via his home callsign, direct or by the Bureau.

EU-079. Members of the QLF DX-Team will be active as LA6Q from Gurskoy Island (WLOTA LH 2397) and other islands in the EU-079 IOTA group between September 9-14th. Operators mentioned are: Bjorn/LA5UKA and Trond/LA9VDA. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via LA9VDA (be sure to see details on QRZ.com).

EU-105. Operators Jean-Claude/F5IL, Christophe/F5UBH, Luis/F5THW and Juan/F5IRC will be active as TM5BATZ from Batz Island (DIFM MA018, WLOTA 0680) between September 10-12th. Activity will be on 80-10 meters using CW, SSB, PSK31 and RTTY. QSL via F5IRC, direct or by the Bureau.

NA-026. Yigal, K2EFG, will be active as K2EFG/p from Fire Island (USI NY013S, Suffolk County, New York) and the lighthouse (ARLHS USA-286, TWLHD WLH K-060, WLOTA LH 1922) between September 9-12th. Activity will be mainly on 40/20 meters, but he may go to 15/10 meters if the conditions allow. Yigal will use a FT-857 (w/75-100 watts) into a Buddipole antenna on the eastern part of the island. There may be a time when Yigal will be directing a YP3 Yagi to the west (in-land). He will only be able to operate for 3-4 hours, as there is no power available at the dunes where he can set up an antenna. QSL via his home callsign, direct or by the Bureau.

NA-092. Operators Buzz/NI5DX and Al/WD5IQR will be active as NI5DX/P from Mustang Island (USI TX-011S, Nueces County, Texas) between September 17-19th. Activity will be on CW, SSB, RTTY and PSK31. QSL via NI5DX.

OC-133. Operators John/9M6XRO, Steve/9M6DXX and Gordon/G3USR, will be active as 9M6XRO/p, 9M6DXX/p and 9M6/G3USR, respectively, from Labuan Island between October 5-8th, and possibly between 0000-0200z October 9th. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. They will have two stations with amplifiers on the air using a Hexbeam, verticals and a 160m Inverted-L very close to the ocean. QSL 9M6XRO/p and 9M6DXX/p via M0URX, and 9M6/G3USR via his home callsign.

J45/SX5, DODECANESE. Operators Michel/ON4MW and Martin/ON4PO will be active as J45MW and J45PO, respectively, from Rhodes Island (EU-001) between October 26th and November 2nd. Activity will include the CQWW DX SSB Contest (October 30-31st) using the callsign SX5P. QSL via their

home callsigns. All QSOs will be confirmed by the end of 2010.

JT1 MONGOLIA. Zsolt, HA8PX, will be operating as JT1PX from Ulaanbaatar for only a few days between August 30th and September 1st. However, he will return to the air waves at the end of September/beginning October. He will use a Yaesu FT-897D into a MP-1 small mobile vertical and an Inverted "L" antenna. QSL direct to his home callsign.

JY7, JORDAN (Special Event). Members of the Royal Jordanian Radio Amateurs Society (RJRAS) will activate special event station JY7P between September 17-19th. The suffix "P" stands for "Petra" the "Rose-Red City" of the ancient Nabataean civilization which is situated in the southern part of Jordan. The RJRAS will be celebrating this special weekend to dedicate the city of PETRA. This event is also designed to promote the city as well as promoting tourism to Jordan and PETRA in particular. QSL via the address on QRZ.com. Also, vist the special JY7P Web page at: http://www.jy7p.com

KG4, GUANTANAMO BAY (Correction). Members of the Virginia DX Century Club will be active from here between October 5-19th. Operators mentioned are Tip/N4SIA (KG4AS), Clyde/K4CQW (KG4QW), Stu/K4MIL (KG4SS) and Bill/W4WV (KG4WV)[not W4VW or KG4VW as reported in OPDX.973]. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsigns.

KH6BZF PROPAGATION FORECAST/REPORT (For August 30th-September 5th)....
Aug 30 AN SOLAR REFERENCE KEYS
Aug 31 AN --------------------
Sept 1 AN BN - Below Normal
Sept 2 AN AN - Above Normal/Geomagnetic Level is QUIET
Sept 3 AN LN - Low Normal
Sept 4 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sept 5 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

M, ENGLAND. Berkin, TA3J, will be active as M/TA3J from various locations between September 9-20th. Activity will be on 160-6 meters, including the newer bands, using SSB and FM. QSL via his home callsign.

MD, ISLE OF MAN. Operators Oliver/OE5OHO, Henry/OE5HDN and Gerhard/OE3GEA will be active as MD/homecall from the Isle of Man (EU-116) between September 7-13th. Activity will be holiday style on all HF bands using CW and SSB. QSL via the Bureau to their home callsigns.

PD55, THE NETHERLANDS (Specil Event) Operators Peter/PD1AJJ and Elmar/ PD3EM, members of the "Lowlands 5x5 Rapid Deployment Amateur Radio Group",

will activate the special event callsign PD55RADAR between September 4-14th. The "RaDAR" is short for "Rapid Deployment Amateur Radio", and this is an international concept of Radio Amateurs being able to operate anywhere under all circumstances. The goal is to set up an Amateur Radio station quickly on remote sites anywhere using only battery power. Anywhere means not only sites reachable by car but also on locations after a few miles walk. The 5�5 concept means being able to communicate by Amateur Radio within 5 minutes after arriving with the QRP power of 5 watts maximum. The "Lowlands 5x5 RaDAR Group" is not a club with payed membership. It's the concept that brings these Dutch Radio Amateurs together. For more info, check Elmar/PD3EM Web site at: http://www.pd3em.com Also, try the YouTube Channel at: http://www.youtube.com/PD3EM

PJ2, NETHERLANDS ANTILLES (Press Release). The following press release was received by John Barcroft, K6AM, dated August 26th: "NEW DXCC OPERATIONS ON CURACAO STARTING 10-10-10 -- As many of you know by now, the Netherlands Antilles will likely be dissolved as a country on October 10, 2010. Several new DXCC entities will result from this change including the addition of the island of Curacao (PJ2) as a new DXCC entity separate from Bonaire (PJ4).
Since this will meet the criteria for a new DXCC entity, we expect all operations to be accepted as of 10/10/10. While ARRL approval is not 100% guaranteed, and may not be officially announced until all DXCC requirements are documented, plans are in place to mount several operations from the Signal Point super-station, PJ2T on Curacao beginning on day one.
The first operation runs from Oct 10 until Oct 18 with a group led by K8ND. They will be followed closely by a team of nine operators from the U.S. and Germany who will be there through November 2nd including a M/M entry in the CQWW SSB contest. We will be using both PJ2/homecall and PJ2T during the 3-week run. We will be on all bands before the contest, including 6 meters, running CW, SSB and RTTY. Considering the number of simultaneous new entity operations, frequencies will be selected to avoid interference.
The GAREC conference (http://www.garec.net/) is being held on Curacao October 11-12th, and we will be opening the PJ2T station to any of the participating amateurs from around the world who wish to operate in their free time before or after the conference. The station will also be open to any local Curacao amateurs who wish to operate from Signal Point during the post 10-10-10 week.
These will not be sponsored expeditions nor are donations being solicited. The operators involved are covering all costs. QSL as instructed on QRZ.com"

PJ5 & PJ7, NETHERLANDS ANTILLES. With the strong possibility of two new DXCC entities to be created on October 10th, Bill, AA4NC, plans to activate St. Eustatius (NA-145) between October 9-15th, as PJ5/AA4NC, followed by Sint Maarten (NA-105) between October 15-18th, as PJ7/AA4NC. QSL route will be announced.

PJ5, NETHERLANDS ANTILLES. Operators Janusz/SP6IXF and Wlodek/SP6EQZ will be active from St.Eustatius (NA-145) starting on November 18th.

They plan to be active for two weeks and will go QRT on December 3rd.
Callsigns will be PJ5/SP6IXF and PJ5/SP6EQZ. Activity is expected to be
on all HF bands (160-10m) using CW, SSB and RTTY. Their location on the
island seems to be favorable to Europe. QSL via their home callsigns.
A Web site will be available soon. Also, online logs will be available
during or right after the DXpedition.

PJ7, SINT MAARTEN (Press Release). Co-leaders Joe Pater/W8GEX and Craig
Thompson/K9CT sent out the following press release on August 26th: "The
PJ7 team going to Sint Maarten on 10-10-10 for the new county activation
reports that plans are coming together very nicely. The team is in the
process of gathering and testing equipment and antennas before shipping
to the staging area where they will be put in a container for sea shipment
to the island.
We are happy to report that not only is RF Concepts/Alpha a proud
sponsor for our Sint Maarten Dxpedition beginning 10-10-10, they have
a great promotion in conjunction with our trip.
In addition to providing six new Alpha 8410 amps, and one Alpha 8406
six meter amplifier, RF Concepts will make a cash donation to the DXpediton
for anyone who purchases a new 9500, 8410, or 8406 between now and the
end of September and specifies the Sint Maarten trip.
The company will donate 150 USDs for the purchase of an Alpha 9500 and
100 USDs for the purchase of an Alpha 8410 or Alpha 8406. This offer is
for any new orders (not trade-ins) ordered and shipped between now and
the end of September.
For further information, contact Molly Hardman, W0MOM, VP Sales at:
molly@rfconcepts.com Phone 303 473-9232
http://www.rfconcepts.com F A X 303-473-9660

The team has received emails asking about when it will count as a new
one. We do not know yet, but do know that the ARRL DXCC committee is
working on this matter and hopefully will have a news release soon.
The team is working diligently to get everything ready, and is anxious
to get on the air to hand out a new one."

NEW QSL MANAGER. Paolo, IK2QPR, informs OPDX that he is now the new QSL Manager for Sergey, UA0FUA, on Iturup Island (AS-025). QSL via IK2QPR: Paolo Fava, via Bertani 8, Mantova 46100 ITALY.

V48M QSLS. The following was received in a V48M QSL envolpe: "We apologize for the delay in QSL response. K2SB has been our QSL mgr for 20 yrs & over 220,000 QSOs. He has been ill lately and has not responded in a timely fashion. Please note that the QSL MGR will be: A.AIMETTE, W2OX, PO BOX 64436, SOUDERTON, PA 18964. PLEASE LET OTHER RADIO CONTESTERS & RADIO AMATEURS KNOW OF THIS CHANGE!!! IF you have not received your QSL by 1st January 2011 (esp by Bureau route), let us know details (no $) by mail or w2ox@verizon.net ".

QSLS VIA LoTW: 5N50K, 9A5ZM, BH4QAK, F1TMY, IK8JVG, MW0ZZK/P, PA/OQ4T, PY2DEL, SN3S, UA0AGI, UA0FM, UA4LCH and ZL6LH

QSLS RECEIVED VIA MAIL: 6Y1LZ, A61E, E4X, E71A, EX8MLE, JA1YUC/6, NP2N, T32SI, TL0A, V47KP, V48M, V51AS, VQ9RD and ZK3X

QSLS RECEIVED VIA THE BUREAU: 9A2X, A62ER, CX4ACH, DG0OBU, DQ4W, E75DX, EA2RKO, EI4CF, EK3SA, ES2Q, F4FEP/P, FG/DK5AL, G0VXE, G3UAS, G4RRA, GX0SRC/P, IO5O, IZ4IRJ,IZ5IPA, LY755A, LZ10ARDF, M0VKY, M6T, RA1AG, TI5/OH0NOA and UA3AKO

RI1, FRANZ JOSEF LAND (New Prefix) Eugene, UA4RX, is currently active from here as RI1FJ (ex-R1FJT, between 2006-2008). It seems in Russia most island operations are using the RI prefix now. Eugene started operating on August 24th, and will be on a new 1 year tour at the Weather Station on Heiss Island, Franz Josef Land. Activity has been on 20 and 17 meters CW at various times (0130-0200z and 0900-1200z). QSL to: Eugene Chepur, P.O Box 1122, Kaliningrad, 236019 Russia. PLEASE NOTE: Ghis, ON5NT, informs OPDX that "R1FJT QSLs used to be via UA4RC who became a 'SK' in 2009. There were a lot of questions on the DXcluster on how to get a QSL from R1FJT after UA4RC became a 'SK'. QSL cards for R1FJT's 2006-2008 operation can now be obtained from UA2FM."

RSGB COVENTION 2010. Just a reminder that the "RSGB Convention 2010" (formerly know as HFC) will be held between October 8-10th, and held for the first time at the Horwood House near Milton Keynes. For complete details about the convention and the programs available, visit: http://www.rsgb.org/rsgbconvention

TC2010, TURKEY (Special Event). The Turkish group called TCSWAT (TC Special Wireless Activity Team) will be active as TC2010WBC for the FIBA 2010 World Basketball Championship to be held in Istanbul, Antalya, Kayseri and Ankara. Activity will take place between now and September 5th. There will only be one station on the air on all HF bands using CW, SSB and PSK. This time there will not be an award available for working this station. QSL via Bureau is "OK" and no need to QSL direct, as at the end of December all QSL cards will be sent to each country's QSL Bureaus (100%).

TK, CORSICA (IOTA and LH Op). Operators Jim/F5MCC and Gilles/F4FGJ will be active as TK/homecall between September 4-24th. They plan to activate as few IOTAs and lighthouses while there. Some of the IOTAs mentioned are: EU-014, EU-104 and EU-164. Some of the lighthouses mentioned are: DPLF + WLOTA LH 1390, LH 0098, LH 0755, LH 2562, LH 4089 and a new reference number (a surprise!). Also, some DFCF, DMF and perhaps a SOTA reference number will be activated too. QSL via their home callsigns, direct or by the Bureau.

TK11, CORSICA. Laurent, F8BBL, who was active this year as TK10B from different islands around Corsica, is expected to return to southern Corsica in 2011 between July 23rd and August 6th. He will be active as TK11OTA from Olmeto Plage on Sanguinaires Island (EU- 014, DIFM TK-001). Activity will be on 80-10 meters, mainly on CW with some SSB and Digital operations.He will use a FT857D with a MP-1 vertical antenna. QSL via LoTW or to F8BBL, direct or by the REF Bureau.

TL0, CENTRAL AFRICAN REPUBLIC. Christian, (ex-TZ9A and 5U5U) is currently on holiday in France at the moment and is expected to head back to Bangui on September 8th. He is expected to be in TL-land until the end of 2010 or early 2011. QSL only to: Christian Saint-Arroman, Chemin de Mousteguy, 64990 Urcuit, France.

TO2, REUNION ISLAND. Olivier, F4FLF, will be active as TO2Z on Reunion Island (AF-016) next year between April 9&#65533;22nd, 2011. He states that this is a holiday style operation and not a DXpedition. He does mention that he will be on every evening operating on SSB, PSK and RTTY. QSL via his home callsign.

V3, BELIZE. Operators Jim/WB2REM, Paul/W4PGM and Glenn/KD2JA will be operating from Placentia, Belize, as V31MM, V31PM and V31GB between March 23-30th, 2011. During the 2011 CQ WPX SSB Contest (March 26-27th), they will use the callsign V31MM. Prior to the contest and after the contest, they will be operating under their own individual callsigns. QSL direct only to each operator's callsign. QSL V31MM via Jim/WB2REM, V31GB via Glenn/KD2JA and V31PM via Paul/W4PGM. Operators will be on both SSB and CW, 160-6 meters with a concentration on the 30/17/12 meter

bands and 6 meters. When QSLing, please supply a SASE (from stateside) or (Overseas) Self Addressed Envelope (SAE) with either a green stamp depending on the U.S. Air Mail Rate at the time or an IRC. This will ensure you will receive a response to your QSL request.

V6, MICRONESIA. Takuto, JE1SCJ, will be active as V63YT from Pohnpei Islands (OC-010) between November 24-28th. Activity will be on 160-6 meters using mostly CW with some SSB, RTTY and PSK31. He does plan to participate in the CQWW DX CW Contest (November 27-28th), but he will go QRT around 0900z on the 28th due to his flight schedule. Outside of the contest he will focus on 160/30/17/12 meters bands. The suggested frequencies are: 1824 (QSX up/down), 3510 (QSX up), 7010, 10110, 14010, 18080, 21010, 24900, 28010 and 50090 kHz. He plans to use 100 watts into wire antennas and a yagi for 6 meters. He states that dupe QSOs during the contest and outside of the contest are OK. QSL via his home callsign, by the Bureau or direct (w/SASE - see QRZ.com).

WH7, HAWAII. Jim, N6TJ, will be active as WH7V from Hawaiian Islands during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (40m) entry. QSL via WA6WPG.

YI9, IRAQ. Tim, KB2RLB, is currently active as YI9RLB and is living and working in Iraq with an international security company. Activity has been on 40/20 meters using SSB, RTTY and PSK31. QSL via his home callsign, direct or eQSL.

YI9, IRAQ. Eric, KG4GYS, is currently active as YI9GYS from Tikrit. His length of stay is unknown. Activity has been mainly on 20 meters SSB the past few weeks usually around 14200 kHz between 0300-0500z or 1400-1600z. QSL via his home callsign.

YK, SYRIA. Saad, N5FF/YK1BA, informs OPDX that he will once again be active as YK1BA from Damascus starting September 6th. He mentions that his tearing down will be on September 17th. Saad's priority is to work everyone that needs YK for a new country/band/mode, and he asks to help him by following the guidelines on QRZ.com. Saad states that his operating hours will be spotty but will try to put in as much radio time as possible. He suggests that his probable operating hours will be between 2000-2300z or between 0200-0500z and possibly some occasional activities between 1200-1400z. He will work any band that is open, but will try to focus on the high bands (including 30/17/12m) on this trip. Saad will be active on CW, SSB and RTTY. PLEASE NOTE: ALL QSLs should go direct to N5FF. The mailing address is Saad Mahaini, 428 Brook Glen Drive. Richardson, TX &#65533; 75080, USA. Saad states, "I prefer the self adhesive type of envelopes
not the ones that you have to lick. Also, please use International mail envelopes for international requests. These are the ones with red and blue markings and that say 'Air Mail' on them..... My turn around is usually less than a month. Please only Green Stamps. I'm ok with two, but more will be much appreciated to help offset my overall QSLing cost. Remember, I reply to about 3000 QSOs a year on average. Direct QSL requests that

don't have a self addressed return envelope and 2 GS for return postage
will be returned via the Bureau."

ZD8, ACENSION ISLAND. Tom, K7ZZ, will be active as ZD8ZZ from an elevation
of 2300 ft. on Green Mountain between October 6-19th. This will be a
"micro-lite" operation on 160-10 meters using CW and SSB. His antennas
will be two element phased vertical array. QSL via LoTW or direct to
K7ZZ.

ZL7, CHATHAM ISLAND. Kaz, JH1HRJ/ZL3JP, will be once again be active as
ZL7J between September 17-21st. Activity will be on all bands including
30/17/12 meters using CW, SSB and possibly RTTY. He will focus on 160/80
meters using a new antenna system. QSL via JH1HRJ, by the Bureau or
direct (w/SASE).

ZL8, KERMADEC. Chris, DL1MGB, from the ZL8X DXpedition team, informs
OPDX that "Some time has gone since the last news. But meanwhile we were
not inactive, a lot of things happened:
- Sea cargo ready for shipment
- Operator change "
In a press release written by Chris on the ZL8X Web page he mentions that
over half of the team met on the last weekend in July, at the QTH of DR1A,
and collected all the material/equipment to pack and ship by sea cargo.
Chris also states that Markus, DJ7EO, had to cancel his participation for
this DXpedtion due to private and business reasons. With the loss of
Markus, the DXpedition added a new team member -- YL Vicky, SV2KBS. To
read the complete press release on the ZL8X Web page, go to:
http://www.kermadec.de/news/news_archives/index.php?task�ownews&id
For more details on becoming a sponsor or information about
this DXpedition, visit the ZL8X Web page at: http://www.kermadec.de

Thanks Dave,

Watching someone on a set of paddles looks and sounds pretty damm good.
Something I wouldn't mind giving ago so I guess I need to find someone who
use these things for the inside info.
A 'bug' may be a way to get started.

Pete VK4CCV

DXNL 1691 - Sep 1, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

FH - MAYOTTE, AF-027
Fabio,PY2AAZ/AC2AC, Anderson,PY2TNT, Fred,PY2XB, and Alex,PY2WAS,
will show up as TO2FH from Mayotte (AF-027) from Sep 3-10.
No QSL route known yet.

LX - LUXEMBURG
Gerard,PE1BBI, Kees,PA5WT, Frans,PC5T, Rob,PE1ITR, and Theo,PA1TK, will
be QRV as LX/PA1TK in the VHF Contest (Sep 4/5) and as LX/homecalls in
CW and SSB on 80m-10m from Sep 2-5. They will use yagis for 2m/70cm,
a Spiderbeam and dipoles for HF and a 5ele yagi for 70 MHz.
QSL cards should be sent via their homecalls.
See also: http://www.vhfcontesten.nl

RI1F - FRANZ-JOSEF-LAND, EU-019
Evgenij,UA4RX (ex-R1FJT), has returned to Franz-Josef-Land (EU-019) and
will take care of the meteorological station on Kheysa Island (Heiss)
for the next year. His new callsign is RI1FJ now.
His QSL cards are managed by UA2FM (bureau ok), who has also the logs
of R1FJT (2006-2008). The former QSL manager UA4RC died last year.

TK - CORSICA
Jim,TK/F5MCC, and Gilles,TK/F4FGJ, are going to activate EU-014, EU-104
and EU-164 from Sep 4-24. They will also activate the WLOTA lighthouses
LH 1390, LH 0098, LH 0755, LH 2562, LH 4089 and a new one which has no
reference number yet. They also plan to make a few SOTA activations.
QSLs direct or via bureau to their homecalls.

YK - SYRIA
Saad,N5FF, will be on their air again as YK1BA from Sep 6-17. Saad
wants to help those who still need Syria on a specific band or mode.
QSLs should be sent direct to N5FF.
More information online at: http://dx-world.net/2010/yk1ba-syria

ZD9 - TRISTAN DA CUNHA 6 GOUGH ISLAND, AF-039
John,ZS1LF, is the leader of a South African scientific team which will stay on Gough Island (AF-039) from September 2010 until September 2011. John is the radio technician. This is already his second stay on Gough. You can expect activities mostly in SSB (but also in digital modes) on 160m-10m using his callsign ZD9GI but he will have time for his hobby only after his work - mostly in the evening hours and at the weekends. His equipment includes a TS480 and dipoles. John also offers to arrange skeds via his e-mail: zd9gi@yahoo.co.uk
His QSL manager is ZS1A (j-s@iafrica.com). QSLs should be sent via the QSL bureau or direct to: Johan Sevenster, 2 Roozeboom STR-de Bron, Bellville, 7530, Republic South Africa.

5R - MADAGASCAR, AF-013
Franck,F4DBJ, will stay another time on Madagascar (AF-013) between Sep 5 and Nov 28. He will sign 5R8HT running 100 watts into a W3DZZ for 40m/80m and a vertical for 10m/15m/20m. QSL via F4DBJ, bureau ok.

9H - MALTA, EU-023
9H3OO is the callsign of Ariel,LU4OO, who works in SSB on HF from Aug 30 until Sep 4. QSL via homecall.

9M6 - EAST MALAYSIA, OC-088
Yoshihiro,9M6/JK2VOC, announced to become active from Borneo (OC-088) on Sep 2-6. He wants to take part also in the All Asian DX SSB Contest on Sep 4/5. QSLs unfortunately only direct via JK2VOC.

9V - SINGAPORE, AS-019
Loren,9V1/AD6ZJ, will be QRV again in September, mostly in the nights and during the weekends. He will work in CW, SSB and RTTY on all open bands (preferring the WARC bands).
QSLs via bureau or direct to AD6ZJ or via LoTW.

9X - RWANDA
Tom,DL2RUM, has extended his stay in Rwanda and stays active as 9X0TL until Sep 9. His next business trip to Kigali will follow on Sep 19-28. Tom is using a K3 Transceiver, a 600 watts amplifier, a Butternut HF9V, an HB9CV for 6m and several wire antennas for 80m-6m nd is working in CW, SSB and RTTY. The QSLs were already approved for DXCC credit and should be sent direct or via bureau to his homecall or via LoTW.
More information and an online log can be found at: http://dl2rum.de

AUSTRIA, SPECIAL EVENT STATIONS
The "Austrian Military Radio Society" celebrates its 50th anniversary from Sep 1 until Dec 31. Several special event stations are activated for this reason, counting two points for the "AMRS award": OE50AMRS, OE50XAM, OE50XCL, OE50XCW, OE50XLC, OE50XMA and OE50XRM. Following stations count one point for this award: OE50AJT, OE50EHB, OE50EMC, OE50EOW, OE50FHA, OE50FQU, OE50GMU, OE50HCE, OE50HFC, OE50IPC, OE50KLU, OE50LTL, OE50MCU, OE50NIP, OE50OLD, OE50PAL, OE50PCD, OE50PLN, OE50PPF, OE50RJJ, OE50RWL, OE50SPW, OE50TKW, OE50TRB, OE50VIE and OE50VRC.
QSLs via OE4RGC (all QSOs will be confirmed via bureau automatically).

BELGIUM, SPECIAL EVENT STATIONS
Several members of the radio club of Binche (ON7RY) are going to put
the special event station ON4WAR on the air on Sep 4 (1100-1800 UTC)
and Sep 5 (1000-1400 UTC). This is to remember the resistance in WW2.
Their preferred frequencies are: 3560, 3579, 3583 and 7025 kHz (in CW)
but they also work in SSB. See also: http://www.on7ry.be
QSL via ON7RY, direct or via bureau.

CHILE, SPECIAL EVENT STATIONS
From Sep 1-30 the Chilean amateurs may change their regular prefixes
CD, AC, CE and XQ to the special prefix 3G to celebrate the 200th anni-
versary of the Chilean war for independence.

ITALY, SPECIAL EVENT STATIONS
The "Aerobatic Patrol" (the aerobatic team of the Italian Air Force)
is celebrating its 50th anniversary and the special event station
II3PAN will be active between Sep 1 and Oct 31.
QSL via IV3IUM, direct or via bureau.
A special award is also issued, for more information visit the website:
http://www.iv3ium.it/freccetricolori

TURKEY, SPECIAL EVENT STATIONS
The "TC Special Wireless Activity Team" is using the special event
callsign TC2010WBC during the 2010 FIBA Basketball World Championship
in Turkey from Aug 28 until Sep 5.
All QSOs are confirmed via bureau automatically by the end of December.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 4/5: IARU Region 1 Fieldday
Sep 4/5: All Asian DX Phone Contest
Sep 4/5: Independence Day Brazil Contest, check the rules online at:
http://brcontest.com/modules/tinyd0/content/RULES2010INGL.htm
Sep 5: DARC 10m Digital-Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-028, I*5, Toscana Region Group: A team of the ARI Vinci will be active
as IA5/IQ5LV from Pianosa Island (IIA LI-016) from Sep 3-5.
QSL via IZ5ENZ (direct/bureau).

EU-029, OZ, Sjaelland Archipelago: Ulli,DD2ML, and Martina,DD7MR, will sign
5P5L from Lolland Island (DIA SJ-015) from Sep 4-18. QSL via DD2ML.

EU-051, I*9, Ustica Island: Raul,IE9/IC8ATA, is working from Ustica Island
(IIA PA-01) until Sep 4. QSL via homecall.

EU-052, SV, Ipeiros/Dytiki Ellas Region Group: Zdeno,SV8/OK1MBZ/p, is active
from Kerkyra Island (aka Corfu GIOTA INS 042) between Aug 28 and Sep 6.
QSL via homecall (direct/bureau).

EU-136, 9A, Kvarner Group: Csaba,9A/DH7KU, is working from Krk (IOCA CI-046)
until Sep 3. QSL via homecall (direct/bureau).

EU-171, OZ, Jylland North Group: Thomas,OZ/DL4VM, will be QRV mainly in CW
on 40m/30m/15m and 6m from Vendsyssel-Thy from Sep 5-17.
QSL via homecall (direct/bureau).

NA-029, VY2, Prince Edward Island: George,K3GV/VY2, announced to be active
from Prince Edward Island (CIA PE-001) mostly on 15m and 20m from
Sep 1-30. QSL via homecall (direct/bureau).

NA-044, VO2, NFLD Province South Group: Juergen,VO2/NF6J, plans an activity
from Battle Island (CisA NF-049) from Sep 3-10. QSL via homecall.

NA-141, W4, FL State South East Group: Bob,KB2VMG/4, is working from
Key Biscayne between Aug 24 and Sep 3. QSL via homecall.

SA-080, PY6, Bahia State Centre Group: A group of Brazilian HAMs will sign
ZY6Z from the islands Tinhare and Morro de Sao Paulo from Sep 3-7.
QSL via PY6HD (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

IA5/IQ5LV LH 0968 Pianosa Sep 3-5
IE9/IC8ATA LH 0848 Ustica Aug 28-Sep 4
K3GV/VY2 LH 0523 P.E.I. Sep 1-30
KB2VMG/4 LH 1246 Key Biscayne Aug 24-Sep 3
LA2PJ LH 2534 Averoey resident
SV8/OK1MBZ LH 4132 Kerkyra Aug 28-Sep 6

690. [RAC-Bulletin] Hurricane Earl information statement issued by the Canadian,Hurricane centre 9.11 AM ADT Tuesday 31 August 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-08-31 16:16:08 UTC
From: rac-bulletins@eton.ca
Message-ID: <4C7D2A39.2050504@rac.ca>
Source record: 5509
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

WOCN31 CWHX 311200
Hurricane Earl information statement issued by the Canadian
Hurricane Centre of Environment Canada at 9.11 AM ADT Tuesday
31 August 2010.

This is a preliminary statement regarding future impact of hurricane
Earl in Eastern Canada.

Based on the large-scale weather pattern and computer models..
Hurricane Earl will likely play a role in the weather over
Eastern Canada in the Friday to Sunday timeframe. There remains a
broad range of future tracks for hurricane Earl which is now north
Of Puerto Rico and moving northwest. The range of possible track
scenarios are as far west as Maine to as far east as eastern
Newfoundland. Thus..It is too early to describe details of potential
Impacts..But important to realize that a storm of this nature
Affecting land would bring heavy rains..Strong winds..And
Large waves. Regular 6-hourly forecasts from the CHC will commence
Today at 3 PM Atlantic time. As time goes on..We will provide
increasing level of detail as is appropriate.

At this point..Probabilistic computer models show a 40 percent
Chance of tropical storm-force winds (about 70 km/h) over Western
Nova Scotia by the weekend. The probability of hurricane-force winds
Over land is low at this time since we are still about 4 days away..
But we will have more information on that in our afternoon technical
discussion.

The primary message at this point is to stay tuned for updated
Forecasts under this header and the CHC website..And to note
That the Friday to Sunday timeframe is the period of impact or
closest approach to Eastern Canada.

End fogarty/March

For more information and updates, see:

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

September 1, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Up, up, and away - ARRL EME and VHF QSO Party
- Sprints Everywhere - NS, NA, ARS, SK
- VHF+ SOLP Categories Being Considered
- Teen and College Radio
- A SOTA 14-er
- Rookie Roundup Redux
- When a Winch?
- Can You Hear Me Now?
- Trust But Verify

NEW HF OPERATORS - THINGS TO DO

The fall contest season really begins to pick up steam in September -
look at all those contests! Some are all-weekend affairs, but there are
many short "sprint" contests, too. If you're just getting started, the
state QSO parties are great for learning the ropes and working on
awards. If you're into digital operating, there is a lot to choose
from, as well.

BULLETINS

There are no bulletins in this issue

BUSTED QSOS

A golden issue last time!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

September 4-5

- ARRL EME Contest
- NS Weekly Sprint--CW (Sep 3 UTC)
- All Asia Contest--Phone
```

- Russian Radio RTTY WW
- DARC 10-Meter Digital "Corona"
- Colorado QSO Party
- IARU Region I Field Day--Phone
- Straight Key Party
- Tennessee QSO Party
- ARS Spartan Sprint--CW
- Labor Day Sprint--CW
- CWops Mini-CWT Test

September 11-12

- ARRL September VHF QSO Party
- 070 Club KA3X Memorial Sprint--Digital (Sep 10)
- Straight Key Weekend Sprint
- WAE DX Contest--Phone
- Arkansas QSO Party
- Ohio State Parks On the Air
- QRP ARCI VHF Contest
- North American Sprint--CW
- Classic Exchange--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Four new proposals for the Single-Operator, Low Power category are being circulated for comment by the ARRL's VHF/UHF Advisory Committee <http://www.arrl.org/arrl-staff-vuac-cac> (VUAC). Contact your VUAC representative to learn about the options and let them know the option you prefer.

Pete N4ZR reports that the Reverse Beacon Network <http://www.reversebeacon.net/> now makes its raw data available in one-day chunks. (The data is available from the Downloads menu.) Data are contained in zipped CSV (comma-separated values) files - unzipped, the files can contain upwards of 100,000 spots during contest periods! With upwards of 30 Reverse Beacons available, if a station was CQing on a band, you'll find it there.

Dave AB7E has created a Web page <http://www.ab7e.com/weak_signal/mdd.html> to investigate how much difference in signal strength might be noticeable in weak signal and/or contest conditions, with several audio files included as illustration. He doesn't consider it authoritative, but it might be of interest.

The Daily DX <http://dailydx.com/> reports on a talk by NASA's Dr. David Hathaway on "The Solar Dynamo Saga: Chapter 11". Dr. Hathaway predicts the weakest cycle in 100 years with a peak in July-August of 2013. You can browse his Huntsville Hamfest <http://solarscience.msfc.nasa.gov/presentations/20090815_Hamfest.ppt> presentation and review his predictions on the NASA Web site <http://solarscience.msfc.nasa.gov/predict.shtml>.

Who's in and who's out? For club secretaries trying to set up their ARRL Club Competition circles for the fall frays, Gabor VE7DXG sends note of a widget <http://www.barnabu.co.uk/geapi/polyplot/> that draws nice circles on a map, supplying precise coordinates and radius information.

Amateur Radio Direction-Finding - the "other radiosport" - is a Big Deal around the world. Ken WM5R has just released an updated version of the IARU Region II ARDF Web site <http://www.ardf-r2.org/>. Ken notes, "We're coming up on the World Championships <http://www.ardf2010.com/> in 9A-land on September 13-18, 2010. 34 IARU member societies will be at the championships, including the ARRL and RAC from Region II." Here is that young radiosport presence!

The August 2010 issue of IEEE Communications magazine <http://www.comsoc.org/publications/magazines> has a very interesting historical article, "An Early History Of the Internet", by Leonhard Kleinrock. On the figures in the article is an entry in a lab notebook showing the first computer-to-computer communication, "Talked to Stanford". Many technical and college libraries have this magazine in their stacks.

What's old is new again, as seen in this guide to decoding <http://www.teenchatdecoder.com/parental-lookup/teenchat-pq.html> those abbreviations flying by in short-messaging texts. CW operators will recognize ABT (about), BCNU (be seein' you), CUL (see you later), QSL (reply), and QSO (contact). I'm sure there are more in use - for example, GG (going) would be a natural.

Syl, VE5ZX wants to remind everyone that the Canada contest reflector can be subscribed to by sending an email to canada_contest-subscribe@narc.net and information about the list <http://narc.net/about/email_reflectors.shtml> can be found online, as well. This is in addition to the email reflector mentioned in the last issue.

The Central Texas DX and Contest Club <http://www.ctdxcc.org/> held elections last Monday for 2010-2011 officers. They are:
President: Bob Farmer, W9BF
Vice President: Gary Schmidt, W5ZL
Secretary: Jim George, N3BB
Treasurer: Craig Markley, AD5YJ
CTDXCC DX Coordinator: Gerry Moravec, WD5AAM
(Thanks, The Daily DX <http://dailydx.com/>)

Web Site of the Week - The Web site Teen Radio Journey <http://www.teenradiojourney.com/> might be a good resource to help get some young people interested in radio or perhaps find out what interests them. Don't forget to check out College ARC <http://www.collegearc.com/> online, too! (Thanks, Mike K5WMG)

WORD TO THE WISE

The August 2010 issue of the digital newsletter from Make Magazine <http://makezine.com/> featured a list of technical jargon and slang that surely have a home in ham radio. Here are my favorite pair:

Bricked -- To make a device inoperable through an action or an attempted fix that goes awry.

Ejectrode -- A straight pin, paper clip, or other suitable pokey thing used to engage the mechanical eject button on disc drives, SIM card bays, etc. Also used to hit reset buttons.

==> SIGHTS AND SOUNDS

And you think your Field Day site was inconveniently located? This video <http://www.youtube.com/watch?v=gwi5gQeXYis> and slide show <http://picasaweb.google.com/qrp.wg0at/Huron_N0B#slideshow/5503532987790427634> are about the N0B adventure up Colorado's Huron Peak (14,003 ft) with Guy N7UN, Rich AC7MA, and Steve WG0AT accompanied by their faithful sherpas, goats Rooster and Peanut, during the recent Summits On The Air <http://www.sota.org.uk/> (SOTA).

A second and final Potomac Valley Radio Club <http://www.pvrc.org/> (PVRC) Webinar about WRTC 2010 will feature the European teams S50A/S57AW, ES5TV/ES2RR, and the winning team of RW1AC/RA1AIP. The Webinar is free but you must register <https://www2.gotomeeting.com/register/920852130> to view it. (Thanks, Ken K4ZW)

After you've had too many cups of strong coffee, or maybe a six-pack of energy drinks, maybe a lightning storm would look like this <http://www.wimp.com/lightningslowed/>. While you're there, take a look at this unique event <http://www.wimp.com/lightningtruck/>. (Thanks, Jim VE7RF)

If you are into analog electronics, here's an old video explaining tube amplifier design from 1964. It also covers four methods of signal coupling. (Thanks, Ken N4ZED) And for videos about how they made those tubes, try these videos from Philips <http://www.youtube.com/watch?v=VV7cimRWah0> and Mullard <http://www.youtube.com/watch?v=HveUY7eivfI&feature=related>. (Thanks, Pete Lancashire)

==> RESULTS AND RECORDS

The August 18th running of the ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> went pretty smoothly this time and participation was much higher than for the April kickoff edition. Results are available on-line and certificates will be emailed to each Rookie sometime this week. If your Rookie had a good time, the upcoming Tennessee QSO Party <http://www.tnqp.org/> is offering an 18-and-under plaque and many other contests do have special youth awards - check 'em out!

The CQ WPX Online Score Database <http://www.cqwpx.com/score_db.htm>
has been extended back to 1975. Thanks to LB1G, AA4NU, W1MD, AC0DS,
HK1KXA, LU8ADX, and DL8MBS for typing in 1982 to 1975. That's a lot of
work!! All CW results are included back to the beginning of the contest
in 1979. (Thanks, CQ WPX Director, Randy K5ZD)

Results for the Alabama QSO Party <http://www.alabamaqsoparty.org/>
have been posted by the Alabama Contest Group
<http://www.alabamacontestgroup.org/>. (Thanks, Jim KC4HW)

The Michigan QSO Party Organizing Committee announces that the official
results of the 2010 MiQP <http://www.miqp.org/> are now available
on-line. (Thanks, Dave K8CC)

OPERATING TIP

Slashed zeros - not so much an on-the-air but an on-the-keyboard tip,
resist the urge to replace the 0 in your Cabrillo log with 0. The
slashed-zero character in many fonts is not the ASCII numeral zero
(ASCII code 48), but a different character with an ASCII code of 216 or
248. That really screws up a computer trying to read your log. Some
fonts do display the 0 with a slash and still put good old ASCII code
48 in the electronic file. Eric K3NA recommends the fixed-width font
Dina <http://www.donationcoder.com/Software/Jibz/Dina> as excellent for
both on-screen and print applications.

==> TECHNICAL TOPICS AND INFORMATION

Winches and hoists - What is the difference between and winch and a
hoist <http://www.americanwinchesandhoists.com/>? A winch is for
pulling and a hoist is for lifting. Hoists are geared differently and
have locking brakes to hold a load. Be sure to know the lifting versus
pulling capacities of whichever you decide to use - some winch/hoist
products can do both jobs, but not with the same capacity. (Thanks, Jon
W4ABC)

Fans of Bob Pease's writings about electronics (and other subjects)
will be glad to know that Electronic Design
<http://electronicdesign.com/search.aspx?query=Pease%20Porridge&sort=pubdate+desc>
has collected his "What's All This..." columns online - all 456 of
them.

What can you do with a 10-foot diameter satellite dish? The gang at
Slashdot.com <http://ask.slashdot.org/comments.pl?sid=10/08/26/1235232>
had a good time with this conundrum. You might imagine some of the
radio-oriented uses, but there were quite a few other uses, as well.

The Dentron AT-3K antenna tuner is a heavy-duty, full-power model
occasionally seen at hamfests and in online swap and auction sites. If
there's no documentation with it, you're not out of luck because Jim
K5LAD just had the same problem and solved it for you by posting a
collection of information
<http://www.hayseed.net/%7Ejpk5lad/Assorted%20Ham%20Stuff/Dentron%20AT-3K%20Tuner/Dentron_
AT3K_tuner.htm>

about the tuner online.

Repainting outdoor enclosures doesn't have to be an expensive exercise. Jim W5IFP recommends self-etching primer from auto parts stores, such as NAPA. Large spray cans only cost a few dollars and the primer is intended to be used on steel, aluminum and fiberglass. (You might want to sand fiberglass to remove loose fibers - using a dust mask and gloves, of course.) Once primed, use a good-quality exterior paint or pickup truck bed liner paint - also available at the auto parts store.

Why is 10.7 cm the wavelength at which measurements are taken to determine the solar flux index? Spaceweather published this interesting article <http://www.spaceweather.gc.ca/sx-2-eng.php> that explains why. (Thanks, Tree N6TR)

Call before you dig - even for ham installations! Every state by law has a free "Call Before You Dig" service funded by the utilities. The usual number is 811, but the online service <http://www.call811.com/> is also available nationwide. The service will find not only your utility services, but any underground feed lines, too. (Thanks, Mike KM1R)

What could you do with a hard drive that weighs "less than a paper clip and is smaller than a postage stamp"? The new 64 Gbyte Sandisk iSSD drive
<http://www.itproportal.com/storage/news/article/2010/8/18/sandisk-debuts-worlds-smallest-64gb-ssd/>
is designed to be soldered directly to PC boards, meaning that it could find its way into all sorts of accessories and gadgets.

Insulation is important for safety and proper operation at high voltages (or at extremely low current levels). Yet the garden variety multimeter isn't sensitive enough to find low-current ground faults and leakage currents. This Nuts and Volts online article <http://nutsvolts.texterity.com/nutsvolts/201009?sub_id=B7EuhEsqyYG2O&folio=42#pg42> shows how to boost the sensitivity of an inexpensive meter to do the job.

Technical Web Site of the Week - The world's first communications satellite, Echo 1 <http://en.wikipedia.org/wiki/Project_Echo>, didn't contain one bit of electronics. A giant, metallic balloon 30 meters across, Echo 1 relayed signals by reflecting them from its 1,048-mile high orbit. Echo 1 was launched forty years ago on Aug 12, 1960. Easily visible to the naked eye, Echo 1 circled the Earth until May 1968. You can see many satellites in the night sky today - check out the Heavens-Above Web site <http://heavens-above.com/> to find visible passes of the ISS and other satellites, including amateur birds. (Thanks, Tim K3LR)

==> CONVERSATION

Trust But Verify

It is getting so routine, the submission of logs electronically, that we don't think twice about generating a Cabrillo-formatted log <http://www.kkn.net/%7Etrey/cabrillo/>, entering an email address, and hitting the "Send" button. Click, clack, and it's done. Or is it? Any log handler or checker will tell you that it's often NOT done!

How many of my readers out there take the time to carefully read the message returned from the log-handling robot? First, you might THINK that if the robot sent you a return message, all is well. Maybe not. Let's back up and start with the simplest of information - what you sent during each QSO. You might be surprised at how common it is for the information in a QSO: line not to agree with what you actually sent during the contest. To generate the Cabrillo QSO: line, most logging software relies on stored personal data you. If you have something else programmed in your CW messages, for example, the program doesn't check those!

Moving around as I do, I often change QTH from one contest to another. More than once, I've checked my Cabrillo output file and found that I had forgotten to change my stored QTH to the correct one. As a result, the sent exchange in my log is wrong. And maybe I had the wrong club or mailing address or station call - there are lots of ways to send in the wrong information. Be sure all of your header and QSO: line information is correct before ever emailing the log! (Here's a tutorial <http://www.arrl.org/cabrillo-format-tutorial> about the Cabrillo format standard and if you are using a general-purpose logging program, several log converters <http://www.dxzone.com/catalog/Software/Log_Converters/> are available.)

The next problem may be that the category information you send could be incorrect for the contest. Again, most logging software will let you select from quite a number of category choices - not all of which are allowed in the contest. For example, there is no Single-Op, Assisted (SOA) category in the ARRL 10 Meter Contest - only Multioperator (MO). If you send in your log as SOA, the robot will take its best guess at what the correct category is (MO) and will tell you about it in the message it returns to you. Yes, you will get a receipt number for the log but the category to which your log is assigned may not be what you expect! Read the response message!

All of the information about your log has to be in that Cabrillo log file, by the way. In all likelihood, no human will ever read your subject line or any notes in the body of the message. The robot files your email under the call sign in the subject line, opens the Cabrillo text attachment, and responds accordingly. All the rest is probably going into the "bit bucket", so notes about how far off your PC clock was or soapbox comments about conditions - all those disappear before any human will see your log data. Put those notes in the Cabrillo header using SOAPBOX: lines where they can be harvested by the log checking software.

Let's say everything went perfectly - all of your information was correct and the response message from the robot has the correct claimed score and category. Excellent! Now comes the "verify" part. Most sponsors will maintain an on-line list of all logs received, including the claimed score and category. For example, the ARRL's Log Received Web page <http://www.arrl.org/logs-received> maintains an up-to-date list of every log received and processed by the robot. If you received a receipt number from the robot, then your score should soon appear in the list. Double-check that your call, QTH, category, and score are all as you expect. If not, check that robot message again. If the robot message looks good, contact the sponsor, such as ARRL Contest Branch Manager, Sean KX9X.

There's almost always plenty of time to get it right, so there should be no unpleasant surprises when the results are printed and someone has to experience the dreaded, "Where's my score!!!" fantod. The automated process and Cabrillo format have made log submission a breeze and the quality of the final results better than ever, but you still have a crucial role in providing the "right stuff" - trust, but verify.

73, Ward N0AX

==> CONTESTS

1 September through 14 September

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

NS Weekly Sprint--CW, from Sep 3, 0230Z to Sep 3, 0300Z. Bands (MHz): 1.8-14. Frequencies: Every Thursday evening (local). Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

All Asia Contest--Phone, from Sep 4, 0000Z to Sep 5, 2400Z. Bands (MHz): 3.5-28. Exchange: RS and age ("00" for YL). Logs due: Oct 31. Rules <http://www.jarl.or.jp/English>

Russian Radio RTTY WW--Digital, from Sep 4, 0000Z to Sep 4, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and oblast or WAZ zone. Logs due: Oct 1. Rules <http://www.radio.ru/cq/contest/rule-results/index2.shtml>

DARC 10-Meter Digital "Corona"--Digital, from Sep 4, 1100Z to Sep 4, 1700Z. Bands (MHz): 28. Exchange: RST and serial. Logs due: 2 weeks. Rules <http://www.darc.de/referate/ukw-funksport>

Colorado QSO Party--Phone,CW,Digital, from Sep 4, 1200Z to Sep 5, 0400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--1.850, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.850, 7.250, 14.250, 21.350, 28.450. Exchange: Call sign, name, and county or S/P/C. Logs due: Oct 5. Rules <http://www.ppraa.org/coqp>

IARU Region I Field Day--Phone, from Sep 4, 1300Z to Sep 5, 1300Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: 16 days. Rules: See IARU Society Web pages

Straight Key Party--CW, from Sep 4, 1600Z to Sep 4, 1900Z. Bands (MHz): 7. Exchange: RST, serial, category, name, age. Logs due: Sep 30. Rules <http://www.agcw.org/>

Tennessee QSO Party--Phone,CW,Digital, from Sep 5, 1800Z to Sep 6, 0300Z. Bands (MHz): 1.8-28, 50+, Frequencies: See Web site. Exchange: RS(T) and county or S/P/C. Logs due: Oct 8. Rules <http://www.tnqp.org/>

ARS Spartan Sprint--CW, from Sep 6, 0200Z to Sep 6, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

Labor Day Sprint--CW, from Sep 6, 2300Z to Sep 7, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP nr or power. Logs due: Oct 7. Rules <http://miqrp.org/>

CWops Mini-CWT Test--CW, from Sep 8, 1100Z to Sep 9, 0400Z. Bands (MHz): 3.5-14. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

070 Club KA3X Memorial Sprint--Digital, from Sep 10, 8 PM to Sep 11, 2 AM. Bands (MHz): 3.5. Frequencies: 3.580. Exchange: Call sign, RST and S/P/C. Logs due: Oct 11. Rules <http://www.podxs070.com/>

Straight Key Weekend Sprint--CW, from Sep 10, 0000Z to Sep 10, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

WAE DX Contest--Phone, from Sep 11, 0000Z to Sep 12, 2400Z. Bands (MHz): 3.5-28. Exchange: RS and serial. Logs due: Sep 28. Rules <http://waedc.de/>

Arkansas QSO Party--Phone,CW,Digital, from Sep 11, 0800Z to Sep 11, 2000Z. Bands (MHz): 3.5-28, 144, Frequencies: CW--3.550, 7.050, 14.050, 21.050, 28.050; Phone--3.980, 7.260, 14.260, 21.360, 28.360, 145-147. Exchange: RS(T), county or S/P or "DX". Logs due: Nov 1. Rules <http://www.arkanhams.org/>

Ohio State Parks On the Air--Phone,CW,Digital, from Sep 11, 1600Z to Sep 11, 2400Z. Bands (MHz): 3.5-28, 50,144. Exchange: "Ohio" or S/P/DX and Park ID. Logs due: 30 days. Rules <http://parks.portcars.org/>

ARRL September VHF QSO Party--Phone,CW,Digital, from Sep 11, 1800Z to Sep 13, 0300Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Oct 13. Rules <http://www.arrl.org/contests>

QRP ARCI VHF Contest--Phone,CW,Digital, from Sep 11, 1900Z to Sep 12, 0400Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Oct 13. Rules

<http://www.qrparci.org/>

North American Sprint--CW, from Sep 12, 0000Z to Sep 12, 0400Z. Bands (MHz): 3.5-14. Exchange: Call signs, serial, name, and state. Logs due: 7 days. Rules <http://www.ncjweb.com/>

Classic Exchange--CW, from Sep 12, 1300Z to Sep 13, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies: 1.820, 3.545, 7.045, 14.045, 21.135, 28.05, 50.1, 144.1. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

VHF+ CONTESTS

ARRL EME Contest--Phone,CW,Digital, from Sep 4, 0000Z to Sep 5, 2400Z. Bands (MHz): 2.3G+. Exchange: Both call signs, sig rpt, acknowledgement. Logs due: Nov 30. Rules <http://www.arrl.org/contests>

ARRL September VHF QSO Party--Phone,CW,Digital, from Sep 11, 1800Z to Sep 13, 0300Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Oct 13. Rules <http://www.arrl.org/contests>

Colorado QSO Party--Phone,CW,Digital, from Sep 4, 1200Z to Sep 5, 0400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--1.850, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.850, 7.250, 14.250, 21.350, 28.450. Exchange: Call sign, name, and county or S/P/C. Logs due: Oct 5. Rules <http://www.ppraa.org/coqp>

Tennessee QSO Party--Phone,CW,Digital, from Sep 5, 1800Z to Sep 6, 0300Z. Bands (MHz): 1.8-28, 50+, Frequencies: See Web site. Exchange: RS(T) and county or S/P/C. Logs due: Oct 8. Rules <http://www.tnqp.org/>

Labor Day Sprint--CW, from Sep 6, 2300Z to Sep 7, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP nr or power. Logs due: Oct 7. Rules <http://miqrp.org/>

Straight Key Weekend Sprint--CW, from Sep 10, 0000Z to Sep 10, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

Arkansas QSO Party--Phone,CW,Digital, from Sep 11, 0800Z to Sep 11, 2000Z. Bands (MHz): 3.5-28, 144, Frequencies: CW--3.550, 7.050, 14.050, 21.050, 28.050; Phone--3.980, 7.260, 14.260, 21.360, 28.360, 145-147. Exchange: RS(T), county or S/P or "DX". Logs due: Nov 1. Rules <http://www.arkanhams.org/>

QRP ARCI VHF Contest--Phone,CW,Digital, from Sep 11, 1900Z to Sep 12, 0400Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Oct 13. Rules <http://www.qrparci.org/>

Classic Exchange--CW, from Sep 12, 1300Z to Sep 13, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies: 1.820, 3.545, 7.045, 14.045, 21.135, 28.05, 50.1, 144.1. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

692. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2010-09-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1283320800@panix.com>
Source record: 5511
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Ohio/Penn DX Special Bulletin No. 974.1
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 974.1
BID: $OPDX.974.1
September 1, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Eric/N3NA and the Radio Expeditions, Inc. for the following DX information.

For immediate release...

On 2010 August 31 the Refuge Manager at US Fish & Wildlife Service (FWS) notified the Radio Expeditions Inc team that it will receive a permit to conduct the next DXpedition to Jarvis Island (KH5).

The selection of a team to visit Jarvis is the most recent step in a long procedure that began in 2009 June with a visit by Radio Expeditions management team members to the Honolulu FWS office.

The administration of the Jarvis Island National Wildlife Refuge is conducted according to goal set in the Comprehensive Conservation Plan, which was finalized on 2008 Sep 24. You can read this Plan here: http://www.fws.gov/pacific/planning/main/docs/HI-PI/HBJ/JARVIS_Final%20CCP.pdf

During the first half of 2010 the FWS staff developed a draft "Compatibility Determination for Amateur Radio Operations at the Jarvis Island National Wildlife Refuge". This document contains the rules and constraints for DXpeditions at Jarvis. Simultaneously Radio Expeditions Inc submitted an initial application for a permit and, together with the owner of the "MV Braveheart", met again with the refuge management staff in April to discuss plans, constraints, and options.

The draft compatibility determination was made available on the FWS website on 2010 June 21 and public comments were solicited. Radio Expeditions Inc was among the groups commenting on the draft. The public comment period closed on 2010 July 5.

The FWS Honolulu office staff reviewed the comments, made a number of changes, and submitted a final draft for approval at their regional office in Portland, Oregon. On 2010 July 28 the final version was released and is attached to this message. Among the many constraints

is the limit of one DXpedition per 5-year period.

Revised applications for a permit were accepted until a deadline of 2010 August 25. Attached are the application documents submitted by Radio Expeditions Inc. The constraints in the Compatibility Determination required a radical restructuring of our plans, reducing both the number of stations and the time on the air.

Since more than one group submitted an application which met the requirements of the compatibility determination, a lottery among the qualified groups was held at the FWS Honolulu office by the refuge manager on 2010 August 30. Radio Expeditions Inc was fortunate to be selected.

Due to the time required to establish the rules for amateur radio operations in the Refuge, the late selection date, and the lead time required to schedule and prepare the MV Braveheart, the expedition has been postponed one year until 2011 November. November remains the best month to visit Jarvis Island from a propagation standpoint, with the largest combination of openings predicted to Europe on both 160/80 and 12/10 meter bands.

Members of the email distribution list will receive additional messages over the next few months on the DXpedition plans, including details about how the project will comply with the many restrictions imposed on amateur radio operations at Jarvis.

-------- Original Message --------
Subject: Amateur Radio expedition to Jarvis Island NWR
Date: Tue, 31 Aug 2010 16:03:27 -1000
From: Beth_Flint@fws.gov
To: Eric Scace K3NA <Eric@RadioExp.org>, "JayKay" <pcb4u@verizon.net>
CC: Susan_White@fws.gov

Dear Applicants for a permit to carry out an amateur radio expedition to Jarvis Island in 2011,

We received 2 applications for this expedition and reviewed both of them carefully to ascertain if the described operation met the constraints described in the stipulations of the Compatibility Determination for Jarvis Island National Wildlife Refuge to engage in amateur radio operations.

Both applications met those standards. Because we are only able to issue one such permit every 5 years we identified the application that would be given the permit by a coin toss witnessed by two individuals unfamiliar with the situation. The random result of this coin toss is that the permit will be issued to Radio Expeditions, Inc. represented by Eric Scace.

We appreciate the hard work, patience, and cooperation of both parties applying in working with us to ensure that these kinds of activities can be carried out in a manner compatible with the wildlife conservation

purposes of the National Wildlife Refuge.

Sincerely,

Beth Flint

Believe it or not we finally have the cause of Gravity !

A correct theory of gravity will show us these four (4) things:

1. It will show us why gravity also acts like acceleration (principle
of equvalence).
2. It will show us the actual cause of gravity.
3. It will show us why gravitational mass and inertial mass are
identical.
4. It will show us the speed of gravitational attraction.

Newton said gravity was acting at a much faster speed than Einstein.
Which one of them was right?

AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 5 2010

WIA Centenary Update

Our newest radio club celebrates the Centenary

The Macedon Ranges Amateur Radio Club successfully operated VK100WIA from
the 18th to the 20th of August from a combination of member's homes and the
Woodend Scout Hall.

Club members arrived at the scout hall early on the Friday with rain, wind
and sleet, the local temperature about 2.5 degrees and reports of snowfall

on the nearby Mt Macedon.

While the chill are being addressed inside the hall by way of a wood fire and gas heater, there were six members outside in the wind and on water-logged ground while erecting a multi-band aerial support by gum trees.

Club member Peter Wolfenden VK3RV mounted a small historical display within the hall while others set-up the operating station.

For the next 12 hours it was a busy time operating on 80M, 40M, and 20M using SSB and CW.

The 2M repeaters and a specially installed IRLP node courtesy of Graeme VK3NE McDiarmid and John Nunan VK3IC was also used.

A great time was had by all especially Joe Aprile who managed to "snag" a number of stations in Italy on 20m by calling them in Italian, although it sometimes took a while for him to explain the significance of the VK100WIA call sign.

On the Friday night, the main scout hall filled with about 100 scouts, Leaders and parents, while VK100WIA continued in full swing in a backroom with operators Luke Steele VK3HJ and Peter Wilmott VK3TQ.

Later Peter VK3TQ, who is also a scout leader explained the operation of the amateur centenary station.

Other club members on the three-day operating roster were Ron Burman VK3ZJ, Bob RobinsonVK3SX, Ray Tampion VK3YAR, Peter Wolfenden VK3RV, Jenny Warrington VK5ANW/3, Colin SmithVK3YWY, Richard Hoskins VK3JFK and Gary Greer VK3GSG.

In all more than 600 contacts were logged. And to top it off the club gained publicity in the Macedon Ranges Leader newspaper with a story and photograph.

Well done to Victoria's, and possibly Australia's youngest radio club on its support for the world's oldest national radio society, the Wireless Institute of Australia.

The Hunter Radio Group

The September monthly meeting of the Hunter Radio Group will be held Friday 10th of September at the NBN TV Studios, Newcastle. After general business, the lecture will be presented by Tim Mills, VK2ZTM. It will be on the 100 years of the W.I.A.

Lockyer Valley Radio and Electronics Club - online log update

On last week's broadcast we reported that the club had done well with its VK100WIA associated activities including plenty of DX contacts. At the time it was believed that Lockyer Valley Radio and Electronics Club in Queensland had made 337 contacts, based on the online log for VK100WIA.

It was later learnt that the club was not able to immediately record contacts on the online log, which is okay.

Now that the online logging task has been completed, it shows a whopping 927 contacts, and some 248 of these were on CW.
The club worked 31 countries, six continents, 23 zones, and 229 callsign prefixes! Well done!

A milestone for the WIA Centenary Award

Claims continue to steadily arrive for this limited edition operating award celebrating the Centenary of Organised Amateur Radio in Australia with more than 160 now issued.

The first from Hawaii, is also the 100th award certificate, and it goes to Dan Greeson KH6P. Congratulations! This achievement is sure to be the subject of plenty discussion when he and other members of the Honolulu Amateur Radio Club meet this month.

The first radio club to get the award is the Moorabbin and District Radio Club VK3APC.

Also receiving his award certificate is Franck Alcidi VK8FNCY of Palmerston in the Northern Territory. Franck, a new radio amateur who in May made his very first ever contact on air, with VK100WIA.

Now he has the WIA Centenary Award Certificate proudly displayed in his radio shack. He joins ten other Foundation Licensees now qualifying for the WIA Centenary Award and their first amateur radio operating award.

Some of the award claims have included personal comments, many simply to congratulate the WIA on its Centenary and making the award available.

Winston Henry VK7WH said, "I have held a licence since 1958 but have been QRT the past 30 years. It was the Centenary of the WIA that was the catalyst to get back on the air and rejoin the WIA."

The special callsign VK100WIA will be on air until the end of October. Claims for the award close on the 30th of January 2011. Eligibility requirements and full details can be found on the WIA website
www.wia.org.au

A look ahead at the VK100WIA roster

The special callsign returned to Tasmania today with Cradle Coast Amateur Radio Club operating it from the 5th to the 7th of September, including 10am to 4pm at the Maritime Museum in Devonport.

The public has been invited to the museum to see the Centenary of Organised Amateur Radio station in operation, plus a display or historic radios and computer presentations.

Listen for it on 7090 kHz, plus 2m and 70cm FM. In the evening club members will put VK100WIA on air from their home QTH?s on 3590 kHz plus or minus QRM.

On Wednesday, Thursday and Friday, the Sunshine Coast Amateur Radio Club that is also celebrating its 40th anniversary, will activate VK100WIA 24 hours a day, on the HF, VHF, UHF, Microwave bands, and some E-M-E moon bounce.

Then next weekend the Tablelands Radio and Electronics Club will be operating from Barrabadeen, combined with its social gathering held in conjunction with the club's annual general meeting. The bands to be used are HF, 6m, 2m and 70cm.

International Space Station Contact with South Hobart Primary School

On Friday 27th August at about a quarter to five students from the South Hobart Primary School got the opportunity to ask questions of US Astronaut Colonel Doug Wheelock as he flew over the Goddard Space Flight Centre in Maryland USA.
The telebridge contact was organized through the Amateur Radio on the International Space Station program.

Let's listen in to one of the questions asked by Student Reuben-.

<Student Audio in here>

We received great media coverage of the event in the local press, the Southern Cross Radio Network before the event and 7 minutes on ABC Local radio after the event on Michael Veitch's morning program.

<Veitch audio grab>

A special thank you to Tony VK5ZAI, the Australian ARISS Coordinator and his dedicated team of volunteers who made this all happen.

(73,Justin, VK7TW)

Tune In To The World - Amateur Radio Gets People Talking -
WIA National Field Day

Registrations are open for the WIA National Field Day, 23rd of Oct. Club coordinators and individuals participating are requested to register via a online information form on wia.org.au

Look for the links under the WIA Centenary Celebrations or Contest pages.

Registration with a password will enable the coordinator to update details and clothing order as details become available. It is anticipated that the clothing pricing will be available at the end of coming week.
Please see the webpage for updates.

The new catchphrase and logo is available on the information page.
PDF Print files for various sized banners and posters will be available for download in PDF format from the bottom of the web page.

Also Officeworks catalogue numbers will be provided for each of the display banners that corresponds to the correctly sized artwork file for download.
Interested participants will be able to download a piece of artwork off the

website, put it on memory stick and simply take it to the local Officeworks store who will produce the poster or banner as required.

Rules for the contest are in September AR magazine.

The current rules and checklist are also available for download via the WIA National Field Day webpage.

The WIA look forward to seeing the innovative locations that your club selects for your event.

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

Amateur Radio New South Wales Radio Homebrew and Experimenters Group.

The next meeting of the group will be the informal meeting on the first Tuesday of the month that's the 7th of September. These are informal meetings where interested amateurs get together to discuss their latest projects or ideas regarding amateur radio. The only major rule of the meetings is to finish at 9pm, so it will not be too late for those who have to go to work in the morning.

So if you want to meet other amateurs interested in home brewing their own radios, or you are looking for a new challenge in the hobby, then go along and join in.

Central Highlands AGM stop press date change

The date for the famous and popular Central Highlands Amateur Radio Club AGM at Camp Fairbairn near Emerald has been CHANGED !
Due to unforeseen circumstances, the AGM will now be held from 4pm Friday 24th to Midday Sunday 26th September.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

Our history has been filled with the fears of change as technology evolves and seems to displace the order we have been comfortable with. So it has been with this hobby, in some ways. The historical fact that Morse code was the technique used to establish effective radio communications was made a sacred symbol, never to be relinquished.

More recently, the great Packet revolution came and went and some of the adherents of RF only communications railed at the moon as to how the world was doomed by the forwarding of traffic via internet worm-holes rather than

station to station links using "radio". Well the insatiable curiosity that propels mankind has seen the evolution of many digital modes and revitalisation of lapsed modes. Very slow Morse and Hellschrieber are 2 modes that pre-date most of us current amateurs but are available because of current technology.

Similarly, there have been the cries of the VOIP modes are killing "real" radio. There still remains an antipathy between IRLP and Echolink proponents but now we have D-Star and Wires. This is evolution.

In some QSP from VK4KEV, Kevin advised an update to his QRZ web page details. This was that he hopes to be using VK0KEV from Macquarie Island later this year. That information has gone viral amongst the DXers thanks to the internet.

To paraphrase, the internet killed the radio star - I don't think so.
I'm Geoff Emery and that's what I think, how about you?

CLUBBING -

Again I remind you that the Queensland Club President's lunch will be held in Rocky, hosted by the Rockhampton & District Amateur Radio Club.

The venue will be the Rockhampton Leagues Club, George Street, Rockhampton.

The doors will open at 12:00 on Sunday 14th November, to start lunch at 12:30. Prior to the lunch, Michael Owen will visit the radio museum at the Rockhampton Heritage Village, starting at 08:30am, and will participate in the news call-back on the 2 metre repeater at 9:45am.

Following lunch, presentations on WIA, and amateur radio issues, will be made by WIA President Michael Owen. There may be additional speakers, to be advised.

The WIA will sponsor the cost of the room, and the cost of lunch will be $24-, to be paid on the day by each attendee. This will include a served meal of beef, chicken, or fish, followed by a desert. Special dietary requirements can be arranged if required.

The intention of the lunch is to have as many Queensland clubs represented as possible.

The RADAR Club will be able to assist with transport from airports and railway stations if required.

Please advise if you wish to attend. Please advise the lunch organiser RADAR Club Secretary Clive Sait vk4acc@wia.org.au

Regards,

Don Wilschefski VK4BY

WIA Queensland Advisory Committee Chairman

Ipswich & District Radio Club
P.O. Box 250

Ipswich Qld 4305
http://ipswichdistrictradioclub.webnode.com/

The Ipswich & District Radio Club held its AGM on August 23rd and saw the election of new Office Bearers.

Re-Elected as President for the 5th year in a row - Mike Charteris, VK4QS.

The Club's new Vice President is Darrin Last VKFVRX who formally held the position of Club Secretary for the last two years.

The position of Treasurer has once again been filled by the very capable John Edwards VK4IE. John was unanimously voted by those present to undertake this valuable role of holding a tight grip on the purse strings.

The position of Scribe -Club Secretary - has been filled by the newly elected Jamie Ware, VK4JY.

Robert Bryce VK4HW has been elected as Station Manager, as his past track record sees him most aptly positioned to fill his vital role at the club.

This was followed by the election of Derek Toreaux, VK4MIA, as Radio Contest Manager. Finally the election of the person to carry out Public Relations has fallen to yours truly Allan Roebuck VK4FABR.

In other news from the Ipswich region - What prompts some 1200 otherwise normal people to mount their bicycles and ride 100 km along the rugged Bicentennial National Trail which covers long steep climbs and downhill tracks over generally very rough ground. I'm told it's a great adrenalin rush.

Mobile phone coverage is very poor along the route, and mountain biking is Among the most hazardous sporting activities. Therefore the organisers ask the Ipswich and District Radio Club us to provide safety communications in case of accidents needing a medical response.

The undulating country making phone coverage bad also makes radio patchy. One repeater cannot cover the course and the three checkpoints (all in different valleys), so we have to use two repeaters, linked together on UHF.

The Wicen crew for the event included one base operator, 2 operators at each of the 3 checkpoints, one person for the sweep vehicle and the two repeater personnel.
Communications for the event worked well and there was only one emergency which happened near check point 2 that eventually was not as serious.

A special thanks to all those who volunteered to assist again this year,
I'm Allan VK4FABR.

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

Over the weekend of 11 and 12 September the Maryborough Electronics and Radio Group, Inc. will be assisting in the 2010 Maryborough Technology Challenge

- this year sponsored by the RACQ.

http://www.technologychallenge.com.au/

Amongst the annual events for schools, this weekend features the endurance event of the 24 hour human powered bicycle race. With the course running around a complete city block, safety and control has to be ensured. An army of local volunteers fill the roles of marshals, caterers, administrators and race officials. Providing the comms for this race has been the privilege of MERG for successive years.

This year MERG is inviting radio operators who would like to participate in controlled or closed net exercise for a few hours to contact Ray, VK4TPT via the MERG listing on wia.org.au

If you are passing through the Wide Bay and Maryborough, in particular, why not come along and see the events being held during the 2010 RACQ Technology Challenge.

SUNSHINE COAST

VK100WIA and Sunfest

SCARC has use of the VK100WIA callsign on 8th through to 10th of September this year. This is leading up to the annual Sunfest that will be held in the same location as the past few years at the Woombye School of Arts building in the main street of Woombye starting from 09:00.

The usual tables of equipment will be there along with great food and friendship.

See you there next Saturday

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC in Far North Queensland.

This week saw TREC members participate in a communications support event for the Far North Horse Endurance Riders. The ride was conducted overnight along forestry trails on the Atherton Tablelands. It was a cool evening with a few light showers.
Members manned checkpoints along the route and provided a safety mantle and logistic support for the riders. A couple of the operators even set up HF stations and worked DX - as any good ham would Hi Hi.

TREC is gearing up for our Annual General meeting to be held in conjunction with the 3 day activation of the VK100WIA special event call-sign from Lake Tinaroo near Atherton on 11, 12, and 13th September. Going on what I

have heard and worked around the bands it should be a busy 3 days on air.

Dale VK4DMC

VK5

David Clegg says that Sunday September 19th the AHARS will be presenting a technical symposium at their Belair clubrooms, commencing 9.30.
Keynote speakers are Drew Diamond, Home construction, Rob Gurr, early SSB techniques Keith Gooley and Iain Crawford, Microwave construction techniques and Phil Harman, HPSDR Several demonstrations will be held during the breaks.

Admission will be $20, pay at the door, This includes morning and afternoon tea and lunch.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

NEXT SUMMERLAND FOUNDATION COURSE 25/26 SEPTEMBER.

Yes the Foundation licence course will be held at the clubrooms on the weekend of 25/26 September.

The cost of the course is $20 and the text book is available from the club or the WIA for about $25.

For more details contact Duncan VK2DLR on 02 6628 1337

or e-mail education@sarc.org.au

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

The ARRL is again saying no to sharing the amateur radio spectrum with public safety robots. Last month the League filed a Petition to Deny Applications with the FCC to reject 68 pending Public Safety Pool license applications associated with the ReconRobotics Video and Audio Surveillance System.

Each license application is accompanied by a waiver request to permit operation of the devices in the 433 to 445 MHz band. The applications were coordinated by APCO International Inc Licensing Services and would allow the use of the Recon Scout product currently being marketed by ReconRobotics pursuant to an FCC waiver. APCO International Inc Licensing Services is the frequency coordinator for the public safety land mobile radio services --

Dan Henderson, N1ND, is the ARRL's Regulatory Information Manager. He says that while several issues factor into the League's Petition to Deny these applications, most notable is that the Commission has not acted on an earlier ARRL Petition for Reconsideration in WP Docket 08-63, which has been pending since March of this year. Henderson sat that petition raises issues that should be addressed prior to any action on the individual applications. He says that granting applications based on the Docket 08-63 waiver, which is not final, would be premature.

Henderson goes on to note that there is the potential for significant interference from these devices to licensed operations in the amateur 70 cm band. Therefore the ARRL urges the FCC to take thoughtful and expedient action on our Petition for Reconsideration.

==========

NEWS FROM ARNEWSLINE

ALLEGED MURDERERS OF N5VGH AND HIS WIFE CAPTURED

The last two of three alleged killers of Gary Haas, N5VGH, and his wife Linda have been captured in Arizona. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here with the details:

Authorities in Arizona say it was the suspicions of a forest ranger about an unattended campfire and a vehicle backed into trees which helped lead to the arrests of John McCluskey and Casslyn Welch.

They say the two were hiding out in a campground southeast of the Sunrise Ski Resort in Apache County, Arizona, when the ranger made the discovery and called federal authorities.

After checking the license plate of the car, authorities found it matched a vehicle missing from Santa Rosa, New Mexico and suspected McCluskey and Welch were responsible for the theft.

Investigators say the car came from an area where authorities discovered the bodies of Gary Haas and his wife in a burned-out trailer.

In charging documents released by the U.S. Attorney's office in New Mexico, graphic details of events leading up to the couple's murder were spelled out.

Investigators say McCluskey, Welch, and another man, identified as Tracy Allen Province carjacked the couple's pickup truck and their camper trailer on Aug. 2 at a rest area off Interstate 40 in Quay County, New Mexico.

Authorities allege the trio forced the couple to drive to an area between Tucumcari and Santa Rosa, New Mexico where they stopped. It was there, investigators say, McCluskey took the couple at gunpoint to the camper trailer and shot them, killing both.

With the bodies still in the camper, the fugitives drove to a remote area of Guadalupe County in New Mexico where they unhitched the camper trailer and set it on fire with the couple's bodies still inside. The burned out trailer with the couple's remains inside was found August 4th.

That led to a massive manhunt for McCluskey, Province and Welch. It is believed Welch helped McCluskey and Province and another inmate, Daniel Renwick to escape from a private prison in Arizona.

Renwick split from all of them right away and was captured in Colorado a few days after the breakout.
Province then split from the couple and was captured in Wyoming on Aug. 10.
McCluskey and Welch, who were first cousins and fianc&#65533;es, remained on the

Iam for another nine days.

All are jailed in lieu of very high bail and facing a host of serious charges ranging from kidnapping to murder.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

If found guilty at a federal trial, McCluskey, Province and Welch would face either life in prison without the possibility of parole or death by lethal injection.

HOW TO QSL CYPRESS DX STATIONS

The QSL Bureau of the Cyprus Amateur Radio Society says that it is receiving large numbers of QSL's that cannot be delivered to the intended recipient. This is because that station has a QSL manager outside Cyprus.

According to 5B4AHJ who is the society's QSL Bureau Manager, the problem is threefold. Those generating the QSL's are not bothering to check to see if the station has a manager. And, even if a manager's call is written on the QSL, many QSL Bureaus are still sending the QSL to Cyprus. Lastly. QSL's for calls 5B DXcalls are being sent to Cyprus when either they should be sent to the operators QSL manager, or in the absence of a manager, they should be sent to the bureau for the home call.

5B4AHJ says that he has produced a list of stations with foreign managers for Cypress stations. It's on line at tinyurl.com/cypruscalls.

VK6LC is operational as XV2LC through September 10th from Ho Chi Minh City and as XV4LC from the Mekong Delta. Listen out for him primarily on CW with some SSB. QSL via VK6LC.

The great expectation of DX quadruplets

The five islands of the Netherlands Antilles in the Caribbean Sea are to undergo constitutional status changes on the 10th of October and result in a four new DXCC entities.

Sint Maarten PJ7, Curacao PJ2, Bonaire PJ4, each are to become a DX entity, while Saba PJ6 and Sint Eustatius PJ5 combined, are set to be a single entity due to their close proximity.

There are two announced DXpeditions to Sint Maarten, and one each to Saba, Bonaire and Curacao, with that island also being the venue at the time for the Global Amateur Radio Emergency Conference GAREC-2010.

The DX community is waiting for the 10th day of the 10th month 2010 for the new DX entities

Two existing DXCC entities, PJ2/PJ4 Leeward Islands and PJ5/PJ6/PJ7 Windward Islands, is said to be set for deletion at the same time.

Aruba P4 seceded from the Netherlands Antilles in 1986 and gained DXCC entity status at that time.

I'm Jim Linton VK3PC and you're listening to VK1WIA.

RADIO MEMORIAL: PA CLUB TO HOLD ON-AIR 911 OPERATION

Look for special event station N3U slash United Flight 93 will be on the air between September 9th to the 13th. This to commemorate the lives lost in the wanton acts of terrorism against the United States by agents of al Quida that took place on September 11, 2001.

This operation is to be sponsored by the Blair Amateur Radio Society, W3PN, along with various local, state and government agencies. These include the City of Altoona, Blair County Pennsylvania, the Red Cross and several others. Operators at N3U will include W3BTX, W3TEF and other W3PN club members.

Listen for N3U slash United Flight 93 on 160 through 6 meters using CW and SSB. QSL N3U/Flt 93 via W3PN, by the Bureau or direct. Please include Self Addressed Stamped Envelope with enough postage to reach your location.

www.cq-amateur-radio.com/WorldRadio.html

The September edition of Amateur Radio magazine

Editor Peter Freeman VK3PF in his editorial discusses continual improvement and self-education, now part of many workplaces, is equally applicable to amateur radio.

He mentions a range of opportunities for us to learn more and be better informed.

The WIA President Michael Owen VK3KI in the WIA Comment section discusses the 'Tune in the world - amateur radio gets people talking'- the National Field Day being held on Saturday the 23 of October.

Also published are the rules and full details of this public relations exercise to promote our hobby.

There are stories about the re-enactment in July of the First UK-Australia Press Message between Wales and Koo-Wee-Rup in Victoria.

An insight into the Welsh end of the re-enactment involving the Dragon Amateur Radio Club in North Wales GB2VK is provided by Jim Linton VK3PC, while a reproduced newspaper clipping has information on the Gippsland Gate Radio and Electronics Club's VK100WIA end of the re-enactment.

Amateur Radio magazine, a WIA membership service and also available at selected newsagents.

This is Barry Robinson VK3PV, I will be report more on the contents of September edition Amateur Radio magazine in next week's VK1WIA broadcast.

American musician and song writer Joe Walsh WB6ACU, best known as a guitarist with The Eagles, has described how his amateur radio technical knowledge came in very handy when he was starting out in his career.

Let's listen into a segment from a syndicated radio program to learn more.

(VK1WIA studio play audio that ends with 'I'd make a great roadie for someone I tell you.')

[TRANSCRIPT: In an on air question time session on Eagle Radio, Joe gets a call from a listener named 'Billy' who asked him about the role amateur radio had played in his music career. Joe got his callsign in 1961 at about the time he first picked up a guitar. In answer to the question he said, 'Learning some theory about how radios work gave me some knowledge to understand how guitars are wired and how a guitar amplifier works. It turned out to be invaluable because I understood amps enough to mess around and change some parts in them, and soup 'em up. In those days we did not have roadies (technical support crew) .... and when your amp broke and you're playing live you have to do something about it. I could rewire guitars and get different sounds out of it. A quick fix in general was pertaining to survival on those days.' Joe quipped 'I'd make a great roadie for someone I tell you.'

(VK1WIA studio closing text)

The interview ended with caller Billy revealing that he too is a radio ham and the pair exchanging amateur radio greetings.

An interesting piece of radio broadcasting and what great public relations for amateur radio.

(Jim Linton VK3PC)

DAB+

Radio's such as Pure's Sensia are both DAB+ and Internet Radio.

If you have an internet radio such as this, now, the WIA National News can be delivered fresh when you want it direct to the set. Just hit the 'lounge' button and Podcasts and "hey presto" WIA National News comes in loud and strong!

If you are in VK and don't as yet have a DAB+ Radio, you can get the same edition of the WIA news by visiting http://www.thelounge.com

Visit both the lounge.com and http://www.pure.com Link to check out the radios and the podcast and overseas broadcast band stations available

WW SPECIAL INTEREST GROUPS --- DIGITAL
Australian Coordinator for TCPIP domains is Indy vk2xb@wia.org.au

Open Source Digital Voice Codec

David Rowe VK5DGR has released V0.1 alpha of Codec2, a fully function 2550 bit/s codec for Amateur Radio digital voice. It fills a gap in open source, free-as-in-speech voice codecs beneath 5000 bit/s.

It is released under the GNU Lesser General Public License (LGPL).

The lack of a copyright free Codec has impeded the development of Amateur Radio Digital Voice communications at both HF and VHF.

It is hoped Codec2 will eventually be incorporated into DV software such as WinDRM and FDMDV which had relied on a non open source Codec.

Further information on Codec2 and audio samples are at www.rowetel.com/

(SOUTHGATE)

Invitation to go straight, for a week - well, straight key operating that is!

The Straight Key Week is organised by the FISTS CW Club runs from the 5th through to the 11th of September UTC, all HF except the WARC bands.

The contest is meant to be fun and friendly as well as competitive.

Up until this year only straight keys could be used. However the rules have changed to manual side-swiper keys to be used, as long as there is no electronic keying deployed.

That will accommodate those who find straight keying for a long period of time causing discomfort and aggravating any medical condition.

For more information check out the FISTS CW Club, International Morse Preservation Society website www.fists.co.uk/

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-09-02
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** Sporadic E season 2010 has ended? **

As August has passed, we may assume that the Sporadic E season
2010 has ended. The start of the season brought us many openings
but July and August were disappointing. The team of MMMonVHF wants
to thank everybody for sending logs to the review pages and in
that way contribute to better understanding of the Sporadic E
mechanism. There is still a lot to discover ... Read more and
find all Openings since 2008 at: http://www.mmmonvhf.de/es.php
SOURCE: Frank, PA4EME, on behalf of the MMMonVHF Team

** MMMonVHF MeteorScatter-page update - September 2010 **

Even if no big meteor showers hit the Earth in September, this
month deserves lot of interest by MS enthusiasts. Sporadic Meteors
flux is at its annual maximum in this period, thus providing
relatively good rates especially during morning hours. Some minor
to medium showers (Alpha-Aurigids, September Perseids, Sextantids
and others) will also add significant meteor rates. Have a look to
shower predictions for September 2010 at our MMM MS-Propagationpage
http://www.MMMonVHF.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** VHF-DATABASE at MMMonVHF (http://www.mmmonvhf.de/dbase.php) **

Time to time it will be necessary to remember abt regular updates
to the VHF-DATABASE at MMMonVHF. At end of september we plan to
spread a NEW ISSUE of our VHF-DATABASE to all DX-Cluster (and USER
which what it). So please be so kind and UPDATE IT NOW SOON!
LOGIN at MMMonVHF and follow the link to your Account >
http://www.mmmonvhf.de/usraccount.php than click on "VHF-DATABASE
Update" and update or set your info to the VHF-DATABASE! THANK YOU
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** 2 METER EME WAS **

Dear Moonnet, I have updated my website listing the biggest 2M EME stations, CW and WSJT, from each state. I am happy to include the first Louisiana station on the site, WZ5Q. Mike has a good signal off the moon. 2 seventeen element yagis, 1000 watts, with elevation: http://home.comcast.net/~kd3uy/site/?/page/2M_EME_WAS/ The goal is to list at least the largest CW and Digital stations for each state. This site is a perpetual work in progress. If you spot any errors or omissions, please email me off list. I would particularly appreciate it if an experienced CW operator could review and add to the CW information. Hope some of you find this helpful. A final personal note. I believe my qsls are up to date. If you have sent me a qsl card direct, and have not received mine, please email me off list and I will send you one right away. SOURCE: Bob, KD3UY via MoonNet

** ARI Firenze 50 MHz Marathon **

Please update your log to 1st 50 MHz Marathon organized by ARI Firenze. All what you have to do is to login and upload your ADIF log of 6m qso of this 2010 ES season, the system will calculate points by its own. Thank you. http://arifirenze.it/maratona/ SOURCE: tnx to Alex, IV3KKW direct to MMMonVHF

** Eduardo, LU7DZ - silent key **

When Juan LU8ENU called me this morning with the sad news, it shock me because we have some good news since yesterday. We well miss him he was a true experimenter, great person and advisor, he was always ready for help. We dont spent much time together, but I'll remember our conversations in his house for ever.
Descansa en paz SOURCE: Adrian, LU1CGB on MoonNet
I did meet Ed, LU7DZ, in the first days of my EME entusiam and have had the pleasure to learn a lot from him about condx and noise and CW signals and patience... Sure we will miss your CQ signal on 144.107 MHz, Ed!
Me and the Team of MMMonVHF will pass our deep sympathy and condolences to his family. Rest in peace, Eduardo! Guy DL8EBW

After his trip to Aaland, Rolf, DK2ZF and Martin, DK7ZB will be active from south/east Pacific on 3 bands EME - LATEST NEWS from Rolf, dated 2010-09-01: QRGs: 50.144 MHz, 144.144 MHz (listening between 143,500 to 144,500 with priorities) at edges... In case of any trouble with the public power supply we will monitoring this segment. Even when we are unable to response immediately - DO NOT CHANGE YOUR TX-freq! 432.090 MHz Sequence: CE always TX FIRST periode! RIG: (please have a look at: http://www.mmmonvhf.de/latest.php?id=3236) Priority is 144 MHz. 432 MHz will have priority on two consecutive days e.g. Oct 4th and 5th for about 3 hrs after moonrise in Chile. Somewhere in FF46. 50 MHz on moonrise and moonset only - maybe by request. Internet access should not be expected - like in OH0 - but will have daily updates to DL8EBW and/or DK3WG. If GSM-coverage exists, DL8EBW will publish the Chilean Cellphone number for arranging of skeds. Together with DK7ZB we will try do the utmost giving at least a new locator to a lot of stations. The latest field trial in OH0 in August was quite successful on 144 and 432 MHz as well. Thanks to all callers. These callers makes me really happy , showing that the system is running quite well. Will give these stations a special attention and a "sharp eye". Any alterations and additions will be published on MMMonVHF. 73 and see you via the moon. SOURCE: DK2ZF direct to MMMonVHF

** UK/DL9LBH MN41OG qrt **

I am sad to say that my beautiful 3 years in Tashkent/Uzbekistan end in September. So I had to pull down my antennas 23rd August. Thank you all for a lot of fun. Even when I was very restricted

by an enormous qrl workload I could work 268 stations from 46
countries on 2m and also 27 stations out of 18 countries on 70cm.
I will move to Astana, the capital of Kazakhstan and will try to
get a licence. So keep the fingers crossed that we meet again in
eme on 2m/70cm from there. Hans-Walter DL9LBH direct to MMMonVHF

** RA3AH / KO94BR - REVIEW **

Igor, RA3AH and Dima, RX3AGD was operating from KO94 during
the PERSEIDS meteorshower in 11st and 12nd of August 2010.
The log and some nice QTH/Antenna Foto can be found at our REVIEW
http://www.mmmonvhf.de/review.php (pass RA3AH in the "CALL Box")

** DM02 qrv during ARRL September VHF QSO Party **

Hi All, I will be going to DM02 the contest weekend. Regret I won't be there specifically for the contest. Work will take me there. I will only be QRV with an 817 and small yagi. Pretty much short range stuff and no MS. Primary band will be 2 meters but might get 6 and 70cm going. Can work 2 meters with low power and 3 ele quad into CM99 (CW) if cndx are average. My times to 3 operate will be late Saturday evening and early Sunday AM. Will advise as contest gets closer. Thanks. 73,
SOURCE: Kent, K6FQ via VHF Reflector

** W4NH qrv during ARRL September VHF QSO Party **

Hello everyone. W4NH will again be operating from Soco Bald (EM85jm) for the September contest. We will be operating limited multi on 6, 2, 222 and 432 with stacked beams, preamps and 1 KW+ TX power on all four bands. Turn your beams our way once in a while and listen out for us. We are also interested in setting up WSJT (FSK441) skeds on 6 and 2 meters starting at midnight until 8 AM eastern time... SOURCE: Jim, W4KXY via VHF Reflector

** KG4, GUANTANAMO BAY, qrv HF and 50 MHz **

KG4, GUANTANAMO BAY. Members of the Virginia DX Century Club will be active from here between October 5-19th. Operators mentioned are Tip/N4SIA (KG4AS), Clyde/K4CQW (KG4QW), Stu/K4MIL (KG4SS) and Will/W4VW (KG4VW). Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsigns.

699. DR 635 noise

Newsgroup: rec.radio.amateur.misc
Date: 2010-09-02 13:25:20 UTC
From: Gary Smith <vkthree@gmail.com>
Message-ID: <4c7fa5b2$0$28668$c3e8da3@news.astraweb.com>
Source record: 5518

Hi, i have an Alinco DR 635 and all of a sudden it has developed a noise (like a broken antenna lead) on RX, i can even hear it with the squelch off with no signal present, it can be random and can get that bad it totally covers a very strong signal. sorta sounds like VCO drift a bit but more like a bad mic lead from the station transmitting or a bad antenna lead. it was in the car so i pulled it out and put it in the shack so i have eliminated most "bits" ie power source, antenna and coax, interference from car etc. seems fine on TX. HELP!!

Thanks

Gary VK3LCD

701. Distinct patterns of functional and structural neuroplasticity associated with learning Morse code.

Newsgroup: rec.radio.amateur.misc
Date: 2010-09-02 19:02:51 UTC
From: Radio KØHB <KZEROHB@GMAIL.COM>
Message-ID: <i5ose3$1ddt$1@adenine.netfront.net>
Source record: 5520

I think this says that Morse operators' grey matter may be denser. Or does
it mean that we're just dense?

---

from http://www.ncbi.nlm.nih.gov/pubmed/20346399

Schmidt-Wilcke T, Rosengarth K, Luerding R, Bogdahn U, Greenlee MW.

Department of Neurology, University of Regensburg, Germany.
tobiass@med.umich.edu

Abstract
Learning is based on neuroplasticity, i.e. on the capability of the brain to
adapt to new experiences. Different mechanisms of neuroplasticity have been
described, ranging from synaptic remodeling to changes in complex neural
circuitry. To further study the relationship between changes in neural
activity and changes in gray matter density associated with learning, we
performed a combined longitudinal functional and morphometric magnetic
resonance imaging (MRI) study on healthy volunteers who learned to decipher
Morse code. We investigated 16 healthy subjects using functional MR imaging
(fMRI) and voxel-based morphometry (VBM) before and after they had learned
to decipher Morse code. The same set of Morse-code signals was presented to
participants pre- and post-training. We found an increase in task-specific
neural activity in brain regions known to be critically involved in language
perception and memory, such as the inferior parietal cortex bilaterally and
the medial parietal cortex during Morse code deciphering. Furthermore we
found an increase in gray matter density in the left occipitotemporal
region, extending into the fusiform gyrus. Anatomically neighboring sites of
functional and structural neuroplasticity were revealed in the left
occipitotemporal/inferior temporal cortex, but these regions only marginally
overlapped. Implications of this morpho-functional dissociation for learning
concepts are discussed.

==> + PUBLIC SERVICE: HURRICANE EARL HEADING FOR NORTH CAROLINA,
HURRICANE WARNINGS ISSUED FOR NEW ENGLAND

Hurricane Earl -- once again a Category 4 storm -- is currently
aiming for North Carolina's Outer Banks. At 11 AM (EDT) on Thursday,
September 2, Earl is located about 300 miles south of Cape Hatteras and
765 south of Nantucket Island, just off the coast of Massachusetts.
Earl is now moving north at a speed near 18 MPH, and is expected to
turn north-northeast with an increase in forward speed on Friday. The
center of Earl will pass near the North Carolina Outer Banks Thursday
night and approach Southeastern New England sometime on Friday night.
No significant change in strength is expected today, but forecasters at
the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) expect
that the storm will show gradual weakening beginning on Friday.
```

"Here at ARRL Headquarters, we are continuing to monitor Hurricane Earl," said ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC. "I've been in touch with Section Managers, Section Emergency Coordinators and served agencies at the national level such as FEMA, National VOAD and the National Weather Service, sharing information about preparedness efforts in the storm's path. Right now, like most, we are keeping alert, monitoring the changing conditions and waiting to see where Earl goes. We're also keeping an eye on other storms developing in the Atlantic -- Fiona and Gaston a threat." Read more here <http://www.arrl.org/news/hurricane-earl-heading-for-north-carolina-hurricane-warnings-issued-for-new-england>.

==> + ARRL LEADERSHIP: ARRL MEMBERS NOMINATE CANDIDATES FOR DIRECTOR, VICE DIRECTOR

The policies of the ARRL are established by 15 Directors who are elected to the Board on a geographical basis, with elections for three-year terms held in five divisions each year. At the same time, Vice Directors are elected on the same basis. Responding to solicitations in the July and August issues of QST, ARRL members in the Pacific, Rocky Mountain, Southeastern, Southwestern and West Gulf Divisions have nominated 16 candidates for the 10 positions of Director and Vice Director.

Five incumbents have been declared elected without opposition, while there will be balloting for the Director position in the Southeastern, Southwestern and West Gulf Divisions, and for the Vice Director position in the Southeastern and West Gulf Divisions. Ballots will be counted on Friday, November 19, 2010, and those elected will serve three-year terms beginning at noon on January 1, 2011.

- In the Pacific Division, Bob Vallio, W6RGG, of Castro Valley, California -- as the only nominee for Director -- was declared re-elected, as was Vice Director Jim Tiemstra, K6JAT, of Oakland, California.
- Current Rocky Mountain Director Division Brian Mileshosky, N5ZGT, of Albuquerque, New Mexico, was unopposed for the position of Rocky Mountain Division Director, so he is declared re-elected. Vice Director Dwayne Allen, WY7FD, of Devils Tower, Wyoming, was also declared re-elected.
- Having no opponent, incumbent Southwestern Division Vice Director Marty Woll, N6VI, of Chatsworth, California, was also declared re-elected. Read more here <http://www.arrl.org/news/arrl-members-nominate-candidates-for-director-vice-director>.

==> + ON THE AIR: NEW D-STAR REPEATER NOW IN PLACE IN ARRL LABORATORY

The ARRL Lab has installed a D-STAR (Digital Smart Technologies for Amateur Radio) repeater in the Lab at the ARRL Headquarters building. Operating with an output of 147.390 MHz, positive offset, the W1HQ D-STAR repeater is a local repeater with a modest footprint covering

the Hartford-New Britain, Connecticut area. The antenna is on the roof of the Headquarters building with the repeater located in the Lab. With its gateway, the repeater is accessible to any D-STAR user on the planet. The Lab's call sign is W1INF.

"The purpose of the repeater is to better educate the Lab staff on D-STAR technology," explained ARRL Test Engineer Bob Allison, WB1GCM. "In turn, we will have the ability to handle some of our members' questions on the matter. We also intend to use this new technology when emergencies occur where D-STAR technology is deployed." Read more here <http://www.arrl.org/news/new-d-star-repeater-now-in-place-in-arrl-laboratory>.

==> + ON THE AIR: DISCOVER THE FUN OF 6 METERS (AND UP!) IN THE ARRL SEPTEMBER VHF QSO PARTY

September is here, and according to ARRL Contest Branch Manager Sean Kutzko, KX9X, that means the VHF bands are getting a workout: "If you've never experienced the fun of VHF+ operating, the ARRL September VHF QSO Party is a great place to start. With many HF radios now offering at least 6 meter SSB/CW capabilities -- and some offering 2 meters and 70 cm as well -- any amateur with a Technician class license or higher can experience long-haul communication on the VHF bands." Read more here <http://www.arrl.org/news/discover-the-fun-of-6-meters-and-up-in-the-arrl-september-vhf-qso-party>.

==> + FCC: NEW RULES FOR EMPLOYEE PARTICIPATION IN DRILLS BEGIN SEPTEMBER 3

Beginning September 3, the new, revised wording of Section 97.113 <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.117.pdf> goes into effect. As of this date, the FCC will permit government entities that sponsor disaster and emergency drills to hold these drills without applying for a waiver. Additionally, employees who wish to participate in non-government-sponsored drills and exercises may do so under certain conditions. Part 97 is the portion of the Commission's rules that govern the Amateur Radio Service. Read more here <http://www.arrl.org/news/fcc-modifies-amateur-rules-to-allow-participation-in-disaster-and-emergency-drills-on-behalf-of-an-e>.

==> + FCC: FCC REAFFIRMS 2�2 CALL SIGNS ARE ONLY FOR ADVANCED, AMATEUR EXTRA LICENSE CLASSES

In May 2010, John Gottschalk, KB1DDK, of Westwood, Massachusetts, requested a new call sign via the FCC's vanity call sign program. Gottschalk, a General class licensee, requested KK1CQ -- a 2�2 call sign -- and a waiver from the Commission allowing him to hold the call sign. The FCC denied both requests on Tuesday, August 31, 2010. Read more here <http://www.arrl.org/news/fcc-reaffirms-2-2-call-signs-are-only-for-advanced-amateur-extra-license-classes>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including advocating for and representing Amateur Radio at the local, national and international level, facilitating elections for Directors, Vice Directors and Section Managers, putting W1AW on the air, holding operating events and more. This installment covers the month of August. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-25>.

==> + AWA RECOGNIZES: QST COLUMNIST RECOGNIZED FOR DOCUMENTING RADIO'S PAST

John Dilks, K2TQN -- who pens the "Vintage Radio" column in QST every month -- was awarded the AWA Houck Award for Documentation by the Antique Wireless Association at their 2010 World Convention, held August 17-21 in Rochester, New York. This award is presented each year to an AWA member who has written original articles on radio development or history in the AWA Journal, AWA Review or other publication. Read more here <http://www.arrl.org/news/em-qst-em-columnist-recognized-for-documenting-radio-s-past>.

==> + ARRL RECOGNIZES: JAMES GARLAND, W8ZR , WINS AUGUST QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for August is James Garland, W8ZR , for his article "The StationPro Master Station Controller." Congratulations James! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web Page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the September issue today!

==> + SOLAR UPDATE

Tad "We turn the Sun away <http://en.wikisource.org/wiki/As_Summer_into_Autumn_slips>" Cook, K7RA, reports: Over the past week three new sunspot groups appeared: Group 1101 was already in place since August 24, group 1102 emerged on August 29, and on September 1, new sunspot groups 1103 and 1104 appeared. From August 26-September 1, the daily sunspot number was 23, 11, 11, 25, 28, 27 and 51. Over those same days, the total relative size of all the sunspot groups in millionths of a solar hemisphere was 100, 100, 130, 170, 180, 220 and 270. The average daily sunspot numbers rose more than 17 points to 25.4, when compared to the previous seven day period. Geomagnetic indicators began the week showing unsettled conditions, but they calmed down to quiet levels again. Predicted solar flux for the next 12 days is 76, 76, 77, 76, 75, 75, 74, 74, 76, 78, 80 and 80. For September 2-18, the planetary A index is predicted to be 5, then 12 and 8 for September 19-20. Look for more information on the ARRL Web site on Friday, September 3. For more information concerning

radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Emily Dickinson's As Summer into Autumn Slips <http://en.wikisource.org/wiki/As_Summer_into_Autumn_slips>.

==> THIS WEEK ON THE RADIO

This week:

- September 4 -- Russian RTTY WW Contest; Wake-Up! QRP Sprint; AGCW Straight Key Party
- September 4-5 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; All Asian DX Contest (Phone); Colorado QSO Party; Brazil Independence Day BPSK31 CDX Contest
- September 5 -- WAB 144 MHz QRP Contest (Phone)
- September 5-6 -- Tennessee QSO Party
- September 6-7 -- Michigan QRP Labor Day CW Sprint
- September 7 -- ARS Spartan Sprint
- September 8 -- QRP Fox Hunt
- September 8-9 -- CWops Mini-CW Test

Next week:

- September 10 -- NCCC Sprint Ladder
- September 11 -- Ohio State Parks on the Air
- September 11-12 -- Arkansas QSO Party; FISTS Get Your Feet Wet Weekend; WAE DX Contest (SSB)
- September 11-13 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>
- September 12 -- North American Sprint (CW); SKCC Weekend Sprint
- September 16 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING EVENTS

- September 17-19 -- ARRL Southwestern Division Convention <http://www.sandarc.net/Convention2010/index.html>, San Diego, California
- October 15-17 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California

Amateur Radio Newsline(tm) Report 1725 - September 3 2010

CLOSED CIRCUIT ADVISORY

The following is a closed circuit advisory and not necessarily for air. Ladies and gentlemen, with a report on Amateur Radio Newsline's financial status, here's our producer, Bill Pasternak, WA6ITF.

--

Well, the last time I was on here with a financial report I told you that I thought we had enough in the bank to hold us over the months of July and August, and that I would not be asking for any contributions unless the sky was falling. I'm happy to say I was able to keep that promise thanks to some frugal spending we made it.

However, no matter how conservative ones spending is, there are still ongoing expenses that have to be met on a month to month basis, and as of now it will be hard to meet the bills for September when they begin arriving in about 4 weeks. Actually, the invoice from Verizon Wireless will be here around September 23^rd and the monster from Pacific Bell will arrive around the 30^th . By early October all the bills will be here and we will need to be able to pay them.

So this time, we are trying something a bit different. Instead of waiting for the last minute, were are asking bulletin stations to spread the word that by the end of September we need to raise about $900 to $1000 so that we will be in a position to pay the September invoices, and about $1000 each month there-after.

To be candid, I do not like to lead off a newscast with an appeal such as this, but we have no other method of getting the word out to you that we need your financial assistance to keep Amateur Radio Newsline on the air. To all of us involved, each donation is looked upon as an ongoing vote of confidence in the quality of the news and information that we provide each week. And for this I add my personal thank you,

Remember, Amateur Radio Newsline is a 501c3, not for profit corporation and your donations are tax deductible. The easiest way to donate is by going to our website at www dot arnewsline dot org and clicking on the Pay Pal button at the top of the page. Or you can mail a donation to the address you will hear at the end of this weeks newscast. Whichever method you choose, the all volunteer Amateur Radio Newsline team says thank you so much for caring. We promise to continue to do all that we can to continue bringing you the information you want and the news that you want to hear.

Thank you. I'm Bill Pasternak, WA6ITF, and now this weeks newscast.

--

Thank you Bill. Now, Amateur Radio Newsline report number 1725 with a release date of Friday, September 3 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A missing Arizona ham is found dead in a trailer and an arrest is made. Also, amateur radio is ready for Hurricane Earl, ham radio towers are included in a controversial proposed ordinance in Escondido, California, the FCC denies a rather interesting request for a waiver of the vanity call sign rules and a working royalty free codec for ham radio digital audio is announced by VK5DGR. Find out the details on Amateur Radio Newsline(tm) report number 1725 coming your way right now.

(Billboard Cart Here)

**

RADIO CRIME: MISSING ARIZONA HAM FOUND DEAD IN TRAILER

A sad end to the search for a Glendale, Arizona, ham who went missing in mid August. Amateur Radio Newsline Mark Abramowicz, NT3V, has the details on what appears to be a vicious crime:

--

Authorities in Maricopa County, Arizona are confirming the body of 30-year-old David Wile, KE7SWL, of Glendale, was found August 24t, hidden inside a box trailer being pulled by a truck in the Sun City area.

The truck driver, 48-year-old David Edison, has been charged with concealing a body. He is being held on $20,000 bond.

An autopsy on August 27^th by the Maricopa County medical examiner confirmed the body was indeed Wile's. A cause and manner of death was still being investigated. The sheriff's homicide unit is also now actively pursuing the case. They say more charges could be pending against Edison.

Investigators say they got a call from a couple following the truck and trailer on August 24^th and they reported what they described as a foul smell coming from the vehicle. They gave deputies the description and license number of the vehicle and it was stopped a short time later between Peoria and Sun City, authorities say. Investigators say when deputies opened the trailer, they made the grim discovery of a decaying body tucked inside a garment.

Edison was interviewed, but is reported to have invoked his right to counsel and he was charged and committed to the jail. On a blog posting, a woman identifying herself as David Wile's aunt claimed the suspect is a roommate and former business partner of her nephew.

Wile was reportedly last seen at his Glendale home on August 14^th . He was reported missing by his family on August 17^th after he failed to

show up for a ballroom dance competition at a Tempe, Arizona dance studio.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

--

More on this story as investigators make information available.
(KB7TBT, ABC15.com, others)

**

RADIO LAW: FCC DENIES CALLSIGN WAIVER REQUEST

The FCC has denied a May 17, 2010 request from John H. Gottschalk, Jr., KB1DDK, for a waiver of the amateur service rules to permit the call sign KK1CQ to be assigned to his amateur station. This, to commemorate the memory of a person that Gottschalk described in his letter to the FCC a close friend.

In turning down Gottschalk's waiver petition, the FCC said that it understands that his request was being made to permit him to memorialize a person close to him. However, because Gottschalk holds a General Class license, and the call sign KK1CQ is a Group B call sign, assignable only to Amateur Extra Class and Advanced Class licensees, that it is denying the request. (FCC)

**

RADIO LAW: HAM TOWERS INCLUDED IN PROPOSED OCEANSIDE CA TOWER LAW

An ordinance making its way to the Oceanside City Council would limit where cell phone companies and in some cases, where amateur radio operators can place their towers and antennas. Amateur Radio Newsline's Norm Seeley, KI7UP, tells us more about this proposed tower law:

--

The Oceanside, California, City Planning Commission voted 6 to 0 on Monday, August 23^rd to recommend the City Council approve the new telecommunication ordinance. One that would replace the city's rules that were drafted back in 1992.

The old ordinance allowed the towers to be built anywhere in the community. This resulted in cellular telephone and other commercial towers being placed in residential neighborhoods, near schools, churches and parks. As a result, residents expressed concern about the proximity of the towers to these locations. They cited concerns about the radiation emitted by antennas and transmitters on the towers as well as claiming that they significantly diminish property values.

The proposed new ordinance would require cellular companies to disguise their towers so as to blend in with a given areas surroundings. It also would encourage cell companies to install their antennas on existing poles. It would also establish a list of preference of locations where towers can locate. In order of preference these would start with city

owned land parcels, industrial properties, commercial properties. Further down the list and subject to owner approval would be quasi public institutions such as schools and churches, agricultural land, open space and lastly residential communities.

Amateur radio operators attended the meeting in force to criticize their inclusion in the ordinance. As currently written it would subject them to expensive fees to install antennas greater than a certain height.

In response to the complaints from the ham community, the commission recommended the creation of less expensive permit system to process amateur radio requests. However is has so far has refused to exempt hams from the new proposed new tower placement rule.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale.

--

Oceanside area hams are expected to be out in force at the full City Council meeting when the vote is taken on this measure. (uniontrib.com)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N4MWA repeater serving Phelps, Kentucky.

(5 sec pause here)

**

RESCUE RADIO: HAMS READY IF HURRICANE MAKES LANDFALL

Amateur radio was ready for Hurricane Earl. A Category 4 storm as it made its way across the Caribbean at its peak Earl packed winds in excess of 140 miles per hour. We have more in this report:

--

WX4NHC is the ham station at the National Hurricane Center in Miami. Its monitoring the Hurricane Watch Net on 14.325 MHz. The secondary HF frequencies are 7.268 MHz and 3.950 MHz should propagation be lost on 20 meters. The EchoLink "WX-Talk" Conference Room and IRLP node 9219 are also being monitored.

Meantime, North Carolina Emergency Management told affiliated agencies including ARES units that the State Emergency Operations Center would activate on September 2 for Earl. ARRL North Carolina Section Emergency Coordinator Tom Brown, N4TAB, warned amateurs in his state that there was an impending ARES activation. He said that coastal localities could be looking for help from those in areas not affected by the storm.

As we go to air, a hurricane watch is in effect from north of the North Carolina and Virginia border to Cape Henlopen, Delaware. Canada has also issued a hurricane watch for Nova Scotia from Medway Harbour to Digby. More on hurricane Earl and the ham radio response, next week.

I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

According to news reports its been over 20 years since a storm this large threatened the coastline of the United States. The U.S. naval fleet in Norfolk, Virginia, was remaining in port, but is under orders to be ready to get underway within 24 hours if necessary. (NWS, ARRL, NOAA, others)

**

RADIO POLITICS: MONTENEGRO ACCEPTED TO IARU MEMBERSHIP

The Montenegrin Amateur Radio Pool formed in October 2008, has been accepted as the International Amateur Radio Union member society. 65 votes were returned to the IARU International Secretariat with 63 votes in favor of admission and 2 abstentions.

The Republic of Montenegro, callsign prefix 4 Oh, declared its independence on June 3, 2006 following a national referendum. It was admitted as the 192^nd member of the United Nations on June 28^th of that year. (IARU)

**

EMERGING HAM TECHNOLOGY: VK2DGR RELEASES ROYALTY FREE DIGITAL VOICE CODEC

An exciting development in the world of ham radio digital audio. This as David Rowe, VK5DGR, announces the release of Version 0.1 alpha of Codec2, which is a fully function 2550 bit per seconds codec for Amateur Radio digital voice.

As previously described here on Newsline, Codec2 is an open source low bit rate speech codec released under the GNU Lesser General Public License designed for communications quality speech use. Applications include low bandwidth High Frequency and VHF digital radio. Its supporters say that Codec2 fills a gap in open source, free speech voice codecs operating beneath the 5000 bit per second rate and to listen to some sample audio in both male and female voices makes you believe that Rowe has succeeded:

--

Sample audio here

--

Those who support Codec2 claim that the lack of a copyright free Codec has impeded the development of amateur radio digital voice communications on both the High Frequency and VHF bands. They hope that

Codec2 will eventually be incorporated into DV software such as WinDRM and FDMDV which has so far relied on a non open source Codec.

Further information on Codec2 along with more audio samples are on line at tinyurl.com/36mx63e (Southgate)

**

RADIO LAW: TECH GROUPS AT ODDS OVER CELLPHONE FM CHIP

It appears the FM chip aspect of performance royalty discussions between the National Association of Broadcasters and the MusicFirst coalition that represents artists and recording companies have angered some wireless companies. As a result, several technology industry associations have written letters to the Chairmen and ranking members of the House and Senate Judiciary Committees. They are urging the lawmakers to resist efforts to mandate an FM chip in cell phones and other personal devices in any legislation addressing what they term as an: " unrelated conflict between the broadcast and recording industries over royalties."

Six trade groups signed the letter. These include the very politically powerful Cellular Telecommunications Industry Association and the equally powerful Consumer Electronics Association. Joining them are the Telecommunications Industry Association, TechAmerica, the Information Technology Industry Council and the Rural Cellular Association. All put forth the same argument that essentially says that this is not their fight and they will not permit themselves to be drawn into it.

In their letter the groups say that calls for an FM chip mandate are not about public safety but are instead about propping up a business which consumers are abandoning as they avail themselves of new, more consumer-friendly options. The letter goes on to state that it is simply wrong for two entrenched industries to resolve their differences by agreeing to burden a third industry. which has no relationship or other interest in the performance royalty dispute.

Those signing the letter say that they do not accept the rationalization that an FM control chip as an emergency alert" solution. They state that this idea was considered and rejected during implementation of the WARN Act. As such, it would put this multi-year collaboration and investment at risk and delay the widespread availability of alerting capability. (RW)

**

NAMES IN THE NEWS: VK2APQ CELEBRATES AGE 99

Some names in the news. First, congratulations to Pierce Healy, VK2APQ, on the celebration of his 99th birthday back on August 13^th . Pierce Healy was first licensed at the beginning of World War 2 but could not get on air at that time. In the 1950's he was a member of Australia's New South Wales Division Council and later served as its president.

While President, VK2APQ prepared and read the VK2WI morning bulletin. He also served many years as VK2 Federal Councilor and was particularly well known for his amateur radio notes that were published in Radio and Hobbies, the predecessor of Electronics Australia. VK2APQ is also still a regular voice on VK2WI Sunday callback net and a life member of the Wireless Institute of Australia and Australia's New South Wales Division Council. (RAC)

**

NAMES IN THE NEWS: W8AAS APPOINTED AMSAT US DELIGATE TO ARISS INTERNATIONAL

David Taylor, W8AAS, of Columbia, Maryland has been appointed to the post of AMSAT's United States delegate to ARISS-International. First licensed in 1970, Taylor has been involved with SAREX and ARISS since 2000. He holds an Extra Class amateur radio license. Taylor replaces Barry Baines, WD4ASW who was holding the position temporarily following the resignation of Will Marchant in 2009.

For those not aware, ARISS is an acronym that stands for Amateur Radio on the International Space Station. ARISS International is a working group consisting of national amateur radio organizations and AMSAT organizations of the host countries represented on the International Space Station. It serves as the unified voice of amateur radio in working with the space agencies that manage the ISS. Information on the activities of ARISS in several languages can be found on-line at www.rac.ca/ariss.(ARISS)

**

NAMES IN THE NEWS: REPEATER OWNER SAYS FLY THE AMERICAN FLAG ON 911

And the owner operator of California's Sunset Ridge Linked Repeater near Los Angeles is suggesting that on Saturday, September 11th, 2010, an American flag should be displayed outside every home, apartment, office, and store in the United States.

In a posting to Facebook, Burton Brink, N6USO, says that every individual should make it their duty to display an American flag on this ninth anniversary of one our country's worst tragedies. He continues by saying that we do this honor of those who lost their lives on 911, as well as their families, friends and loved ones who continue to endure the pain. Also to honor those who today are fighting at home and abroad to preserve our cherished freedoms.

If you are a Facebook member you can find the Sunset Ridge Linked Repeater page using the shortcut URL of tinyurl.com/sunsetrepeater. More about the repeater itself is in cyberspace at www.n6uso.com/

And if we at Amateur Radio Newsline may be permitted a short editorial comment on the suggestion by N6USO, we 100% agree. (N6USO via Facebook)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: MAX: A RADIO DOG - S.K.

We don't usually do stories about the passing of the pets of ham radio operators, but a dog named Max deserves such a mention. This, because his heart like that of his closest friend, Chris Boone, WB5ITT, was devoted to radio.

According to Chris, he found Max at the AM transmitter site of the famous "Mighty 1190" in Dallas, Texas in January of 2001. Chris described Max as a great pet, loyal, friendly and protective. WB5ITT notes that for him to be a Rottweiler and Shepherd mix, he amazed Chris and others at dog parks by being an accomplished swimmer.

Due to a spinal aneurysm where a disk blew out and caused the spinal bone to put pressure on the cord itself, Chris had to make the hard decision on Monday, August 23^rd to put Max down. As a result, a discussion arose among an on-line group of those in radio broadcast engineering after Chris told them about Max's passing.

Not long after, WB5ITT received a call from a reporter for Radio World. This is a nationwide broadcast trade publication which a few days later published an article about Max as well as a number of other four-legged faithful canine friends of radio engineers. You can read this truly inspiring story and see a photo of Max on line at www.radioworld.com/article/105620. (WB5ITT)

**

HAM RADIO IN SPACE: BURNING WATER CUBESAT CONCEPT

Two videos on YouTube video show the concept for a CubeSat propulsion system using plasma electrolysis of water. This prototype shows that thrust can be produced by plasma electrolysis or burning water so to speak. You can view these videos on-line at tinyurl.com/2csky34. (Southgate, ANS)

**

ON THE AIR: RADAR COMES TO HAM RADIO IN AN ON THE AIR OPERATION

RADAR is coming to the ham bands, but in a good way. This as PD1AJJ and PD3EM will be active with the special event callsign PD55RADAR from 4^th to the 14^th .

In this case RADAR stands for Rapid Deployment Amateur Radio. This is an international concept of radio amateurs being able to operate anywhere under all circumstances. The goal is to setup an amateur radio station quickly on remote sites anywhere using only battery power. And anywhere means not only sites reachable by car but also on locations after a few miles walk. Also the groups 5 by 5 concept means being able to communicate by amateur radio within 5 minutes after arriving at the operating site with the QRP power of 5 watts maximum.

PD1AJJ and PD3EM will participate in the IARU HF SSB Field Day On September 4^th and 5^th from the Dutch polders near the famous windmills of Kinderdijk. They will use a Yaesu FT-817 which means QRP only. The rest of the period they will be operating PD55RADAR in their free-time which will mainly be during the evenings. QSL via PD3EM, More information on line at www.pd3em.com (PD3EM)

**

DX

In DX, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland for one week beginning September 18^th . They plan to operate under the callsign MS0SCG on VHF, HF, SSB, CW and data modes. QSL as directed on the air.

HA0HW will sign J48HW from Thassos Island until September 7^th . Thassos is a Greek island in the Aegean Sea farmed for its clean beaches and the magnificent honey. QSL via HA0HW.

KT8X will be active portable BW from Taiwan through September 6th. QSL via his home callsign or by the Logbook of the World.

Lastly, members of the QLF DX-Team will be on the air as LA6Q from Gurskoy Island group between September 9^th to the 14^th . Activity will be on 80 through 10 meters using CW, SSB and RTTY. QSL via LA9VDA.

(Above from various DX news sources.)

**

THAT FINAL ITEM: THE YHOTY AWARD - SAYING THANKS

And finally this week, the August 21^st presentation of the 2010 Amateur Radio Newsline Young ham of the year Award to Cody Anderson, KI4FUV, also marked the 25^th anniversary of this program that was first introduced back in 1986. And attending this years special celebration were two former Young Ham of the Year recipients. They were Christopher Arthur, NB4V, who was KT4XA when he received the award in 2000 and Andrea Hartlage, KG4IUM, who was honored back in 2004. Both had words of praise for KI4FUV, while also reminiscing about what the award meant to them. First to speak was Andrea Hartlage, KG4IUM:

--

KG4IUM: "I just want to congratulate you Cody on this great honor. You should definitely be very proud.

"Its leaders like you who are recognized and other youth will look up to and say -- 'well he got to do all this pretty cool stuff like go to Space Camp because he did these really good things for ham radio.'

"So I think its important that people like you are recognized for your work so that we can get more youth involved (in the hobby) and have a lot of hams for tomorrow."

--

Christopher Arthur, NB4V, talked about the fact that he still has and uses his Yaesu gift almost every day:

--

NB4V: "It was 10 years ago here that I was the 2000 Young Ham of the year, and I have to echo the sentiment of the 1990 winner as it really was one of the best days of my life. It was a truly wonderful, wonderful honor that I will truly never forget.

"My prize radio I still use on a regular basis and its truly been a wonderful thing. And I thank you Bill, and Amateur Radio Newsline, CQ, Yaesu and Chip with Heil Sound and that the award continues to be given and hopefully the Young Ham of the Year Award program will continue for many more years to come and continue to honor the leadership among youth in amateur radio,

"Once again, congratulations Cody and keep up the good work and congratulations to you on all your future endeavors"

--

Also attending vicariously was Mary Alestra, KB2IGG, who in 1990 at age 12 was the youngest person ever to receive the Young Ham of the Year Award. Now grown up and an attorney in New York City, our producer Bill Pasternak, WA6ITF, reads part of the e-mail from Mary describing what the award meant to her:

--

WA6ITF READS E-MAIL FROM KB2IGG: Winning the YHOTY award gave me such a sense of accomplishment and pride at a very young age. It was a wonderful feeling to win an award for something that I loved doing anyway. There have been a lot of great moments in my life since then, including graduating from college and law school, but the YHOTY award may have been the most important since it helped me realize that all of these goals were possible.

"I think it's fantastic that Amateur Radio Newsline recognizes the dedication and accomplishments of young people by continuing to sponsor this award. Congratulations to Cody! I wish him all the best and lots of exciting QSOs for years to come!

"And that was from Mary Alestra, KB2IGG."

--

The first recipient was Shawn Alan Wakefield, WK5P, with the presentation made at the long gone Ham West convention in Las Vegas, Nevada. For about half a decade the award presentation ceremony moved around the country until it found a permanent home at the Huntsville Hamfest in Alabama. That's where its been almost every year since 1993.

Vertex-Standard which manufacturers Yaesu brand ham gear has been a corporate underwriter since the award was created. In the mid-1990's CQ Magazine added its name and prestige to the companies supporting the award. And three years ago Heil Sound Limited came on board to help make the presentation ceremony an even more exciting event for the recipient. They, along with Dave Bell, W6AQ, who subsides the plaque that Amateur Radio Newsline presents the winner and the crew at the Huntsville Hamfest that has given the award a permanent home are the ones who make this presentation possible. To them, we say a heart felt thank you. Without their support, the award and its presentation would not have lasted a quarter of a century. They are the ones who truly make it happen. (ARNewsline(tm))

GB2RS NEWS

Sunday 5th September 2010

The news headlines

Further areas of Pakistan connected by amateur radio

Come and try amateur radio direction finding near Wellwyn Garden City

DXpedition to the Isle of Arran

AP2AUM from the Pakistan Amateur Radio Society reports that emergency communications support has been extended in the past week to include three more villages. The next stage is to move a repeater installed at Changla and re-install it at Malakand Heights. This will then be linked to a cross band repeater at Nowshera, which in turn is connected to the PARS VHF repeater. The linking of so many repeaters will cause a tail squelch delay but given the circumstances and lack of proper equipment it cannot be helped. This will be the first time that the Swat Valley will be connected with the rest of the country through 2m repeaters.

A come and try ARDF event will be held at Sherrardspark Wood near Welwyn Garden City on Sunday 12 September. It is being organised in conjunction with an orienteering event. The session starts at 12 noon. The venue is off the B197, which runs alongside the A1(M) between junctions 5 and 6. Parking is at grid reference TL228142. Final details will be posted at www.rsgb.org.uk/radiosport/ardf/

>From 18 September, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland, operating under the callsign MS0SCG. They plan to operate on VHF, HF, SSB, CW and data modes. The location is IOTA island number EU123 and SCOTIA island number CS14.

A new Network Affiliated RAYNET Group is being formed in the mid-Pennine region of Lancashire.&#65533; The envisaged operating area will be the boroughs of Rossendale, Hyndburn and Burnley. Members of the amateur radio community who are interested in joining are invited to contact mid.pennine.raynet@gmail.com for further information.

Kettering & District ARS have a Kenwood TM-V71E FM Dual Band transceiver that has gone missing, presumed stolen on or about 17 August. The serial number is A9100019. If you have any information about the radio, please either contact the club or Northamptonshire Police, reference NB12284/10.

Bolton Wireless Club have organised a coach trip to the National Hamfest at Newark on Saturday 2 October. There are a few places left on the trip, if you are interested please e-mail boltonwireless@gmail.com.

Bromley & District ARS will be running an Advanced course starting in September, the exact date and day of week to be decided by those enrolling. The Course will be held on a midweek evening and run for about 16 weeks in Orpington, London Borough of Bromley. Expressions of interest and questions can be e-mailed to courses@bdars.co.uk.

Bromley & District ARS will also be holding a Foundation Course on Saturday 16 October and Saturday 6 November at the Victory Social Club Kechill Gardens, Hayes, Bromley. Further details on the website www.bdars.org or by e-mail from courses@bdars.co.uk.

And now for the details of rallies and events for the coming week.

The annual Telford HamFest takes place today, Sunday 5 September, at Telford Enginuity, Coalbrookdale, Telford, with the sat nav location TF8 7DU. As well as the varied traders and specialist groups that will be present, a guest speaker, Nick Miers, from Bletchley Park Code Breakers Centre will be giving a presentation covering the World War 2 activities at that famous Centre, and bringing an original German Enigma machine for a hands-on demonstration. The rally opens at 10:30am, with a talk-in facility on 2 metres and via the local repeater GB3TF, using the callsign GB4THF. Further information from Martyn, G3UKV on 01952 255416, or via the group's website www.telfordhamfest.co.uk

A boot sale and open day organised by North Norfolk Amateur Radio Group will be held at the Muckleburgh Collection military museum, Weybourne, Norfolk on Sunday 12 September. For one day only, admission to the museum will be free, it is normally ?6. The Radio Hut, restaurant and shop will be open to visitors. There will also be a sale of surplus equipment from the museum's stores and from the Group's radio collection. Army surplus CLANSMAN equipment will also be on sale. Boot sale pitches cost ?5. Set-up will be from 8am. Free public admission from 10am. The Radio Hut, containing the Group's unique collection of all-service communications equipment will be open all day and members of the Group will be pleased to welcome visiting amateurs to the hut. All enquiries to Bob Finch, G0HYZ, on 01263 838198. More details are available on www.gb2mc.co.uk.

The Gatwick Family Radio Weekend will be held on 11 and 12 September at Hunters Moon, close to Gatwick on the A217, RH6 0HU, TQ262438. Bring some vintage-ish radio with you if you can and military vehicles of all radio types are welcome. There will be special interest groups and plenty to interest the family including a Saturday night barbecue and large bonfire. More details from Mike, M1CCF, on 0208 654 2582.

Torbay Annual Communications Fair will take place on 12 September at Newton Abbot Racecourse, Newton Abbot, Devon TQ12 3AF. There will be trade stands, a Bring and Buy as well as an RSGB Bookstall.

Now for the news of special events

It is hoped that the Orkney Wireless Museum amateur radio station will be in operation from its premises at Kiln Corner, Kirkwall between Thursday 2 September and Wednesday 8 September during the 20th Orkney International Science Festival. Using the callsign GB2OWM, probable operating periods will be weekdays and Sunday afternoons between 2.30 and 4.30pm and Saturday morning between 10am and 12.30pm. Operation will be primarily on HF SSB. More information can be obtained from Bill, GM3IBU by e-mail to bill@gm3ibu.plus.com.

To celebrate the 497th Anniversary of the Battle of Flodden, GB2BCL will be active on most HF bands on Sunday 12 September from Barmoor Castle, Lowick, Northumberland. Event manger Roy, G0AXJ says visitors are welcome to the station, which will be active from 10am to 7pm situated at the Barmoor Castle West entrance gate. Talk-in will be available on 2m through GB3BT on 145.700MHz.&#65533; For more information please contact Roy on 0788 426 2029.

Glasgow and Clyde RAYNET group will be operational over the weekend of 18 and 19 September under the group callsign GM0RAY to raise funds for the British Wireless for the Blind during the Transmission weekend. The group will be transmitting from Carman Hill, which is located South of Loch Lomond above the town of Alexandria. Operation will be on 80, 40, 20 and 17m as well as the 2m band. For further info contact Paul Lucas on 0776 827 1736.

At the Bentley Priory public open days in Stanmore, NW London, Radio Society of Harrow will be demonstrating amateur radio, ATV streaming via GB3BH and displaying some WWII communications equipment. The RAF Amateur Radio Society will have a stand and also will be running nets using GB1RBP throughout the main public open day on Saturday 11th. For further information please see www.bentleypriory.org.

The Appledore & District ARC will operate GB2AC at the open day on 11 September at Arlington Court in North Devon, owned by the National Trust. The station will be operational on all HF bands.

And now the HF DX news compiled from 425 DX News and other sources

Ulli, DD2ML and Martina, DD7MR, will operate as 5P5L from Lolland Island near Denmark, which is IOTA reference EU-029 until 18 September. QSL via DD2ML.

Thomas, OZ/DL4VM, will be on the air, mainly with CW, on 40m, 30, 15 and 6m from North Jutlandic island, IOTA reference EU-171 between 5 and 17 September. QSL via his home callsign either direct or via the bureau.

George, K3GV/VY2, will be active from Prince Edward Island, which is IOTA reference NA-029, mostly on 15m and 20m throughout September. QSL via his home callsign either direct or via the bureau.

Juergen, VO2/NF6J, will be on Battle Island, which is in the Newfoundland Province South group of islands, until 10 September. QSL via his home callsign.

Now the contest news

The ever-popular SSB Field Day finishes at 1300UTC today, 5 September. The event covers the 3.5 to 28MHz bands and the exchange is signal report and serial number.

Also finishing today, 5 September, on VHF, is the 144MHz Trophy. This finishes at 1400UTC. Another contest that's on 144MHz is the 5th Backpacker Contest, which takes place today from 1100 to 1500UTC. It's all modes with an exchange of signal report, serial number and locator.

Overlapping the two RSGB 2m events taking place on Sunday 5th is the WAB 144MHz QRP Phone Contest. Multipliers are WAB squares and DXCC countries. The event takes place between 1000 and 1400UTC and the exchange is signal report, serial number and WAB square.

On 7 September, between 1900 and 2130UTC, the 144MHz UK Activity Contest takes place. Using all modes, the exchange is signal report, serial number and locator.

The 80m Club Sprint SSB leg takes place on 9 September from 1900 to 2030UTC. The exchange is serial number and name.

The IARU Region 1 International Amateur Television Contest takes place from 1800UTC on 11 September until 1200UTC on the 12th. Operation is fast scan, on all bands from 70cm upwards. The video exchange is the callsign and 4 digits. The phone exchange includes the report, serial number and locator. Details and full rules are on the web at www.batc.org.uk.

The 2nd 70MHz Contest takes place on Sunday 12th from 0900 to 1200UTC. For many years this contest typically attracted between 16 and 21 entries, but last year it shot up to 28. A sign of the times perhaps, with more and more people in more and more countries coming onto the band. The exchange is signal report, serial number and locator.

Following the success of the first 75 Baud Sprint and many requests for a second, BARTG is running a second Sprint 75 on 18 September between 1700 and 2100UTC. On the 80, 40, 20, 15, and 10m bands using RTTY 75 Baud only, the rules and scoring can be found on the BARTG website http://bartg.co.uk/.

And now the solar factual data for the period from the 23rd to the 29th of August, compiled by Neil Clarke, G0CAS on the 30th of August.

Solar activity was at very low levels for the week. No solar flares took place at all. The solar disc was spotless on the 23rd but on the 24th a large singe spot rotated into view. Solar flux levels declined slightly from 75 units on the 23rd to 72 by the 28th. The average was 74 units. The 90 day solar flux average on the 29th was at the same level as last week at 77 units. X-ray flux levels varied little day to day and averaged A6 units. Geomagnetic activity started at quiet levels on the 23rd with an Ap index of 5 units but overnight into the 24th a coronal hole disturbance arrived. The most disturbed day was the 25th with an Ap

index of 20 units. Quiet conditions returned on the 29th with an Ap of only 2 units. The average was Ap 11 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from a slow 270 kilometres per second on the 23rd to a fast 710 by the next day. Speeds remained fast until the 29th when they declined to 430 by the end of the day. Particle densities increased to very high levels with 82 particles per cubic centimetre measured late on the 23rd. By the 26th particles had declined to 1 particle per cubic centimetre where they remained for the rest of the period. Bz during the disturbance fluctuated between minus 14 and plus 17 nanoTeslas and between minus and plus 2 nanoTeslas once the magnetic field had quietened down on the 29th.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Solar activity though, will probably remain at very low levels but there may be a increased chance of activity increasing. Solar flux levels are expected to be in the low 80's for most of the week. Geomagnetic activity should be mostly quiet everyday, saying that, the next couple of days could be slightly unsettled due to a small recurring coronal hole. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows are expected to be about 10MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1600 and 2100 hours. Every week these predications are for a quiet geomagnetic field, any increase in geomagnetic activity will decrease the MUF by several megaHertz, particularly on paths that go over or close to the polar regions. Paths over the equator to the southern hemisphere will be the least effected.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

NEWS FOR THE MIDLANDS

On Sunday 5 September Midland Amateur Radio Society is visiting the Telford Hamfest. Details from Norman, G8BHE, on 01214 229 787.

On Sunday 5 September South Birmingham Radio Society has a club stand at the Telford Hamfest. Contact Don, on 0121 458 1603.

On Sunday 5 September Spalding & District Amateur Radio Society is holding a BBQ and Fun day at the Portakabin, no set format, just run

what you bring. For more information contact Graham Boor, G8NWC, on 07947 76448.

On Sunday 5 September Telford & District Amateur Radio Society will be organising the Telford Hamfest. Contact Mike, G3JKX, on 01952 299 677.

On Monday 6 September Gloucester Amateur Radio & Electronics Society is holding its AGM. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 6 September South Birmingham Radio Society will be unpacking the trailer after the rally and holding a review of the event. Contact Don, on 0121 458 1603.

On Monday 6 September Wythall Radio Club will be holding the Advanced Course Session 2. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 7 September Derby & District Amateur Radio Society is having a Junk Sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 7 September Friskney and East Lincolnshire Communications Club hope to have a talk and demonstration on Echo-link. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 7 September Loughborough & District Amateur Radio Club is holding an Open Forum on EMC. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 7 September South Notts Amateur Radio Club will take part in the 144MHz UK Activity Contest contest. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Tuesday 7 September Spalding & District Amateur Radio Society will take part in the 144MHz UK Activity Contest at the Portakabin. For more information contact Graham Boor, G8NWC, on 07947 76448.

On Tuesday 7 September Wythall Radio Club will take part in the 144MHz UK Activity Contest. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 8 September Lincoln Short-Wave Club will put G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 8 September Midland Amateur Radio Society will be having a committee meeting, training classes and summer social. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 8 September South Notts Amateur Radio Club is having a construction project evening. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 8 September Telford & District Amateur Radio Society discuss the next members' project. What is your idea? Contact Mike, G3JKX, on 01952 299 677.

On Friday 10 September Coventry Amateur Radio Society is holding the 4th Round of the G2FDC Trophy. Contact John, G8SEQ, on 07958 777363.

On Friday 10 September South Birmingham Radio Society is having a construction evening and ragchew. Contact Don, on 0121 458 1603.

On Saturday 11 September Lincoln Short-Wave Club will have G5FZ on air from the shack and will also be jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 6 September Angel of the North Amateur Radio Club invites members and visitors to come along and take to the Air whilst preparations are made for the Churches and Chapels on the Air event. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 6 September Scarborough Amateur Radio Society has a talk By G0VXE on LogBook of the world. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 6 September Sheffield Amateur Radio Club is holding a Social Evening & Foundation Licence ``taster'' course session. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Tuesday 7 September Chester & District Amateur Radio Society is having a bring and tell evening. Details from Barbara Green on 07957 870770.

On Tuesday 7 September Morecambe Bay Amateur Radio Society has arranged a social evening. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

On Tuesday 7 September Otley Amateur Radio Society is taking part in the 144MHz UK Activity Contest & holding a Foundation Exam. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 8 September Hornsea Amateur Radio Club is having an SSB Field Day Washup. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 9 September Hornsea Amateur Radio Club is taking part in the 80m SSB Club Sprint Contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 9 September South Manchester Radio and Computer Club has an open subject forum. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 9 September Wakefield & District Radio Society is inviting members and visitors to come along and play with some of the new equipment the recent grant has provided. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 10 September Angel of the North Amateur Radio Club is taking part in a Heritage Open Day at Whitehall Road Methodist Church. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Friday 10 September East Cleveland Amateur Radio Club has a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 11 September Angel of the North Amateur Radio Club is taking part in the Churches and Chapels on the Air event. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Saturday 11 September Wakefield & District Radio Society continues the Foundation Licence Course from 1.30pm. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR SCOTLAND

On Tuesday 7 September Livingston & District Amateur Radio Society is holding a Club Evening. Details from Norman, 07740 946192, uk.groups.yahoo/group/ms0liv

On Wednesday 8 September Lothians Radio Society will enjoy the President's address on Home Brew /P by Dr John Cooke, GM8OTI. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 8 September Paisley YMCA Amateur Radio Club will have a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 8 September West of Scotland Amateur Radio Society will be holding an evening of construction projects and licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 9 September Aberdeen Amateur Radio Society will be on the air and has beginners' CW lessons available. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 10 September Borders Amateur Radio Society will make the final preparations for the special event station GB2BCL. More information from Ray, GM0CDV, on 01573 228730.

On Friday 10 September West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle and a quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR NORTHERN IRELAND

GB2RS welcomes information from all RSGB affiliated clubs. We invite club secretaries to e-mail details of forthcoming meetings to GB2RS@rsgb.org.uk.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 5 September Loughton & Epping Forest Amateur Radio Society will be putting GB2EFF on the air for the Epping Forest Festival, Chingford Plain. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Sunday 5 September Norfolk Amateur Radio Club will be holding the Gala Day as part of their SSB Field Day activities. Details from Chris Danby, G0DWV, on 01603 898678.

On Sunday 5 September Verulam Amateur Radio Club will be running the Dunstable Downs National Trust demo station. Details from Ralph, on 01923 265572.

On Monday 6 September Basingstoke Amateur Radio Club will be enjoying an additional monthly informal meeting. Details from Clive, G4ODM, on 01256 326050.

On Wednesday 8 September Chesham & District Amateur Radio Society will have a shack planning evening. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 8 September Darenth Valley Radio Society will be on the air as well as enjoying a natter night. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 8 September Farnborough & District Radio Society has a club night meeting planned. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 8 September Harwich Amateur Radio Interest Group has a talk by Paul Howe of Trinity House. Information from Kevan, 2E0WMG on 0776

654 3784.

On Wednesday 8 September Norfolk Amateur Radio Club has an informal evening including construction and workshop activities. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 8 September South Essex Amateur Radio Society has a presentation on Marine & Offshore Radio Part 2 by Dave, G4UVJ. Contact Norman, M0FZW, on 01268 692776.

On Wednesday 8 September Southdown Amateur Radio Society will be operating at Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Wednesday 8 September Southgate Amateur Radio Club will be taking part in The Great Erg Race. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 8 September Worthing & District Amateur Radio Club will be holding a discussion evening on how the club did in the SSB Field Day. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 9 September Bittern DX Group will be holding an informal meeting. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 9 September Echelford Amateur Radio Society will be having a talk by Paul Matthews, G4AWZ on Solar Powered Shacks. Contact John, G4GSC, on 01784 451898.

On Thursday 9 September Edgware & District Radio Society will be having a talk by John, G3SJE on his journey through the ICE age. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 9 September Lowestoft & District Amateur Radio Club will enjoy a club night at the shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 9 September Radio Society of Harrow starts a four day event at Bentley Priory using the callsign GB1RBP. More information from Linda, G7RJL, on 0208 386 8586.

On Thursday 9 September Reading & District Amateur Radio Club have a talk on flying PNG at its hair-raising best by Colin Couston, M0XSM. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 9 September Shefford & District Amateur Radio Society welcomes everyone back after the summer break. Details from David, G8UOD, on 01234 742 757.

On Friday 10 September Itchen Valley Amateur Radio Club has a club night planned. Contact Charlie, M0WYM, on 02380 439560.

On Friday 10 September Loughton & Epping Forest Amateur Radio Society has a vsit by Mark Francis G0GBY of Waters & Stanton. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 10 September Mid-Sussex Amateur Radio Society has a radio night organised. Contact Peter, G4AKG, on 01444 239371.

On Friday 10 September Wimbledon & District Amateur Radio Society has a Summer Camp Debrief. Contact Jim, M0CON, on 020 8874 7456.

NEWS FOR THE SOUTH WEST

On Tuesday 7 September West Devon RC Club has a review night looking at winter events and project discussion. You can expect the usual natter and refreshments. All welcome. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 8 September Taunton & District Amateur Radio Club will have an SSB Field Day debrief. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 8 September Thornbury & South Gloucestershire Amateur Radio Club will be on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 9 September South Bristol Amateur Radio Club will have a talk on Military Wireless by Luke, M3VHV. Contact Len, G4RZY, on 01275 834 282.

On Thursday 9 September Yeovil Amateur Radio Club is having a talk on Heathkit by M1SAN. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 10 September North Bristol Amateur Radio Club has a talk entitled Underground Affairs by Paul G8YMM. Details from Dick on 01454 218362.

NEWS FOR WALES

On Monday 6 September Dragon Amateur Radio Club has a discussion night planned. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Monday 6 September Llanelli Amateur Radio Society will be on the air. Contact Craig, MW0MXT, on 01269 840292.

SARL NEWS - SUNDAY 5 SEPTEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

NEW LICENCE FEE STRUCTURE TABLED IN GOVERNMENT GAZETTE

SARLNEWS HAS VACANCIES

SARL MEMBERSHIP TOUCHES 1 200

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NEW LICENCE FEE STRUCTURE TABLED IN GOVERNMENT GAZETTE

On Friday 27 August ICASA published the new licence fee structure in the Government Gazette no 33 495. The minimum fee for any radio licence is R120. The new fee structure will become effective on 1 April 2011, at the start of ICASA's financial year. All licenses in the amateur service will cost R120 per annum from that date.

On 29 April 2009, the SARL submitted a memorandum to ICASA objecting to the proposed increases and argued that it would not be in the interest of retired persons and the youth. However, ICASA declined the SARL proposals for lower fees. Putting the new fee in perspective, it is well within the average inflation figure of the past 25 years, amounting to less than 8% per annum increase.

>From 1 April the following licenses will increase to R120 per annum: . ZU, ZR and ZS licenses . Beacon licence . Change of call sign request . Special event licence . Listener licence . Repeater station including radio link . Digipeater/bulletin board . Experimental station for weather satellite reception and retransmission.

There is a discount for advance payments as follows: If the licence is paid 2 years in advance it will cost R240; 3 years R329; 4 years R419 and 5 years R500.

SARLNEWS HAS VACANCIES

SARL News has vacancies for bulletin compilers, editors and translators. The successful candidates must have enthusiasm and language ability in English or Afrikaans or both. The reward is the satisfaction of seeing the bulletin in print and being read on the air. SARL News is produced by teams working with George Honiball. Currently each team works every second month. News is collated on Friday afternoons and Saturday mornings, then edited and translated and finally checked by George before being distributed on the internet on Saturday evenings. If you would like to get some experience in editing, call George on 012 664 4155. Your assistance will be appreciated.

SARL MEMBERSHIP TOUCHES 1 200

August 31 was the cutoff date for paying the SARL 2010/2011 membership fee. The number of paid-up members was touching the 1 200 mark, and will by now have been exceeded. If you have not paid your SARL subscription you have another 7 days' grace to do so before losing all benefits.

Please don't let this happen and pay those few rand in the next day or so. If you lost the invoice or the reminder that was sent a few days ago, call Mariska on 011 765 2393 on Monday morning.

RTA TO BE OPENED BY EXECUTIVE DIRECTOR OF NRF

Dr Robin Drennan, Executive Director of the National Research Foundation, will deliver the opening address at the SARL Radio Technology in Action 2010 on Saturday 18 September at the National Amateur Radio Centre. He will also inaugurate the real-time space weather display that is being installed in collaboration with the Hermanus Magnetic Observatory. The hardware has been donated by Acer South Africa.

The full programme can be downloaded from www.sarl.org.za. Click on RTA and follow the links. If you would like a copy in your mailbox, send an email to rta@sarl.org.za with RTA in the subject line.

VK2DGR RELEASES ROYALTY-FREE DIGITAL VOICE CODEC

An exciting development is taking place in the world of amateur radio digital audio. David Rowe, VK5DGR, announced the release of Version 0.1 alpha of Codec2, which is a fully function 2 550 bits per second codec for amateur radio digital voice.

Codec2 is an open-source low bit rate speech codec released under the GNU Lesser General Public License designed for communications quality speech use. Applications include low bandwidth HF and VHF digital radio. Its supporters say that Codec2 fills a gap in open source, free speech voice codecs operating below the 5 000 bps rate. When you listen

to some sample audio in both male and female voices, you have to believe that Rowe has succeeded. You can hear it on Amateur Radio Mirror International later this morning.

Those who support Codec2 claim that the lack of a copyright-free codec has impeded the development of amateur radio digital voice communications on both the HF and VHF bands. They hope that Codec2 will eventually be incorporated into DV software such as WinDRM and FDMDV which has so far relied on a non-open source codec.

DID YOU MISS THE ISAT PRESENTATION?

If you missed the ISAT presentation by John Williscroft, ZS6EF, you can listen to it on www.amsatsa.org.za. The presentation describes an imaginary CubeSat and was devised by John to stimulate the discussion which ensued on last Sunday's SAT Network. You can still submit your ideas of what should be considered for inclusion in the payload on the planned satellite. Send your comments to saamsat@intekom.co.za.

RADIO ZS IN THE MAIL

As always, the latest edition of Radio ZS contains plenty to read. You will enjoy reading about adding AM to the FT-102 by Andr&#65533; Botes, ZS2ACP, and building a foot switch for contest operation, by Kevin McDonald, ZS6KMD. If you sported a flag on your car during the World Cup, there is an interesting recycling project titled Recycling the World Cup by John Williscroft, ZS6EF. Take a trip to Friedrichshafen with Dennis Green, read about amateur radio and the World Cup, about satellites and to QSL or not to QSL. The July/August edition is on its way to you. If you are not a member and want to see what you are missing, send an email to armi@sarl.org.za with RadioZS in the subject line and we will mail you a complimentary trial copy. A warning to members: if you have not renewed by 10 September, you will lose access to the member pages and the online version of Radio ZS.

INVITATION TO ATTEND HABEX 2010 SECOND TEST LAUNCH

On 24 July 2010, Sci Bono in co-operation with radio amateurs unsuccessfully tested the High Altitude Balloon Experiment Payload, also known as HABEX. The payload was lost through electronic failure and we had to return to the workbench to fix all the problems.

Radio amateur clubs and individuals are invited to attend the second attempt at success by the hopeful team.

Details are as follows:

Venue: Klerksdorp Airport FAKD Time : 07:00-13:00 CAT Date: 25 September 2010.

Details of the payload will be posted on the SARL forum and you are invited to share in the fun.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. A rash of small sunspots is breaking out across the sun's northern hemisphere. Unfortunately they all appear to be fairly inactive. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. With the change of season 15 m is also starting to show signs of life. Conditions to India will be good from late afternoon until after sunset. During sunset it will be good towards Europe. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. Weak 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts, 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the workhorse for contacts around the country with 30 m also very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons and over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

10 September - Last day to pay SARL membership fees; 18 September - RTA symposium at the NARC; 25 September - Launch of HABEX at Klerksdorp.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN, and edited by Hester van der Walt.

Thank you for listening, 73.

AREC at The Ready Following Big Earthquake
Date : 04 / 09 / 2010

Author : Jim Linton - VK3PC

So far AREC (Amateur Radio Emergency Communications) volunteers have not been required in any major way to assist, following the earthquake that hit Christchurch in New Zealand. The magnitude 7.1 earthquake occurred at 4.36am local time Saturday 4 September, while most people were asleep in their homes. The result was extensive building damage in New Zealand?s second largest city, Christchurch, with only two people seriously hurt and no one reported trapped or missing.

AREC Deputy Director, Geoff Chapman ZL3PX who lives in Christchurch, said that while AREC was at the Civil Defence Headquarters, there has been no requirement for it to pass any emergency traffic. That is due to restoration of telephone and power to the majority of the affected areas. While water and sewerage systems have been affected there has been no reported major loss of roads or bridges. However AREC is ready, as the situation could worsen with the weather bureau issuing a warning of very strong winds with gusts up to 130km/h and heavy rain posing new threats to already damaged buildings. Adding to the danger are numerous after shocks with authorities advising that these will continue for many days or weeks.

The quake is New Zealand's most damaging since the one which hit Napier (Hawke's Bay) in February 1931, that saw radio amateurs extensively provide emergency communications. That led to the formation of the Amateur Radio Emergency Communications, of what is today known as AREC.

Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communications Committee.

The Start of The Christchurch Earthquake
PRELIMINARY EARTHQUAKE REPORT

GNS SCIENCE
GeoNet Data Centre
Lower Hutt, New Zealand

http://www.geonet.org.nz

The following earthquake has been recorded by GNS Science:

Reference number: 3366146/G
Universal Time: 3 September 2010 at 16:35
NZ Standard Time: Saturday, 4 September 2010 at 4:35 am
Latitude, Longitude: 43.54ï¿½S, 172.23ï¿½E
Location: 30 km west of Christchurch
Focal depth: 33 km
Richter magnitude: 7.4

Web page: http://www.geonet.org.nz/earthquake/quakes/3366146g.html

Widely felt throughout New Zealand.

The GeoNet project is core funded by the Earthquake Commission (EQC)
and is being designed, installed and operated by GNS Science on behalf
of EQC and all New Zealanders.

Debby Says...

SUBSCRIPTION PAYMENTS by direct credit

If paying your membership subscription for 2011 by direct credit to our bank account, please remember to include either your call sign or membership number, so I know who the payment is from.

To pay direct to our bank account, the details are as follows:

BNZ 02 0772 0209760 00. New Zealand Association of Radio Transmitters Inc.

HAMADS

If you are wanting to place an advertisement in the HAMADS, you need to forward this directly to the Break In Editor, John Walker ZL3IB. The address details can be found inside the front cover of your magazine.

EXAMINATION SUPERVISOR APPLICATIONS

There is now a new policy under which Examination Supervisor applications are to be received. If your branch is nominating a member, please include the branch minutes where this nomination has been made and entered, plus a covering letter from the Branch President/Secretary, together with the new application form. If you need a copy of this, I can forward one to you.

Remember the person you are nominating does need to be a financial member of NZART.

Talk soon...Debby ZL2TDM

****

New Zealand Amateur Radio Day

Purpose
The purpose of the New Zealand Amateur Radio Day is to promote our hobby to the public so that some may be encouraged to join the local club, take on classes and become amateur radio operators.

Time

>From 1000-1200 hours local time annually on the 3rd Saturday of January

Location

Any prominent and public location where there is plenty of public foot traffic. The location will most likely require council (or other landowner) approval. Make sure this is sought and obtained in plenty of time as councils often have minimum notification times.

Logs

You are required to keep a log of all stations worked during the 2 hours. Logs must include the callsign of the station worked, time, frequency, and any other information you may like to include.

Callsign

Use of club callsigns is encouraged, however individuals may also set up a station using his or her own callsign.

Prior Publicity

For this exercise to be a success prior publicity is essential. Make ever effort to publicise the event through local club magazines, local newspapers and other media outlets as much as possible.

Publicity on the day

As the aim of this exercise is to promote our hobby to the public, have material to hand out on the day. A liaison person or persons should be nominated for this task. People with good communication skills are recommended to take on this role. This person should have a thorough understanding of the systems and modes being used on the day as they will be inundated with questions. Cards, pamphlets and other such giveaways, with club representative contact details are a must. Get copies of the latest amateur radio promotional brochure from Debby at NZART HQ. If you have a class coming up make sure the details are included on any handout material. Take down details of people who express an interest in the hobby and follow them up.

Contacts

Contacts are to be made with other NZARD stations, or home stations willing to work NZARD stations. Interested public should be encouraged to have a go on the air under direct supervision.

Bands and Modes

Operation on the day can be on any band and any mode. The national system, IRLP nodes, 80 and 40m would be recommended as a starting point for New Zealand based contacts. Digital modes and CW may also be used to attract interest.

Other Rules

While this is a field type operation, mains may be used if available.

Make sure your equipment is working and presentable to the public before the event.

Afterwards

Please write an activity report and submit it with your log to warren@zl2aj.com. There is no scoring of contacts made during the day. Activity reports will be submitted to Break In. It is imperative to follow up any names collected on the day. Invite them to a club night, or get them involved in activities. Encourage them to study and get a callsign. All this will help boost club membership.

****

Doug Gorman Frequency Measuring Contest

Doug Gorman Frequency Measuring Contest

This contests runs again on Monday 6th September 2010 at 2100 NZST (0900 UTC).

The revised rules brings the contest up to the modern standard that amateurs can now reach with home brew equipment.

Gone is the measuring of three frequencies spread across the 80 m amateur band. For maximum points a total of five frequencies must be measured within +/-5 kHz of 3895 kHz. There are now three grades of measuring, John McKim Cup (Simple equipment to 100 Hz readout resolution), Norm Edwards Shield (equipment better that 10 Hz readout resolution), or Ultra Category (equipment directly referenced to an atomic standard during the contest)

The Branch award is still available and certificates will be provided to all entries with an average deviation of 100 Hz or better.

The contest takes care of all measuring methods now available to the amateur.

How about giving it a go again this year, to celebrate the 58th year of running this contest!

Jamie Pye ZL2NN

Dipshit. Yeah...and introduce a virus to my computer?
You fifteen year old hackers should not be allowed to use your daddy's
computer.

712. Estimated pecentage of 'gay' hams?

I suspect it's 1 in 16, same as the general population. Maybe a little
more because of the IQ factor.

714. Ohio/Penn DX Bulletin #975

September 6, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, NG3K & ADXO, K4ZW, N4AA & QRZ DX, N7DF, K8YSE, ND8L, W8GEX (60m News), N0TG, Algarve STAR DX Team, AT International, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F5PFP, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, IK7JWX, OZ6OM & 50 MHz DX News, PA7DA, Pete's-DX-Newsdesk, RSGB IOTA Web Site, RN1CW, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK2IR, VK3PC and VK3QB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th-August, through Sunday, 5th-September there were 202 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2R, ROTUMA. Tommy, VK2IR/SV0XBF, informs OPDX that he is heading up a team of 10 operators to activate Rotuma in July 2011 (with the help of 3D2AA). Team leader Tommy, VK2IR, states details will be forthcoming as plans progress.

8P, BARBADOS (Update). John, G0OPA, will be active as 8P9LJ from Holetown, St.James Parish, Barbados (NA-021, WLOTA 0999), between September 12th and November 8th. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau.

CQ COMMUNICATIONS PRESS RELEASE. Richard Moseson/W2VU, Editor, sent out the following on September 1st: "CQ Magazine Launches Streamlined Website - Celebrates With Special Web-Only Offer (Hicksville, NY) -- CQ magazine has launched a new, easy-to-navigate website, and is celebrating with a special web-only discount offer. The updated site, which features a clean new look and a streamlined user interface, completes a company-wide website upgrade for all four magazines published by CQ Communications, Inc.
The site features highlights of the current issue and links to selected content, as well as hamfest & special event listings, easy links to the CQ Writer's Guide, award and contest information, a comprehensive links section, special information for new and prospective hams, and direct links to advertisers' websites, as well as a direct link to CQ's Facebook page. Callsign lookup and a link to the online CQ archive are also included.
New material posted includes September issue highlights, expanded results of the 2009 CQWW CW Contest (as well as complete SSB results), a link for pre-ordering CQ's 2011-2012 Amateur Radio Calendar, and a special web-only offer for 5 USDs off any order of 25 USDs or more, including subscriptions (new or renewal) to all CQ publications.
'We have always had a tremendous amount of valuable information on our website,' said Editor Rich Moseson, W2VU. 'But because it has been added bit-by-bit over the years, some of it had become hard to find. Our new design makes it much easier for readers and prospective readers to access this treasure trove of ham radio information.'
CQ Amateur Radio is the world's #1 independent amateur radio magazine, serving active hams since 1945. In print for more than 65 years, it is one of the longest-running magazines in publication today. CQ is published by CQ Communications, Inc., which also publishes Popular Communications, CQ VHF and WorldRadio Online magazines.
The new CQ website may be accessed at <http://www.cq-amateur-radio.com>."

CR6, PORTUGAL (WWF Op). Members of the Algarve STAR DX Team will be active as CR6A from Natural Reserve St. Andre e Sancha (DPRN & WFF CTFF-19) as an all time new one on September 19th. Activity will be on 40-15 meters using CW and SSB. Operators mentioned are: Luis/CT1CQK, Toze/CT1GFK, Al/CT1GPQ and Mike/CT1IUA. QSL via CT1GFK. For more details and updates, vist the Algarve STAR DX Team Web page at: http://algarvedx.com

D2, ANGOLA. Craig, MM0SSG, is now active as D2SG from a beach 1 mile from the capital Luanda. He expects to be there for the next 6 months (on 6/2 rotation). Activity will be during most days on the HF bands, 80-10 meters including 30/17/12 meters using CW, SSB and PSK31. He is using a Yaesu FT-897 with either 100 or 10 watts (depending on circumstances) into a small vertical antenna for most bands and a 20m dipole for 20m. QSL via ONLY DIRECT to his P.O Box in Glasgow which will be set up by the 10th of September or sooner. He requests a SAE (Self Addressed Envelope) with 2 green stamps (USDs). No IRCs please. QSL cards will be returned approxi-mately every 2 months when he returns to the UK. LAST MINUTE UPDATE:

QSL via GM4FDM.

EM0, UKRAINE. Look for the club station of Ukrainian State Centre of Radio Frequencies (Ukrchastotnaglyad - UGTSR) to be active during the period of September 6-10th using the callsign EM0ITU. Activity is in connection with an ITU workshop <Spectrum monitoring/Task Problems and Solutions> by the ITU Centre of Excellence in Kiev, Ukraine. Operations will be on all amateur bands using CW, SSB and RTTY. QSL via UT3UZ: Alex Arbuzov, P.O. Box 7, Kiev-232, 02232, Ukraine.

IOTA NEWS.....
AF-018. Emilio, IZ1GAR, will be active as IH9R from Pantelleria Island (African Italy - CQ Zone 33, IIA TP-01, WAIP TP, WLOTA LH-0041) during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (40m) entry. QSL via IZ1GAR, direct or by the Bureau. He will be on the island between November 23-30th.

AF-097. Members of the Sahara DX Radio Club (7X3WPL) will be active as 7V2PI from Pisan Island between September 16-20th, weather permitting. Operators mentioned are Afif/7X2RO, Ahmed/7X2EB, Sofiane/7X2GX, Youcef/7X2HF, Ahmed/7X2DF and Yves/7X0MT. QSL via EA5FL.

AS-039. Sergey, US0IW, is now active as R0/US0IW from the rare Beringa Island (as R0/US0IW), in the Komandorskiye Islands Group. His length of stay is not known. Activity has been on 40/20 meters CW. QSL via his home callsign.

EU-037. Operators Fred/SM7DAY and Jan/SM7NGH will be active as home-call/p from Oland Island (WLOTA 0588) between September 5-11th. Activity will be on all bands using CW and SSB. QSL via their home callsigns, direct or by the Bureau.

OC-137. Ray ("Lucky"), K9LUK, will be active as K9LUK/VK4 from North Stradbroke Island between October 8&#65533;16th. Activity will be sporadic, but look for him on 14260 kHz. QSL via his home callsign, direct only.

SA-059. Members of the Caracas DX Group will be active as YW5LF from Los Frailes Islands between November 18&#65533;22nd. QSL via DM4TI. More details are forthcoming.

IR7, ITALY (WFF Op). Fred, IK7JWX, announced that he will be activating National Parks/Reserves in the Italian Provinces of Lecce (LE), Brindisi (BR), Taranto (TA) and Bari (BA), for the "World Flora Fauna" Award between October 1st and December 31st. He will use the special callsign IR7WFF. QSL via his home callsign.

K3, UNITED STATES (VHF and USI Op). Charlie, K3NXH/4, will be on vacation on Topsail Island (NC004S [for the U.S. Island Award], Pender County, North Carolina) between September 8th and October 9th. He plans to be active during the ARRL September VHF Contest (September 11-12th) from Kure Beach (Grid Sq. FM13) and Topsail Island (Grid Sq. FM14), North

Carolina. Activity will be on 6 and 2 meters. If time and conditions permit, Charlie will try to activate Grid Squares FM03 and FM04. QSL via his home callsign.

KX9, UNITED STATES (Quick USI Op). Sean, KX9X, will be making a qualifying run for Eastman Pond Island (NH-018) near Grantham, New Hampshire on Monday, September 6th. This run will be relatively short, only 2 hours or so. He hopes to make the needed QSOs in that time to qualify. Rig will be a Yaesu FT-817 with 5 watts to a dipole up as high as he can manage. Look for him on SSB, 14260 and 7260 kHz (+/- QRM), and if that fails, he will also be on 14064 and 7064 kHz CW. Sean states, "I have to canoe to the island. Estimated time QRV will be 1600z to 1800z."

KH6BZF PROPAGATION FORECAST/REPORT (For September 6-12th)....
Sept 6 AN SOLAR REFERENCE KEYS
Sept 7 AN --------------------
Sept 8 AN BN - Below Normal
Sept 9 AN AN - Above Normal/Geomagnetic Level is QUIET
Sept 10 AN LN - Low Normal
Sept 11 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sept 12 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OJ0, MARKET REEF (EU-053). Pasi, OH3WS/OG3A, will be active as OJ0W between September 12-22nd. Activity will be on the HF bands using CW and SSB. QSL via his home callsign.

PG6, THE NETHERLANDS (Special Event). Look for special event station PG6N to be active during the International Hertage Day on September 11th. Activity will from the Noordwijk Lighthouse Station (ARLS NET019). The team will try to be active after 1100z after setting up the station. The Noordwijk Ligthouse will be open for public on this day between 11.00-17.00 local time. PLEASE QSL via the Bureau. For more details see: http://www.qrz.com/db/PG6N --or-- http://pg6n.jouwweb.nl/english

PJ5 & PJ7, NETHERLANDS ANTILLES. With the strong possibility of two new DXCC entities to be created on October 10th, David, AH6HY, plans to activate St. Eustatius (NA-145) between October 6-15th, as PJ5/AH6DX, followed by Sint Maarten (NA-105) between October 15-22nd, as PJ7/AH6DX. QSL via his home callsign.

TS8P QSL STATUS. Alfredo, IK7JWX, reports that some 1000 QSLs for TS8P were sent out last week and he expects to send out another 500 cards this week.

QSLS VIA LoTW: KL5DX, LA1J, NH7O, OH0X, OL1C, UA2FF, V31UB, ZL1BYZ and ZL6LH

QSLS RECEIVED VIA MAIL: 3D2M, A7/M0FGA, CE4WJK, E4X, FW5F, FW5M, GW3YDX, PJ4/OK5MM, TL0A and V21ZG

QSLS RECEIVED VIA THE BUREAU: None reported this week!

RUSSIAN PREFIXES (Are You Confused?). In 2010, Russia started new structure prefixes for hamradio callsign and some of them are confusing. Vladimir, RW2L, in Smolensk, European Russia (not Kaliningrad), has put together an interesting table/list of the new prefixes at: http://www.qrz.com/db/rw2l

RZ1, RUSSIA (WCA & COTA Op). Members of the Sosnovyj Bor Radio Club (RZ1CWC) will be active as RZ1CWC/P from Ivangorod Fortress (WCA UA-00006, COTA-RU C-106, RDA LO-26) on September 11th. Operators mentioned are: Andrew/RN1CW, Victor/UA1CBN and Vlad/UA1CIO. Activity will be on 40/30/20 meters using CW and SSB. QSL via RN1CW, by the Bureau or direct. For more details on the Castle and Fortress awards, visit the following Web sites:
World Castles Award (WCA) at: http://www.wcagroup.org
Castles On The Air Russia (COTA-RU) at: http://www.rz1cwc.qrz.ru

SV5, DODECANESE. Members of Aegean DX Group will be activating Arkoi Island (IOTA EU-001, GIOTA DKS 058 [for Greek Islands On The Air Award <http://www.greekiota.gr>] as SV5/homecall/p between now and September 7th. Operators mentioned are Alexandros/SV8CYR, Vassilis/SV8CYV, Giorgos/SV8IJZ and Dirk/ON5CT. Activity is planned for 80/40/20/17 meters using SSB and the Digi modes mainly on the IOTA frequencies. Their portable stations will be fairly simple with power limited to 100 watts and

antennas being verticals and dipoles. QSL via their home callsigns, direct or by the Bureau.

T6, AFGHANISTAN. Radek, SQ8HNB, is now currently active as T6LR. His length of stay is presently not known. Activity has been on 40/20/17/15 meters SSB. QSL direct to: Radoslaw Mos, Poniatowskiego 10/23, Zamosc, 22-400, Poland. Also, QSL via the Bureau to SP8PRL.

TM32, FRANCE (Special Event). Look for special event station TM32CDXC to be on the air between now and September 18th. Activity is to celebrate the 32nd Convention of the Clipperton DX Club. Operations will be on all bands and modes. A special QSL will be printed at the end of the operation. QSL via F5CWU. The log will be uploaded to LoTW.

TS7, TUNISIA (Update/IOTA Op). An Italian team of operators will activate the Tunisian Islands of Plane (AF-091) and Kuriat (AF-092) as TS7TI and TS7TI/p between September 13-23rd. Operations will be from the fixed base at Raf Raf and Monastir using the club stations 3V8ST, 3V8SA and 3V8SQ. Operators mentioned are: Alfredo/IK7JWX, Leopoldo/I8LWL, Simon/IZ7ATN, Paolo/IK7UXW, and Ivo/9A3A (CW op). Activity will be on all bands HF, WHF, VHF and 6m, using CW, SSB, PSK31 and RTTY. During their activity they will also activate some wanted WFF/VFF and lighthouse reference numbers, and the most wanted grid square JM57 as well as other grid squares. They are currently seeking sponsors/supporters for this DX-pedition.

VK0H, HEARD ISLAND. It was announced this past week that Heard Island, ranked the number 6th world's most wanted DX entities, will once again be activated in February of 2013. This uninhabited sub-Antarctic island, in the Southern Indian Ocean, was last activated in January 1997 (VK0IR). The planned 2013 Dxpedition is being organized by co-leaders Chris/VK3FY and Steve/VK6IR. The co-leaders are proposing to be on the island for two weeks with a 13 member DXpedition team. This is expected to be a very expensive operation costing around 500,000 USDs. Discussions has already taken place with the relevant Australian Government Minister and an application has been submitted for approval. Also, negotiations have begun to appropriate a ship for the journey to Heard Island. Once all the above items are approved and set, a callsign will be sought from the Australian Communications and Media Authority, and Web site will be set up to keep everyone informed. Stay tuned! By the way, Jim, VK3PC, has been named the Publicist for the Heard Island 2013 DXpedition, and he will keep OPDX and its readers informed.
Mehdi/F5PFP and Michel/F6DWQ provided the following interesting Web pages on Heard Island:
http://www.french-polar-team.fr/VK0_Atlas_Cove_Heard_Island.php

http://www.antarctica.gov.au/science/cool-science/cool-science-archive/2007-articles/exploration-of-heard-island-between-1947-and-1971
http://www.heardisland.aq/

VP9, BERMUDA. Operators Ray/ND8L and Jamie/WW3S will be active as VP9I from Ed/VP9GE's QTH for the CQWW RTTY DX Contest (September 25-26th).

QSL via N1HRA. They plan to arrive on September 23rd and leave on the 27th. Outside of the contest, look for them to be active as VP9/WW3S and VP9/ND8L. QSL via LoTW or SASE to their CBA.

WRTC WEBINAR #2. Ken, K4ZW, reports that another Webinar will be available on Tuesday, September 7th, at 1800z, and it is called "A Look at the 2010 WRTC Competition - European Teams". This is the second and final look at WRTC 2010. Presenters will be the European teams S50A/S57AW, ES5TV/ES2RR, and the winning team of RW1AC/RA1AIP. The event is free but you must register at: https://www2.gotomeeting.com/register/920852130

XW1, LAOS. Bruce, XW1B, will be active during the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/Lower-Power (possibly Single-Band 20m) entry. QSL via E21EIC.

YJ0VK DXPEDITION WRAP-UP. Chris, VK3QB, reports (edited): "The four members of the YJ0VK team (Chris/VK3QB, Allan/VK2CA, Luke/VK3HJ and Brenton/VK3CBV) returned from Vanuatu on September 2nd, after 6 days of operation. A quick summary of operation follows:
* Almost 4,000 qsos
* 69 DXCC entities
* Approx 500 digital qsos (RTTY and PSK31)

Overall the team had a lot of fun and regards the expedition as a success. Conditions were a bit disappointing, especially into EU, with barely 300 QSOs to that part of the world. We listened, we called EU but conditions did not favor that path; we worked EU as much as possible when the conditions were there. Obviously, lots of NA and JA.
More detailed statistics can be found on our Web site (under the 'News' tab) at: http://yj0vk.vkham.com
We have also posted a few pictures under the 'Gallery' tab.
The QSL card is currently being designed, and we hope to start QSLing in the coming 4-5 weeks. Many thanks to all the patient operators who sat on the side as we worked the pileups, and also those who persevered with the poor conditions. And sorry to those who we know were chasing us but we were unable to work especially on 12 and 30 meters. We did try!
A more detailed report will be published in the coming weeks when we recover from the trip and get our equipment unpacked, cleaned and ready for the next trip.
On behalf of the team, I would like to offer a special thank-you to the following:
* ODXG as principle supporter
* Chris, VK5CP, for the loan of equipment
* Phil, VK3YB, for the loan of equipment
* Allan, VK2CA, and vkham.com for our internet presence.
* Individual amateurs who made donations
* Brian, VK3BSN, (NBS Masts and Antennas) who manufactured our vertical antennas

Thanks again to one and all, and I think we are already considering
another trip next year. Very 73 to all...es gud dx. Pls drop me an
E-mail <vk3qb@wia.org.au> if you have any questions about the trip.
On behalf of the YJ0VK Team, de Chris, VK3QB"

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, continues to be active
most days on 20 meters SSB (various frequencies) between 1230-1730z. He
has also released another newsletter from Marion Island which he provides
more pictures, along with more details about his set up and activities
on the island. His newsletter can be found online at:
http://www.iz8epy.it/html/zs8m.html

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 5th September 2010

The many friends in Region 4 & Limerick Radio Club, of Terry Deegan EI4BK will be sad to hear of the passing of his father John Deegan. The burial took place last Monday 30th August, and there was a big representation of operators from the Region. May he rest in peace.

IRTS Morse testing at North Cork Radio Group Rally.

Morse testing can be made available if required, at the upcoming North Cork Radio Group Rally on 19th September. Anyone wishing to sit a morse test should contact Ger McNamara EI4GXB on 087 2532512 or ei4gxb /at/ gmail.com

---

Closing Date for Theory Examination

It is now less two three weeks to the 17th of September which is the closing date for applications to sit the next theory examination for an Amateur Station Licence. The next exam will be held on Wednesday the 6th of October at 2 p.m. in the ComReg Offices in Dublin.

For further information on the application procedure, exam fees and other details see 'Theory Examination' in the 'Information' section of the IRTS website atwww.irts.ie

---

Two Metres Counties Contest

The two metres counties contest, held last Sunday, was well supported as usual, with stations from most counties, north and south, on the air. For a change, we had some good weather for the contest, which encouraged a number of stations to operate portable. Among the portable operators heard on the day were Shannon Basin Radio Club operating from Longford, and Mayo Radio Experimenters Network from a site in Mayo.

Other portable stations logged included Declan EI2GFB, Sean EI4IP, David EI7GEB and Joe EI7GY - Joe was on the Slieve Blooms in County Laois, his favourite portable QTH. David MI0VKO operated portable from County Fermanagh, a very welcome multiplier from a rare county! Band conditions were relatively poor, with QSB requiring plenty of patience

from the contesters.

Please send logs to the Thos EI2JD, IRTS Contest Manager at email address contestmanager /at/ irts.ie

---

Change of 40M WAI Frequency

It was decided at the recent IRTS Committee Meeting to Change the WAI Frequency from 7.068 to 7.170

Theory Classes in Clane

There will be an Introduction to Amateur Radio & Electronics course being ran from Scoil Mhuire Clane, held over 10 sessions on Monday evenings from 8-10pm for bookings please phone Scoil Mhuire on 045868255.

Shannonbasin Radio Club

Shannonbasin radio club will again be hosting the annual SSB field this weekend In Garbally collage Ballinasloe.

This is an ideal venue for this contest and all clubs are welcome. Shannonbasin radio club will also host there now famous BBQ and all are welcome.

Rallies

North Cork Radio Group is pleased to announce their first annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 19th 2010

Tables and stalls are now fully booked out. NCRG would like to thank all those parties who have shown great interest in placing early bookings and promoting the event. Anyone still wishing to sell items and who haven't successfully booked a stand can still make use of the bring and buy stall, arrangements for this can be made on the day. Once again a very big thank you to all.

More information is available via the Groups website www.NorthCorkRadioGroup.com,

7th November Foyle and District ARC Rally is being held at the White Horse Hotel, 68 Clooney Road, Derry for anyone with GPS / SATNAV the post code is BT47 3PA

Doors will open at 12 noon, for more information Information:See www.mn0aku.co.uk

21st November Mayo Radio Experimenters Network Annual Rally is being held at the Welcome Inn, Castlebar, Co. Mayo

Doors open at 11:00 a.m. for more information on the MRE Rally please contact the Rally Director: Padraic Baynes, EI9JA website www.ei7mre.org

For further details on Rallies please see www.irts.ie/rallies

I forgot, "gay" is a four letter word in these parts, proper people
don't say it, and it is spelled pgay here; The "p" is silent ... <grin>

Regards,
JS
```

Message-ID: <19519672500.20100906222630@dxhf.darc.de>
Source record: 5539
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

DXNL 1692 - Sep 8, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

D2 - ANGOLA
Craig,MM0SSG, is active as D2SG from Luanda since Sep 1 and will stay
there for the next six months. He plans to work in CW, SSB and PSK31
on 80m-10m barefoot with a small vertical and a dipole for 20m.
His QSL manager is GM4FDM.

EA8 - CANARY ISLANDS, AF-004
Al,EA8/DJ5AA, and Bernd,EA8/DL2DXA, are QRV from La Palma (WLOTA 1648)
working holiday style on 80m-10m from Sep 10-24. They will also try to
activate one or two lighthouses: Fuencaliente (ARLHS CAI-037, CAI-083)
or Punta del Muro (ARLHS CAI-036) but only in QRP with battery power.
QSLs via bureau or direct to their homecalls.

GD - ISLE OF MAN, EU-116
Oliver,MD/OE5OHO, Henry,MD/OE5HDN, and Gerhard,MD/OE3GEA, plan to work
in CW and SSB on all bands from the Isle of Man (EU-116) from Sep 7-13.
QSLs via bureau to their homecalls.

OJ0 - MARKET REEF, EU-053
Pasi,OH3WS/OG3A, will be QRV as OJ0W from Market Reef (EU-053) in SSB
and CW on HF from Sep 12-22. QSL via OH3WS, also via Finnish bureau.

SU - EGYPT
Gab,SU/HA3JB, will be active with his renewed license in CW, RTTY,
PSK31 and some SSB from September until November. Gab plans to join the
CQWW RTTY Contest as well.
QSLs only direct with SAE to HA3JB, Gabor Kutasi, H-8601 Siofok,
PO Box 243, Hungary. Please write your e-mail address on the back of
your QSL card. For more information click on: http://www.ha3jb.com

T6 - AFGHANISTAN
T6LR is Radek,SQ8HNB, who has been spotted in SSB on 40m/20m/17m/15m.
Nothing is known about the length of his stay. QSL via buro to SP8PRL.

TA - TURKEY
Rene,DL2JRM, plans a mini DXpedition as TA2/DL2JRM from Sep 13-16.
His QTH will be Sile, about 50 km northwest of Istanbul. Rene also
plans to take part in the single OP 100W class of the WAE CW Contest
and the rest of the time he will work also in CW on the WARC bands.

Bernhard,DJ5MN, and his family also spend their holidays in Turkey from
Sep 7-17. He is working as TA4/DJ5MN from Belek and maybe also as
TA1/DJ5MN from Istanbul (for two days). Bernhards works with 100 watts
and a fullsize vertical mainly in CW on 80m-6m and if there is enough
space also on 160m. Ben will try to respond to all sked requests.
QSLs via bureau to his homecall.

TK - CORSICA, EU-014
Patrice,TK/F5RBB, and Mireille,TK/F0FRL, are going to hit the airwaves
from Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA L-1390) from
Sep 12-25. Patrice works in SSB and digital modes on 80m-10m while
Mireille works in SSB on 2m. QSLs via their homecalls.

VK0/H - HEARD ISLAND, AN-003
Chris Dimitrijevic (VK3FY) and Steve Chamberlain (VK6IR) are planning
a DXpedition to Heard Island (AN-003) for February 2013. The team
includes 13 OPs and should be active on the air for two weeks. The
costs are estimated around US$ 500.000.
A website with further information will go online soon.

YI - IRAQ
Tim,KB2RLB, is active as YI9RLB. He lives in Iraq and works in SSB,
RTTY and PSK31 on 40m and 20m. QSL via homecall, direct or eQSL.

Eric,KG4GYS, has got a license as well and is now working as YI9GYS
from Tikrit mostly on 14200 kHz from 0300-0500 UTC and 1400-1600 UTC.
QSL via KG4GYS.

8P - BARBADOS, NA-021
John,G0OPA, announced to be active as 8P9LJ on all bands from Holetown
in the St. James Parish on Barbados (NA-021) between Sep 12 and Nov 8.
QSLs direct or via bureau to G0OPA.

9H - MALTA, EU-023
Alex,SQ9UM, plans an activity as 9H3UM from Qawra on Malta (EU-023)
from Sep 8-22. He also plans a sidetrip to Marsalforn on Gozo (EU-023).
QSL via homecall.

AUSTRIA, SPECIAL EVENT STATIONS
The special calls OE2XXM and OE5XXM (with special ADL 553) are active
from Sep 1-30 during the XXIV. international autumn fieldday in Gosau
at Dachstein mainly on 80m, 40m and 20m. QSL via the Austrian bureau.
See also http://www.qrz.com/db/oe2xxm or http://www.qrz.com/db/oe5xxm

FRANCE, SPECIAL EVENT STATION
TM32CDXC is working from the 32nd Convention of the Clipperton DX Club
from Sep 4-18. The convention is held in Pontarlier on Sep 17/18.

See also: http://www.cdxc.org

ITALY, SPECIAL EVENT STATION
The special call IR0ROMA active from Sep 6-12 shall remember the
tragedy of the battle ship "Roma" in WW2. QSL via IK0LZR.
More information about the battle ship can be found online at:
http://en.wikipedia.org/wiki/Italian_battleship_Roma_(1940)

POLAND, SPECIAL EVENT STATION
The special call SN140MPR is activated until Sep 30 to mark the
140th anniversary of the Polish museum in Rapperswil (Switzerland).
QSL via SP9KDU, direct or via bureau.

USA, SPECIAL EVENT STATIONS
Members of the "Symbol Technologies Amateur Radio Club" are activating
the special callsign N1Y to remember the terror attack in New York on
Sep 11, 2001. The clubstation W2SBL will work with several radios at
the same time from Sep 11, 1500 UTC, until Sep 12, 1500 UTC.
Operation will take place in SSB, CW, PSK31, SSTV on HF and 70cm/2m/6m.
QSLs direct or via bureau to W2SBL.

Another special activity is organized by the "Blair Amateur Radio
Society" using the special call "N3U/United Flight 93" from Sep 9-13.
N3U remembers the attacks in Shanksville (PA), New York City and
Washington DC. OPs are Bob,W3BTX & P49T, Roy,W3TEF, and other members
of the clubstation W3PN. Following frequencies were announced:
CW: 1810, 3530, 7030, 10120, 14030, 18090, 21030, 24895, 28030 kHz
SSB: 1850, 3820, 7195, 14240, 18130, 21300, 24930, 28485 kHz.
QSL cards should be sent via bureau or direct via W3PN.

6m allocation for India's HAMs

The Southgate ARC writes on his website (http://www.southgatearc.org/news)
that the 6m band has finally been allocated for amateur radio use in India.
Prasad,VU2PTT, contest manager of the Amateur Radio Society of India (ARSI)
writes that HAMs are allowed to work with 25 watts on 50-54 MHz.
The licensing structure has been rationalized with only two classes of
license (General and Restricted) and one can choose if he acquires the
licenses for either 20 years or for the lifetime of the holder.
The callsign block VU2 is reserved for the General license class and
the callsign block VU3 for the (lower) Restricted class.

==> THE VIEW FROM FLAGLER COUNTY

Hurricane Earl: On Monday morning, August 30, I listened to the opening of the Hurricane Watch Net <http://www.hwn.org/> on 14.325 MHz, with Dan Weisenburger, KW4T, performing superbly as net control station, in response to the storm's brush with the Virgin Islands. The National Hurricane Center <http://www.nhc.noaa.gov/> station WX4NHC <http://www2.fiu.edu/orgs/w4ehw/> was activated and monitored the net. Long time friend and Virgin Islands Section Manager John Ellis, NP2B, on the north side of St. Croix, reported a barometric pressure of 29.66 mb, and maximum sustained winds of 33 mph. His Internet connection, cell phone service, and commercial power were out. At mid-week, Ellis reported that they were fortunate: no major damage. The island community was turning its attention to new cells starting their march across the Atlantic off the coast of Africa.

As I write this on Friday morning, September 3, Hurricane Earl is off the coast of Cape Hatteras, and I'm listening for reports on the HWN. I also listened to the EchoLink "WX-Talk <http://www.voipwx.net/>" Conference Room, an efficient operation, to say the least. The crew at WX4NHC also monitors CWOP <http://www.wxqa.com/>, APRS <http://www.aprs.net/> and MADIS <http://madis.noaa.gov/> automated weather stations in the affected areas, as well as the EchoLink service. Surface reports using WX4NHC's Online Hurricane Report form <http://www.wx4nhc.org/WX-form1.html> are also monitored.

The VoIP Hurricane Net <http://www.voipwx.net/> was also supporting WX4NHC with surface reports. Stations can connect to the net via the EchoLink conference node 7203.

More from ARRL HQ on Hurricane Earl here <http://www.arrl.org/news/hurricane-earl-continues-to-strengthen-watch-nets-activated>.

Report: Massachusetts ARES Prepares as a Now-Weakened Hurricane Earl Approaches
<http://www.arrl.org/news/massachusetts-ares-prepares-as-a-now-weakened-hurricane-earl-app

roaches>

I also checked into the Florida Hurricane Net <http://www.floridahurricanenet.org/> on the D-STAR platform Monday night at 2100 local time, which had a robust turnout of check-ins from across the southeastern portion of the country in the spirit of mutual support. The digital voice quality is superb! The net is run with a high degree of professionalism.

The purpose of the net is to provide training to ARES members in the three Florida ARRL Sections and hurricane emergency communications in Florida for served agencies. Any Amateur Radio emcomm operator or organization is welcome on the net, however. In addition to hurricanes, the net will be activated by any major emergency to support our served agencies and the Florida State Emergency Operations Center <http://www.floridadisaster.org/eoc/update/home.asp>.

Note the check-in protocol: The net takes check-ins using the "Quick Key Format." The operator transmits his/her call sign by keying the radio or Dongle for one second only when the frequency is clear. Net Control will then acknowledge all check-ins seen. Quick and efficient!

And finally, no news to anybody is that this month marks the fifth anniversary of the catastrophe of Hurricane Katrina. For a look back at the Amateur Radio response as it was unfolding then, see the special edition of this newsletter released this month five years ago here <http://www.arrl.org/ares-el?issue=2005-09-03>.

==> LEARNING THROUGH PRACTICING: GAREC-2010 CONVENES NEXT MONTH

"Learning through practicing" is the theme of GAREC-2010, to be held October 11 and 12, 2010, in Curacao. GAREC is the global Amateur Radio emergency communications
conference, a popular annual confab that is supported by the ARRL and IARU <http://www.iaru.org/> through all three ITU Regions <http://www.iarums-r1.org/iarums/itu.pdf>.

This year's conference is an opportunity for emergency communicators to discuss recent events, cooperation with professional partners and technical solutions to problems. An actual emcomm exercise will also be conducted during the conference to explore how information sharing across borders can be improved.

The opening ceremony will feature a representative of the Curacao government; patron Dr. Hamadoun Tour&#65533;, HB9EHT, Secretary-General of the ITU <http://www.itu.int/en/pages/default.aspx>; Hans Blondeel Timmerman, PB2T, President of IARU Region 1; and a representative of the GAREC Organizing Committee. Activity reports will be heard from Region 1 representative Greg Mossop, G0DUB; Region 2 representative Michael Corey, W5MPC; and Jay Oka, JA1TRC, of Region 3.

Jean-Robert Gaillard, HH2JR, will present "Earthquakes and Amateur Radio: Haiti." The conferees will also hear from Professor Arnaldo Coro Antich, CO2KK, veteran Region 2 emcomm expert. A program on "ITU - IARU Cooperation" will be presented by Dr. Cosmas Zavazava, (ITU-D <http://www.itu.int/net/ITU-D/index.aspx>), chaired by GAREC-2010 coordinator Dr. Seppo Sis&#65533;tt&#65533;, OH1VR. A tabletop exercise will be conducted by Mossop.

A panel discussion on "Forwarding Received Emcomm Messages" will be conducted by Dr. Zavazava, Corey, and Joop Verdoes, PA1JOV, chaired by Timmerman. Technical solutions for emcomm problems will be presented in the form of examples from multiple organizations, by Dr. Sisatto.

A program "How to Organize an EmComm Exercise" will include examples from Finland, Netherlands, and South Africa, chaired by W5MPC. And finally, "The Future Role of the Amateur Radio Service in EmComms" will be an open discussion for all conference participants.

Click here <http://www.garec.net/> for complete conference information.

Coincidentally, Curacao will be celebrating its independence on October 10. An ICOM IC-7600 will be operated at the conference site.

The GAREC mission: To get Amateur Radio operators to be better prepared for emergency communications and create practices for national and international levels. GAREC is a forum for exchanging information and experiences among all Amateur Radio operators and groups that are interested in emergency communications. Its Vision: To have regular world wide cooperation and understanding between governmental

authorities and the Amateur Radio Service and community. -- Dr. Seppo Sis&#65533;tt&#65533;, OH1VR <http://www.oh1vr.net/>, Chairman of the Organizing Committee, GAREC-2010

==> PAKISTANI AMATEURS TEAM UP TO PROVIDE COMMUNICATIONS, RELIEF SUPPORT FOR FLOOD VICTIMS

According to the Pakistan Amateur Radio Society (PARS) -- that country's IARU Member-Society -- radio amateurs in Pakistan have teamed up with the Islamabad Jeep Club and Pakistan Academy of Family Physicians to provide relief activities in those areas of Pakistan devastated by floods. The groups will supply food, tents and medical support to the northern flood affected areas of Nowshera, Charsadda and central Sargodha districts. "The cellular services are down and so is the landline," the PARS Web site reports. "Last week, the joint team carried out a survey in the north and the center of the country, and to its dismay, the situation isn't promising. Restoration of cellular services and landlines could take months." On August 21, hams reached the town of Dharkhanawala, looking to set up communications, but had to turn back because the equipment had not arrived; however, teams were able to distribute food in Dharkhanawala and Chauki Darab. Read more here <http://www.arrl.org/news/pakistani-amateurs-team-up-to-provide-communications-relief-support-for-flood-victims>.
- ARRL Letter

==> NOMINATION BEING SOUGHT FOR THE 2010 GEORGE HART DISTINGUISHED SERVICE AWARD

At its July 2009 meeting, the ARRL Board of Directors established the George Hart Distinguished Service Award to be given to an ARRL member whose service to the League's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM. Hart was a long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System (NTS). Upon learning that the ARRL Board of Directors had established this award named after him, Hart called his namesake award "a great honor."

Selection criteria include:

- Operating record with the National Traffic System; or

- Participation within the Amateur Radio Emergency Service&#65533; (ARES&#65533;); or

- Station appointments and/or leadership positions held within the ARRL Field Organization.

Nominations for the George Hart Distinguished Service Award shall be accepted from anyone and shall be submitted to the Membership and Volunteer Programs Manager at ARRL Headquarters by November 1. Nominations should document as thoroughly as possible the nominee's lifetime activities and achievements within the ARRL Field Organization. It is expected that nominated candidates will have 15 or

more years of distinguished service. The Programs and Services Committee will serve as the Review Committee, with the Board of Directors making the final determination at its Annual Meeting in January. Recipients will be given an engraved plaque and cover letter, and will be profiled in QST.

Nominations for the George Hart Distinguished Service Award, including any related supporting material and letters of recommendation, may be e-mailed to ARRL Headquarters to the attention of ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N <nn1n@arrl.org>, or to ARRL Field and Public Service Team Supervisor Steve Ewald, WV1X <wv1x@arrl.org>. Nominations and supporting materials must be received no later than November 1, 2010 to be considered.

==> ARES 75TH ANNIVERSARY UPDATES

ARES® is celebrating its 75th anniversary from September through December 2010. ARRL's ARES program has provided emergency communications for agencies such as the American Red Cross, Salvation Army, countless Emergency Operations Centers and others in the worst of times. In events from ice storms to Hurricane Katrina, when normal communications systems were down or overloaded, the Amateur Radio operators of the ARES programs responded to requests for communications aid.

Over the years the equipment has changed, but the decentralized communications nets that ARES can create to blanket regions without the need for other infrastructure remain critical in emergency planning. Recognition of this capability has led to renewed formal agreements with DHS, FEMA, NOAA and other federal agencies. With over 20,000 of the country's 680,000+ Amateur Radio operators involved in ARES--all of them truly "amateur" and providing their time, services, knowledge and equipment totally uncompensated--they are more than worthy of recognition for their 75 years of community services in the worst of times.

You can find more information about ARES at:
http://www.arrl.org/public-service

Information about the anniversary is at:
http://www.arrl.org/ares-anniversary

Click here <http://www.arrl.org/current-contact-issue> for more information on celebration plans and resources. -- Allen Pitts, W1AGP, ARRL Public Relations Manager

==> ILLINOIS NUCLEAR POWER PLANT EXERCISE: LESSONS LEARNED

On July 28, 2010, at the request of the LaSalle County (Illinois) EMA Director, hams provided backup communications between the County Emergency Operations Center (EOC) and the township EOCs within the emergency planning zone during the Biennial FEMA-Graded Exercise at the LaSalle County Nuclear Station. Served agencies included the LaSalle

County EOC at Ottawa, Township EOCs at Marseilles and Seneca, and the Illinois Valley Chapter of the American Red Cross at Peru. Amateur groups providing the support included the Starved Rock Radio Club, LaSalle County Amateur Radio Emergency Services, and LaSalle County Radio Amateur Civil Emergency Service.

The exercise is conducted every two years. Nuclear Accident Reporting System (NARS) messages were handled using 2 meter voice: the LaSalle County EOC conducted roll call, and transmitted the NARS messages.

An observer from the Department of Homeland Security complimented the hams for "impressive communication skills." The observer noted how we enforced accurate message handling. The mentoring of newer hams was also recognized by the DHS observer as a "Strength."

Lessons Learned

1. Continued practice of sending NARS messages via voice is needed.

2. Once communications is established, backup simplex and other repeater communications should be tested and verified for lowest output power needed for reliable communications.

3. The EOC needs to identify all stations calling and determine if they may be from another served agency.

4. Better antennas are needed for some locations.

5. Operators need to bring go-bags with radios with battery and power supply (as backup).

6. Power Pole connectors are needed at all sites for standardization and efficiency.

7. The EOC needs to issue each net station a tactical call. -- Joe Tokarz, KB9EZZ <kb9ezz@arrl.net>, EC/OES, La Salle County, Illinois

==> LETTERS

Personal Disaster Planning

In re the Ralph Phillips, KE5HDF, letter in the last issue <http://www.arrl.org/ares-el?issue=2010-08-11>, Phillips stated he has chosen to store less water because he has a swimming pool and stocked up on cheese cloth and pool shock instead.

Unless Ralph is on very high ground, this idea may be problematic. In the event of even a moderate flood his pool water could be contaminated with raw sewage, gasoline, oil and lord knows what else. And cheese cloth may be good for getting the lumps out of paint, but I would not exactly consider it a drinking water filter.

I am also uncomfortable with his intended use of pool shock. Where there are well-established formulas for safely using chlorine bleach to disinfect water, my Google search for a safe formula using pool shock

was less than fruitful. And depending on the brand, various brands of pool shock also contain other chemicals that may do a human much more harm than good, even at low percentages per gallon.

I admire Ralph's thinking out of the box, but I strongly suggest he take the pool shock he intends to use and get a qualified medical opinion on its use for this purpose. And if it can be safely used, the correct high and low amounts per gallon to be used for the various levels of contamination faced.

I would also suggest that Ralph increase his water storage just in case he finds the pool shock mix may need to stand for longer than anticipated, or finds the water may also require boiling. And as the saying goes: "A watched pot never boils, especially when your family is thirsty." -- Jeff Sabatini, KI6BCX, Redlands, California

South Texas EmComm Competition

I read with interest in the last issue about the South Texas group planning for an emcomm field competition in the last issue. They may want to add the following test to the competition: "Send and receive 5 properly formatted ARRL NTS Radiograms using correct voice procedure and phonetics." All of the radios in the world are useless unless a message can get through. It's this last skill that I've found most lacking in most SET's and other drills. Not knowing this skill results in message throughput about one fifth the rate of an NTS net where ops use the skill daily. -- Gary Wilson, K2GW, ARRL Sotuhern New Jersey SEC, ASM

History of Amateur Radio EmComms

Starting with the issue of October 1925, QST was full of news and commentary about the Army-Amateur Radio System, about which the journal's editor wrote in the December 1925 issue, "It seems to us that this affiliation is about the most important thing that ever happened to amateur radio in this country." Or as the original story in the October 1925 QST expressed it (page 23), "If we can put this over it will be the biggest thing ARRL has ever done."

There's even "new news" from that era. At Dayton this year two members of that "[truly] original Amateur Radio emergency response organization" were recognized by posthumous induction into the CQ Hall of Fame. Ralph Hollis, 4FC, and Forrest Dana, 4AGR, transmitted the calls that brought Red Cross and Army aid to South Florida in the Okeechobee hurricane of 1928, which killed 2,000 persons. Their heroism, fully recounted in QST at the time, should be included in any commemoration of the beginnings of amateur emcomm. The story would make great reading for the E-Letter. -- Bill Sexton, N1IN <sextonw@juno.com>, Region 1 (New England) Deputy Director of Army MARS, Pittsfield, Massachusetts

MS-150: Memphis, Tennessee

The Delta Amateur Radio Club of Memphis, Tennessee, is again supporting our area's MS-150 tour as we do every year. This year's event will be run on September 11-12. This year, my XYL and I will be operating net control from our remote audio truck, which does double duty as a mobile communications post. This is a regular audio control room in a 19 ft cargo box, acoustically tuned inside. We've built a cover for the mixing console, giving us a two tiered operating bench 7 ft wide, with an upper tier for radio equipment, the lower for writing implements, computer keyboards or laptops.

I have a mast assembly that mounts to the frame for the HVAC unit, which is positioned above the cab of the truck. With this mast made of heavy PVC, I can get a dual band antenna at a height of around 25 ft, in a one man operation. On this mast assembly is a pulley and rope assembly allowing me to raise HF wire antennas to position quickly as well. This means that within 20 minutes of arrival I can be operating on VHF/UHF. Within a half hour of arrival, we can have a couple of stations operating off of deep cycle batteries, completely with digital modes. See: www.gatasound.com

- Dick Webb, NF5B, NTS Central Area Net Manager, Eads, Tennessee

Training Aids Available

The Hernando County, Florida, ARES group has released two presentations: The first is on writing messages for and sending messages via the National Traffic System (NTS), which is available in Power Point or PDF format from
http://kc4mts.no-ip.org/Hernando/files.html
<http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fkc4mts.no-ip.org%252FHernando%252Ffiles.html>
(look under ARES and ARRL files). The presentation contains information on a radiogram, explaining what it is and how to fill out each section of the form. Included are examples for normal and "booked" traffic and a narrative has been used to show a typical session of sending messages by phone and Morse code. References for handouts are listed at the end of the slides.

The second presentation is on using Digipan software for communicating using PSK31 and it is available from the same Hernando County ARES Web site. This tutorial covers connection of the radio and computer, configuring the software, and getting on the air. Also included is a narrative of a typical conversation when operating in this digital mode. -- Alan McGrew, KC4MTS <kc4mts@bellsouth.net>, EC, Hernando County, Florida

Alabama State Be Ready Day

Alex Davies, W4AVD, Glenn Raines, KA4SZQ and I spent from 9 AM to 2 PM on September 1 presenting Amateur Radio to several hundred Birmingham area school children at Linn Park, Birmingham, Alabama. We were set up next to the Birmingham National Weather Service

Glenn Raines, KA4SZQ, demonstrates Amateur Radio for local students. tent. This provided a unique opportunity to present a live demonstration of how hams can serve their community and then send people directly to the NWS to inquire about training. It was a very successful day all around! -- Hub Harvey, N4HUB, Jefferson County, Alabama, Emergency Coordinator

==>

==> 2010 ARRL SIMULATED EMERGENCY TEST GUIDELINES AND LINKS TO REPORTING FORMS

SET planners can download copies of the 2010 SET reporting forms and the EC Annual Report form and read the Simulated Emergency Test (SET) guidelines on the ARRL Web Page: http://www.arrl.org/public-service-field-services-forms <http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fwww.arrl.org%252Fpublic-service-field-services-forms>

Look for these specific titles on the above-mentioned Web page.

Form A: EC Simulated Emergency Test Report

Form B: NM Simulated Emergency Test Report

Form C: EC Annual Report

Simulated Emergency Test Guidelines: October 2-3

The ARRL Simulated Emergency Test is a nationwide exercise in emergency communications, conducted by ARRL Section, District and local Emergency Coordinators, and by Net Managers. Both ARES &#65533; and the National Traffic System (NTS) are involved. The SET weekend gives communicators the opportunity to focus on the emergency-communications capability within your community while interacting with NTS nets. The main SET weekend to focus on this year is October 2-3, 2010.

During September, the ARRL will be among dozens of organizations and agencies taking part in National Preparedness Month <http://www.ready.gov/america/>. "The Ready Campaign," produced by the Ad Council in partnership with the US Department of Homeland Security (DHS), is aimed at making citizen preparedness "a priority for every city, every neighborhood and every home" in the US. The ARRL encourages you to consider this year's Simulated Emergency Test and preparations for it as a demonstration of Amateur Radio's readiness and as an active participant in National Preparedness Month.

Purpose of SET

1. To find out the strengths and weaknesses of ARES and NTS, the Radio Amateur Civil Emergency Service (RACES) and other groups in providing emergency communications.

2. To provide a public demonstration--to served agencies such as Red Cross, Civil Preparedness, and through the news media--of the value to the public that Amateur Radio provides, particularly in time of need.

3. To help radio amateurs gain experience in communications using standard procedures and a variety of modes under simulated-emergency conditions.

The ARRL Web Page is a resource available to you as you prepare for the upcoming test. Check the ARRL Field Organization Page on the ARRL Web Site, http://www.arrl.org/public-service-field-services-forms <http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fwww.arrl.org%252Fpublic-service-field-services-forms>, for electronic versions of the SET reporting forms, traffic handling information, and several other items related to public service and emergency communications. Please e-mail your SET summaries to ARRL Headquarters via sewald@arrl.org <http://webmail.cfl.rr.com/do/mail/message/mailto?to=sewald%40arrl.org> or wv1x@arr.org <http://webmail.cfl.rr.com/do/mail/message/mailto?to=wv1x%40arr.org>. (If you mail them to ARRL via the postal service, the address is: ARRL Headquarters, 225 Main Street, Newington, CT 06111-1494.

Summary

One of the first steps on the way to a successful SET is to try to get as many people as possible involved and especially new hams. In a real emergency, we find amateurs with all sorts of varied interests coming out of the woodwork. Let's get them involved in SET so they will know more about how emergency communications should be handled. Promote SET on nets and repeaters, and sign up new, enthusiastic radio amateurs. Many of those offering to help will be inexperienced in public-service activities. It's up to you to explain what's going on to them, and provide them with useful roles. They may like it so much that they become a permanent fixture in your ARES or NTS group. For a review of last year's nationwide Simulated Emergency Test, read the article in July, 2010, QST, or see the SET announcement in September QST.

==> EMCOMM EAST, SEPTEMBER 18: PLAN TO ATTEND NOW!

The third annual EmComm East emergency communications conference is an ARRL-sanctioned Amateur Radio event where operators can attend training sessions on technical topics, learn from served agencies, obtain VE testing for license upgrades, and interact with other operators from all over the country. It will be held on September 18, 2010, at St. John Fisher College, Rochester, New York, from 8 AM to 5 PM.

The featured speaker this year will be Steve Ewald, WV1X, supervisor of the ARRL Field Organization Team at ARRL Headquarters. Ewald is the lead staff liaison to ARRL Section Managers and ARRL Field Organization

appointees. He edits the Public Service column in QST and helps support the ARRL efforts in emergency and public service communications.

Register on-line at the event Web site EmComm East <http://www.emcommeast.org/>. A $30 registration fee provides for continental breakfast and lunch.

==> COMMUNICATIONS ACADEMY LITE - SEATTLE, WASHINGTON, OCTOBER 2: FOCUS ON NEW HAMS

A communications training program, the Communications Academy <http://commacademy.org/>, will focus on the needs of newly licensed hams, as well as those new to CERT, SAR, and other disciplines involving the use of radios. The program will be an expanded version of the popular "Beginner's Track" offered at the Spring Communications Academy. It will provide information on how to select a radio, how to talk on the radio, operating on nets, and other topics of interest to new communicators. Registration is open now. The session will be held at the South Seattle Community College, Olympic Hall--Room 120, in Seattle, Washington. Click here <http://commacademy.org/> for more information.

The Spring Communications Academy will be held April 16-17 at the South Seattle Community College. -- Marina Zuetell, N7LSL <n7lsl@arrl.net>, ARES District M Assistant Section Emergency Coordinator, Western Washington Medical Services Communications

==> K1CE FOR A FINAL

In just this issue alone, we have reviewed two major climatic situations: The Pakistan floods, and Hurricane Earl. The International Telecommunication Union (ITU) is the UN specialized agency for telecommunications, and conducts international radio regulation, including frequency allocations for the globe. I read with interest a 2008 official statement by its Secretary-General Dr Hamadoun I. Tour&#65533;, HB9EHT, on the subject of climate change, which resonates even more today. The issue has serious implications for us as radio amateurs in the field of emergency communications and service to our local emergency managers and EOCs. Here are some excerpts from his statement:

Climate change is another profound challenge that is at work, transforming the face of the world. Whatever the underlying cause, at current rates of extinction, scientists predict that two-thirds of all bird, mammal, butterfly, and plant species will be extinct by the end of this century. Not only the species, but the very survival of the world we live in and the planet itself, is now in jeopardy. Climate change is a global challenge that the world simply cannot afford to lose -- not just for our sake, but for the sake of our children.

In the global effort to combat climate change, ITU is continuing to help developing countries to mitigate the effects of climate change, including the use of emergency telecommunications and alerting systems

for disaster relief. ITU, in collaboration with its membership, is identifying the necessary radio-frequency spectrum for climate monitoring and disaster prediction, detection and relief, including a promising cooperation with the World Meteorological Organization (WMO) in the field of remote-sensing applications.

You can read the full statement here <http://www.itu.int/themes/climate/sg-declaration.html>.

See also the FEMA National Situation Update: Monday, July 19, 2010 <file:///C:/Documents%20and%20Settings/Owner/My%20Documents/une,%20April-June,%20and%20Year-To-Date%20Global%20Temperatures%20are%20Warmest%20on%20Record>, reporting on "June, April-June, and Year-To-Date Global Temperatures are Warmest on Record."

There is no value to be added by anything I can say, except it seems to me that it would be worth your time to discuss the obvious and well-documented implications with your local served agency representatives. Also, please evaluate your own resume of emergency communication training program certifications so that you can make the greatest possible personal contribution to what it is sure to be a more demanding emergency and disaster management environment in the very near future. If 9/11 kicked off the current ratcheting up of emergency management in this country, climate change and its implications are certain to keep it going. Here in tiny Flagler County, Florida, for example, we have a large emergency management commitment, with a staff and EOC that has just now consolidated and revamped its volunteer-support functions for more efficiency and effectiveness in a budget-strapping economy. See news of this effort here <http://www.flagleremergency.com/pages.php?pid=75>. Flagler County emergency management requires volunteers to hold certifications in IS-100, IS-200, IS-700 and IS-800 courses from FEMA. See below.

Here are a few courses to consider:

Introduction to Incident Command System <http://www.training.fema.gov/EMIWeb/IS/IS100A.asp>

ICS for Single Resources and Initial Action Incidents <http://training.fema.gov/emiweb/is/is200a.asp>

National Incident Management System (NIMS) An Introduction <http://www.training.fema.gov/EMIWeb/IS/is700a.asp>

National Response Framework, An Introduction <http://www.training.fema.gov/EMIWeb/IS/IS800b.asp>

Emergency Support Functions (ESF) #2 - Communications <http://www.training.fema.gov/EMIWeb/IS/IS802.asp>

The above courses are available free of charge from the FEMA Independent Study Web site, conducted by its Emergency Management Institute. These are just a few of the many courses that apply to

Amateur Radio emergency communications. Take as many as you can!

Here are a few additional courses to take:

Introduction of Disaster Services, American Red Cross
<http://www.redcross.org/flash/course01_v01/>

Intro to Emergency Communications - Level 1/Basic
<http://www.arrl.org/online-course-catalog>, ARRL

Public Service and Emergency Communications Management for Radio
Amateurs <http://www.arrl.org/online-course-catalog>, ARRL

I'm going to close this issue with an ominous little note I received
from the communications staff at the Florida State Emergency Operations
Center this week: "Assume you all are watching the tropics with the
storms coming off Africa. Africa is producing a storm or two every two
days. We have not had a hit so far but it can be expected this year. We
are also approaching the time that the storms generate in the Gulf and
Caribbean, which means less time to prepare. Please encourage all
operators to prepare with antennas, batteries, GPS, etc. There are two
storms just off Africa that have bad scenarios for Florida, so be
ready!"

See you next month! 73, Rick K1CE

725. Keefe Bartels investigation into HD Radio picking up steam - LMFAO!!!

Newsgroup: rec.radio.amateur.misc
Date: 2010-09-09 16:30:03 UTC
From: DigitalRadioScams <digitalradioscams@yahoo.com>

Law Firm's HD Radio Probe Picking Up Steam?

Keefe Bartels, the law firm that's looking into whether consumers are unhappy with their new HD Radio car receivers, is hearing lots of stories. Whether legal action will result remains unclear.

We reported on the New Jersey firm's efforts last week. John Keefe, a managing partner, tells me the firm is still in the information-gathering stage and has not filed a lawsuit on behalf of unhappy consumers — though what it finds could potentially lead to that from the personal injury firm.

Keefe became interested in the technology when he bought a new BMW a couple of years ago. He says the dealer told him HD Radio wouldn't work but that it was built into the cost of the car, because the receiver was part of a package. He says the dealer threw in a set of floor mats to compensate.

Keefe told me he heard the AM signal blending between digital and analog and back again in a demo. He called it "bumping," which sounded like upcutting speech, as that happened.

The firm is soliciting comments from unhappy consumers regarding HD Radio on its website. Keefe says it is receiving complaints from "all kinds of people" and wants to determine how individuals have been affected. He didn't say how many exactly or go into details.

Keefe, who describes himself as a consumer advocate lawyer, says he wants to understand if potentially faulty car HD Radio receivers have cost consumers money — from paying more for the car because of the package and then either not being able to receive a reliable digital signal or because there are not a lot of digital signals in their area.

When I contacted iBiquity for my first story on this, they had no comment.

It sounds like most of the complaints he's getting are from AM listeners. He's also getting an earful from radio industry people, so this should be interesting. I'll keep you up to date.

http://www.rwonline.com/article/106152

SMS- I told you the investigation would escalate! Broadcasters will file a class-action, too! It's over for iNiquity - LMFAO!!! Time to put that scammer Struble in prison for major criminal fraud against

the American People, and broadcasters!

I wonder how many complaints came out of those automaker HD Radio
complaint forums where I dropped a link to Keefe Bartels - LMfAO!!!!!!!

According to my contact over on http://keeppublicradiopublic.com/,
Keefe Bartels has spent about 25 hours on the site, and I have also
gotten a number of hits from them, too. Also, I am getting hits from
many foreign countries, including Brazil where they are considering
DRM and HD Radio. Struble can lie and hide, but now, there is no where
to run. I bet his investors start pulling out, for fear of being
dragged into court over a class-action suit. Radio World is obviously
down-playing the negative affects of FM-HD, as many FM stations are
receiving severe interference, too. I can see this escalating all the
way to the FCC. I do know that broadcasters are getting involvded,
too. Perhaps, the Courts and the DOJ will get a whiff of this
investigation, and file criminal charges against all those connected
with HD Radio for fraud. This has been a long time coming, and wil not
go away, just like HD chearleaders claimed about HD Radio. Maybe, all
of the unhappy analog listeners should jump on the clas-action aganst
iBiquity for breaking all of their analog radios, especially the AM-
sections.

I would like to see radio go digital. In that, compression algorithms covert audio into bit steams, which a digital radio receives on a RF carrier and decodes to audio fed to the speaker.

I would like to see something open source used, in the encoding algorithms, like the Ogg Vorbis protocol, so anyone can create software to encode/decode the streams without infringing on someones patent rights, and so it is open source.

Cheap converters should be able to be produced which decode the audio bit streams and produce a voice modulated signal to feed to old analog radios ... but then, people in hell want ice water ...

I have a certain fondness for analog signals the fact very simple simple circuits can be used to construct a radio ... but, it is time.

Regards,
JS

That statement reeks of stupidity ... like saying radios sound like chit
... some implementation do, others don't ... a statement which is both
true and false is worthless.

Regards,
JS

==> + PUBLIC SERVICE: COLORADO HAMS ASSISTING WILDFIRE RELIEF EFFORTS
```

A fire that began on Monday, September 6 in Emerson Gulch located in Four Mile Canyon -- just northwest of Boulder, Colorado -- has members of Boulder County ARES® providing communications support to the Boulder County Sheriff's Office and the American Red Cross. According to a 911 call, the fire was started when a truck collided with a large propane tank.

```
"Amateur Radio operators are located at the Red Cross shelter set up at
the University of Colorado Event Center and also at the Boulder County
Emergency Operations Center," ARRL Colorado Section Manager Jeff Ryan,
K0RM, told the ARRL. "Amateur Radio operators are providing voice and
ATV communications between forward fire units, the Incident Command
post and the Emergency Operations Center, as well as voice and packet
communications for the Red Cross." Read more here
<http://www.arrl.org/news/colorado-hams-assisting-wildfire-relief-efforts>.

==> + PUBLIC SERVICE: GAREC 2010 TO CONVENE NEXT MONTH
```

The 2010 Global Amateur Radio Emergency Communications Conference (GAREC) -- supported by the ARRL, the IARU and all three IARU Regions -- is scheduled for October 11-12 in Curacao. With its theme of Learning through Practicing, this year's conference is an opportunity for emergency communicators to discuss recent events, discover technical solutions to problems and how to cooperate with professional partners. One of the highlights of the 2010 conference will be an actual EmComm exercise during the conference, exploring how information sharing across borders can be improved. Read more here <http://www.arrl.org/news/garec-2010-to-convene-next-month>.

==> + FCC: ARRL GOES ANOTHER ROUND WITH RECONROBOTICS

As reported earlier <http://www.arrl.org/news/arrl-amends-em-petition-to-deny-em-to-include-16-additional-recon-scout-applications>, on August 16, ReconRobotics -- manufacturers and marketers of the Recon Scout, a remote-controlled, maneuverable surveillance robot designed for use in areas that may be too hazardous for human entry - filed with the FCC an opposition to the ARRL's Petition to Deny Applications <http://www.arrl.org/news/arrl-files-petition-with-fcc-to-deny-applications-with-reconrobotics>.
The ARRL petition asked the FCC to deny dozens of pending Public Safety Pool license applications for the Recon Scout device, which operates in the 430-448 MHz band. On September 1, the ARRL filed its reply (see below). Read more here <http://www.arrl.org/news/arrl-goes-another-round-with-reconrobotics>.

==> + FCC: ARRL COMMENTS IN FCC REVIEW OF CB RULES

In June the FCC opened a proceeding -- WT Docket No. 10-119 -- "to simplify, streamline, and update the Part 95 rules to reflect technological advances and changes in the way the American public uses the various Personal Radio Services." The Citizens Band (CB) Radio Service is one of several Personal Radio Services regulated by Part 95. Three of the CB-related issues raised in the Notice of Proposed Rule Making are of interest to the Amateur Radio Service. On September 3, the ARRL filed comments limited to these issues. Read more here <http://www.arrl.org/news/arrl-comments-in-fcc-review-of-cb-rules>.

==> + FCC: ARRL SEEKS TO PROTECT 2304 MHZ OPERATION

In May, as a partial implementation of its National Broadband Plan, the FCC adopted amendments to its rules for Wireless Communications Services in the 2.3 GHz band to permit mobile broadband services, in addition to fixed services, in the bands 2305-2317.5 and 2347.5-2360 MHz. The Report and Order in WT Docket No 07-293 was published in the Federal Register on August 2, 2010, triggering a 30 day window for petitions for reconsideration. On September 1 the ARRL filed a Petition for Clarification or Partial Reconsideration, asking the FCC to "clarify, or partially reconsider a single aspect" of its Report and Order. Read more here <http://www.arrl.org/news/arrl-seeks-to-protect-2304-mhz-operation>.

==> + COMING UP IN QST: TAKE A LOOK AT THE OCTOBER ISSUE!

In the October issue of QST, DX is! This issue is chock-full of articles all about DX, DXing and DXers. This issue -- our first-ever DX issue -- is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at one of the ARRL Homebrew Challenge winners and an abundance of articles relating to DXing -- the upcoming issue of QST has something for just about everyone.

Located off the shore of Ontario in the southwestern portion of Hudson Bay -- only a few kilometers southeast of Manitoba -- East Pen Island is one of several uninhabited Canadian arctic islands in Nunavut, Canada. In April, Cezar Trifu, VE3LYC, reached East Pen (NA-231) via sled and activated the much-needed entity, making almost 2700 QSOs. But as the weather unexpectedly turned warmer, quickly thawing the ice, Trifu knew he was in trouble. "Stranded on East Pen: SOS de VY0V" is his nail-biting account of how he got VY0V on the air -- and himself off the island. Join Bill Vanderheide, N7OU, as he takes "Slow Boat to Tokelau," where just getting to this remote New Zealand territory is a story in itself.

For less than $32, David W. Cripe, NM0S, built a 40 meter band 50 W linear amplifier for his 5 W voice and CW 40 meter transceiver that he built in the ARRL's first Homebrew Challenge, taking the prize (along with Donald W. Huff, W6JL) for the lowest cost entry in the ARRL's Homebrew Challenge II. Find out how to build this nifty amp in his article "Homebrew Challenge II Co-Winner -- The Lowest Cost Entry."

ARRL News Editor S. Khrystyne Keane, K1SFA, writes of the ARRL Board of Directors 2010 Second Meeting, held in July in Windsor, Connecticut. She also profiles eight deserving hams whom the Board recognized and honored for their contributions to the Amateur Radio Service. ARRL's Amateur Radio on the International Space Station (ARISS) Program Manager Rosalie White, K1STO, takes a look at a Utah elementary school where a dedicated principal and an enthusiastic teacher sparked a fire of interest in Amateur Radio with their students, incorporating it into its curriculum in "ARISS Scores an A+ at Midvalley Elementary."

The October issue of QST features three product reviews this month. Assistant Manager of ARRL's Membership and Volunteer Programs Department Norm Fusaro, W3IZ, takes a look at the RF Concepts Alpha 9500 linear amplifier. "The Alpha 9500 is worthy of its place at the top of the Alpha product line," he reports. "Once configured for your station, automatic tune-up is effortless and nearly instantaneous. It will operate at 1500 W output for long periods with no apparent effort and is ready to serve in the most demanding amateur applications." QST Contributing Editor Gary Pearce, KN4AQ, reviews the Yaesu FT-7900R dual band mobile transceiver, saying that this radio "includes excellent receiver performance, a wide range of features and relatively simple operation in a sturdy package." Lastly, ARRL Technical Advisor Bruce Prior, N7RR, checks out the Small Wonder Labs Retro-75 AM transceiver Kit, "an economical and fun alternative for anyone looking to build a

low power transceiver for a mode other than CW."

Of course, there are the usual columns you know and expect in the October QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your October issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ON THE WEB: FINDING YOUR SECTION INFORMATION

When ARRL members log on to the ARRL Web site, their ARRL Section information automatically appears right below the "Your Favorites" drop-down menu. By clicking on the "Section News" link (see the red arrow below), you can then conveniently go directly to your Section page for news and events in your Section, as well as find contact information for your Section Manager and the Section Cabinet.

When your Section Manager has important news to share, you will see an alert on your homepage, located below the Section News.

If you're looking to get in touch with your Section Manager or another Section official, go to www.arrl.org/sections <http://www.arrl.org/sections> where you can find Sections listed by state and by ARRL Division. You can sign up for news alerts from your Section Manager or Division Director using the "Edit Your Profile" link.

==> + MARS: NEW INTERIM CHIEF TAKES OVER AIR FORCE MARS

The Air Force Military Auxiliary Radio System (AFMARS) organization has a new interim Chief. Outgoing USAF MARS Chief Allen Eiermann, K3LSR, retired at the end of May and was replaced by Technical Sergeant Jason Sandifer. Sandifer is a systems manager stationed at the Air Force Network Integration Center (AFNIC) at Scott Air Force Base in Illinois, just outside St Louis, Missouri. AFNIC is the headquarters of the national Air Force MARS organization. Read more here <http://www.arrl.org/news/new-interim-chief-takes-over-air-force-mars>.

==> + SOLAR UPDATE

Tad "The sultry suns of summer came <http://www.worldburnsclub.com/poems/translations/john_barlecorn.htm>" Cook, K7RA, reports: The average daily sunspot number for the week rose nearly 13 points to 38.3, and the average daily solar flux was up more than four points at 78.4. On September 2, one new sunspot group emerged -- numbered 1105 -- joining sunspot groups 1101, 1102 and 1103. On September 4, group 1102 faded away, then 1101 and 1103 vanished on September 6. Group 1105 is currently going over the western side of the Sun, but a new spot seems to be emerging in the northeast. The current prediction from the US Air Force and NOAA shows a rising solar flux, 76 on September 9-10, 77 on September 11, 78 on September 12-13, 79 on

September 14-15 and peaking at 80 on September 16. After that, a decline in solar flux is predicted. Look for more information on the ARRL Web site on Friday, September 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Robert Burns' John Barleycorn <http://www.worldburnsclub.com/poems/translations/john_barlecorn.htm>.

==> ARRL INTRODUCES FIRST CHALLENGE COIN

This month, the ARRL and the Amateur Radio community celebrate the 75th anniversary of the Amateur Radio Emergency Service®, or ARES®. To help commemorate this milestone, the ARRL has introduced an anniversary Challenge Coin. The die-struck, 1.5 inch brass coin depicts the ARES® 75th anniversary logo in gold with red, white and blue color fill, while the reverse shows the ARRL diamond logo against a hemisphere of the world.

Around the perimeter of the ARES® logo are the words Ready, Resilient and Responsive. "These words represent the critical need that ARES® activities have provided, and will continue to provide into the future," said ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC. "The Challenge Coin honors the service of ARES® volunteers and all Amateur Radio operators who respond to the call of public service. We hope ARES® volunteers will enjoy the honor of having the first Challenge Coin issued by the ARRL." Read more here <http://www.arrl.org/news/arrl-introduces-first-challenge-coin>.

==> THIS WEEK ON THE RADIO

This week:

- September 10 -- NCCC Sprint Ladder
- September 11 -- Ohio State Parks on the Air
- September 11-12 -- Arkansas QSO Party; FISTS Get Your Feet Wet Weekend; WAE DX Contest (SSB)
- September 11-13 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>
- September 12 -- North American Sprint (CW); SKCC Weekend Sprint
- September 16 -- NAQCC Straight Key/Bug Sprint

Next week:

- September 17 -- NCCC Sprint Ladder
- September 18 -- Connecticut QSO Party; Feld Hell Sprint
- September 18-19 -- ARRL 10 GHz and Up Contest (local time) <http://www.arrl.org/10-ghz-up>; South Carolina QSO Party; Washington State Salmon Run; QCWA Fall QSO Party; QRP Afield; Scandinavian Activity Contest (CW); SRT HF Contest (SSB)
- September 19 -- North American Sprint (SSB); BARTG Sprint 75
- September 20 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint

(local time)
- September 22 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL CONVENTIONS

- September 17-19 -- ARRL Southwestern Division Convention <http://www.sandarc.net/Convention2010/index.html>, San Diego, California
- October 15-17 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California

ARRL -- Your One-Stop Resource for Amateur Radio News and Information

- Join or Renew Today! <http://www.arrl.org/join> ARRL membership includes QST <http://www.arrl.org/qst> , Amateur Radio's most popular and informative journal, delivered to your mailbox each month.
- Subscribe to NCJ -- the National Contest Journal <http://www.arrl.org/ncj> . Published bimonthly, features articles by top contesters, letters, hints, statistics, scores, NA Sprint and QSO Parties.
- Subscribe to QEX -- A Forum for Communications Experimenters <http://www.arrl.org/qex>. Published bimonthly, features technical articles, construction projects, columns and other items of interest to radio amateurs and communications professionals.
- Free of charge to ARRL members: Subscribe <http://www.arrl.org/myarrl-account-management#%21/edit-info-email_subscriptions>
to the ARES E-Letter (monthly public service and emergency communications news), the ARRL Contest Update (bi-weekly contest newsletter), Division and Section news alerts -- and much more!

Well, that is because you are like that damn princess which could detect a pea placed under her mattress! You are special, special ed ... err, special dave ... to the rest of us, am radio at 64 kbps sounds great, 32 ain't bad and 16 will suffice ... at 128 kbps I doubt there is even any loss at all ... only one with special ed (special dave) abilities is made uncomfortable! ROFLOL

AAC sounds like crap. I listen to MP3 web streams. They sound much
better. Now that there's wireless broadband, HD radio is growing more
irrelevant by the minute.

128 sounds very ragged to me. It's fine for the car or background music
but when I put on my Grado headphones the lossy compression is not
really a pleasure to listen to.

This:
"Audio (MP3)
32 kbit/s ï¿½ MW (AM) quality
96 kbit/s ï¿½ FM quality - This is questionable since FM broadcast is
transmitted in analog 30hz-15khz. Similarly one cannot compare directly
an LP record to CD using kbit/s.
128ï¿½160 kbit/s ï¿½ Standard Bitrate quality; difference can sometimes be
obvious (e.g. lack of low frequency quality and high frequency "swashy"
effects)[citation needed]
224ï¿½320 kbit/s ï¿½ VBR to highest MP3 quality"

from here:
http://en.wikipedia.org/wiki/Bit_rate

At 225 kbit, it is strange it is so offensive to your ear, it is
approaching concert hall quality ... 96 kbit is ~equal to fm radio ... I
think what your are hearing is more in your mind than anywhere else.

Regards,
JS

amateur radio assessments

VUVUZELA MORSE CODE

nz aftershock forces radio station's evacuation

MOON BOUNCE FROM SOUTH CHINA SEA

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 12 2010

Special callsign logs its 15,000th contact

It does not seem all that long ago that VK100WIA reached its 10,000th QSO
milestone. It was back in mid-August when the callsign was rostered to the
Southern Peninsula Amateur Radio Club in Victoria.

Now we bring you news of its 15,000th contact that occurred on the 3rd of
September with the Port Stephens Amateur Radio Club on New South Wales central

coast making contact with Martin Luther VK7GN in Richmond Tasmania, on the 80m band.

Martin, an avid contester and member of the WIA Awards Committee said, 'I'm delighted to be number 15,000. The large log being created by VK100WIA shows that amateur radio is alive and well, even after a century.

'It's especially pleasing that the WIA has not only survived for 100years, but is now even stronger and more effective than ever. The centenary celebrations have been a great advert for amateur radio.
Congratulations to all involved.'

He explained how he noticed a few weeks ago that he'd logged VK100WIA a few times, and then set a personal goal to score ten contacts as qualification for the WIA Centenary Award.

Martin VK7GN said he now has the special callsign on Phone and CW as well as three bands, and hopes before it closes at the end of October to get contacts the 160m band too.

VK100WIA PAST PRESENT AND FUTURE

The venue of the Maritime Museum in Devonport Tasmania proved to be ideal to put the special callsign VK100WIA on air with plenty of public exposure for amateur radio and club members achieved some 700 plus contacts.

When the museum closed at 4pm each day, the activity switched to member's home QTH's to keep the callsign on air.

On next week's broadcast we will have more details, including a listen to Club President David Spicer VK7EX being interviewed on ABC local radio.

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

As this news goes to air TREC members are on air from Lake Tinaroo on the Atherton Tablelands with the VK100WIA special event call-sign. We are set up on the shores of the lake and are making many contacts both in VK and internationally.

Listen out for VK100WIA in the Far North and drop in and say G'day. We are operating on the HF bands as well as 2 metres FM and SSB.
We are updating the WIA online log on a regular basis.

Check out the online log as a guide to the frequencies in use by the club at Barrabadeen, Lake Tinaroo in the Atherton Tablelands of Queensland.

On Tuesday the Radio Amateurs Old Timers Club begins its three-day slot ? operating from the Combined Club Rooms, Turner Road Highett, the home of the Moorabbin & District Radio Club radio museum.

Representatives of the Kingston City Council and the local newspapers have been invited to attend ? and the station will be open to the public.

To round off the week, Melbourne's Eastern and Mountain District Radio Club will operate VK100WIA from its club rooms at 13A McCubbin Street, Burwood.

There's also a display of amateur radio at the Whitehorse Civic Centre, and the EMDRC President Jack Braham VK3WWW is scheduled for an interview on 3WBC, the community broadcasting station.

The tail-end of September includes the Harvey Bay Radio Club in Queensland, and the wonderful Super Springtime in Perth, a collaborative effort of seven groups putting VK100WIA on air for nine days.

World attention is being focused on Perth as seven local groups celebrate the centenary of organised amateur radio in Australia that began with what is now the world's oldest continuing national radio society.

Organiser of an activity known as ?Super Springtime?, Heath Walder said, the celebration will include the demonstration of working amateur radio stations and displays at the Perth Royal Show and the historical site of Wireless Hill.

The WA Repeater Group (WARG), WA VHF Group (WAVHFG), Wireless Institute Civil Emergency Network (WICEN), Hills Amateur Radio Group (HARG), Peel Amateur Radio Group (PARG) , Scout Communications and Technology Team, and Ham College.

Mr Walder said, ?So important is the centenary of our national society, the Wireless Institute of Australia (WIA), that virtually all radio clubs and groups in the Perth area are eager to be involved in what has been dubbed the ?Super Springtime?..

The displays and operating amateur radio station with its unique callsign VK100WIA talking to the world, provide an excellent opportunity for the community to learn about amateur radio and how they can be involved.

While it is a very interesting and personally rewarding recreational pursuit, radio amateurs or ?hams? have provided emergency communications on many occasions in time of disasters.?

He said the displays will show early radio pioneering, evolution of radio technology, antenna designs and construction, sending pictures over the radio, personal global position system tracking via radios, amateur radio satellite and much more.

There will also be active displays to involve members of the public so they can experience the wondrous world of radio and electronics.

This will be held over ?Show Week? 25 September to 2 October at the Perth Royal Show co-located with the Scout stand, as well as the Wireless Hill historical site.

The displays at both locations will inform the public about the many facets of amateur radio and providing advice to anyone interesting in learning more or becoming a radio amateur.

Mr Walder said, ?While the hobby is for all ages and abilities, there is no better recreational and self-learning activity than amateur radio for

anyone wishing to get into a technical of scientific career.?

The national radio society, the Wireless Institute of Australia (WIA) was founded in Sydney in 1910 making it the world's oldest continuing organisation of its kind.

WIA President, Michael Owen said, ?The historical milestone we are now celebrating starts at a time of early wireless experimentation, when it was a new science being explored by ordinary people who are today called radio amateurs.

Just think about it, there were amateur experimenters building equipment to send and receive wireless messages in the late 19th century, more than two decades before radio broadcasting began in Australia.

Mr Owen said the start of organised amateur radio in Australia was a response to the somewhat harsh and unfair treatment of experimenters by authorities.

They were being asked to pay three guineas ($6.30) for the use of the airwaves. To fight that impost and gain better recognition of experimenters, the Institute of Wireless Telegraphy of Australia (now WIA) was established at a meeting in Sydney on 11 March 1910, he said.

Wireless was also being explored at the time by Marconi and others as a means of communicating across oceans and with ships. The wireless operator on the SS Titanic put out the distress SOS call in 1912 and in doing so saved many lives.?

Mr Owen said during World War I those who had gained experience as amateur wireless experimenters used, and further developed the technology. The same thing occurred to a much greater level throughout WWII.

He said ?Many of the developments in radio communications have been pioneered by radio amateurs.

The activity of amateur radio is enjoyed by individuals in more than 100 countries and has undergone a revival in Australia over the past five years through the introduction of a new entry level Foundation Licence.

Recognised by the United Nations agency the International Telecommunications Union, it is a recreation, a means of self-education and radio amateurs can provide emergency communications.

Mr Owen said, ?In Australia the first known time radio amateurs provided emergency communications was at a severe tropical cyclone which struck north of Cairns Queensland on 9 February 1927.

There have been numerous occasions in Australia since then, including the Black Friday bushfire disaster January 1939, after Tropical Cyclone Tracy in 1974, the Newcastle Earthquake 1989, after floods, and the Black Saturday disaster of 2009.?

Many WIA affiliated clubs and their members are engaged in various aspects of the multi-faceted recreation.

He said part of the centenary celebration the club members are ?talking to the world? using a commemorative radio callsign VK100WIA.

More detail on that activity and other centenary activities are available on the WIA website www.wia.org.au

Media Inquiries:
Heath Walder, Event Organiser, WARG President, VHF Group Vice President, WICEN Technical Officer
www.warg.org.au
www.wicen.org.au

VK100WIA is set for DXCC status

Thanks to the excellent efforts of WIA affiliated clubs rostered to activate VK100WIA, the special callsign has recently worked its 100th DX entity.

The WIA Centenary Committee's hopes that VK100WIA would itself qualify for the DX Centenary Club Award, will now be realised.

While so far radio amateurs in 15 DX countries have provided their QSL cards are confirmation of the contact, more will be received over time.

The enthusiasm being shown by clubs in putting VK100WIA on air and working, where possible, DX stations is sure to see even more new countries being recorded in the online logbook.

Contact with the WIA Centenary callsign is eagerly sought by overseas radio amateurs, and as reported earlier it has caused pile-ups on occasion.

WIA National Field Day
Tune Into the World - Amateur Radio Gets People Talking

The first two clubs have registered for this major inaugural public relations outreach initiative that will happens across the nation on Saturday the 23rd of October.

The Adelaide Hills Amateur Radio Society will be setting up at the Eden Hills Primary School, while the Victoria's Scout Radio and Electronics Service Unit has chosen the Kangaroo Ground Memorial Tower in Melbourne's north-east.

Both clubs have registered online via the WIA website in the WIA Centenary section.

We know that others clubs are groups are also planning their participation in this great public relations event to help promote amateur radio to the public and have fun.

The event rules can be found on the WIA website and in the September edition of Amateur Radio magazine.

Registrations are now open for all radio clubs, or three or more radio amateurs, who intend to operate an amateur radio club in a public place on Saturday 23 October.

Meantime the final touches are being put on the artwork for both a vertical banner of A-frame display, plus a range of clothing - all bearing the distinctive 'Tune Into the World - Amateur Radio Gets People Talking' logo.

HOME OF THE GOOD GUYS

Fair go! This guy is not a bad apple operator!

An unusual situation is occurring where a good radio amateur is being harassed and shunned, simply because he has the same surname of a known former serial pest on the amateur bands.

The good guy is not related to and has never associated with the bad apple.

It's just downright unfair that the law abiding, and by all accounts good very active radio amateur, is now experiencing QRM and verbal threats. All despite him doing nothing wrong.

He's put up with it long enough and just does not deserve this ill-treatment.

This is not what amateur radio is about! Here's a message to those involved. Give him a break, let him get on and enjoy amateur radio, instead of jumping to conclusions.

(Jim Linton VK3PC)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

"It was a dark and stormy Saturday in Melbourne with the weather man forecasting heavy rain , just the ideal day for a Foundation Course.

So Ark's Academy's team of Lino VK3EI , Lionel VK3NM and John VK3DQ set to work.

The Result a 100% pass rate so please welcome Matt , Brad and Miki to the amateur radio fraternity. They all decided to have the next available callsign issued to them as they are all keen to try to upgrade in the next course in October "

(John Fisher VK3DQ / VK3ARK)

Amateur Radio Assessments

Persons in the N/West Area of VK7 interested in Training and Assessments for all classes of Amateur Radio are advised that the N.W.T.A.T.V.Group can provide all these requirements and in addition provision of Facilitators via the Radio and Electronics School if candidates so desire.

Potential candidates and interested persons should note that these facilities can be conducted at a central location within the North West.

For more information regarding these facilities, please contact the Club's Learning Organizer Tony VK7AX. Contact details can be found on the Club Web Site or the WIA site under VK7 Clubs.,

(Tony VK7AX, News Officer - NWTATVG)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

New Zealand radio amateurs were at the ready to respond when a massive earthquake hit the Christchurch area on Saturday the 4th of September.

Taking up the story is Jim Linton VK3PC.

(Audio text)

The earthquake measuring 7.1 on the Ritcher scale caused widespread damage, and New Zealand's Amateur Radio Emergency Communications AREC volunteers were ready to give their support.

This is a story of mother-nature and lady-luck working in hand in hand. The quake hit at 4.36am while most were asleep in their homes. A few were injured, none seriously, and no-one was trapped in building rubble.

If would have been a dramatically different situation if it occurred in daylight with people in the streets certain to have been killed as shopfronts collapsed in Christchurch's central business district.

Similar strength earthquakes in other countries have resulted in a huge loss of life, and their affected areas struggled for a long time to recover due to the nature of their infrastructure and government funding.

In the case of Christchurch, the damage bill is some $4Billion. The ?quake is New Zealand's most damaging since the one which hit Napier (Hawke's Bay) in February 1931, that saw radio amateurs extensively provide emergency communications.

However this time they have not been required so far, mainly because Christchurch was well prepared including rapid response by the power authorities and telephone companies to quickly restore their services.

(Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communications Committee).

NZ aftershock forces radio station's evacuation

Monday afternoon's 4.5 magnitude aftershock has pushed a number of damaged buildings over the edge in Christchurch, New Zealand.

The 12-story Radio Network-Newstalk ZB building in Worcester Street is one that officials have ordered be evacuated after the tremor. It had sustained some damage during last Saturday's initial quake, and the aftershock has made some of the cracks worse.

Radio Network stations will continue to broadcast from back up facilities

50th Dutch Ham Radio Convention

On November 6, 2010, the 50th Ham Radio Convention will take place in The Netherlands organised by VERON, the Dutch radio society.

There will be a homebrew exhibition and of course the Amateur radio equipment sales, the VERON Components market (flea market) and stands of various commissions and working groups will be present.

ZNS 1540 signal restoration likely to take 30 days

The Broadcasting Corporation of the Bahamas (BCB) has announced that the initial assessment of damage caused by thieves to their 1540 AM's transmission facilities suggests restoration of the signal is expected to take around 30 days.

Police are actively investigating the theft of copper from the Broadcasting Corporation's South Beach transmitter site that disrupted the national radio station 1540 AM transmission shortly after 10am on Thursday. The broad daylight robbery occurred when two men in a truck reportedly pulled up and advised the security officer on duty that they were there to check the transformer.

Immediately upon the departure of the vehicle, the station went off air. It was discovered that copper bands around the tuning huts had been removed. The stolen copper links the tuning huts to the transmission tower. The police were immediately contacted and are investigating.

==========

NEWS FROM ARNEWSLINE

MISSING ARIZONA HAM FOUND DEAD IN TRAILER

A sad end to the search for a Glendale, Arizona, ham who went missing in mid August. Amateur Radio Newsline Mark Abramowicz, NT3V, has the details on what appears to be another! vicious crime:

Authorities in Maricopa County, Arizona are confirming the body of 30-year-old David Wile, KE7SWL, of Glendale, was found August 24t, hidden inside a box trailer being pulled by a truck in the Sun City area.

The truck driver, 48-year-old David Edison, has been charged with concealing a body. He is being held on $20,000 bond.

An autopsy on August 27^th by the Maricopa County medical examiner confirmed the body was indeed Wile's. A cause and manner of death was still being investigated. The sheriff's homicide unit is also now actively pursuing the case. They say more charges could be pending against Edison.

Investigators say they got a call from a couple following the truck and trailer on August 24^th and they reported what they described as a foul smell coming from the vehicle. They gave deputies the description and license number of the vehicle and it was stopped a short time later between Peoria and Sun City, authorities say. Investigators say when deputies opened the trailer, they made the grim discovery of a decaying body tucked inside a garment.

Edison was interviewed, but is reported to have invoked his right to counsel and he was charged and committed to the jail. On a blog posting, a woman identifying herself as David Wile's aunt claimed the suspect is a roommate and former business partner of her nephew.

Wile was reportedly last seen at his Glendale home on August 14^th . He was reported missing by his family on August 17^th after he failed to show up for a ballroom dance competition at a Tempe, Arizona dance studio.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

More on this story as investigators make information available.

WIRELESS WEATHER

HERE COMES THE SUN

Some good news on the propagation front. Better days may be on their way.

Researchers at Boston University's Centre for Space Physics have announced they have what they term as sub-visual evidence that a new cycle of solar wind activity around Earth is finally starting. This based on observations of recent appearances of aurora near the North Pole accompanied by dimmer glows well south of that.

What has fascinated space scientists in recent years is the delayed onset of such effects this time around. Typically, the Sun has an activity cycle of about 11 years, with flares, C-M-E's and ejection of electrically charged particles called the Solar Wind. These cause changes in the Earth's magnetic field or magnetosphere that produce luminous auroral emissions in the northern most latitudes high in the Earth's atmosphere.

Such effects are subdued during so-called solar minimum years such as the case in 1996 to 1997. They are also very prominent in solar maximum years as they were in 2001 to 2002.

According to this cycle, called Cycle 24, a new wave of solar activity had been expected to start last year but the Sun remained dormant. This had some solar observers predicting that we might be headed for a historic solar minimum. Now the Boston group says there are finally signs of the new cycle 24 appearing.

Hello Listener's , I'm Peter Harding RD Contest Manager.

Well this year's RD Contest is over all we have now is for all the logs to arrive, so I can process them.

We are about 20% down in logs compared to last year, with only a bit over a week until the closing date for everyone to get their logs to me either by vk4od@wia.org.au or Snail Mail.

Any logs received after the closing date will be returned unopened, as I need the time to prepare the final results for the December/January AR Magazine.

Where possible I have sent emails to those that I have email addresses for, confirming the receipt and confirmation for the points in their logs..

Until next we meet

This is Peter vk4od.

Heard Island DXpedition plans announced

This an uninhabited sub-Antarctic island is being targeted for a DXpedition in February 2013.

Heard Island, an Australian territory, is in the top ten of the world's most wanted DX entities.

DXpedition team leader Chris Dimitrijevic VK3FY, and co-leader Steve Chamberlain advise that the planning phase is underway for a total of 13 operators to activate the island for two weeks.

Chris VK3FY has already had discussions with the office of the relevant Australian Government Minister and submitted an application for Ministerial approval.

An appropriate ship for this journey has been sourced and negotiations have begun with its owners.

(Jim Linton VK3PC, Publicist for the Heard Island 2013 DXpedition)

NET FOUNDER - SILENT KEY.

Robert, VK2BMY (ex DJ1MI, AX2BMI,VK2BMI, VK4BMI) has past away.
Robert was, in the sixties, founder of the daily VK-DL net on 14.307 MHz.

Moon bounce from the South China Sea

DXpedition Team Leader, Chris Dimitrijevic VK3FY & DU8/VK3FY has announced
that Earth-Moon-Earth (EME) contacts are planned as part of the DX0DX
activation of The Spratlys.

The DXpedition that will involve some 30 radio amateurs in three teams on
Thitu Island, 6-24 January 2011.

In the latest news, experienced EME contester and DXpeditioner, Colin Brown
GM0RLZ will be active on both 6m and 2m.

He has filled a vacancy on DXpedition Team 2 (6-15 January) and has the
role of coordinating any requests for moon-rise and moon-set contact attempts.

Chris VK3FY said all other plans for the DXpedition are continuing
satisfactorily and with 120 days to go there's a lot of work yet to be done.

Support for DX0DX is growing steadily and thank you to those who
have already given financially or in other ways towards this major undertaking.

SWL Denis F-11217 and radio ham F1USC report QSO made with an amateur radio
operator signing 'Aeronautical Mobile'.

PH9HB/AM regularly flies to northern Europe and is often active on
17 meter band and regularly contacts radio amateurs from his Boeing 737.

The airborne equipment consists of a Collins HFS900D which works on USB and AM,
it can use 400 watts PEP. The antenna is of the shunt-fed slotted type,
situated in the vertical end of the tail section.

http://f1jxq.passion-radio.org/ham-radio-operator/ph9hb-ham-radio-operating-from-a-boeing-737/

Chris, VK3QB, reports that the four members of the YJ0VK team (Chris VK3QB,
Allan VK2CA, Luke VK3HJ and Brenton VK3CBV) returned from Vanuatu September 2,
after 6 days of operation.

A quick summary of operation shows almost 4,000 QSO's, 69 DXCC entities along
with approximately 500 digital QSOs (RTTY and PSK31)

Overall the team had a lot of fun and regard the expedition as a success.

Amateur Radio magazine - a very good read

On last week's broadcast we highlighted some of the interesting material in the September edition of the WIA journal. Now we have a further look at its content.

Continuing the Centenary year historical theme there's an article about Bill Hart VK2XT who has been a radio amateur and member of the WIA since 1930.

Amateur Radio New South Wales is in need of photographs of its former properties - Amateur Radio House 1959 to 1982 at St Leonards, and then at Harris Park 1982 to 2006.

There's a well illustrated story on the National Radio and Phono Fest to be held in Canberra on the 18th and 19th of September.

Technical articles this month include:

* 'A generic PC interface for the amateur experimenter' written by Paul McMahon VK3DIP

* The latest in the Foundation Corner series is entitled 'The good, the bad and the ugly: the G5RV antenna' by Geoff Emery VK4ZPP and Ross Pittard VK3CE

* And Gary Gibson VK8BN explores the question 'Is reflected power lost power?'

Amateur Radio magazine, a WIA membership service and also available at selected newsagents.

I'm Barry Robinson VKPV and you're listening to VK1WIA.

The ARRL Lab has installed a D-STAR (Digital Smart Technologies for Amateur Radio) repeater in the Lab at the ARRL Headquarters building.

The purpose of the repeater is to better educate the Lab staff on D-STAR technology," explained ARRL Test Engineer Bob Allison, WB1GCM.

"In turn, we will have the ability to handle some of our members' questions on the matter. We also intend to use this new technology when emergencies occur where D-STAR technology is deployed."

HABEX 2010 SECOND TEST LAUNCH

On 24 July 2010, Sci Bono in co-operation with radio amateurs unsuccessfully tested the High Altitude Balloon Experiment Payload, also known as HABEX. The payload was lost through electronic failure and we had to return to the

workbench to fix all the problems.
The new attempt will take place in South Africa 07:00-13:00 C.A.T.
25 September.

Denmark's private venture rocket launch planned for Sunday, September 5 was postponed following the discovery of a faulty valve.

Copenhagen Suborbitals, which is entirely dependent on sponsors and volunteers, plan to eventually launch a human into space. The current launch is a initial test flight which aims to get to a height of 30km.

Copenhagen Suborbitals is using a military test area near Bornholm island in the Baltic Sea. They have use of the facility until September 17.

Vuvuzela Morse Code

The Soccer World Cup may be over, but it seems we haven't yet heard the last of the dreaded vuvuzela.

Just when you thought it was safe to remove your earplugs...

>From the National JOTA Organizer in (of course) South-Africa comes the suggestion to have a game with Morse Code on the vuvuzela.

Dave Gemmell suggests:
a) send each character correctly in morse.
b) how many scouts can receive message correctly?
c) determine the maximum distance that can be achieved.
d) record the distance and tell us about it.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

December 11, VK1 WICEN will be supporting the Brindabella
Motor Sports Club's "Rallye des Femme".

Other coming events include:

Trek for Timor on the 18th & 19th of September.

Brookvale Endurance Ride in the ACT on the 19th of September.

Barrington Tops SAREX on the 16th & 17th of October.

The Hawkesbury Canoe Classic on the 23rd & 24th of October.

SUMERLAND - WICEN antenna / transmit test exercise.

Bring your antenna design ideas, show and test them to see how (if) they work.
On site construction will start no earlier than 1030 and finish by 1100.
Use of trees and building is permitted but NO USE of the existing towers.
Mobile whips attached to cars, beams, portable towers etc are all ok.
You just have to be able to bring it on site at 1030 and be ready to
transmit by 1100.

As the news goes to air today some Radio Amateurs in the Townsville
area are playing with radios in the field to the sound of trotting hooves
providing communications support for the TERAHA Horse Endurance
Ride in the Bluewater and Toolakea areas.

The operators provided support yesterday for the introductory
5 kilometre ride as well as the 20 kilometre ride, then played with HF
a bit and tried to contact the TREC VK100WIA station.

The operators also tried out the new VK4ZZ-3 portable internet gateway and
then they were early to bed and up at 2am this morning providing competitor
tracking for the 80 kilometre and 40 kilometre rides and should be finished
and heading home by 2pm this afternoon.

Communications have mainly been on VHF, although some stations
have also seized the opportunity to put up a wire or two at the checkpoint
and play a little HF during the ride.

RESCUE RADIO: HAMS READY TO ASSIST AFTER QUAKE HITS IN NEW ZEALAND

Ham radio was ready to respond when a massive earthquake hit near the
city of Christchurch, New Zealand, on Saturday, September 4th. Jim
Linton, VK3PC, has more:

--

So far AREC (Amateur Radio Emergency Communications) volunteers have not
been required in any major way to assist, following the earthquake that
hit Christchurch in New Zealand. The magnitude 7.1 earthquake occurred
at 4.36am local time Saturday 4 September, while most people were asleep
in their homes. The result was extensive building damage in New
Zealand?s second largest city, Christchurch, with only two people
seriously hurt and no one reported trapped or missing.

AREC Deputy Director, Geoff Chapman ZL3PX who lives in Christchurch,
said that while AREC was at the Civil Defence Headquarters, there has
been no requirement for it to pass any emergency traffic. That is due to
restoration of telephone and power to the majority of the affected
areas. While water and sewerage systems have been affected there has
been no reported major loss of roads or bridges. However AREC is ready,
as the situation could worsen with the weather bureau issuing a warning
of very strong winds with gusts up to 130km/h and heavy rain posing new
threats to already damaged buildings. Adding to the danger are numerous
aftershocks with authorities advising that these will continue for many
days or weeks.

The quake is New Zealand's most damaging since the one which hit Napier
(Hawke's Bay) in February 1931, that saw radio amateurs extensively

provide emergency communications. That led to the formation by the IARU national radio society, the New Zealand Amateur Radio Transmitters (NZART) of what is today known as AREC.

Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communications Committee.

--

The New Zealand Ministry of Civil Defense and Emergency Management said the prime concern was ongoing aftershocks with a number of tremors between magnitude 3.2 and 5.4 that have been recorded. Meantime, an ongoing search of the rubble of quake-damaged buildings in Christchurch has not turned up trapped residents, officials said on Monday September 6th. (VK3PC)

**

RESCUE RADIO: UPDATE ON HAM RADIO AID TO PAKISTAN

The Pakistan Amateur Radio Society reports that a cross-band emergency repeater is set to provide the first communications of its type to the flood hit Swat Valley. This, by linking it to the rest of the country through a chain of 2 meter repeaters.

According to Pakistan Amateur Radio Society emergency communications organizer Asad Marwat, AP2AUM, notes that the linking of so many repeaters will cause a squelch tail delay. However given the circumstances and lack of proper equipment, AP2AUM says it will be more than acceptable.

Meantime, a convoy of radio amateurs is relocating a repeater already installed at Changla to the Malakand Heights. This is so it can be linked into the emergency communications system. Meantime, AP2AUM says that a team of radio amateurs will be transporting VHF base station with a high gain antenna via helicopter and subject to the availability of a 12 volt car battery all should be up and running shortly.

A massive flood disaster has ravaged Pakistan for over a month and shows no signs of easing. As a result, the Pakistan Amateur Radio Society continues to work in partnership with Islamabad Jeep Club members and the Pakistan Academy of Family Physicians to provide support for those affected. Some 30 radio amateurs are involved in providing emergency communications in response to the disaster that so far has affected an estimated 20 million people and claimed 1500 lives. (PARS)

**

RESCUE RADIO: TALIBAN THREATENS OUTSIDE RESPONDERS IN PAKISTAN

And in a related development, news reports say that the revolutionary extremist Taliban group has hinted it may launch attacks against foreigners helping Pakistan, saying their presence was unacceptable. The militant group has attacked aid workers in the country in the past, and

an outbreak of violence could complicate a relief effort that has already struggled to reach the 8 million people who are in need of emergency assistance.

The United Nations said it would not be deterred by threats of violence. However, a spokesman for the World Health Organization told the BBC that relief and aid work in certain areas was already being affected by security concerns.

For those not aware, the Taliban is a Wahhabi Islamist political movement that governed Afghanistan from 1996 until it was overthrown in late 2001. It has regrouped and since 2004 has become a strong insurgency movement fighting a guerrilla war against the governments of Afghanistan, Pakistan, and the NATO led International Security Force in the area. (Published news reports)

**

RESCUE RADIO: DIRS DEACTIVATES AS HURRICANE EARL FADES

Back in the United States, the Public Safety and Homeland Security Bureau of the Federal Communications Commission has announced the deactivation of the Disaster Information Reporting System in regard to Hurricane Earl. Communications providers are advised not to submit additional information related to the effects of Hurricane EARL through Disaster Information Reporting System until further notice.

For those not aware, Disaster Information Reporting System is a voluntary web-based system that communications providers, including wireless, wireline, broadcast, and cable providers can use to report communications infrastructure status and situational awareness information during times of crises. (FCC)

**

RESCUE RADIO: HAMS ASSISTING AT COLORADO WILDFIRE

The ARRL reports that hams are providing some of the communications at a wildfire just northwest of Boulder, Colorado.

Amateur Radio operators are located at the Red Cross shelter set up at the University of Colorado Event Center and also at the Boulder County Emergency Operations Center. They are reportedly providing voice and ATV communications between forward fire units, the Incident Command post and the Emergency Operations Center. Hams are also providing voice and packet communications for the Red Cross.

At airtime news reports say that the fire has consumed over 8000 acres. More on this story is on the ARRL website at www.arrl.org.

**

RESCUE RADIO: SOUTH AFRICA'S HAMNET SEVERS LINKS WITH IRESC

South Africa's amateur radio emergency communications organization HAMNET has decided to sever its ties with the International Radio Emergency Support Coalition which is also known as IRESC. Hamnet's move follows what its leadership describes as mounting concerns over the direction and leadership of IRESC.

Hamnet's National Director is Francois Botha, ZS6BUU. He told the Southgate News that his organization had no choice but to take this step. He claims that this happened after many of its current officers were dismissed or resigned due to discontent at the way the IRESC was being run.

According to Botha, HAMNET has already been approached by another organization who he says really has an international feel and flavor about them and who are very open to ideas and suggestions. ZS6BUU says that once the two groups solve some software problems and establish some on-line links set up, an announcement will be made.

But in a public response to Botha, The IRESC's Salvatore Torres, W0CST, has issued a statement that takes Issue with ZS6BUU. In it Torres says that IRESC has revoked Francois Botha, ZS6BUU and three other Officers for violation of bylaws and interfering with present operations.

Torres claims that Botha has communicated false and misleading information regarding IRESC. He also says that his organization has e-mails and others information to certify its position but will not play that card as wit has more important matters at hand in the area of emergency communications needs.

Torres does end on a positive note. He says that the IRESC does not have any ill fillings toward Hamnet or the 4 former officers that were revoked. He says that IRESC thanks them for their service they have performed and wish them well.

More on HAMNET is on line on the South Africa Radio League's web page at tinyurl.com/25x59st. The International Radio Emergency Support Coalition cyberspace home is at www.iresc.net.

Also see http://www.southgatearc.org/news/september2010/hamnet_splits_from_iresc.htm for more details on this breaking news story. (Southgate, QRZ)

RADIO REPORTING: VE3JX WANTS STORIES ON YOUTH MENTORING FOR HIS QCWA WORLDRADIO COLUMN

Dave Hayes, VE3JX, who writes the QCWA column in WorldRadio online magazine says that he is looking for input from members regarding their involvement in youth oriented projects such as ham radio youth mentoring and education. To that end, Dave says that he would like to ask those chapters who have experience in this to relate them to him.

By way of example VE3JX cites among other activities, Chapter 151 in Alberta, Canada. Its members have gone to various schools and conducted live contacts with the astronaut and cosmonaut hams on-board the International Space Station. He also asks if other members or chapters have participated in the youth mentoring program sponsored jointly by the QCWA and Amateur Radio Newsline.

If you are a QCWA member and have experiences with any aspect of ham radio youth mentoring, please send your story along with any related photos to Dave. His e-mail is ve3jx (at) arrl (dot) net or ve3jx (at) rac (dot) ca. (VE3JX)

**

THE LAW: PATENT PENDING STIFILING TELECOMMUNICASTIONS INNOVATION

Some of the biggest players in the technology industry are complaining that the U.S. patent system is broken. This, by putting too many patents of dubious merit in the hands of people who can use them to drag companies and other inventors to court.

As a result, a growing number of inventors are taking part in an experimental program called Peer-to-Patent. Peer-to-Patent was launched in June of 2007 with the U.S. Patent and Trademark Office and backed by the technology industry that is intended to give both inventors and the public more of a voice in the system. The concept behind the program is to publish patent applications on the World-Wide-Web for all to see and let anyone with relevant expertise submit commentary to be passed along to the Patent Office.

By using the power of the Internet to tap the knowledge of the public, Peer-to-Patent hopes to locate hard-to-find prior evidence that an invention already exists or is obvious and therefore doesn't deserve a patent. The ultimate goal is to locate prior documentation that Patent Office examiners might not find on their own. This in turn could produce better patents by reducing ones granted on applications that aren't novel.

The U.S. Patent and Trademark Office employs more than 5,800 examiners with specialized expertise, but they are sifting through a mountain of applications. 467,243 patent requests were submitted in fiscal 2007, up from 237,045 in fiscal 1997. As a result, said Dave Kappos, vice president of intellectual property law for IBM, says that it is taking big technology companies with huge patent portfolios longer and longer to get applications through the system.

The Patent Office had a backlog of nearly 761,000 applications at the end of fiscal 2007 many dealing with emerging technology. At the same time applicants were waiting an average of two years and eight months for a final decision. That is especially hard for the telecommunications industry which is built on rapid innovation, short product life cycles and technology that can become quickly outdated. (Comm-Law Review)

**

HAM INDUSTRY NEWS: CQ MAGAZINE INTROIDUCES A NEW STREAMLINED WEBSITE

CQ magazine has launched what it calls a new and easy-to-navigate website. The updated cyberspace home for the magazine features a clean new look and a streamlined user interface which according to Editor Rich Moseson, W2VU, is a major step forward:

--

W2VU: "The main benefit of our new website is ease of navigation. We've had great things on there for years but they have been added piecemeal and they have built up ino a kind of a patchwork and its been hard to find things. Now, we've reorganized things and its all easy to find with much of it easy to get to with just one or two clicks."

--

The new site currently features links to special information for new and prospective hams as well as hamfest and special event listings. But that's not all:

--

W2VU: "We also have a couple of new features on the website such as the current issue highlights right on the front page; links to our other magazines and a direct link to our Facebook page as well."

--

Also on the site are easy links to the CQ Writer's Guide, award and contest information, a comprehensive links section, special information for new and prospective hams, and direct links to advertisers' websites. Callsign lookup and a link to the online CQ archive are also included.

The updating of the CQ website completes a company-wide website upgrade for all four magazines published by CQ Communications, Inc. The other three are Popular Communications, CQ VHF and WorldRadio Online magazines. The new CQ website may be found on-line at www.cq.amateur.radio.com. (CQ)

**

RADIO HONORS: ARRL INTRODUCES FIRST CHALLENGE COIN

To help commemorate the 75th anniversary of the Amateur Radio Emergency Service, or ARES the ARRL has introduced an anniversary Challenge Coin. This die-struck, 1.5 inch brass coin depicts the ARES 75th anniversary

logo in gold with red, white and blue color fill, while the reverse shows the ARRL diamond logo against a hemisphere of the world.

The ARRL's Emergency Preparedness and Response Manager is Mike Corey, W5MPC. He says that the Challenge Coin honors the service of ARES volunteers and all amateur radio operators who respond to the call of public service. Corey adds that the ARRL hopes that ARES volunteers will enjoy the honor of having the first Challenge Coin issued by the ARRL. More about the Challenge Coin is on-line at tinyurl.com/2bmbr4y (ARRL)

**

THE SOCIAL SCENE: AGILENT DONATES MAJOR PRIZE TO MICROWAVE UPDATE

Turning to the ham radio social scene, word that Microwave Update 2010, has received a donation from Agilent Technologies of a portable spectrum analyzer that will be given away sometime during the event in Cerritos. This years event is being sponsored by the San Bernardino Microwave Society on October 21st through October 24th at the Sheraton Cerritos Hotel, in the city of Cerritos, California. Early Bird Registration ends on September 30th. For more information take your web browser to www.microwaveupdate.org on the World Wide Web. (KH6WZ)

**

RADIO BUSINESS: NEWSPAPER SAYS BUSINESS WAS DOWN AT SHELBY

According to the Cleveland County Star on-line newspaper, while ham radio enthusiasts crowded North Carolina's Gaston County Park on Saturday, September 4th to attend the 2010 Shelby Hamfest, business at the event appeared to be down.

The newspaper quotes Scott Cole, who is the owner of Tower Electronics in Green Bay, Wisconsin who said business seemed off from years past. The story noted that Cole has been coming to the Hamfest for almost 20 years. He told the paper that it was likely a combination of the economy and that people were a little scared about the then approaching hurricane Earl.

But not everyone comes to a hamfest to buy and sell. Ham radio comradery is a big part of any event. In its report the newspaper noted that some of those attending came to socialize and in some cases to take an amateur exam to get their ham radio operator's licenses. One ham told the paper that it was not just the hamfest and flea market. He said that he comes to stay a few days to enjoy the area. The complete article is on line at tinyurl.com/2wopsfg (adapted from the Cleveland County Star)

**

THE SOCIAL SCENE: HAMFEST INDIA IN NOVEMBER

And the 19th annual Hamfest India will be held on November 13th and 14th in Pollachi city in India. The venue is the Pollach P.A.Educational Institution. More about this event is on-line at www.hamfestindia.com.

NAMES IN THE NEWS: K2TQN HONORED WITH AWA HOUCK AWARD

Some names in the news. First up is John Dilks, K2TQN, who writes the "Vintage Radio" column in QST magazine and who has been honored with the AWA Houck Award for Documentation by the American Wireless Association. This, at the organization's 2010 World Convention held back in mid-August in Rochester, New York.

This award is presented each year to an American Wireless Association member who has written original articles on radio development or history that has been published in the AWA Journal, AWA Review or another other publication. K2TQN began writing the Old Radio column in QST a decade ago in January of 2000. That column has since been renamed Vintage Radio. In its presentation the American Wireless Association noted that these monthly columns represent a remarkable range of topics and are based on great original research resources. (ARRL, others)

**

NAMES IN THE NEWS: AF MARS APPOINTS INTERIM CHIEF

And Air Force Military Auxiliary Radio System has a new Interim Chief. This with the announcement that Sergeant Jason Sandifer has replaced Allen Eiermann, K3LSR, in this position.

Sergent Sandifer is a systems manager stationed at the Air Force Network Integration Center at Scott Air Force Base located in Illinois. The Air Force Network Integration Center that has long been the headquarters of the national Air Force MARS organization. His appointment is expected to last until recruitment of a permanent new Air Force MARS Chief is completed. (Air Force MARS)

EMERGING TECHNOLOGY: AN UPDATE ON HOME 3D TELEVISION

Three dimension television in the average viewer's home is likely not around the corner. At least not as long as having to wear 3 D glasses are a part of getting the picture. Jim Davis, W2JKD, has more:

--

Years may pass before 3-D reception is widely adopted at home by the public, but 3-D's ultimate dominance seems assured. This according to the CGC Communicator broadcast industry newsletter that cites an article from IEEE Spectrum magazine gives fascinating technical details on 3-D Television. It also provides an important information update on the state of this technology. You can find it in cyberspace at tinyurl.com/3d-overview.

Meantime, two electronics giants are looking for a way to make 3-D television more appealing to the consumer market. Both Sony and Toshiba are independently working on 3-D television receivers that do not require the viewer to wear special glasses to obtain the 3-D effect/ Unfortunately, both high costs and a number of technical hurdles remain.

Im Jim Davis, W2JKD.

--

You can read where this research is headed by visiting tinyurl.com/3Dglasses-free. (CGC Communicator, IEEE Spectrum)

**

HAM RADIO IN SPACE: ISS ON THE AIR

Some news about manned amateur radio from space. This with news that Colonel Doug Wheelock, KB5BOC, has been very busy of late as NA1SS making random contacts from the International Space Station. Take a listen to this time compressed audio supplied to us by Scott Avery, WA6LIE:

--

Audio report only. Download the audio version of this weeks newscast to hear it.

--

Colonel Wheelock also had these words for students who might be listening to him:

--

Audio report only. Download the audio version of this weeks newscast to hear it.

--

This is not KB5BOC's first time on-orbit. In 2007 Colonel Wheelock served as a mission specialist as a part of the crew of STS-120. In completing his first space flight he logged over 362 hours in space, including 20 hours and 41 minutes of Extra Vehicular Activity during 3 spacewalks. Wheelock was launched to the ISS on June 15th. Together with fellow-astronaut Tracy Caldwell Dyson he undertook an 8hr 3min spacewalk to repair a failed ammonia pump module in early August. He is

due to return to Earth in November. (ANS)

ON THE AIR: HAM RADIO TO CELEBRATE BONAIRE BECOMING A DXCC ENTITY

On the air, the upcoming Bonaire DXpedition by a combined Dutch and American operating team plan to use the large antenna farm of Radio Netherlands. This, to deliver the world a truly whopping signal between October 10th and the 24th when they activate the island for the first time after it becomes a new DXCC entity.

Bonaire is currently part of the Netherlands Antilles which are scheduled to be dissolved as a unified political entity on October 10th. The five islands of the former Netherlands Antilles will each attain a new constitutional status within the Kingdom of the Netherlands, thus creating several new DXCC entities.

To commemorate the event, this group of dedicated radio amateurs will take to the High Frequency airwaves using the giant Radio Netherlands antenna system constructed on the island back in 1969. As of Tuesday, September 7th, a large shipment of equipment has been loaded into a sea container in Miami, Florida. The shipment consists of yagi antennas, masts, amplifiers, coax, bandpass filters, tuners and a wide variety of accessories. It was expected to set sail for Bonaire on Friday, September 10th.

You can keep track of the planning for the Bonaire DXpedition and vicariously join in on the festivities on line at the operations website. Its home in cyberspace is www (dot) bonaire2010 (dot) com. www (dot) bonaire2010 (dot) com. (QRZ DX)

**

DX

In DX, members of the Caracas DX Group will be active as YW5LF from the Los Frailes Islands between November 18th and the 22nd. QSL this operation via DM4TI.

VK2IR says through the Ohio Penn DX Newsletter that with the help of 3D2AA that he will be will be heading up a team of 10 operators to activate Rotuma in July 2011. VK2IR, says that further details of this operation will be forthcoming as plans progress.

K9LUK will be active stroke VK4 from North Stradbroke Island between October 8th and 16th. His operation will be sporadic, but look for him on 14.260 MHz as time permits. QSL via his home callsign.

G0OPA will be active as 8P9LJ from Holetown in St.James Parish on Barbados between September 12th and November 8th. His operation will be on all of the High Frequency bands. If you make contact, please QSL via his home callsign, either direct or via the bureau.

Lastly, MM0SSG is now active from Angola as D2SG. He's operating from a beach 1 mile from the capital Luanda and expects to be there for the next 6 months. Craig's operation is most days on 80 through 10 meters using CW, SSB and PSK31. QSL via GM4FDM.

(Above from various DX news sources)

** Beta release of WSJT 9.0 **

A beta release of WSJT 9.0 is now available for free download on
the WSJT Home Page. Briefly stated, WSJT 9.0 offers:
1. A new mode called ISCAT, which replaces JT6M
2. EME Echo mode
3. Enhanced features and performance for FSK441
4. Optional T/R period of 15 s for FSK441 and ISCAT
5. Enhanced user-editable message templates for FSK441 and ISCAT
6. Calculation of EME Doppler spread caused by lunar librations
7. Some simplification and clarification of the user interface.
More details can be found in the "WSJT 9.0 Supplement to User's
Guide", available at:

http://physics.princeton.edu/pulsar/K1JT/WSJT_9.0_Supplement.pdf
A full WSJT 9.0 User's Guide is in the works, but not yet available.
Go here http://www.physics.princeton.edu/pulsar/K1JT/wsjt.html to
find the WSJT 9.0 download link. After gaining some experience with
the beta release of WSJT 9.0, please share your views and opinions
about it! Of course, bug reports are also welcome.

** Space Weather News for Sept. 9, 2010 **

SPECTACULAR ERUPTION: Just as sunspot 1105 was turning away from
Earth on Sept 8th, the active region unleashed a spectacular
eruption of plasma and extreme ultraviolet radiation. Earth was
not in the line of fire--this time. Must-see movies from the
Solar Dynamics Observatory and other spacecraft are highlighted
on today's edition of (SOURCE:) http://spaceweather.com.

SPACECRAFT FLYBY ALERT: This is a good week for satellite watchers
in the USA and Canada. Both the International Space Station and
the US Air Force X-37B space plane are making a series of
favorable passes over North American towns and cities. The
spacecraft are easy to find using our Simple Satellite Tracker--an
app for iPhones and Android. Visit http://simpleflybys.com for
downloads and more information. SOURCE: http://spaceweather.com

Moon bounce for DX0DX - The Spratlys DXpedition 2011 DXpedition
Team Leader, Chris Dimitrijevic VK3FY and DU8/VK3FY has announced
that Earth-Moon-Earth (EME) contacts are planned as part of the
DX0DX activation of The Spratlys. Also advised is latest external

funding support that has been confirmed for the DXpedition that will involve some 30 radio amateurs in three teams on Thitu Island 6-24 January 2011. In the latest news, experienced EME contester and DXpeditioner, Colin Brown GM0RLZ will be active on both 6m and 2m. Chris VK3FY said, "We're delighted to have Colin GM0RLZ join DX0DX so it can be propagated by bouncing signals off the lunar surface. "He has filled a vacancy on DXpedition Team 2 (6-15 January) and has the role of coordinating any requests for moon-rise and moon-set contact attempts." The equipment proposed is an ICOM IC-9100 transceiver, OM2006 6m amplifier, Commander 2m amplifier, with antennas being a 6M7 for 6m and 2M9 on 2m, both by M2inc. Chris VK3FY said all other plans for the DXpedition are continuing satisfactorily and with 120 days to go there's a lot of work yet to be done. He said, "Support for DX0DX is growing steadily and thank you to those who have already given financially or in other ways towards this major undertaking." The Team acknowledges funding it has from NCDXF, EUDXF, CDXC (Chiltern DX Club), East Iowa DX Association, GMDX Group, Western Washington DX Club W7DX and the Helenic Amateur Radio Association of Australia. Other financial support has been received from individual radio amateurs Brad WA6JJB, Paul N6PSE, Marc DO4DXA, Maurice N4LZ, Vic W4VIC, Ken N5TY, Allan VK2CA, Paul VK2HV, Scotty KG9Z, Clay K7HC, Mitch DJ0QN, Neill K4ESE, Doyl AB4IQ, William K3WA. Billy W3EL, Hans SM0IMJ, Robert W0ZT, Albert N8NN, Tom N6AJR, Patricia K7EIE, John G3LZQ, and Tony VK3VTH. EA3CEC, EA3CBH, EA6SA and EA6VQ was operating from EA3CEC's radio QTH in the province of Avila (IN70QK) - LAST NEWS from Gabriel, EA6VQ, dated 2010-09-07: Operation finished and we are back home (except myself who will go to C3 tomorrow for some non radio holidays). 159 QSO in the log with 31 DXCC (117 QSO via EME 29 via satellite and 13 via tropo). We are quite satisfied with the results of the EME operation, that was our main goal and we are only disappointed for not having been able to make more QSO via satellite. Smallest station worked via Moon was using a single Yagi and 400w. We missed the contact with some well known EMErs. No CW requests were received so all QSO were made in JT65. QSL information and log of worked stations at: http://www.vhfdx.info/burguillo.html

** K5QE on EME in the ARRL Sept VHF contest **

Hello to everyone in the EME community. This year, the ARRL
September VHF Contest will be held Sept 11th and 12th. We want to
work as many EME stations on 2M AND 432 as possible to increase
our grid count. Please help us with this event by working us on
JT65b or CW. Thank you very much. As usual, we will be operating
2M on 144.142MHz Second sequence. On 2M, we will be running QRO
with 8 x 18ï¿½s and ask that you try to work us if you see us during
the contest. However, our moonrises and moonsets are very poor for
contesting this time(AGAIN!!). Our first moonrise is 1545Z on
Saturday, well before the contest starts(the contest starts at
1800Z). This means that the moon is up during the day when we
need to be working the rovers and tropo operations. We will have
to operate EME and terrestrial during the same time frame. We will
just have to do the best we can. If we see an EME caller on 2M OR
432, we will stop and work that caller. If you see us working
another station, PLEASE KEEP CALLING. That allows us to decode
your call while we are finishing up a QSO with another operator.
If you call in on CW, we will switch to CW and work you on CW as
soon as possible. More in detail (QRG and times) pse use:
http://www.mmmonvhf.de/latest.php?id=3522
SOURCE: SOURCE: tnx to Marshall, K5QE, direct to MMMonVHF

** Keith, KA9RSL will be operating from Drummond Island **

(USi MI017L, Grid Loc. EN86, Chippewa County), Michigan, during
the 2010 ARRL Sept VHF QSO Party - LATEST NEWS from Andy, N8OFS,
dated 2010-09-09: We will be leaving Indiana for Drummond Island,
MI on Thursday. Friday will be setup and testing day for the
station. We will be running 150 watts on 6 meters into a H array
with reflector. On 2 meters we will be running 200 watts into a
Cushcraft A144-11 70 cm will be 100 watts into a Diamond A430S15
QSL direct KA9RSL for our special QSL card from EN86ea.
SOURCE: tnx to Andy, N8OFS direct to MMMonVHF

** Al, WA4EWV will be traveling during august and september **

He will be qrv from lot of different Squares during 23rd aug. and
28th sept. Targets: EM80-EM90-EM91-FM02-FM13-FM14-FM25-FM26-FM27-
FM28-FM29-FM16-FM06-EM85-EM75-EM62. At all it shall be a trial to
keep each day's miles to 200...300 plus or minus
Al was showing up on 50 MHz past days from FM13...
SOURCE: tnx to Al, WA4EWV direct to MMMonVHF

** 50 & 144 MHz from Kure Beach (FM13) and Topsail Isl (FM14) **

Charlie, K3NXH/4 will be vacationing on Topsail island (IOTA
NA-112, NC004S, Pender County), North Carolina, between 8
September and 9 October 2010. He will be active during the
ARRL September VHF Contest (11-12 September) from Kure Beach
(Grid Loc. FM13) and Topsail Island (Grid Loc. FM14), North
Carolina. QRV on 6 and 2 metres. If time and conditions permit
Charlie will try FM03 and FM04. QSL via home call.
SOURCE: [N8OFS] via ICPO Bulletin (02-10 September 2010)

** KN69 Activity on HF and 144 / 430 MHz **

Members of Radio Club "DELTA", will be active on 10 -13 September
from Chigirin Fortress, WCA: UR-00002, UCFA: CH-002, URDA: CH-25,
WW Loc KN69HB. Be plans work as EN1UCF/P on HF bands, CW/SSB and
144/430 MHz. This activity also good for the National historical
and cultural reserve "Chigirin", UFFA: UUFF-050 and for "Ukrainian
Rivers Award" and "Ukrainian Museum Award". QSL via UR7UT, bureau
or direct. SOURCE: Andrew RN1CW via GOTO List

** Vendsyssel-Thy (JO47) qrv on HF and 50 MHz **

Tom, DL4VM will be active from Vendsyssel-Thy [Nordjylland]
(EU-171, DIA NJ-001) on 4-18 September 2010. QRV on 40, 30, 15
6m, CW+ PSK31. QSL via home calll, direct or bureau.
SOURCE: [rsgbiota.org] via ICPO Bulletin (02-10 September 2010)

** V31MM, V31PM and V31GB qrv from Belize on HF and 50 MHz **

Operators Jim/WB2REM, Paul/W4PGM and Glenn/KD2JA will be operating
from Placentia, Belize, as V31MM, V31PM and V31GB between March
23-30th, 2011. During the 2011 CQ WPX SSB Contest (March 26-27th)
they will use the callsign V31MM. Prior to the contest and after
the contest, they will be operating under their own individual
callsigns. QSL direct only to each operator's callsign. QSL V31MM
via Jim/WB2REM, V31GB via Glenn/KD2JA and V31PM via Paul/W4PGM.
Operators will be on both SSB and CW, 160-6 meters with a
concentration on the 30/17/12 meter bands and 6 meters. When
QSLing, please supply a SASE (from stateside) or (Overseas) Self
Addressed Envelope (SAE) with either a green stamp depending on
the U.S. Air Mail Rate at the time or an IRC. This will ensure
you will receive a response to your QSL request.
SOURCE: [GOLIST] Ohio/Penn DX Bulletin #974

** V63YT, MICRONESIA, qrv on HF and 50 MHz **

Takuto, JE1SCJ, will be active as V63YT from Pohnpei Islands
(OC-010) between November 24-28th. Activity will be on 160-6 m.
using mostly CW with some SSB, RTTY and PSK31. He does plan to
participate in the CQWW DX CW Contest (November 27-28th), but he
will go QRT around 0900z on the 28th due to his flight schedule.
Outside of the contest he will focus on 160/30/17/12 meters bands
The suggested frequencies are: 1824 (QSX up/down), 3510 (QSX up)

7010, 10110, 14010, 18080, 21010, 24900, 28010 and 50090 kHz.
He plans to use 100 watts into wire antennas and a yagi for
6 meters. He states that dupe QSOs during the contest and outside
of the contest are OK. QSL via his home callsign, by the Bureau
or direct (w/SASE - see http://www.QRZ.com).

GB2RS NEWS

Sunday 12th September 2010

The news headlines

RSGB EMC Pages Revamped

G5RP Trophy nominations sought

Radio clubs take part in Transmission 2010

The RSGB EMC Committee has totally refreshed the RSGB website pages covering EMC matters. The new information contained in the pages should be of practical help to anyone experiencing interference on the amateur bands, or causing interference to nearby electronic equipment. Just as importantly, the site now contains a survey questionnaire to capture information about the extent of interference to amateur band reception. Please, if you are experiencing regular local interference to your reception, report it on the short questionnaire available under the ``I am experiencing interference'' pages. This will enable the RSGB to build a creditable database of interference cases, which will help in its discussions with Ofcom

The G5RP Trophy is an annual award to encourage newcomers to HF DXing. However, the award is not limited to youngsters or the newly-licensed: the HF DX bug can bite at any age or after many years of experience on other bands. If you are an established HF DXer and want to recommend someone to be awarded the G5RP Trophy for 2010, now is the time to send in your nomination. Your nominee should be an up-and-coming HF DXer who has made rapid progress in the last year and has some real achievements to show, for example, a good total of new countries worked or some serious HF DXpedition activity.

This prestigious award will be presented this year at the RSGB HF Convention on 8 - 10 October. Please send your nominations to John Gould, G3WKL, QTHR, or by e-mail to g3wkl@btinternet.com to arrive no later than Friday 17 September.

British Wireless for the Blind Fund invites your club to take part in Transmission 2010, their annual competition to make as many contacts across the world as possible and raise money for a very worthwhile cause at the same time. The Fund is a registered charity providing specially adapted radios and audio equipment on free permanent loan to registered blind and partially-sighted people in need in the UK. This year's competition will be taking place over the weekend of the 18 and 19

September and many amateur radio clubs will be taking part. But it's not too late to plan to take part. To enter the competition, please go to www.blind.org.uk and fill in the on-line form. Sponsorship forms and a poster can also be downloaded.

A new Network Affiliated RAYNET Group is being formed in the Mid-Pennine region of Lancashire. The envisaged operating area is the boroughs of Rossendale, Hyndburn and Burnley. Members of the amateur radio community who are interested in joining are invited to e-mail mid.pennine.raynet@gmail.com for further information.

Advance notice now that the frequency for the Morse Enthusiasts Group (Scotland) will be changing from 3530kHz +/- QRM to 3555kHz +/- QRM. The day and time will be every Monday at 1800UTC. The changes will take place on Monday 6 December, although up to that date Doug, GM0AIR will call on 3530 and QSY to 3555kHz.

The Edgware Activity Periods run from 21 September to 1 October in short periods of operation. These can be found on their website, www.g4gys.btinternet.co.uk. You can use SSB or CW on any or all of the bands. The format and rules of the event are best checked out on the website. In addition to individual club members, participation by club stations is encouraged to spread some bonus points as shown in the rules. The Edgware Club station, GX3ASR, will be operated once more by G3SJE and other club stations should identify themselves by use of the GX prefix. The call to use to show that you are participating in the event is, on CW, CQ EAP or, on SSB, CQ Edgware Activity Period.

And now for the details of rallies and events for the coming week.

A boot sale and open day organised by North Norfolk Amateur Radio Group will be held at the Muckleburgh Collection military museum, Weybourne, Norfolk today, Sunday 12 September. For one day only, admission to the museum will be free, it is normally ?6. The Radio Hut, restaurant and shop will be open to visitors. There will also be a sale of surplus equipment from the museum's stores and from the Group's radio collection. Army surplus CLANSMAN equipment will also be on sale. Boot sale pitches cost ?5. Set-up will be from 8am. Free public admission from 10am. The Radio Hut, containing the Group's unique collection of all-service communications equipment will be open all day and members of the Group will be pleased to welcome visiting amateurs to the hut. All enquiries to Bob Finch, G0HYZ, on 01263 838198. More details are available on www.gb2mc.co.uk.

The Gatwick Family Radio Weekend will be held on 11 and 12 September at Hunters Moon, close to Gatwick on the A217, RH6 0HU, TQ262438. Bring some vintage-ish radio with you if you can and military vehicles of all radio types are welcome. There will be special interest groups and plenty to interest the family. More details from Mike, M1CCF, on 0208 654 2582.

Torbay Annual Communications Fair will take place today, 12 September, at Newton Abbot Racecourse, Newton Abbot, Devon TQ12 3AF. There will be trade stands, a Bring and Buy as well as an RSGB Bookstall.

The Fog on the Tyne Rally will take place on 18 September in the Whitehall Road Methodist Church Hall, Bensham, Gateshead NE8 4LH. Doors open at 10.30am and the entry fee is ?1.50. There will be plenty of traders, both national and local names, as well as special interest groups and an RSGB Bookstall. Details from Nancy Bone on 0191 477 0036.

On Sunday 19 September, the Great Northern Hamfest will take place at the Metrodome Leisure Centre, Queens Road, Barnsley, S71 1AN. Opening time is 11am. There will be trade stands, an RSGB bookstall and special interest groups but please note there is no Bring and Buy. There are a limited number of tables available at a reduced price for individual amateurs wishing to sell their surplus equipment. Details from Ernie, G4LUE on 01226 716339.

Now for the news of special events

To celebrate the 497th Anniversary of the Battle of Flodden, GB2BCL will be active on most HF bands today, 12 September, from Barmoor Castle, Lowick, Northumberland. Event manger Roy, G0AXJ says visitors are welcome to the station, which will be active from 10am to 7pm. The station is situated at the Barmoor Castle West entrance gate. Talk-in will be available on 2m through GB3BT on 145.700MHz. For more information please contact Roy on 0788 426 2029.

Sheffield Royal Society for the Blind will be hosting a special event station, GB5RSB, to commemorate its 150th Anniversary. The station has been organised in co-operation with Sheffield Amateur Radio Club and Radio Amateur Invalid and Blind Club and will operate from Monday 13 September to Friday 17 September from 10am to 4pm each day. Operation is from the Society's headquarters at 5 Mappin Street, Sheffield S1 4DT. Primary activity will be telephony on the HF bands and possibly VHF via GB3US. QSL cards will be issued. David Blunkett MP is expected to attend on the afternoon of Friday 17th September and the event will be publicised via local press and media. Further information available from Steve Hambleton, G0EAK, on 0114 272 2757.

Glasgow and Clyde RAYNET group will be operational over the weekend of 18 and 19 September under the group callsign GM0RAY to raise funds for the British Wireless for the Blind during the Transmission weekend. The group will be transmitting from Carman Hill, which is located south of Loch Lomond above the town of Alexandria. Operation will be on 80, 40, 20 and 17m as well as the 2m band. For further information contact Paul Lucas on 0776 827 1736.

Over the weekend including 12 September, Bawdsey Research Station will be activated for the final time, as GB70BRS, to commemorate the contribution of radar to success in the Battle of Britain. In the previous operations they have contacted around 700 stations each time across HF and 6m and hope to make many more contacts in this final

session. The Bawdsey Certificate is available to stations that worked the Bawdsey site as GB75BRS in February and as GB70BRS in either June or September. Proceeds from the Bawdsey Certificate are going to the RAF Benevolent Fund. More detail about the awards, including examples of the certificates and how to apply can be found on the BRS website at http://bawdseyreserachstation.org.uk.

Cray Valley Radio Society operating as GB2BF will be taking part in British Wireless for the Blind Fund's Transmission 2010 event over the weekend of the 18 and 19 September. The club will be operating from the Margaret McMillan House field study centre near the summit of Wrotham Hill in Kent, which is locator JO01DH, and will be active on the HF bands as well as 2 and 4m. Further details may be found at www.cvrs.org.

And now the HF DX news compiled from 425 DX News and other sources

For the week starting 18th September, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland. They plan to operate on VHF, HF, SSB, CW and data modes under the callsign MS0SCG. The location is IOTA island number EU123 and SCOTIA island number CS14. For more information and an up to date blog on the event, check out the group's website at www.m0scg.org.uk.

The Middlesex DX Group will be active on the Isle of Mull, which is IOTA reference EU-008, from 18 to 24 September using the callsign GB2MUL. They plan to be active on HF as well as 2, 4 and 6m. For further details check out the website at www.dxcc.co.uk.

Guenter, IA5/DL3NBI, will be active from 12 to 20 September from Giglio Island, which is IOTA reference EU-028. QSL via his home callsign.

Marcel, PD5MVH/P, will spend his holidays on the island Schiermonnikoog from 13 to 25 September. The island is IOTA reference EU-028. QSLs should be sent via his home callsign.

Now the contest news

The 2nd 70MHz Contest takes place today, Sunday 12th, from 0900 to 1200UTC. For many years this contest typically attracted between 16 and 21 entries, but last year it shot up to 28. A sign of the times perhaps, with more and more people in more and more countries coming onto the band. The exchange is signal report, serial number and locator.

The European Chapter of the North American QRP CW Club will be holding its first sprint from 1800 to 2000UTC on Monday 13 September. The frequencies in use will be 3555 to 3560kHz, 7030 to 7,035kHz and 14060 to 14,065kHz. A maximum of 5W may be used and the only mode must be CW.

Any licensed amateur is invited to take part and submit a log, but only members of the NAQCC are eligible for awards. Membership is free and there are already over 100 members in the UK.

The 432MHz UK Activity Contest takes place on 14 September from 1900 to 2130UTC. The exchange is signal report, serial number and locator.

Following the success of the first 75 Baud Sprint, BARTG is running a second Sprint 75 on 18 September between 1700 and 2100UTC. It will take place on the 80, 40, 20, 15, and 10m bands using RTTY 75 Baud only, the rules and scoring can be found on the BARTG website http://bartg.co.uk/.

And now the solar factual data for the period from the 30th of August to the 5th of September, compiled by Neil Clarke, G0CAS on the 6th of September.

On the 2nd of September, NASA's investigations of the Sun took a giant leap forward with the announcement of the Solar Probe Plus, a NASA mission to touch the Sun. Slated for a launch in July 2018, it is expected to make its first close approach during December 2024 when the spacecraft will plunge directly into the atmosphere of the Sun. The sensors selected to ride aboard spacecraft are designed to solve some of the biggest mysteries of solar physics, including why the Sun's atmosphere so much hotter than its surface and what propels the solar wind? We've been struggling with these questions for decades and hopefully the mission will answer these and many more. At closest approach, Solar Probe Plus will be 7 million kilometres from the Sun, compared with over 149 million kilometres from Earth. From these near distances, inside the Sun's atmosphere, the solar disk will loom 23 times wider than it does in the skies above Earth.

Now back to the present. For most of the period the solar disc had up to 4 sunspot groups visible but most was small and inactive. Solar activity was very low with no solar flares taking place. Solar flux levels increased from 75 units on the 30th to 82 by the 4th and the 5th. The average was 78 units. The 90 day solar flux average on the 5th was 78 units, that's one unit up on last week. X-ray flux levels increased slight during the period and averaged A7.9 units. Geomagnetic activity was quiet every day and averaged Ap 4 units. During the evening of the 5th a small coronal hole disturbance arrived but the effects were very limited. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 300 and 460 kilometres per second. Particle densities were low throughout, in fact on some days levels were well below 1 particle per cubic centimetre. Bz varied no more than minus 8 and plus 9 nanoTeslas during the week.

And now the solar forecast. This week solar activity is expected to be at very low levels. There is the chance though, that activity could increase with the occasional C class solar flare. Solar flux levels should be around the 80 mark for most of the week. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try the path will be between 1000 and 1600 hours.

And that's all for this week from the propagation team.

True. The fake stereo does the latter, the SBR guesses the treble at the
hint of a few bits available to steer it.

gr, hwh
